PREFACE

In an age of Economic Nationalism such as ours, it is more than ever necessary to have at hand abundant and reliable statistical information for every country in the world in order to form a true estimate of its economic capacity. This need the Year Book continues to supply, and in the present issue, the seventy-second of the series, every effort has been made to bring the facts and figures up-to-date. The latest available information will be found either in the body of the book or in the "Additions and Corrections" at the beginning of the volume.

This is the twenty-fifth year of the present Editor's association with the Year Book and he desires specially to thank the friends of the Year Book all over the world for their valued collaboration.

II.—PRODUCTION OF PETROLEUM IN PRINCIPAL COUNTRIES.

The following table shows the production of petroleum in the chief producing countries for 2 years, in tons:—

Country	1933	1934
	Tons	Tons
United States	122,795,018	123,689,000
Russia (incl. Sakhaline)	21,440,000	24,000,000
Venezuela	17,293,000	20,366,000
Rumania	7,387,000	8,450,000
Persia	7,044,169	7,700,000
Mexico	5,076,000	5,886,000
Total	181,035,187	190,091,000

III.—WORLD PRODUCTION OF TIN.

A summary of the production of tin, by continents, is given as follows, in metric tons:—

Continent.	1934.	1933.	1932.
Asia	88,768	64,352	67,031
Africa	10,799	7,623	6,077

XI.—THE LEAGUE OF NATIONS.

Secretary-General: M. Joseph Avenol (from July, 1933). Elected Dec. 9, 1932.

The League of Nations is an association of States which have pledged themselves, through signing the Covenant (*i.e.*, the constitution of the League) [For the text of the Covenant, *see* THE STATESMAN'S YEAR-BOOK for 1921, page xxviii], not to go to war before submitting their disputes with each other or States not members of the League to

arbitration or enquiry and a delay of from three to nine months. Furthermore, any State violating this pledge is automatically in a state of outlawry with the other States, which are bound to sever all economic and political relations with the defaulting member. The States Members of the League have pledged themselves to co-operate over a wide range of economic, social, humanitarian and labour questions.

The League of Nations formally came into existence on January 10, 1920, through the coming into force at that date of the Treaty of Versailles. The two official languages of the League are English and French. The seat of the League is Geneva, Switzerland.

1. MEMBERSHIP.

The following 59 States are members of the League (March 30, 1935):—

[1] Made declarations putting the protection of their national minorities under League auspices as a condition of their entry into the League.

[2] The delegation of the Argentine Republic did not attend the second Assembly and withdrew from the first Assembly upon the latter's decision to refer the amendment to Article 1 of the Covenant proposed by the Argentine, for study by a committee that was to report to the second Assembly. The Argentine Government has not given notice of an intention to leave the League, and appears to regard itself as in a state of suspended or passive membership, to continue until some measure regarded as a satisfactory equivalent to the amendment proposed by the Argentine has been adopted by the League. In 1933 the Argentine Government ratified the Covenant of the League, thus returning to membership.

Brazil on June 12, 1926, Spain on September 8, 1926, Japan on March 27, 1933, Germany on October 21, 1933, and Paraguay on February 24, 1935, announced their withdrawal from the League; according to Art. 1, par. 3, of the Covenant, the notice of withdrawal only comes into force two years after it has been given. On March 22, 1928, Spain resolved to continue a member of the League. Brazil's withdrawal became effective on June 12, 1928, and Japan's on March 27, 1935.

The following 6 States are not members of the League:—United States, Brazil, Egypt, Costa Rica, Japan, and Saudi Arabia. Costa Rica became a member of the League on December 16, 1920, but on December 24, 1924, she gave notice of her intention to withdraw, on the ground of the expense involved. The notice became effective on December 24, 1926. She has since announced to the League her intention to bring the question of her return before the Constitutional Congress. Egypt is to apply for admission on the ratification of the treaty settling the 'reserved issues' between herself and Great Britain.

II. THE ORGANS OF THE LEAGUE.

The primary organs of the League are :—

1. The Council.
2. The Assembly.
3. The Secretariat.
4. The Permanent Court of International Justice (at The Hague).

1. THE COUNCIL.

The Council was originally composed of four permanent Members (the British Empire, France, Italy, and Japan) and four non-permanent Members to be elected every year by a majority of the Assembly. The first non-permanent Members, appointed by the Peace Conference and named in the Covenant before the first Assembly met, were Belgium, Brazil, Greece, and Spain. With the approval of the majority of the Assembly, the Council may appoint new permanent and non-permanent Members. At the Assembly of September, 1926, Germany was admitted to the League and given a permanent seat on the Council. At the same time the number of non-permanent seats, already increased to six in 1922, was further increased to nine, the period of office to be three years. In order to institute the new system of rotation, three were elected for one year, three for two years, and three for three years, so that at all subsequent Assemblies three members retire instead of nine at once. In 1928 (Sept.) China, Colombia, and Holland were replaced by Spain, Persia, and Venezuela. Spain was specially accorded the privilege of re-eligibility on the expiration of her three years period of office. Poland was accorded the same privilege on her election for three years in 1926, and was re-elected in 1929. Belgium and China both failed to get the necessary majority required for re-eligibility. Any Member of the League not represented on the Council shall be invited to send a representative to sit on it at any meetings at which matters especially affecting it are being discussed. A similar invitation may be extended to States not Members of the League.

The Council meets on the 3rd Monday in January, the 2nd Monday in May, and just before and after the Assembly in September.

At its session of January, 1935, the Council was composed as follows

PERMANENT MEMBERS.

United Kingdom and Northern Ireland—The Right Hon. Sir John Simon, Secretary of State for Foreign Affairs. Mr. Anthony Eden, Lord Privy Seal.
France—M. Laval, Minister of Foreign Affairs.
Italy—Baron Aloisi.
U.S.S.R.—M. Litvinoff.

NON-PERMANENT MEMBERS.

Argentine Republic—M. Cantilo.
Australia—Mr. S. M. Bruce.
Chile—M. Rivas-Vicuña.
Mexico—Dr. Castillo Najera.
Denmark—M. Munch.
Poland—M. Komarnick.
Portugal—M. Vasconcellos.
Spain—M. de Madariaga.
Czechoslovakia—M. Osusky.
Turkey—M. Rüstü Aras.

2. THE ASSEMBLY.

Every State Member of the League is entitled to be represented by a delegation to the Assembly composed of not more than three delegates and three substitute delegates, but it has only one vote. It meets at the seat of the League (Geneva) on the first Monday in September. It may meet at other places than Geneva, but hitherto it has never done so; extraordinary sessions may be called to deal with urgent matters.

The President is elected at the first meeting of the session, and holds office for the duration of the session.

The Assembly divides itself into the following six principal committees, on each of which every State Member of the League has the right to be represented by one delegate :

I. Juridical.
II. Technical Organisations.
III. Disarmament.
IV. Budget and Staff.
V. Social Questions.
VI. Political Questions and admission of new Members.

The decisions of the Assembly must be voted unanimously, except where the Covenant or the Peace Treaties provide otherwise. As a general principle decisions on questions of procedure are voted by majority or in some cases by a two-thirds majority.

3. THE SECRETARIAT.

The Secretariat is a permanent organ composed of the Secretary-General and a number of officials selected from among citizens of all Member States and from the United States of America. The Secretary-General is M. Joseph Avenol (French), who took office in July, 1933. The other officials are appointed by the Secretary-General with the approval of the Council.

The Under-Secretaries-General are (as from July 1, 1933):—
M. P. Azcarate (Spanish), 1st Deputy Secretary-General;
Dr. M. Pilotti (Italian), 2nd Deputy Secretary-General;
Mr. F. Walters (British).
M. Rosenberg (U.S.S.R.) as from January 1, 1935.

4. PERMANENT COURT OF INTERNATIONAL JUSTICE.

The revised Statutes adopted at the 10th Assembly provide for 15 judges for the Court, and stipulate that the Court shall remain permanently in Session except for such holidays as it may decide. The judges are elected jointly by the Council and the Assembly of the League for a term of 9 years.

The Secondary Organs of the League are:—

(*a*) The Technical Organisations.
1. *Economic and Financial.*
2. *Health.*
3. *Transit.*

(*b*) Advisory Commissions.
1. *Military, Naval and Air Commission.*

V. MANDATES.

The African and Pacific possessions of Germany and certain territories of the Ottoman Empire were ceded by these countries at the end of the war to the Allied and Associated Powers. The latter had inserted an article (Art. 22) in the Covenant of the League according to which the inhabitants of these territories should be put under the

tutelage of "advanced nations who by reason of their resources, their experience, or their geographical position, can best undertake this responsibility." These nations should act as mandatories of the League, and exercise their powers on behalf of the League. They should act on the principle that the well-being and development of the peoples under their tutelage formed a "sacred trust of civilisation," and should render the Council an annual report on the territory committed to their charge.

Article 22 furthermore divides the mandated territories into three classes, according to the degree of civilisation of their inhabitants, economic and geographic circumstances, and so forth. Class A is composed of the communities detached from the Ottoman Empire, declared to have "reached a stage of development where their existence as independent nations can be provisionally recognised subject to the rendering of administrative advice and assistance by a Mandatory until such time as they are able to stand alone."

Class B, consisting of the former German colonies in Central and East Africa, should be administered by the Mandatory under conditions which will "guarantee freedom of conscience or religion, subject only to the maintenance of public order and morals, the prohibition of abuses such as the slave trade, the arms traffic and the liquor traffic, and the prevention of the establishment of fortifications or military or naval bases and of military training of the natives for other than police purposes and the defence of territory, and will also secure equal opportunities for the trade and commerce of other members of the League."

Class C (German South-West Africa and Pacific Islands possessions) is composed of territories which, owing to sparseness of population, small size, remoteness from centres of civilisation, or geographical contiguity to the territory of the Mandatory Power, "can best be administered under the laws of the Mandatory as integral portions of its territory, subject to the safeguards above mentioned in the interests of the indigenous population."

The Supreme Council, as the organ of the Allied and Associated Powers, allocated the mandates for the territories ceded by Germany and Turkey, subject to the approval of the Council of the League. The mandates and mandatory powers, as determined by the Supreme Council, are:—

A Mandates.—Palestine, attributed to Great Britain. Syria (including Lebanon), attributed to France.

B Mandates.—Togoland and Cameroon, attributed in part to Great Britain and in part to France.

The North-Western portion of former German East Africa, attributed to Belgium.

The remainder of former German East Africa (now Tanganyika Colony), attributed to Great Britain.

C Mandates.—Former German South Pacific possessions (except Nauru and Samoa), attributed to Australia.

Samoa, attributed to New Zealand, and Nauru, attributed to the British Empire and administered by Australia, New Zealand, and Great Britain.

Former German North Pacific possessions (Yap, etc.), attributed to Japan.

Former German South-West Africa, attributed to the Union of South Africa.

XII.—INTERNATIONAL LABOUR ORGANISATION.

Director of the International Labour Office.—Mr. Harold Butler (Great Britain).

The International Labour Organisation was constituted by the Treaties of Peace, as an autonomous organisation of the League of Nations. Its Constitution forms Part XIII of the Treaty of Versailles and the corresponding Parts of the other Treaties of Peace. Its object is the establishment of social justice since "the failure of any nation to adopt humane conditions of labour is an obstacle in the way of other nations which desire to improve the conditions in their own countries." Membership of the League of Nations carries with it membership of the Organisation, which also includes certain states which do not or have ceased to belong to the League. The Organisation consists of the International Labour Conference, which meets at least once a year, and the International Labour Office, controlled by a Governing Body. The Conference and the Governing Body are composed of representatives of Governments, employers and workers. The decisions of the Conference take the form of Draft Conventions or Recommendations, which each State is required by the Constitution to submit to the authorities within whose competence the matter lies for the enactment of legislation or other action. If a Draft Convention obtains the assent of the competent authorities, the Member must communicate the formal ratification of it to the Secretary-General of the League of Nations. If the competent authority does not consent, no further obligation rests on the Member. The Members report annually to the International Labour Office on the measures which they have taken to give effect to the Conventions which they have ratified. Machinery also exists for the case of complaints made against a Member that fails to give proper application to a Convention which it has ratified.

In the case of a Recommendation the Members have to inform the Secretary-General of the League of the action taken. The functions of the International Labour Office are the preparation of the agenda of the Conference, the collection and distribution of information on all subjects relating to the international adjustment of industrial life and labour, the publication in various languages of periodicals and reports dealing with problems of industry and employment and any other duties assigned to it by the Conference.

GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE.

The Governing Body, under the control of which the International Labour Office works, is composed of sixteen Government representatives, eight employers' representatives, and eight workers' representatives. Its present composition is as follows:

Chairman: Mr. G. de Michelis (Italy).

Vice-Chairmen: Mr. W. A. Riddell; Mr. Oersted; Mr. Mertens.

Government Group:[1]

Mr. Ruiz Guiñazú (Argentine Repub.)
Mr. Mahaim (Belgium)
Mr. Bandeira de Mello (Brazil)
Mr. Riddell (Canada)
Mr. Li Ping-Heng (China)
Mr. Winter (Czechoslovakia)
Mr. Mannio (Finland)
Mr. Picquenard (France)
Mr. Krohn (Germany)
Mr. Leggett (Great Britain)
Sir Bhupendra Nath Mitra (India)
Mr. de Michelis (Italy)
Mr. Yoshisaka (Japan)
Mr. Tello (Mexico)
Mr. Jurkiewicz (Poland)
Mr. Ruiz Manent (Spain)

Employers' Group:

Mr. Čurčin (Yugoslavia)
Mr. Erulkar (India)
Mr. Forbes Watson (Great Britain)
Mr. Gemmill (South Africa)
Mr. Lambert-Ribot (France)
Mr. Oersted (Denmark)
Mr. Olivetti (Italy)
Mr. Tzaut (Switzerland)

Workers' Group:

Mr. Caballero (Spain)
Mr. Hayday (Great Britain)
Mr. Johanson (Sweden)
Mr. Joshi (India)
Mr. Jouhaux (France)
Mr. Mertens (Belgium)
Mr. Moore (Canada)
Mr. Yonekubo (Japan)

The number of States Members of the International Labour Organisation is now 62. The Organisation has held eighteen Conferences, in 1919 at Washington, in 1920 at Genoa, and subsequently in Geneva. At these Conferences the following Draft Conventions and Recommendations have been adopted:—

First Session (Washington, 1919).

Draft Convention limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week.
Draft Convention concerning unemployment.
Recommendation concerning unemployment.
Recommendation concerning reciprocity of treatment of foreign workers.
Draft Convention concerning the employment of women before and after childbirth.
Draft Convention concerning employment of women during the night.
Recommendation concerning the prevention of anthrax.
Recommendation concerning the protection of women and children against lead poisoning.
Recommendation concerning the establishment of Government health services.
Draft Convention fixing the minimum age for admission of children to industrial employment.
Draft Convention concerning the night work of young persons employed in industry.
Recommendation concerning the application of the Berne Convention of 1906, on the prohibition of the use of white phosphorus in the manufacture of matches.

Second Session (Genoa, 1920).

Recommendation concerning the limitation of hours of work in the fishing industry.
Recommendation concerning the limitation of hours of work in inland navigation.

[1] As the list of the eight States of chief industrial importance has been modified by the Governing Body owing to the entry into the International Labour Organisation of the United States of America and the Union of Soviet Socialist Republics, the seats on the Governing Body hitherto occupied by the Governments of Belgium and Canada have been allocated to the Governments of those two countries as from the Seventieth Session (April, 1935).

Recommendation concerning the establishment of national seamen's codes.
Draft Convention fixing the minimum age for admission of children to employment at sea.
Recommendation concerning unemployment insurance for seamen.

II. Princess *Maud* Charlotte, born November 26, 1869; married July 22, 1896, to Charles, Prince of Denmark, now King Haakon VII. of Norway. Offspring:—Olav, Crown Prince of Norway, born July 2, 1903.

Living Brother and Sisters of the late King.

I. Princess *Louise*, born March 18, 1848; married March 21, 1871, to John, Marquis of Lorne, who became Duke of Argyll, April 24, 1900, and died May 2, 1914.

II. Prince *Arthur*, Duke of Connaught, born May 1, 1850; married March 13, 1879, to Princess Louise of Prussia, born July 25, 1860, died March 14, 1917. Living offspring:—(1) Arthur, born Jan. 13, 1883, married Alexandra Victoria, Duchess of Fife, October 15, 1913; (2) Patricia, born March 17, 1886, married February 27, 1919, Hon. Alexander R. M. Ramsay, D.S.O., R.N.

III. Princess *Beatrice*, born April 14, 1857; married July 23, 1885, to Prince Henry (died January 20, 1896), third son of Prince Alexander of Hesse. Living offspring:—(1) Alexander Albert, born Nov. 23, 1886, married Lady Irene Denison; (2) Victoria Eugénie, born Oct. 24, 1887, married May 31, 1906, to Alfonso XIII., King of Spain.

The King's legal title rests on the statute of 12 and 13 Will. III. c. 3, by which the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being

Protestants.' By Act of Parliament, 1927, the title of the King is declared to be 'George V., by the Grace of God, of Great Britain, Ireland and the British Dominions beyond the Seas King, Defender of the Faith, Emperor of India.' By proclamation of July 17, 1917, the Royal family became known as the House and Family of Windsor.

By Letters Patent of November 30, 1917, the titles of Royal Highness and Prince or Princess are (except for existing titles) to be restricted to the Sovereign's children, the children of the Sovereign's sons, and the eldest living son of the eldest son of the Prince of Wales.

Provision is made for the support of the Royal household by the settlement of the Civil List soon after the commencement of each reign. (For historical details, see YEAR-BOOK for 1908, p. 5.) By Act of 10 Ed. VII. and 1 Geo. V. c. 28 (August 3, 1910), the Civil List of the King, after the usual surrender of hereditary revenues, is fixed at 470,000*l.*, of which 110,000*l.* is appropriated to the privy purse of the King and Queen, 125,800*l.* for salaries of the Royal household and retired allowances, 193,000*l.* for household expenses, 20,000*l.* for works, 13,200*l.* for alms and bounty, and 8,000*l.* remains unappropriated. In September, 1931, the King decided, in view of the financial position of the country, to reduce His Majesty's Civil List by 50,000*l.* while the emergency lasts. The same Civil List Act of 1910 also provides for an annuity of 70,000*l.* to Queen Mary in the event of her surviving the King. Should the Prince of Wales marry, the Princess of Wales will receive an annuity of 10,000*l.*, and should she survive the Prince of Wales, this annuity will be raised to one of 30,000*l.* Further, there is to be paid to trustees for the benefit of the King's children (other than the Duke of Cornwall) an annual sum of 10,000*l.* in respect of each son (other than the Duke of Cornwall) who attains the age of 21 years, and a further annual sum of 15,000*l.* in respect of each such son who marries, and an annuity of 6,000*l.* in respect of each daughter who attains the age of 21 or marries. The First Commissioner of the Treasury, the Chancellor of the Exchequer, and the Keeper of the King's Privy Purse are appointed the Royal Trustees under this Act. The King has paid to him the revenues of the Duchy of Lancaster, the payments made therefrom in 1929 being 62,000*l.* for His Majesty's use.

On the Consolidated Fund are charged likewise the following sums allowed to members of the royal family:—25,000*l.* a year to the Duke of Connaught; 6,000*l.* to H.R.H. Helena Augusta Victoria (Princess Christian); 6,000*l.* to Princess Louise, Duchess of Argyll; 6,000*l.* to H.R.H. Beatrice Mary Victoria Feodore; and 6,000*l.* to each of the late King's daughters.

The Heir Apparent has an income from the revenues of the Duchy of Cornwall, the payment in 1927 on his account being 72,917*l.*

GREAT BRITAIN AND NORTHERN IRELAND.

Constitution and Government.

I. Imperial and Central.

The supreme legislative power of the British Empire is vested in Parliament. Parliament is summoned by the writ of the sovereign issued out of Chancery, by advice of the Privy Council, at least twenty days previous to its assembling.

Since 1914 the sittings of Parliament have been interrupted only by comparatively short intervals. Every session must end with a prorogation, and all Bills which have not been passed during the session then lapse. A dissolution may occur by the will of the sovereign, or, as is most usual, during the recess, by proclamation, or finally by lapse of time, the statutory limit of the duration of any Parliament being five years.

Under the Parliament Act, 1911 (1 and 2 Geo. V, ch. 13), all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the House of Lords without amendment, may become law without their concurrence on the royal assent being signified. Public Bills, other than Money Bills or a Bill extending the maximum duration of Parliament, if passed by the House of Commons in three successive sessions, whether of the same Parliament or not, and rejected each time, or not passed, by the House of Lords, may become law without their concurrence on the royal assent being signified, provided that two years have elapsed between the second reading in the first session of the House of Commons and the third reading in the third session. All Bills coming under this Act must reach the House of Lords at least one month before the end of the session. Finally, the Parliament Act limited the maximum duration of Parliament to five years.

The present form of Parliament, as divided into two Houses of Legislature, the Lords and the Commons, dates from the middle of the fourteenth century.

The House of Lords consists of peers who hold their seats—(i) by hereditary right; (ii) by creation of the sovereign; (iii) by virtue of office—Law Lords, and English archbishops (2) and bishops (24); (iv) by election for life—Irish peers (28); (v) by election for duration of Parliament—Scottish peers (16). The full house would consist of about 740 members, but the voting strength is about 720.

The House of Commons consists of members representing County, Borough, and University constituencies. No one under 21 years of age can be a member of Parliament. Clergymen of the Church of England, ministers of the Church of Scotland, and Roman Catholic clergymen are disqualified from sitting as members; Government contractors, and sheriffs, and returning officers for the localities for which they act, are also among those disqualified. No English or Scottish peer can be elected to the House of Commons, but non-representative Irish peers are eligible. Under the Parliament (Qualification of Women) Act, 1918, women are also eligible, and the first woman member took her seat in December, 1919.

In August, 1911, by resolution of the House of Commons, provision was first made for the payment of a salary of 400*l.* per year to members, other than those already in receipt of salaries as officers of the House, as Ministers, or as officers of His Majesty's household. Payment began as from April 1, 1911. This provision does not extend to the House of Lords.

Under the Representation of the People (Equal Franchise) Act, 1928, the qualifications for the franchise are the same for men and women. Electors,

for inclusion in the register, must be of full age (twenty-one years), and have resided, or occupied business premises of an annual value of not less than ten pounds, in the same parliamentary borough or county, or one contiguous thereto, for the qualifying period of three months ending on December 1, 1928, and in Scotland, on December 15, 1928. There is also a University franchise, to be qualified for which a person must be twenty-one years of age, and must have taken a degree, or in the case of a woman, have fulfilled the conditions which would entitle a man to a degree.

Every registered elector is entitled to vote at an election, but no person may vote at a general election for more than two constituencies, for one of which there must be a residential qualification. The second vote must rest on a different qualification, and each vote must be recorded in a different constituency.

Disqualified for registration are (among others) peers, infants, aliens, bankrupts, lunatics and idiots. Receipt of poor relief or other alms does not count as a disqualification.

Two registers of electors must be prepared each year, one in the spring, and the other in the autumn, except in Ireland, where only one is required; and the authorised expenses are met by local and State funds in equal parts. University registers may be made up as the governing bodies decide, and a registration fee not exceeding 1*l.* may be charged.

In university constituencies returning two or more members the elections must be according to the principle of proportional representation, each elector having one transferable vote. At a general election all polls must be held on the same day, except in the case of Orkney and Shetland, and of university elections. Provision is made for absent electors to vote, in certain cases by proxy.

Under the same Act the seats in Great Britain were redistributed on the basis of one member of the House of Commons for every 70,000 of the population. By a separate Act, redistribution in Ireland was made on the basis of one for every 43,000 of the population. The total membership of the House of Commons was thereby raised from 670 (as established in 1885) to 707. In 1922 the number was reduced to 615 (including 13 from Northern Ireland), owing to the establishment of separate parliaments in Ireland.

The electorate in 1930, in England and Wales, numbered 25,730,507 (12,101,108 males, 13,629,399 females). Under the provisions of the Representation of the People Act, 1928, it is estimated that about 5,000,000 new voters were added to the register in 1929.

The following is a table of the duration of Parliaments called since the accession of King Edward VII. (for heads of the Administrations see p. 8).

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, whose existence is dependent on the support of a majority in the House of Commons.

The head of the Ministry is the Prime Minister, a position first constitutionally recognised, and special precedence accorded to the holder, in 1905. No salary is attached to the office of Prime Minister, as such, and it is usually held in conjunction with some other high office of State, generally that of First Lord of the Treasury. His colleagues in the Ministry are appointed on his recommendation, and he dispenses the greater portion of the patronage of the Crown.

The present Government (appointed Nov. 5, 1931, reconstructed Nov. 1931 and Oct. 1932) consists of the following members:

(*a*) The Cabinet.

1. *Prime Minister, First Lord of the Treasury, and Leader of the House of Commons.*—Right Hon. J. Ramsay *MacDonald*, born 1866. Prime Minister, First Lord of the Treasury, Foreign Secretary, 1924 and 1929. Present appointment, 1931.

II. Local Government.

England and Wales.—In each county the Crown is represented by H.M. Lieutenant. There is also a sheriff, who represents the executive of the Crown, an under-sheriff, a clerk of the peace and a clerk of the County Council, coroners, who are appointed and paid by the County Councils, and other officers. The licensing of persons to sell intoxicating liquors, and the administration of the criminal law—except that which deals with some of the graver offences—are in the hands of the magistrates.

For the purposes of local government England and Wales are divided primarily into sixty-two administrative counties, including the county of London, and eighty-three County Boroughs. The counties are administered by the justices and by a popularly-elected Council, called a County Council, who co-opt a prescribed number of aldermen, either from their own body or from outside it. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The jurisdiction of the County Councils covers the administration of higher and (outside certain Boroughs and Urban Districts) elementary education; maintenance of main roads and bridges; work in relation to agriculture (diseases of

animals, destructive insects and pests, land drainage, fertilisers and feeding stuffs, small holdings and allotments); provision of mental hospitals and other public health work (schemes for treatment of tuberculosis and venereal diseases, for maternity and child welfare, and for the welfare of the blind; accommodation and care of mental defectives; prevention of pollution of rivers; and supervision of milk and other food supplies). The control of the county police is vested in a standing joint committee composed of equal numbers of magistrates and of members of the County Council. The Metropolitan police are, however, under the control of the Home Secretary.

Secondly, the administrative counties, with the exception of the County of London, are subdivided into 'County Districts' which are either 'Urban Districts' or 'Rural Districts.' Generally speaking, an urban district comprises a town or a small area more or less densely populated, and a rural district takes in several country parishes. County District Councils administer the Public Health and Highway Acts, and exercise powers under the Housing Acts. Urban Authorities may also take over the maintenance and repair of main roads from County Councils; provide burial grounds, allotments, baths and washhouses, libraries, open spaces, museums, isolation hospitals, &c.; establish and manage trading services (gas, electricity, water, trams, &c.). Councils of Boroughs which had over 10,000, and of Urban Districts which had over 20,000 people in 1901 are also usually the local authorities for elementary education. Rural District Councils may also make arrangements for an adequate water supply; and exercise any 'urban powers' conferred on them by the Minister of Health.

Under the Local Government Act, 1929, the functions of the Poor Law authorities were transferred to county and county borough councils. These functions include the organisation and management of indoor and outdoor relief, responsibility for collection of fundamental vital statistics and responsibility for the provision, maintenance and management of all public institutions for the cure of diseases. Provision is also made under the Act to secure for every county district council the services of a medical officer of health. Industrial and freight-transport hereditaments were derated to the extent of three-fourths and agricultural lands are completely derated. The Act provides for the abolition of most of the assigned revenue grants, of the grants under the Agricultural Rates Acts, and of the percentage grants paid in respect of health services and certain roads. In place of these a grant comprising the equivalent of the total loss to local authorities both of rates and of grants under the Act, together with a substantial amount of new money, are distributed as a 'block grant' fixed for five years at a time on a basis of local need and ascertained by means of a formula. To avoid the difficulties created by a sudden change in the revenues of local authorities the allocation of grant will not be entirely by the formula until 1947.

The main central authority in London is the County Council, created by the Local Government Act of 1888. It has considerable powers in regard to public health, housing, bridges and ferries, asylums, street improvements, parks, main drainage, fire brigade, sanitary control, education, and numerous other matters. It is also the tramway authority for the county. The City Corporation has powers respecting sanitation, police, bridges, justice, &c., in the City of London. London comprises the ancient city with an area of one square mile, and an area of 118 square miles beyond the city, which is divided into 28 metropolitan boroughs, under the London Government Act, 1899, each with a mayor, aldermen, and councillors (women are eligible). The Councils have powers in regard to public health, highways, rating,

housing, education, &c., but they are not municipal boroughs in the statutory sense as in the rest of the Kingdom. The County Council has certain powers of control over them.

In all incorporated towns, local business is administered by a municipal Corporation. There are two kinds of municipal boroughs, County Boroughs and Non-County Boroughs. A number of the latter are small boroughs of special and generally ancient jurisdiction. Most of the County Boroughs and a number of the Non-County Boroughs have a separate Court of Quarter Sessions. The County Boroughs are outside the jurisdiction of the County Councils. A municipal Corporation consists of the mayor, aldermen, and burgesses, and acts through a Council elected by the burgesses—practically by the ratepayers. The councillors serve for three years (women are eligible), one-third retiring annually; the aldermen are elected by the Council, and the mayor, who serves for one year, also by the Council. A Town Council as an Urban Authority is invested with all the normal powers of an Urban District Council; and in addition certain powers, such as making byelaws or maintaining a separate police force, are conferred either upon all Town Councils or upon Councils of towns of certain sizes, or complying with other conditions, in virtue of their status as Councils of incorporated towns.

Scotland.—A Local Government Act was passed for Scotland in 1889 and followed in its main outlines the English Act of the previous year. The powers of local administration in counties formerly exercised by the Commissioners of Supply, the Justices and Road Trustees were either wholly or in part transferred to County Councils, which took over their duties and responsibilities in 1890. By the Local Government (Scotland) Act, 1894, a Local Government Board for Scotland was constituted, consisting of the Secretary for Scotland as President, the Solicitor-General for Scotland, the Under-Secretary for Scotland, and three other members nominated by the Crown. The latter Act provided that a Parish Council should be established in every parish to take the place of the Parochial Boards. Their principal function was the administration of the Poor Laws, and in addition they exercised powers similar to those of the Parish Councils in England. There were 869 civil parishes in 1921. The powers and duties of the Local Government Board were by the Scottish Board of Health Act, 1919, transferred to the Scottish Board of Health, constituted as in that Act provided. Municipal bodies exist in the towns of Scotland, as in those of England. Each burgh has a Town Council consisting of a Provost or Lord Provost, Bailies and Councillors. The Provost is the head of the Scottish municipality and holds office for three years. Bailies are selected by the Councillors from among their own number; they act as magistrates and sit as such in police courts. There are in Scotland three principal kinds of burghs, numbering altogether 201 (1921 census): (1) Royal Burghs, *i.e.* burghs created by a Charter of the Crown; (2) Parliamentary Burghs, which possess statutory constitutions almost identical with those of the Royal Burghs; (3) Police Burghs, constituted under a general Police Act. All burghs of whatever class have new Town Councils and their administration is regulated by the Burgh Police (Scotland) and Town Councils (Scotland) Acts or corresponding local Acts. The Local Government (Scotland) Bill, 1929, made many drastic changes in the local government machinery so as to bring it in line as far as possible with that set up for England and Wales. The new units of local government are the county councils and burghs with a population of over 20,000. Only the four great cities are Poor Law authorities and parish councils are abolished.

Area and Population.

I. Progress and Present Condition.

The population was thus distributed at the census, taken April 27, 1931:—

Divisions	Area in sq. miles	Males	Females	Total Population on April 27, 1931
England (including Monmouthshire)	50,874	18,061,643	19,732,360	37,794,003

In 1934 the birth rate was 18·0 and the death rate 12·9 per thousand of the population.

2. *Emigration and Immigration.*

In the thirty-eight years 1815–1852, the total number of emigrants from the United Kingdom was 3,463,592. Up to 1852 the emigration returns made no distinction between British subjects and foreigners. From 1853 to 1934 inclusive, the number of passengers of British origin, *to places out of Europe*, was 16,265,834. Figures of the *passenger traffic* to and from non-European countries in recent years are given as follows :—

Year	Outward			Inward			Balance outward.

The number of British emigrants (excluding persons only temporarily absent) to places out of Europe was 22,690 in 1933, 25,390 in 1934, and the immigrants of British nationality into Great Britain was 48,618 in 1933, 39,971 in 1934.

The destinations of British subjects leaving the United Kingdom to take up permanent residence in non-European countries in 1934 were mainly the United States, 2,028 (1,331 in 1933); British North America, 2,167 (2,243 in 1933); Australia, 4,572 (4,200 in 1933); New Zealand, 1,191 (1,233 in 1933); British South Africa, 3,392 (2,587 in 1933); India and Ceylon, 6,096 (5,890 in 1933).

The passenger movement between the United Kingdom and European countries (including all ports in the Mediterranean and Black Seas) in recent years is given as follows :—

Religion.

1. England and Wales.

The Established Church of England is Protestant Episcopal. Civil disabilities on account of religion do not attach to any class of British subjects. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from March 31, 1920, and

Wales was formed into a separate Archbishopric. Property belonging to the Church in Wales, and a sum of 1,000,000*l.* provided by Parliament, were assigned to a temporary body not exceeding three persons, called the Welsh Commissioners, for distribution to a body representing the Church (called the Representative Body), and to certain other authorities including the University of Wales.

The King is by law the supreme governor of the Church in England, possessing the right, regulated by statute, to nominate to the vacant archbishoprics and bishoprics. The King, and the First Lord of the Treasury in his name, also appoint to such deaneries, prebendaries, and canonries as are in the gift of the Crown, while a large number of livings and also some canonries are in the gift of the Lord Chancellor.

There are two archbishops (at the head of the two 'provinces' of Canterbury and York) and 41 bishops, and 31 suffragan bishops in England. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his province he exercises archiepiscopal jurisdiction. Under the bishops are 28 deans, 105 archdeacons, and 14 Provosts of Parish Church Cathedrals. Under the Church of England Assembly (Powers) Act, 1919, there is a National Assembly, called 'the Church Assembly,' in England, consisting of a House of Bishops, a House of Clergy, and a House of Laymen, which has power to frame legislation regarding Church matters. The first two Houses consist of the Convocations of Canterbury and York, which in turn consist of the bishops (forming an Upper House), archdeacons, and deans, and a certain number of proctors, as the representatives of the inferior clergy (forming the Lower House). The House of Laymen is elected by the lay members of the Diocesan Conference. Parochial affairs are managed by Parochial Church Meetings and Church Council. Every measure passed by the Church Assembly must be submitted to an Ecclesiastical Committee, consisting of fifteen members of the House of Lords nominated by the Lord Chancellor, and fifteen members of the House of Commons nominated by the Speaker. This Committee reports on each measure to Parliament, and the measure becomes law if each House of Parliament passes a resolution to that effect.

The number of civil parishes (districts for which a separate poor rate is or can be made) at the census of 1921 was 14,483. These, however, in most cases, do not coincide with ecclesiastical parishes, which have, from the civil point of view, lost their old importance. Of such parishes there were (1933) 13,116, inclusive of the Isle of Man and the Channel Islands, but excluding Wales. Each parish has its church, presided over by an incumbent or minister, who must be in priest's orders, and who is known as rector, vicar, or perpetual curate, according to his relation to the temporalities of his parish. Private persons possess the right of presentation to about 7,000 benefices; the patronage of the others belongs mainly to the King, the bishops and cathedrals, the Lord Chancellor, and the universities of Oxford and Cambridge. In 1933 there were about 12,715 beneficed clergy, and 4,266 assistant curacies. Voluntary offerings raised and administered parochially amounted in 1933 to 6,139,397*l.*, exclusive of very large sums contributed to central and diocesan societies and institutions and administered by such organisations.

Of 36,196 churches and chapels registered for the solemnisation of marriage at the end of 1929, 16,377 belonged to the Established Church and the Church in Wales and 19,819 to other religious denominations. Of the marriages celebrated in 1929, 56·2 per cent. were in the Established Church and the Church in Wales, 6·0 per cent. in the Roman Catholic Church, 11·4

per cent. were Nonconformist marriages, 0·03 per cent. were Quaker marriages, 0·7 per cent. Jewish, and 25·7 per cent. civil marriages in a Registrar's Office.

The following is a summary of recent statistics of certain churches in England and Wales, Channel Islands, and Isle of Man :—

The Unitarians have about 350 places of worship, the Catholic Apostolic Church over 80, the New Jerusalem Church about 75. The Salvation Army, a religious body with a semi-military organisation, carries on both spiritual and social work at home and abroad, and had (December, 1932) about 35,000 officers and *employés*, 15,931 corps and outposts, and 257,170 local officers; their places of worship in the United Kingdom have about 560,000 sittings. There are about 300,000 Jews in the United Kingdom with about 200 synagogues.

Roman Catholics in England and Wales are estimated at 2,278,830 in 1933. There were (1934) four archbishops (of whom one is a cardinal), and fourteen bishops; about 4,000 priests (not all officiating); and 2,196 churches, chapels, and stations.

2. Scotland.

The Church of Scotland (established in 1560 at the Reformation and re-established in 1688 as part of the Revolution Settlement) is Presbyterian, the ministers all being of equal rank. There is in each parish a kirk session, consisting of the minister, and of several laymen called elders. There are presbyteries (formed by groups of parishes), meeting frequently throughout the year, and these are again grouped in synods, which meet half-yearly and can be appealed to against the decisions of the presbyteries. The supreme court is the General Assembly, which now consists of over 1,730 members, partly clerical and partly lay, chosen by the different presbyteries. It meets annually in May (under the presidency of a Moderator appointed by the Assembly, the Sovereign being represented by a Lord High Commissioner, appointed by the King on the nomination of the Government of the day), and sits for ten days. Any matters not decided during this period may be left to a Commission, which sits at stated intervals until the meeting of the next General Assembly.

On October 2, 1929, the Church of Scotland and the United Free Church of

Scotland were reunited under the name of the Church of Scotland, and the two bodies met in General Assembly in Edinburgh as one. The United Church had, in Scotland, on December 31, 1933, 2,652 congregations, 1,289,145 members, besides adherents; 3,560 Sunday schools, with 47,807 teachers and 363,456 scholars in attendance. The Church courts are the General Assembly, 12 synods, 66 presbyteries in Scotland, 3 in England and 3 on the Continent, in addition to foreign mission presbyteries. Income in 1932 was 1,743,359*l.* The Church has Divinity Faculties in the four Scottish Universities of Edinburgh, Glasgow, Aberdeen and St. Andrews, and also Theological Colleges in the three first named cities, with 37 professors and lecturers. The United Church's foreign mission agents (including natives) exceed 9,000, and income 700,000*l.* There are in Scotland some small outstanding Presbyterian bodies and also Baptists, Congregationalists, Methodists, and Unitarians. The Episcopal Church in Scotland had in 1933, 7 bishoprics, 411 churches and missions, 339 clergy, and 61,821 communicants.

The Roman Catholic Church had in Scotland (1930) two archbishops, four bishops, 638 priests; about 450 churches, chapels, and stations, and about 600,000 adherents.

The proportion of marriages in Scotland according to the rites of the various Churches in 1932 was: Church of Scotland, 63·4 per cent.; United Free (continuing), 0·7; Roman Catholic, 13·1; Episcopal, 2·8; others, 7·9; irregular, 12·1.

Education.

University Education.

In *England* the highest education is given at the ancient universities of Oxford and Cambridge, the former having 22 colleges and 3 private halls, and the latter 17 colleges and 1 hall; the university of Durham, with a college of medicine and of science at Newcastle; the university of London, with 2 Incorporated Colleges, 34 "Schools," and 28 Institutions giving instruction in 8 faculties; the Victoria University (Manchester), the Birmingham University, the Liverpool University, the Leeds University, the Sheffield University, the Bristol University, and the University of Reading, which started in 1860 as a college for art classes. There are also University Colleges at Exeter, 60 lecturers, &c., 489 students, 1934–35; Nottingham (founded 1881), 117 lecturers, and 1,020 full-time students, 1934–35; Southampton (founded 1850), 67 day lecturers, 70 evening lecturers, &c., 516 day students, 750 evening students, 1933–34; Leicester (opened in 1923), 49 lecturers, &c., 163 internal and 1,226 extra-mural students, 1934–35; Hull (founded in 1928) with 46 lecturers and tutors and 208 students in 1934–35. There are special Agricultural Colleges at Carlisle, Cirencester, Glasgow Newport (Shropshire), Kingston-on-Soar (Derby), Wye (Kent), Uckfield (Sussex), and Ripley (Surrey). The university of *Wales* has 4 colleges (Cardiff, 120 lecturers, 1,392 students; Aberystwyth, 130 lecturers, 882 students; Bangor, 99 lecturers, &c., 630 students; and Swansea, 58 lecturers, &c., 684 students). In *Scotland* there are 4 universities, viz., at St. Andrews, Glasgow, Aberdeen, Edinburgh. The Carnegie Trust, founded in 1901 with a capital of 2,000,000*l.*, has an annual income of 100,000*l.*, of which half is devoted to the equipment and expansion of the Scottish Universities and half to assisting students. The following table gives the approximate number of professors, lecturers, &c., and students of the Universities for 1934–1935. (The dates of foundation are given in brackets.)

Included among the grant-receiving schools on March 31, 1934, were 752 Council Schools, 87 Roman Catholic Schools, 440 Foundation and other schools, and 102 Welsh Intermediate Schools. On October 1, 1934, there were 294 preparatory schools not on the grant list, with 19,924 pupils.

In the year ending July 31, 1934, there were 66 Technical Colleges providing advanced courses with 7,072 full-time students and 1,727 part-time students, and 179 Institutions at which Technical Day Classes were held, attended by 28,016 students, of whom 2,589 were full-time students. In addition there were 4,886 evening schools giving part-time technical and other instruction to 842,325 students, and 51 separate Day Continuation Schools with 15,638 students. Among other institutions providing technical, commercial and other instruction were 194 junior technical and housewifery schools with 22,158 students, and 6 nautical schools with 932 students. There was in 1933-34 a total of 226 Schools of Art with 58,555 students.

In the same year there were 111 training institutions for teachers with 17,241 students (1,093 as teachers of domestic subjects).

The number of students receiving instruction in full-time courses of higher education for blind, deaf, defective and epileptic students during 1933–34 was 1,799, and of these 1,329 were blind. There were also two schools providing secondary education for blind children (39 boys and 32 girls).

The total net expenditure by local authorities on higher education in 1933–34 was 16,885,145*l.*, and for 1934–35 is estimated at 18,327,270*l.*

Scotland.—In 1934 there were 251 secondary schools (205 with primary or preparatory departments) with a total accommodation of 188,712; the average number of scholars on the registers being 164,118 (93,536 post primary). The number of students attending Central Institutions in 1933–34 was 8,414 day students and 10,515 evening students. Centres for Continuation Classes numbered 737 in 1933–34 with a total attendance of 135,593 students. The number of teachers in secondary schools at March 31, 1934, was 6,714, including 4,302 University Graduates. In 1933–34 there were 1,661 students training for the Teacher's General Certificate, including 854 graduates, in 4 training centres and 3 training colleges.

Elementary Education.

England and Wales.—In the year 1933–34 the number of schools (public elementary, special, nursery, and certified efficient) for elementary education was 21,573. In 1934 there were 10,014 Council schools and 10,828 voluntary schools; total public elementary schools (maintained by Local Education authorities), 20,842. The average attendance for the year 1933–34 at these schools was 5,065,963 (3,460,707 at Council schools and 1,605,256 at Voluntary Schools). The number of scholars on the registers in 1934 was: 155,175 aged under 5; 3,966,551 aged 5 and under 12; 1,455,026 aged 12 and over. The number of teachers, 1933–34, was 170,908 (47,060 men and 123,848 women), of whom 130,654 were certificated, 28,284 were uncertificated and 6,291 were supplementary.

There were 619 'special' schools in 1933–34, comprising 76 for the blind, with accommodation for 4,760 pupils; 48 for the deaf, with accommodation for 4,560 pupils; 166 for the mentally defective, accommodation 16,587; 323 for the physically defective, accommodation 31,171; and 6 for epileptic children with accommodation for 609 pupils. There were also 29 Poor Law schools, 59 nursery schools and 290 play centres.

The number of meals provided free in 1933–34 for necessitous children was 56,204,113 as compared with 48,780,098 in 1932–33, and the total number of children in public elementary schools who were medically examined in 1933 was 3,094,926, and there were 1,992,883 re-inspections.

The total number of school clinics on March 31, 1934, was 1,880 (1,855 in 1933). There were 2,332 medical officers, 778 dentists and 5,585 nurses employed for whole or part time.

The total net expenditure of local authorities for elementary education in 1933–34 was 62,155,034*l.*, and for 1934–35 is estimated at 65,445,037*l.*

Scotland.—In 1933–34 there were 2,909 Primary Schools, and the average number on the registers was 669,058, and the average attendance was 606,600.

On July 31, 1934, there were 34 special day schools, 11 residential schools and special classes attached to 47 ordinary schools, and the number of defective children under instruction was 10,348, of which 5,993 were physically defective and 4,355 were mentally defective. There were also 3 residential schools for blind children, 5 for deaf mutes and 2 for both combined. The total number of children under instruction was 948

(262 blind and 686 deaf mutes). At July 31, 1934, there were 21 nursery schools with a total enrolment of 689. On June 30, 1934, there were 23 'approved schools' (reformatory and industrial schools) with a total of 1,466 boys and girls.

As at March 31, 1934, there were 19,402 recognised certificated primary school teachers, including 5,782 University Graduates.

The total ordinary expenditure of Education authorities during 1932–33 was 11,977,071*l.*, including 7,876,954*l.* on account of salaries and retiring allowances of teachers. The expenditure for 1933–34 was 11,939,661*l.*, and for 1934–35 is estimated at 12,561,684*l.*

Justice and Crime.

England and Wales.

The Supreme Court of Judicature is the ultimate authority in most cases, civil and criminal, in England and Wales, and in others, where there is an appeal to the House of Lords, the penultimate. It exercises its power through the High Court of Justice, the Courts of Appeal, and (in a sense) a variety of subordinate local courts. The principal courts having criminal jurisdiction are the petty sessional courts, the general or quarter sessions, the courts of oyer and terminer and gaol delivery, more popularly known as 'assizes,' and the Central Criminal Court, which is the Assize Court for London in the widest sense, including 'the City' and other neighbouring counties, and is also the Quarter Sessions for the City. Two or more justices of the peace, the Lord Mayor or any alderman of the City of London, or any stipendiary magistrate, sitting in a court house, constitute a petty sessional court. The courts of quarter sessions are held four times a year by the justices of the county. Two justices constitute a court, but usually a larger number attend. Women may be justices. Certain cities and boroughs have a court of quarter sessions, with similar jurisdiction to that of the county justices in quarter sessions, in which the recorder of the borough is the judge. The assize courts are constituted by Judges of the High Court (or in some cases by King's Counsel having His Majesty's special commission). These go on circuit twice or four times a year, visiting every county in turn, and hearing and determining all civil cases entered for trial and all criminal cases presented by the Grand Jury of the County or Riding, city or borough. Except in cases of treason when the trial is 'at bar' before the Lord Chief Justice and two or more judges of the King's Bench Division, criminal cases are tried by a jury, and the jury, subject to the direction of the Judge on points of law, are the sole judges of the facts of the case. Women serve on juries. The sessions of the Central Criminal Court are held at least twelve times a year and more often if necessary. The Recorder and the Common Serjeant, and, if the number of the prisoners makes it necessary, the judge of the City of London Court, sit on the first two days, after which they are joined by one or more of the judges of the High Court on the rota, for whom capital and certain other cases are reserved. Criminal cases of special importance or complexity arising in any part of the country may, by direction of at least two High Court judges, be brought for trial in the King's Bench Division. A petty sessional court deals summarily with minor offences, some of which are practically civil and can be reviewed by the judges. All offences are usually investigated by a petty sessional court before being tried at the sessions or the assizes, but with the consent of the accused, justices can dispose of many felonies. To every sessions, assize, and to every sitting of the Central Criminal Court, the sheriff summons a number of the chief inhabitants of the approximate district, of whom not less than 12 and

not more than 23 are sworn and constitute a grand jury, which examines the bill of indictment against the accused person, hears the evidence of witnesses for the prosecution, and if it thinks a *prima facie* case for trial is made out, endorses the bill 'a true bill,' which is then tried by the petit jury. All criminal trials, except those which come before a court of summary jurisdiction or the House of Lords, take place before a judge and such a jury (twelve persons). Appeal is allowed in criminal cases: (i.) on a point of law; (ii.) on a question of fact, or other sufficient ground if the judge certifies the case as fit for appeal, or the Court of Criminal Appeal grants leave to appeal; and (iii.) against the sentence (if not fixed by law) with the leave of the Court of Criminal Appeal. This Court can reverse, amend, or affirm the judgment: in a few cases its decision may be reconsidered by the House of Lords. The only other method of securing the revision of a sentence is through the Royal prerogative, exercised on the advice of the Home Secretary, by which a sentence can be modified or annulled. No man can be tried again for the same crime after a petit jury has found him 'not guilty.' Nominally all the judges are appointed by the King, but in practice the Lord Chancellor (who is a minister, a member of the Cabinet, ex-officio president of the House of Lords, and goes out with the ministry), the Lord Chief Justice, the Lords of Appeal in Ordinary, who sit in the House of Lords and on the Judicial Committee of the Privy Council, and the Lords Justices of Appeal who sit in the Court of Appeal, are appointed on the recommendation of the Prime Minister, and all the other judges on the recommendation of the Lord Chancellor.

The courts chiefly having jurisdiction in civil cases are the modern County Courts, created in 1846, Assizes, and the High Court, Quarter Sessions and old local courts also have this jurisdiction to a certain extent.

The authorised strength of the police force in England and Wales on September 29, 1933, was 58,418 (including 20,073 Metropolitan police). Total Police Expenditure in England and Wales for 1930–31 was 21,379,187*l.*

Scotland.

The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges of the Court of Session, and sits more or less frequently, as the number of cases before it may require, in Edinburgh or in the circuit towns. One judge can, and usually does, try cases, but two or more preside in cases of difficulty or importance. It is the only competent court in cases of treason, murder, robbery, rape, fire-raising, deforcement of messengers, and generally in all cases in which a higher punishment than imprisonment is by statute directed to be inflicted; and it has moreover an inherent jurisdiction to punish all criminal acts, both those already established by common law or statute, and such as have never previously come before the courts and are not within any statute.

The sheriff of each county is the proper criminal judge in all crimes occurring within the county which infer only an arbitrary punishment, and if the case is tried with a jury the High Court has no power of review on the merits. Even in cases indicted to the High Court the accused is, under the Criminal Procedure (Scotland) Act of 1887, regularly asked to plead in the sheriff court, and minor objections to the indictment can be wholly or in part disposed of there. Borough magistrates and justices of the peace have jurisdiction in petty cases occurring within the burgh or county, and in a number of minor offences under various statutes.

The Court of Session exercises the highest civil jurisdiction in Scotland, with the House of Lords as a Court of Appeal.

The police force in Scotland at the end of 1933 had an authorised strength of 6,526. The estimated expenditure on police was 1,039,449*l.* for 1933–34.

National Insurance. Pensions.

Under the National Health Insurance Act 1924, the Unemployment Insurance Acts 1920–25, the Old Age Pensions Act 1908–24, and the Widows, Orphans and Old Age Contributory Pensions Act 1925–32, provision is made for insurance against loss of health, for prevention and cure of sickness, compulsory insurance against unemployment, and pensions for widows and orphans and aged persons.

National Health Insurance.—This is administered by the Ministry of Health in England and Wales, and the Department of Health for Scotland in Scotland; by specially constituted authorities, Approved Societies, including friendly societies and Insurance Committees and trade unions.

Subject to specific exceptions, persons who are compulsorily brought under the National Health Insurance Act, known as *employed contributors*, comprise all persons of the age of 16 years or over who are employed under contract of service, written or implied, whether by time or piece. Aliens are subject to compulsory insurance equally with British subjects. Among persons

excluded are those employed in non-manual labour at a rate of remuneration exceeding £250 a year. Insured persons who are not members of an approved society must, within a certain time, become *deposit contributors*; their benefits are limited. Certain persons not compulsorily insured may become *voluntary contributors*. The rates of contributions are given below. The ordinary benefits are (*a*) free medical treatment; (*b*) payments during sickness (not exceeding 26 weeks), amounting to 15*s*. a week for men and 12*s*. for unmarried women and widows, 10*s*. for married women, after 104 contributions; 9*s*. (men), 7*s*. 6*d*. (women) after 26 contributions; (*c*) disablement benefit after 26 weeks sickness benefit, 7*s*. 6*d*. a week for men, 6*s*. a week for unmarried women and widows; 5*s*. a week for married women; (*d*) maternity benefit of 40*s*. payable to wife on confinement. Approved societies may also give additional benefits. Deposit contributors receive sickness and disablement benefits at rates slightly less than the above.

The National Health Scheme covered about 18½ million persons in Great Britain in 1933. The total expenditure on benefits for 1933 was approximately 31,750,000*l*., including 10,150,000*l*. for medical benefit. The cost of administration was 5,700,000*l*. in 1933.

Widows, Orphans and Old Age Pensions.—Provision is made in the Widows', Orphans' and Old Age Contributory Pensions Acts of 1925 and 1929 for a contributory pensions scheme under which pensions are provided for widows, children and elderly persons. This scheme is interlocked with the National Health Insurance Scheme, and in general, an inclusive weekly insurance contribution is payable for both services together. Subject to certain conditions, the following pensions are payable, free from any restriction as to means:—*Widows' pensions* of 10*s*. a week to the widows of insured men, together with allowances for children at 5*s*. a week for the eldest and 3*s*. for younger children. The children's allowances continue payable up to age 14 (or so long as school instruction continues but not beyond 31st July following the 16th birthday). On remarriage, the widow's pension of 10*s*. ceases but children's allowances continue. The widow of a man who died or reached the age of 70 before the scheme began on January 4, 1926, but who would have been insured for pensions purposes had the Acts been in operation earlier may receive a similar pension when she reaches the age of 55. *Orphans' pensions* are 7*s*. 6*d*. a week, the period of the continuance being the same as for children's allowances. *Contributory old age pensions* of 10*s*. a week at age 65 for insured persons, including wives of insured men who have themselves qualified.

Widows and contributory old age pensions normally continue to age 70 and are then replaced by pensions under the Old Age Pensions Acts, 1908 to 1924, free from the means and other restrictions which those Acts impose.

The normal weekly contribution for National Health and Pensions Insurance is 1*s*. 6*d*. for men and 1*s*. 1*d*. for women, of which 9*d*. and 6*d*. respectively may ordinarily be recovered from the worker. In the case of workers aged over 65 contributions of 9*d*. (men) and 7*d*. (women) are paid by the employer only.

The total amount paid in Great Britain in respect of widows' and orphans' pensions for the year ending March 31, 1934, was approximately 22,600,000*l*.; the beneficiaries were 722,000 widows and 338,000 children (including orphans). The total number and cost of pensions paid under the contributory old age pensions scheme (persons between ages 65 and 70) for the year ending March 31, 1934, was 715,000 (18,300,000*l*.).

Unemployment Insurance.—This is administered by the Ministry of Labour through the Employment Exchanges, Trade Unions, and by certain associations of employed persons. There are also special schemes in operation for

the Banking and Insurance Industries. The scheme is compulsory in its operation, and with the main exceptions of domestic servants in private service and persons employed in agriculture, substantially all persons covered by the Health Insurance Scheme are required to be insured against unemployment. The minimum insurable age is 16 years. Certain employees of Government Departments, public or local authorities, railways and public utility undertakings, and persons with rights under statutory superannuation schemes may also be excepted by their employers under certificates granted to the employers in cases where the Minister of Labour is satisfied that the employment is permanent in character, that the employees have completed three years' continuous service in that employment, and that the other circumstances of the employment are such as to make it unnecessary that they should be insured under the Unemployment Insurance Acts. A certificate of exemption, relieving him from liability to pay the employed person's share of the contributions, may be claimed by an employee who can prove that he is (*a*) in receipt of a pension or income of not less than 26*l.* a year; or (*b*) ordinarily and mainly dependent upon some other person; or (*c*) ordinarily and mainly dependent on his earnings from an uninsurable occupation or (*d*) employed in a seasonal occupation which does not ordinarily last for more than 18 weeks in any year and not ordinarily employed in any other insurable employment. The rates of weekly contributions are as follows: (*a*) contributions at ordinary rates: man (aged 21 but under 65), from employer 10*d.*, from employee 10*d.*; woman (over 21 but under 65), from employer 9*d.*, from employee 9*d.*; young man (aged 18 but under 21), from employer 9*d.*, from employee 9*d.*; young woman (aged 18 but under 21), from employer 8*d.*, from employee 8*d.*; boy (aged 16 but under 18), from employer 5*d.*; from employee 5*d.*; girl (aged 16 but under 18), from employer 4½*d.*, from employee 4½*d.* (*b*) In the case of an exempt person, the employer's share only of a contribution is payable. No part of this contribution can be recovered from the exempt person. (*c*) Contributions in respect of persons of the age of 65 and over are payable by employers only, at the following rates: man, 10*d.*; woman, 9*d.* The ordinary State contribution is a sum equivalent to one-half of the joint contributions of employers and employed persons. Under the Unemployment Insurance (National Economy) Order, 1931, the standard rates of benefit payable as from week commencing 12th October, 1931, are:—men (aged 21 and under 65), 15*s.* 3*d.*; women (aged 21 and under 65), 13*s.* 6*d.*; young men (aged 18 and under 21), 12*s.* 6*d.*; young women (aged 18 and under 21), 10*s.* 9*d.*; boys (aged 17 and under 18), 8*s.*; girls (aged 17 and under 18), 6*s.* 9*d.*; boys (aged 16 and under 17), 5*s.* 6*d.*; girls (aged 16 and under 17), 4*s.* 6*d.* Additional benefits at the rate of 8*s.* a week in respect of an adult dependant and 2*s.* a week in respect of each dependent child are payable in respect of certain classes of dependants. Under the Unemployment Insurance (National Economy) (No. 2) Order, 1931, payment of benefit is limited to 156 days in a benefit year. Under the same Order a scheme of Transitional Payments replaced the Transitional Benefit scheme. These payments are made only on proof of need, and the amount is determined by the Public Assistance Authorities with the appropriate benefit rate as a maximum limit. The whole cost (including the cost of administration) is borne by the Exchequer as in the case of transitional benefit after 1st April, 1929. *Approximate* particulars of receipts and payments for the financial year 1933–34 are as follows:—Contributoins: employers and employees, 39,670,000*l.*; Exchequer 'equal thirds,' 19,800,000*l.*; total receipts, 59,470,000*l.* Insurance benefit: direct, 38,250,000*l.*; indirect, 2,040,000*l.*; administration, 3,800,000*l.*; interest, 5,270,000*l.*: miscellaneous (refunds, grants towards approved courses of

instruction, etc.), 210,000*l.*; total payments, 49,570,000*l.* Transitional payments and cost of administration (the total is repaid in full to the fund by the Exchequer, and is not included in the Insurance Account above) amounted to 52,250,000*l.*

War Pensions.—The number of war pensions or allowances in payment as at March 31, 1934, was 1,053,500 approximately, and the estimated expenditure of the Ministry of Pensions for 1934–35 was 43,281,000*l.*, and the estimated expenditure for 1935–36 is 42,400,000*l.* (inclusive of administration expenses).

[1] The principal items included in these branches of revenue are shown on pages 32-4 above. The excise receipts include receipts from Motor Vehicle Duties.

Income Tax.—The gross amount of income brought under the review of the Inland Revenue Department in the year ended April 5, 1933, in Gt. Britain and Northern Ireland, was 3,203,689,924*l.*; in 1933–34 it was estimated to be approximately 3,150,000,000*l.* The income on which tax was actually received in 1932–33, after allowing for exemptions and reliefs, was 1,205,708,062*l.*, and the estimated amount for 1933–34 was 1,160,000,000*l.* The estimated number of incomes in Great Britain and Northern Ireland above the effective exemption limit in 1933–34 was 7,800,000: the number actually chargeable with tax was estimated at 3,400,000.

Prior to April 6, 1915, incomes not exceeding 160*l.* were exempt from Income Tax, and from April, 1915, to April, 1920, incomes not exceeding 130*l.* were exempt. The graduation of the tax on incomes in excess of these limits was effected by means of differential rates and by various abatements

and reliefs (for wife, children, etc.) granted in the lower ranges of incomes only.

Under the new system of graduation introduced by the Finance Act, 1920, personal allowances of 135*l.* assessable income (= 150*l.* earned income) for unmarried persons and 225*l.* (= 250*l.* earned income) for married persons, and allowances for children, dependent relatives, etc., were granted to all taxpayers irrespective of the amount of their total income. The effect of the increase in the earned income relief (from one-tenth to one-sixth) by the Finance Act, 1925, was to increase the personal allowances, *in the case of earned incomes*, to 162*l.* and 270*l.* respectively. The Finance Act, 1935, reduced the personal allowances, in terms of assessable income, to 100*l.* for unmarried persons, and 170*l.* for married persons. For 1935–36 a relief of two-thirds of the standard rate[1] is allowed on an amount of income not exceeding 135*l.* Income not exceeding 125*l.* are exempt from tax, and the tax payable on any total income of less than 140*l.* will not be more than one-fifth of the amount by which the total income exceeds 125*l.* The standard rate of tax has varied as follows:—

1923-24 and 1924-25 . . .	4*s.* 6*d.* in the £.
1925-26 to 1929-30 . . .	4*s.* ,,
1930-31	4*s.* 6*d.* ,,
1931-32 to 1933-34 . . .	5*s.* ,,
1934-35 to 1935-36 . . .	4*s.* 6*d.* ,,

The gross income brought under review in 1932–33 was distributed as follows:—

Profits from the ownership of Lands	49,400,000
,, ,, Houses	444,394,714
Profits from the occupation of lands	47,900,000
,, British and other Government securities . .	179,534,167
,, businesses, professions, and certain interest .	1,126,583,174
Salaries of Offices and employments (including Manual wage-earners)	1,355,877,869
	3,203,689,924

The gross income in 1933–34 was estimated at 3,150,000,000*l.*

Total income from abroad amounted in 1932–33 to 104,402,496*l.*, and in 1931–32 to 116,867,285*l.*

The gross income from the ownership of lands and houses in 1932–33 was distributed as follows:—

—	England	Scotland	N. Ireland	Gt. Britain and N. Ireland
	£	£	£	£
Lands, etc. . .	41,300,000	6,000,000	2,100,000	49,400,000
Houses, etc. . .	406,718,156	34,647,090	3,029,468	444,394,714

Sur-tax.—Sur-tax is payable by persons with incomes exceeding 2,000*l.* per year (prior to 1914–15, 5,000*l.* per year; from 1914–15 to 1917–18, 3,000*l.* per year, and in 1918–19 and 1919–20, 2,500*l.* per year).

As part of a general scheme for the simplification of the Income Tax, the Finance Act, 1927, merged the Super-tax into one tax with the Income

[1] From 1920–21 to 1929–30, tax was charged on the first 225*l.* at half the standard rate. For 1930–31 tax was charged on the first 250*l.* at four-ninths of the standard rate. From 1931–32 tax was charged on the first 175*l.* at half the standard rate.

Tax having the same basis of assessment and payable, under the name of Sur-tax, as a deferred instalment of Income Tax on the 1st January in the year following the year of assessment. The Sur-tax was payable for the first time in respect of the year 1928–29 on January 1, 1930. Net receipt from Sur-tax in 1933–34, was 52,394,604*l.* (60,310,344*l.* in 1932–33).

Local Taxation Grant.—Under the Local Government Act, 1929, grants payable out of the Consolidated Fund into the Local Taxation Account ceased to be payable in respect of any period after March 31, 1930.

The total payments made to the Local Taxation Account for England and Wales in 1930–31 was 326,736*l.*, including 265,821*l.* in relief of rates and 49,799*l.* under the Agricultural Rates Act, 1923. Scotland received a total of 30,898*l.*

It was estimated that national taxation per head of population amounted in 1930–31 to 16*l.* 6*s.* 5*d.* (14*l.* 15*s.* 10*d.* in 1929–30). In 1930–31 direct taxation amounted to 462,781,000*l.*, and indirect taxation to 240,907,000*l.*

III. National Debt.

Borrowing by the State on the security of taxes was practised in Norman times, but the National Debt really dates from the time of William III. The acknowledged debt in 1689 was about 664,000*l.*, on which the annual charge for interest and management was only 40,000*l.* At various subsequent dates the amounts were as follows (including the Irish debt throughout):—

[1] Excluding advances from votes of credit to Dominions, Allied Powers, &c., and other war assets. The amount of loans remaining unpaid at March 31, 1934, was : loans owing by Allies, 2,297·1 million ; Colonies, 113·8 million ; loans for relief and reconstruction, 29·9 million ; other debts, 4·7 million ; total 2,445·5 million.

IV. Local Taxation.

The estimated rates collected by local authorities in 1933–34 in England and Wales were 147,700,000*l.*, in Scotland 1932–33, 18,574,382*l.* For 1934–35 the amounts collected were England and Wales, 152,900,000*l.*, Scotland, 18,974,000*l.* In addition to the block grants under the Local Government Act, 1929, local authorities receive other large Government grants, *e.g.* from the Board of Education for purposes of education, from the Home Office for police expenses, from the Ministry of Health for housing, from the Road Fund for highways. Total Government grants to local authorities amounted in 1932–33 to 125,000,000*l.* for England and Wales, and in 1931–32, 19,595,791*l.* for Scotland. The General Exchequer grant for Scotland in 1932–33 was 6,318,666*l.*

In England and Wales the average amount of the rates per pound of assessable value was 6*s.* 8¾*d.* in 1913–14, 10*s.* 9½*d.* in 1933–34, and 10*s.* 8¾*d.* in 1934–35. In Scotland the average amount of the rates in 1932–33 was 9*s.* 11*d.*

The gross debt of the County of London on March 31, 1935, amounted to 125,651,826*l.* The proposed rate for 1934–35 was 6*s.* 1½*d.*, and for 1935–36 is 7*s.* 0*d.* The estimated gross expenditure on rate accounts for 1934–35 was 31,176,783*l.*

Defence.

The Committee of Imperial Defence is responsible for the co-ordination of naval, military, and air policy. Of this Committee the Prime Minister is *ex-officio* President, and he has power to call for the attendance at its meetings of any naval or military officers, or of other persons, with administrative experience, whether they are in official positions or not. The

usual members are the Secretaries of State for Foreign Affairs, for War and Air, the Colonies, India, the Chancellor of the Exchequer, the First Lord of the Admiralty, the First Sea Lord, the Chief of the Imperial General Staff, the Chief of the Air Staff, Directors of the Intelligence Departments of the War Office and the Admiralty. During 1923 a Cabinet Committee inquired into the co-ordination of the policy and administration of defence. As the result of its report a standing sub-committee of the Committee of Imperial Defence has been appointed, with a Cabinet Minister as Chairman, the heads of the three services and representatives of the Foreign Office and Treasury as members, for the purpose of correlating defensive policy. Three further sub-committees have since been appointed, one composed of the Chiefs of Staff of the three services of Navy, Army and Air, to furnish the Cabinet or the main committee with expert advice on problems of defence, the second sub-committee deals with man-power, and the third, the principal supply officers' sub-committee, with the provision of munitions and supplies in time of war. At the beginning of 1927 an Imperial Defence College was founded to educate selected officers of the three services in working together in the solution of problems of Imperial Defence and to carry out detailed studies for the main committee.

I. Army.

The land forces of the United Kingdom consist of the Regular Army, the Territorial Army, and the Reserve Forces. The British troops of the Regular Army serve both at home and overseas and are commonly referred to as the British Army in contradistinction to the Indian Army or Native Army, and to the Local Forces in certain British Colonies and Dependencies, the personnel of which is native with a proportion of British officers.

The Regular Army, whether at home or abroad, except India, is paid for by the Imperial Exchequer (although certain Dominions pay contributions towards its upkeep); India pays a contribution towards the cost of troops at home owing to these serving as a depôt for the regular troops in India. The Imperial Exchequer pays for Indian and Colonial troops serving outside their own countries. The Territorial Army serves only at home in peace time, but as the supreme position of the British Navy in Home Waters has practically eliminated all risk of invasion, members of the Territorial Army are now asked to accept liability for service overseas in time of war, subject to the consent of Parliament. As from October 1, 1932, the entire responsibility for manning the Coast Defences at home has been entrusted to the Territorial Army. The rank and file for both Regular Army and Territorial Army are obtained by voluntary enlistment. The Reserve Forces consist of the Army Reserve, the Supplementary Reserve of Officers and the Supplementary Reserve, the Militia and the Channel Islands and Colonial Militia, and the Territorial Reserve. The Army Reserve is composed of men who have completed their period of colour service with the Regular Army; its strength on January 1, 1935, was 111,364. The Supplementary Reserve of Officers and the Supplementary Reserve were created in August, 1924, with establishments of 2,489 and 20,639 respectively, for the purpose of supplying officers and technicians to the army on mobilisation. The strength of the Supplementary Reserve on January 1, 1935, was 18,609. The Militia, which is intended to serve as a supply source to the Regular Army after the Army Reserve is exhausted, is in process of reconstruction. The Channel Islands and Colonial Militia consist of the Channel Islands Militia, the Malta Militia,

the Bermuda Militia, and the Isle of Man Volunteers. The Territorial Reserve is in process of formation.

Service is for 12 years, with permission to extend to 21 years in certain circumstances. Of the original 12 years, from 3 to 9 are spent 'with the colours,' *i.e.*, on permanent service, and the remainder of the time in the Army Reserve; the majority of the men serve for 7 years with the colours and 5 years in the Army Reserve, which is the rule for infantry other than the Foot Guards. Men enlist between 18 and 25 years of age.

For purposes of training and command the fighting troops are for the most part organised in divisions, which consist of 3 infantry brigades, divisional artillery and engineers, together with the necessary auxiliary services. The cavalry is organised in brigades. The infantry brigades are composed of 4 battalions, the cavalry brigades of 3 regiments. Each infantry battalion has 1 machine gun company of 16 guns, and the battalion is provided with anti-tank guns. The organisation of the Territorial Army is analogous to that of the Regular Army, and it consists of 14 divisions, composed of infantry, artillery, engineers, and auxiliary services, and of the mounted brigades, chiefly composed of yeomanry. During 1934 further experiments were made in the process of mechanising the Army. The experimental mechanised brigades, composed of artillery, infantry and tanks carried out extensive tests.

For purposes of command Great Britain is divided up into six 'commands' and the London and Northern Ireland Districts. The commands are (1) Aldershot, of very limited area, (2) Eastern, including the eastern and southern counties, (3) Northern, including the northern midlands and north-eastern counties, (4) Scottish, (5) Southern, including the southern midlands and south-western counties, (6) Western, including Wales, Lancashire and north-western counties. These commands (except the Aldershot command) are divided up into Territorial Recruiting districts for the Regular Army. The Eastern, Northern, Scottish, Southern, and Western commands and the London District each include from 1 to 4 Territorial mounted brigades, and 2 or 3 Territorial divisions. There are normally two Regular divisions in the Aldershot, one Regular division in the Eastern, one in the Southern command and one in the Northern command. At the head of each command is a general officer (styled the General-Officer Commanding-in-Chief). He is assisted by a general-officer of lower rank who is responsible for questions of administration apart from training and defence questions.

The land forces are administered by an Army Council which is composed of the Secretary of State for War, who is its President; the heads of the departments into which the War Office is primarily divided, and the permanent Secretary of the War Office. The Territorial Army is to a large extent administered by County Associations over which the War Office merely maintains a general control as regards expenditure.

The principal military educational establishments are the Royal Military Academy, educating youths to be officers in the artillery and the engineers, the Royal Military College whence officers are obtained for cavalry and infantry, the Senior Officers' School, which trains officers for command, and the Staff College, which trains officers for the staff. The Officers' Training Corps in two divisions representing respectively the universities and public schools, is intended to provide officers for the Territorial Army, and for the Regular Army on expansion.

The estimated expenditure for the army for the year 1935–36 amounted (March, 1935) to 43,550,000*l.*

The total personnel charged to British votes for 1935–36 was 152,200, of

whom 149,626 were British troops, 2,574 were Colonial and Native Indian troops. There were in India 57,554 British troops, so that the total establishment of the Regular Army in 1935–36 was 149,626 + 2,574 + 57,554 = 209,754. The strength of the Territorial Force on January 1, 1935, was 7,030 officers and 123,458 other ranks.

The distribution of Regular troops, except in India, was as follows:

Home	111,598

II. Navy.

The British Navy is a permanent establishment, governed by the Board of Admiralty. The First Lord of the Admiralty is the Cabinet Minister responsible for the Navy.

The duties of the Admiralty are grouped under the two headings of Operations and Maintenance. The First Sea Lord and Chief of the Naval Staff and the Deputy Chief of the Naval Staff, have charge and direction of the Operations Division. This Division is concerned with Naval policy and the general direction of operations, war operations in Home waters and elsewhere, strategy, tactics, the development and use of material, including types of vessels and weapons, and with trade protection and anti-submarine considerations. The four members of the Board who are in charge of the Maintenance Division are the Second Sea Lord and Chief of the Personnel; the Third Sea Lord and Controller of the Navy; the Fourth Sea Lord and Chief of Supplies and Transport; and the Civil Lord. The Parliamentary Secretary and the Permanent Secretary are concerned with Finance and Admiralty business.

The Washington Treaty of 1922, which relates to the British Navy and the Navies of the United States, France, Italy, and Japan, so far as it concerns capital ships, defines for each Power what her replacement tonnage shall be, fixing the maximum displacement of such ships at 35,000 tons, and their heaviest armaments at the 16 in. gun.

By the London Treaty of 1930 it was agreed to defer replacement of capital ships until after 1936, except as regards the replacement tonnage which France and Italy were entitled to have laid down in 1927 and 1929. In the meantime, certain ships were discarded without replacement.

Cruisers, which the Washington Treaty had restricted to a standard displacement of 10,000 tons and guns not above 8 inches in calibre, are dealt with in Part III of the Treaty, to which only the British Empire, the United States and Japan subscribed. Definite limits are assigned to the

cruiser tonnage which may be maintained by these three countries during 1931–36 in two categories, (*a*) cruisers armed with guns of more than 6·1 inch calibre, and (*b*) those armed with guns of 6·1 inch calibre or less. Destroyer and submarine tonnage, which had remained unaffected by the Washington Treaty, is also restricted by the same section of the Treaty. In the period 1931–36, each of the three fleets concerned is allowed 52,700 tons of submarines.

Washington Treaty restrictions concerning aircraft carriers remain in force, but the construction of any such vessels of 10,000 tons or less displacement mounting a gun above 6·1 inch calibre is forbidden to all five of the signatory powers.

Under the 1932–33 Estimates there are completing 2 cruisers (*Apollo* of 7,000 tons, *Galatea* of 5,200 tons), 1 submarine (*Grampus*), and 1 destroyer depot ship (*Woolwich*).

Under the 1933–34 Estimates there are building 2 cruisers of 9,000 tons (*Southampton*, *Newcastle*), and 1 of 5,200 tons (*Penelope*), 1 flotilla leader, 8 destroyers, 3 submarines, 5 sloops, and some smaller craft.

Under the 1934–35 Estimates there are in hand 3 cruisers of 9,000 tons (*Glasgow*, *Birmingham*, *Sheffield*) and 1 of 5,200 tons (*Aurora*), 1 aircraft-carrier (*Ark Royal*), 1 flotilla leader, 8 destroyers, 3 submarines, 6 sloops, 1 net-layer, 1 surveying vessel, and 5 smaller craft. Under the 1935–36 Estimates there are to be built 3 cruisers of 9,000 tons, 1 flotilla leader, 8 destroyers, 3 submarines, 6 sloops, 1 submarine depot ship, 1 surveying vessel and 5 smaller craft.

The Navy Estimates amounted to 53,570,000*l.* net for 1933–34; to 56,550,000*l.* net for 1934–35; and for 1935–36 to 60,050,000*l.*

The number of officers, seamen and marines borne on January 1, 1914, was 144,871. The estimates for 1935–36 provide for a total personnel of 94,482 (excluding Royal Marine Police).

Summary of the British Fleet.

With the disappearance from the lists of all capital ships armed with guns of less than 15 inch calibre, the general tendency is to classify them as pre-Jutland and post-Jutland types. Of the last-named the only representatives at present are the *Nelson* and *Rodney*, though the *Hood* embodies in her design certain modifications based on war experience.

The following summary of the more important units will illustrate the present position.

Class.	Completed by end of		
	1932	1933	1934
Battleships and Battle Cruisers	15	15	15
Cruisers	52	50	50
Aircraft Carriers	7	7	7
Flotilla leaders and Destroyers	158	152	161
Submarines	55	52	51

Ships and vessels of the Dominions are included in the above table and in the following paragraph. See notes following the ship lists.

Of the 37 monitors which existed in 1919, three still survive. There are 10 seagoing depôt and repair ships, 34 sloops, 24 minesweepers (mostly laid up in reserve), 11 surveying vessels, and a large number of smaller craft, such as gunboats, patrol boats, drifters and trawlers.

In the following tables the ships are grouped in classes according to type. The dates of the Naval Estimates under which they were sanctioned are given in certain cases, but, with reference to the capital ships affected by the Washington and London Treaties, the years are substituted in which they are due for replacement if desired.

The destroyers of the British Fleet are of the following classes: flotilla leaders, 1310–1540 tons, 34–36·5 knots, 20 (including 2 Australian); R class, 900 tons, 9; S class, 905 tons, 30 (including 5 Australian and 2 Canadian); V class, 1090–1140 tons, 63 (including 4 Australian); A class (1170–1350 tons), 12 (including 2 Canadian); B class (1360 tons), 8; C, D, E and F classes (1,375 tons), 28.

The submarines are of eight successive classes. H class (410 tons surface displacement) 9; L class (760–845 tons), 11; X class (2425 tons) 1; O class (1311–1475 tons), 9; *Parthian* and *Rainbow* class (1475 tons), 9; *Swordfish* class (640–670 tons), 8; *Thames* class (1805–1850 tons), 3; *Porpoise* class (minelaying, 1500–1520 tons), 1.

Dominion Navies.—When Admiral of the Fleet Earl Jellicoe made a tour of the Dominions with the object of arriving at an understanding with the Governments on the naval defence of the Empire, his report to the Government of Australia emphasized the desirability of the Commonwealth becoming self-contained in regard to shipbuilding and the manufacture of guns, mountings, explosives, and aircraft, but no action of much importance has been taken on the proposals. The Imperial Cabinet (July, 1921) left on record its view that co-operation among the constituent parts of the Empire was necessary, but that the details must be left to the Dominion Parliaments. So far the only one of Lord Jellicoe's main recommendations to be carried into effect has been the transformation of the Royal Indian Marine into the Royal Indian Navy. Its effective strength at present is limited to 5 sloops, a patrol vessel, a surveying vessel and a trawler for target towing.

The Royal Australian Navy, in addition to the 3 cruisers and 1 aircraft tender named in the list above, has 1 flotilla leader, 9 destroyers, and a few other vessels. A cruiser of 7,000 tons (*Sydney*) and a sloop are approaching completion.

New Zealand, in addition to the *Diomede* and *Dunedin*, has the obsolete light cruiser *Philomel* as a training ship, and a mine-sweeping trawler for instructional purposes.

The Royal Canadian Navy has 3 mine-sweeping trawlers, 2 destroyers of the A class (*Skeena* and *Saguenay*), which were delivered from England in 1930–31, and 2 older destroyers of the 'S' type (*Champlain* and *Vancouver*).

Newfoundland has a transport built in 1925, the *Caribou*, which is employed under the Railways Department.

III. Air Force.

In May, 1912, the Royal Flying Corps first came into existence. On January 2, 1918, an Air Ministry was formed, and the control of the Royal Air Force was vested in an Air Council analogous to the Army Council. The Air Minister was given the status of a Secretary of State and became President of the Council. In April, 1918, the naval and military wings were amalgamated, under the Ministry of the Air, as the Royal Air Force.

The Force consists of the Royal Air Force, the Air Force Reserve, the Air Force Special Reserve, the Auxiliary Air Force, the Auxiliary Air Force Reserve, and the Territorial Air Force. The establishment of the Royal Air Force for the year 1935–36 is 33,000 exclusive of those serving in India, who are paid for by the Government of India. During 1922 the Air Ministry took over control of Iraq and Palestine, and in January, 1928, of Aden.

The Air Force is organised into commands as follows:—

I. United Kingdom: (*a*) Inland Area, (*b*) Coastal Area, (*c*) Irish Wing, (*d*) Cranwell, (*e*) Halton.

II. Overseas: (*a*) Middle East Area, (*b*) Iraq, (*c*) India, (*d*) Mediterranean, (*e*) Palestine.

Areas are subdivided into groups and wings, a certain number of squadrons being allotted to each group or wing. Squadrons are subdivided into flights. In 1934, the Home Defence Air Force comprised 43 squadrons. Eleven squadrons are to be added in 1935 making a total of 54 squadrons, 41 of which are regular and 13 Auxiliary or Special Reserve squadrons. The total strength of the Royal Air Force will then be 106½ squadrons. Provision has been made for the construction of a number of new aerodromes, chiefly in the Eastern Counties.

University Air Squadrons exist at Oxford and Cambridge and in 1935 a University Squadron will be formed in the University of London. In November, 1924, an Air Officer, commanding-in-chief Air Defences of Great Britain, was appointed to organise and command the Air Forces allotted for Home Defence. These are now divided into 3 sub-commands: the Fighting Area, with headquarters at Uxbridge; the Wessex Bombing Area, with headquarters at Andover, and the Special Reserve and Auxiliary Air Force.

The chief educational establishments of the Air Force are the Cadet College at Cranwell and the Staff College at Andover. The chief training depôt is at Halton. There are also 3 flying training schools, 1 central flying school, and schools of gunnery, ballooning, army co-operation, photography and wireless.

The net Air Estimates for 1935–36 amounted to 20,650,000*l.*

For 1935–36 the net sum allotted to Civil Aviation was 595,000*l.* The air routes maintained were London-Manchester, London-Amsterdam, London-Brussels-Cologne, London-Paris and Cairo-Karachi. In January, 1932, a London-Cape Town service was opened. In February, 1933, a Royal Air Force machine established a long distance record of 5,340 miles on this route between Cranwell and Walvis Bay. In December 1934 a regular service to Australia was established. Owing to the disaster to the airship R 101, which was destroyed with all on board on its first flight to India, experiments on airships are in abeyance.

[1] Figures for Scotland relate only to beans harvested as corn.

The production of dressed meat in Great Britain in 1930–31 was estimated at 1,022,000 tons; of milk, 1,425 million gallons. The value of produce sold off

the farms in 1930–31 (excluding produce consumed in farmers' households) was estimated at 240,400,000*l.*, namely: farm crops, 39,550,000*l.*; live stock, 85,250,000*l.*; dairy produce, 62,450,000*l.*; wool, 1,800,000*l.*; poultry and eggs, 23,450,000*l.*; miscellaneous crops, 27,900,000*l.*

For the quantities of cereals and live stock imported, see under *Commerce*.

In *England and Wales*, the Ministry of Agriculture make grants for, and, to some extent, supervise vocational education and scientific research in agriculture. The Board of Agriculture for *Scotland* dispenses certain grants for the development and improvement of agriculture, including agricultural education and research, in that country. Grants are also made, in respect of agricultural education and research, from the Development Fund set up by the Development and Road Improvement Acts, 1909. In 1932–33, the grant voted to the Development Fund was 375,000*l.*

The metals obtainable from the ores produced in 1933 were:—Copper, 40 tons, value 1,422*l.*; iron, 2,238,516 tons, 7,393,886*l.*; lead, 37,749 tons, 440,562*l.*; silver, 37,553 oz., 2,841*l.*; tin, 1,543 tons, 300,261*l.*; zinc, 3 tons, 47*l.*; total value, 8,139,375*l.*

The total number of persons (including clerks and salaried persons) ordinarily employed at all mines in Great Britain under the Coal and Metalliferous Mines Regulation Acts at December 16, 1933 was 813,389. The number of mines at work was 2,376; 630,751 persons (males) worked underground, and 172,824 males and 3,726 females (including clerks and salaried persons) above ground. The average number employed at quarries under the Quarries Act in 1933 was 65,700, of whom 41,812 worked inside the quarries, and 23,888 outside. The number of quarries at work was 5,110.

Professor H. S. Jevons estimated the resources of British coal in 1915, within 4,000 feet of the surface, at 197,000 million tons.

[2] The average number of furnaces in blast for the year 1930 was 123.
[3] Average number. The number existing in January 1933 was 344.

The total output of steel ingots and castings in 1934 was 8,859,600 tons (7,023,600 tons in 1933).

The total output of finished steel products in 1933 was 5,214,000 tons (4,424,000 tons in 1932). Total Iron and Steel and manufactures thereof exported in 1934 was 2,253,467 tons, valued at 35,129,824*l.*; in 1933, 1,921,794 tons, valued at 29,879,132*l.*

Statistics of the Shale Oil industry are as follows: Output of shale in 1933 was 1,397,000 tons, valued at 401,000*l.* About 30,000,000 gallons of crude oil and crude naphtha, and 24,950 tons of sulphate of ammonia were produced.

In 1933 oil refineries in Great Britain treated 546,683,000 gallons of crude oils and produced 425,766,000 gallons of refined oils and spirits and 402,297 tons of solid products (asphalt and pitch; wax; and petroleum coke).

The following table summarises the provisional statistics relating to the Census of Production, 1930, for the principal industries:—

[1] Not including state.
[2] Including sheet metal and hollow-ware.
[3] Excluding saddlery, and fancy leather goods.
[4] Including printing and publication of newspapers, engraving and kindred trades
[5] Gas electricity and waterworks.

For all industries the total consumption of coal and coke was as follows: 1930, coal, 97,312,000 tons (111,660,000 tons, 1924 census); coke, 15,886,000 tons (17,776,000 tons, 1924 census).

The total consumption of electricity was 11,158·3 million units.

IV. Water Power.

The available water-power resources of Great Britain are estimated to be 900,000 B.H.P., of which 200,000 B.H.P. are developed (1922).

Commerce.

Value of the imports and exports of merchandise (excluding bullion and specie and foreign merchandise transhipped under bond) of the United Kingdom for five years:—

[1] Provisional figures.

The value of goods imported is generally taken to be that at the port and time of entry, including all incidental expenses (cost, insurance, and freight) up to the landing on the quay. For goods consigned for sale, the market value in this country is required and recorded in the returns. This is ascertained from the declaration made by the importers, and is checked by the expert knowledge available in the Customs Department, with the help of current price-lists and market reports. For exports, the value at the port of shipment (including the charges of delivering the goods on board) is taken. Imports are entered as from the country whence the goods were consigned to the United Kingdom, which may, or may not, be the country whence the goods were last shipped. Exports are credited to the country of ultimate destination as declared by the exporters.

Internal Communications.

I. Railways, Tramways, Aviation and Highways.

Under the Railways Act, 1921, the railways of Great Britain are grouped, as from January 1, 1923, into four systems, namely: London, Midland and Scottish (7,464 miles); London and North-Eastern (6,464 miles); Great Western (3,765 miles); Southern (2,129 miles); total, 19,822 miles of route.

The following table gives the latest railway statistics available for Great Britain:—

Year	Length of road open at end of year	Authorised Capital	Number of Passengers originating (excluding season-ticket holders)[1]	Weight of goods and mineral traffic originating	Railway & Ancillary Businesses	
					Gross receipts.[2]	Expenditure[3]

1933 . . .	20,251	1,219·3	798·9	251·0	169·6	142·6

[1] Excluding London Railways the equivalent number of annual tickets representing season ticket holders in 1932 was 606,410, and in 1933 was 599,712.

[2] The gross receipts from *railway working only* in 1933, 149,642,627*l.* gross, 26,519,867*l.* net.

[3] The expenditure on railway working was in 1933, 123,122,760*l.*

The net receipts on Railway and Ancillary businesses in 1933 were 26,933,320*l.* (24,341,499*l.* in 1932).

Tramways.—In 1933 there were in Great Britain 1,533 miles of tramways and light railways open for public traffic, excluding the Local Authority and Company Undertakings transferred to the London Passenger Transport Board on July 1, 1933. The paid-up capital amounted to 81,793,000*l.* Tramway receipts amounted, in 1933, to 15,903,000*l.*, and expenditure to 12,681,000*l.* The total number of passengers carried in 1933 was 2,835,359,000.

Civil Aviation.[1]—In 1933 the number of aircraft miles flown was 2,638,000; actual number of passengers carried, 79,080; weight of cargo (including Company's stores), 913 tons. British aircraft, in 1933, made 4,644 flights between the United Kingdom and abroad, carrying 53,483 passengers over each stage (about 200 miles).

[1] See page 48.

Highways.—The public highways in Great Britain in December, 1933, had a total length of 177,347 miles. (England and Wales, 151,854 miles; Scotland, 25,493 miles.)

II.—Canals and Navigations

The total length of canals in the United Kingdom in 1905 was 4,673 miles, of which 3,641 miles were in England and Wales, 184 in Scotland, and 848 in Ireland.

The total tonnages originating on the principal canals[1] in Great Britain in 1933 were: Railway-owned canals, 1,250,650 tons; other than railway-owned, 10,183,854 tons, including Birmingham, 2,515,023 tons, Grand Junction, 1,188,303 tons, Leeds and Liverpool, 1,430,393 tons, and Bridgewater, 1,007,625 tons, Aire and Calder, 2,064,791 tons. Tonnage carried on the River Thames (above Teddington) was 405,615.

There is a scheme for modernisation of the Grand Union Canal. Work is in progress on the branch from Napton (Warwick) to Birmingham, a distance of 24 miles. The canal is to be made suitable for motor-driven barges of large size.

Manchester, one of the leading ports in the United Kingdom, was opened to maritime traffic in 1894 by the construction of the Manchester Ship Canal, which is 35½ miles in length. Between Eastham and Stanlow Oil Docks the waterway has been excavated to a depth of 30 ft.; from Stanlow Oil Docks to Manchester to 28ft. The bottom width of the canal at the excavated depth is 120 ft. except for ¾ mile near Latchford, where it is 90 ft. The maximum width of the locks is 65 ft., with the exception of the entrance lock, which is 80 feet wide. The canal is in direct communication with all the principal railway systems and barge canals of the Kingdom. The total issued capital of the Company at December 31, 1934, was 20,091,980*l.* The gross revenue of the canal in 1934, including the Bridgewater department and the railways, amounted to 1,788,304*l.*, and the net revenue, including miscellaneous receipts, to 709,803*l.* (631,481*l.* in 1933). The traffic receipts in 1934 amounted to 1,317,083*l.* The merchandise traffic paying toll in 1934 amounted to 5,949,970 tons.

III.—Post, Telegraphs and Telephones.

(Great Britain and Northern Ireland.)

Number of Post Offices at March 31, 1934, 23,432, besides about 60,000 road and pillar letter boxes; staff employed January, 1935, 232,654 persons (179,724 males, 52,930 females).

The telegraphs were transferred to the State on February 5, 1870. On March 31, 1934, the single-wire mileage of Post Office wires used for telegraph purposes excluding spare wires was 251,749 miles. The total single-wire mileage of Post Office wires, *i.e.*, telegraph, telephone, and spare wires, was 11,346,492. Of this total, 1,218,010 miles were aerial, 10,105,932 underground, and 22,550 submarine.

The total number of telegraph offices open on March 31, 1934 (including Railway and Cable Companies' Offices, etc., which transact public telegraph business), was 13,168. On March 31, 1934, there were 23 Post Office wireless stations in operation, and several "stand-by" stations for emergency purposes.

All telephone exchanges deal with trunk telephone business, but on March 31, 1934, there were 23 exchanges which dealt only with trunk work. On that date there were 18,929 Inland trunk and 135 International circuits (including 4 transatlantic, 1 Australian and New Zealand, 2 South American, 1 South African, 1 Canadian, 1 Egyptian and 1 Indian channels); the mileage of Post Office wires used therein was 1,539,942. The London local exchange system had 237 exchanges, 9,414 call offices (including 3,891 kiosks), 3,745,295 miles of working wire and 831,800 telephones. The Provincial local exchange system had 5,145 exchanges, 31,771 call offices (including 13,252 kiosks), 4,693,375 miles of working wire and 1,393,206 telephones. The approximate number of originated effective calls in 1933–34 was 1,580 millions (710 millions in London). For private wires, the rentals in 1933–34 amounted to 715,000*l.*

The income and expenditure of the Post Office as shown in the Commercial Accounts was as follows :—

The amount due to depositors on Jan. 1, 1935, was approx. 354,800,000*l.* The receipts and payments include purchases and sales of Govt. stock for depositors, but the amount shown as due to depositors is exclusive of such stock held by depositors. The latter amounted to 194,531,512*l.* at the end of 1932 and 186,795,884*l.* at the end of 1933.

Money, Weights, and Measures.

The sovereign weighs 123·274 grains, or 7·98805 grammes, ·91666 (or eleven-twelfths) fine, and consequently it contains 113·001 grains or 7·3224 grammes of fine gold. The shilling weighs 87·27 grains or 5·6552 grammes, and down to 1920 was ·925 (or thirty-seven-fortieths) fine, thus containing 80·727 grains or 5·231 grammes of fine silver, but under the Coinage Act, 1920, the fineness was reduced to ·500 (one half). Bronze coins consist of a mixture of copper, tin, and zinc. The penny weighs 145·83 grains, or 9·45 grammes. The standard of value is gold. Silver is legal tender up to 40 shillings; bronze up to 12*d.*, but farthings only up to 6*d.* Bank of England notes are legal tender in England and Wales, except at the Bank itself (3 and 4 Will. 4, cap. 98). Under the Currency and Bank Notes Act, 1928, the Bank was empowered to issue 1*l.* and 10*s.* notes, which became legal tender for all payments. Under the Gold Standard Act, 1925, the issue of gold coin is suspended and the Gold Standard (Amendment) Act, 1931, suspended the right of purchase of gold bullion. The note circulation at March 8, 1935, was: 452,520,583*l.*, of which 72,454,463*l.* was held by the Bank of England and 380,066,120*l.* was in the hands of the public.

Standard units are: of length the standard *yard*, of weight the standard *pound* of 7,000 grains (the pound troy having 5,760 grains), of capacity the standard *gallon* containing 10 pounds avoirdupois of distilled water at 62° F., the barometer at 30 inches. On these units all other legal weights and measures are based.

NORTHERN IRELAND.

Constitution.

UNDER the Government of Ireland Act, 1920, as amended by the Irish Free State (Consequential Provisions) Act, 1922 (13 Geo. V. Ch. 2, Session 2), a separate parliament and executive government were established for Northern Ireland, which comprises the parliamentary counties of Antrim, Armagh, Down, Fermanagh, Londonderry, and Tyrone, and the parliamentary boroughs of Belfast and Londonderry. The Parliament consists of a Senate of 2 *ex-officio* and 24 elected persons and a House of Commons of 52 elected members. An allowance for expenses is made in the case of those members of both Houses who are not in receipt of salaries as members of the Government or as officers of Parliament, amounting to (*a*) 1*l.* 16*s.* a day to members of the Senate for attendance at meetings of the Senate or committees, but the total allowance to each may not exceed 72*l.* in any one year, unless under a declaration of insufficiency of means when an additional 100*l.* per annum is paid irrespective of attendance, and to (*b*) 170*l.* a year to members of the House of Commons. The Parliament has power to legislate for its own area except in regard to (1) matters of Imperial concern (the Crown, making of peace or war, military, naval, and air forces, treaties, titles of honour, treason, naturalisation, domicile, external trade, submarine cables, wireless telegraphy, aerial navigation, lighthouses, etc., coinage, etc., trade marks, etc.), and (2) certain matters 'reserved' to the Imperial Parliament (postal service, Post Office and Trustee savings banks, designs for stamps, registration of deeds, land purchase). The executive power is vested in the Governor on behalf of His Majesty the King: he holds office for six years and is advised by ministers responsible to Parliament. Senators hold office for a fixed term of years: the House of Commons is to continue for five years, unless sooner dissolved. The qualifications for membership of the Parliament are similar to those for membership of the Imperial House of Commons. By the Representation of the People Act (Northern Ireland), 1928, the franchise was conferred upon women upon the same terms as it had hitherto been enjoyed by men; and by the House of Commons (Method of Voting and Redistribution of Seats) Act (Northern Ireland), 1929, the system of Proportional Representation (under which the Parliaments which met in 1921 and in 1925 had been elected) was abolished, and Parliamentary Representation, except for the constituency of Queen's University of Belfast, was based upon single-member constituencies.

Northern Ireland continues to return 13 members to the Imperial House of Commons.

Two Acts of the Imperial Parliament, passed in 1928 and 1932 modified, in minor details, restrictions placed on the powers of the Northern Irish Parliament by the Act of 1920. The legislative and administrative powers relating to Railways, Fisheries, and the Contagious Diseases of Animals (originally intended for a Council of Ireland), were, under the Ireland (Confirmation of Agreement) Act, 1925, transferred to, and became, as from April 1, 1926, powers of the Parliament and Government of Northern Ireland.

The Northern Irish Parliament met for the first time in June, 1921. At the election on November 30, 1933, there were returned 37 Unionists, 9 Nationalists, 2 Independent Unionists, 2 Labour, 1 Fianna Fail, and 1 I.R.A. Republican.

Governor.—The Duke of Abercorn, appointed for a term of 6 years from December 8, 1922; the appointment has twice been extended for a similar period. Salary, 7,200*l.* per year, payable from Imperial Revenues (1,800*l.* being recoverable from Northern Ireland Revenues).

The Ministry is composed as follows:—
Prime Minister.—Rt. Hon. Viscount *Craigavon* (salary, 2,720*l.*).
Finance.—Rt. Hon. H. M. *Pollock* (salary, 1,700*l.*).
Home Affairs.—Rt. Hon. Sir R. Dawson *Bates* (salary, 1,700*l.*).
Labour.—Rt. Hon. J. M. *Andrews* (salary, 1,700*l.*).
Education.—Rt. Hon. Viscount *Charlemont* (salary, 1,700*l.*).
Agriculture.—Rt. Hon. Sir B. *Brooke* (salary 1,700*l.*).
Commerce.—Rt. Hon. J. *Milne Barbour* (unpaid).

The usual channel of communication between the Government of Northern Ireland and the Imperial Government is the Home Office.

Local Government.

In the two chief cities, the County Boroughs of Belfast and Londonderry, local administration is vested in Corporations, who are responsible for roads, public health, rating, housing, lighting, etc.

In each of the six counties there is a County Council responsible for the construction and maintenance of roads and other public works, collection of rates, supervision of the arrangements for dealing with tuberculosis and special diseases; also of public mental hospitals, county infirmaries and county fever hospitals.

The counties are divided into thirty-two rural districts, in each of which is a Rural District Council, which is the sanitary authority for the district, and is also responsible for such matters as provision of labourers' cottages, burial grounds, etc. There are also under Municipal Government two Boroughs and thirty Urban Districts, as well as four towns which are not Urban Districts.

The administration of poor relief and dispensary medical relief is vested in Boards of Guardians, who are the Rural District Councillors, with representatives from the Urban Districts. In some cases the area administered by a Board of Guardians extends into two counties.

Area and Population.

A census of Northern Ireland was taken on April 18, 1926. The area and population of the country at that date were as follows:—

Counties and County Boroughs	Area in statute acres (exclusive of water)	Males	Females	Total
Antrim	702,851	92,596	99,047	191,643
Armagh	312,767	53,609	56,461	110,070

Northern Ireland	3,351,444	608,088	648,473	1,256,561

The provisional estimated population of Northern Ireland at June 30, 1934, was 1,280,000.

Vital statistics for 4 years :—

Year	Marriages	Births	Deaths	Year	Marriages	Births	Deaths
1930	7,426	25,410	19,822	1932	6,959	25,107	17,812
1931	7,369	25,673	18,049	1933	7,630	24,601	18,154

Religion.

The religious professions in Northern Ireland, as recorded at the census of 1926, were: Roman Catholics, 420,428: Presbyterians, 393,374; Protestant Episcopalians, 338,724; Methodists, 49,554; Other professions, 54,481; Total, 1,256,561.

Education.

The following are the latest available statistics :—

University: The Queen's University of Belfast (founded in 1849 as a College of the Queen's University of Ireland, and reconstituted a separate University in 1909), 136 Professors, Lecturers and Demonstrators, and 1,495 students in the session 1933–34.

Secondary Education: 73 schools with 12,710 pupils. *Technical Instruction:* 57 technical schools and 67 other centres with 23,278 students.

Elementary Education: 1,814 public elementary schools with 208,321 pupils on rolls.

Justice.

Under the Government of Ireland Act, 1920, a Supreme Court of Judicature of Northern Ireland has been established, consisting of the Court of Appeal in Northern Ireland and the High Court of Justice in Northern Ireland. An appeal lies direct, in certain conditions, from the former to the House of Lords. A Court of Criminal Appeal was established in 1930.

A system of County or Civil Bill Courts deals with civil disputes generally where the sum at issue does not exceed 50*l.*, but possesses wider jurisdiction in certain cases. Courts of summary jurisdiction generally attended by permanent judicial officers—known as resident magistrates—determine summarily minor criminal and quasi-criminal cases and certain minor civil disputes. Some cases are tried by resident magistrates sitting alone.

The Police Force consists of (*a*) the Royal Ulster Constabulary, with a statutory maximum strength of 3,000; and (*b*) the Special Constabulary, a part-time force.

Finance.

The bulk of the taxation of Northern Ireland is imposed and collected by the Imperial authorities, who make certain deductions and remit the balance to the Northern Irish Exchequer. The exact share of the latter in the proceeds of such taxation is determined by the Joint Exchequer Board, a special body consisting of one representative of the Imperial Treasury, one of the Northern Irish Treasury, and a chairman appointed by the King. The deductions made by the Imperial Treasury represent a contribution towards Imperial liabilities and expenditure, and the net cost to the Imperial Exchequer of Northern Irish services 'reserved' to the Imperial Parliament.

The Northern Irish Parliament has independent powers of taxation,

except as regards customs duties, excise duties on articles manufactured and produced, excess profits duty, corporation profits tax, any tax on profits or a general tax on capital, or any tax substantially the same in character as any of these duties or taxes. It has no power to impose, charge or collect income tax, including super tax, but it can grant relief from these taxes to individuals resident and domiciled in Northern Ireland. The Government of Northern Ireland also raises money from time to time by means of Ulster Stock, Ulster Savings Certificates and Treasury Bills, for temporary requirements of the Exchequer. In March, 1933, Ulster 3½% Stock, 1948, amounting to 2,000,000*l.* was issued, replacing an equivalent amount of Treasury Bills. In October, 1925, a Government Loans Fund was established from which loans are made to local authorities and others for public utility services. This has been financed by issues amounting to 4,000,000*l.* Ulster Loans 4½% Stock, 1945–1975, and 2,000,000*l.* Ulster Loans 5% Stock, 1950–60.

The revenue and expenditure of the Northern Irish Exchequer for the last four years were as follows:—

	1932-33	1933-34	1934-35 (estimated)	1935-36 (estimated)
	£	£	£	£
Revenue[1]	9,753,000	9,795,000	9,489,000	9,468,509
Expenditure . . .	9,746,000	9,776,000	9,486,000	9,468,509

[1] Net, after issues to Reserve Fund and deduction of estimated cost of 'Reserved' Services and contribution to Imperial Services. An adjustment is made when the true Residuary Share has been finally ascertained.

Production.

Agriculture.—The acreage under crops in Northern Ireland in 1932 and 1933 was as follows:—

Crops.	1932	1933	Crops.	1932	1933
	Acres	Acres		Acres	Acres
Wheat	3,260	6,158	Potatoes	141,789	139,021

			Fruit	8,666	8,718
			Hay.	453,146	447,881
			Total under Crops	943,241	943,019

The yield in 1933 was (in tons): oats, 263,021; potatoes, 948,641; turnips, 596,871; flax, 2,173; hay, 841,577.

The livestock as at June, 1934, was: cattle, 698,290; sheep, 474,266; pigs, 295,402; goats, 48,429; horses used in agriculture, 84,705; mules and jennets, 196; asses, 7,478; poultry, 10,290,000.

There were 97,489 agricultural holdings exceeding one acre in area in 1933 in the hands of 96,428 separate occupiers.

Mining.—The mineral output in 1931 and 1932 for Northern Ireland was:—

	1931	1932		1931	1932
	Tons	Tons		Tons	Tons
Bauxite, Iron Ore and Lignite	3,340	1,473	Gypsum	—	40

Gravel and Sand	67,140	38,442	Sandstone	208,277	177,824
			Diatomite	3,401	3,731

The number of persons employed, inclusive of those employed at coal mines, was: 1932, 1,913.

Manufactures.—The two principal industries are linen and shipbuilding, both centred in Belfast. The former provides employment for approximately 70,000 persons (excluding those engaged in growing the fibre), 874,000 spindles, and 28,000 looms. The value of linens exported from the United Kingdom during 1933 was 5,727,535*l.*, practically the whole of which came from Northern Ireland. The Belfast shipyards employ approximately 11,000 persons, and possess an output capacity exceeding 250,000 tons a year. Other important manufactures are ropes and twines, tobacco, soaps, aerated waters, biscuits, spirits, hosiery and underwear.

National Insurance.

Sickness and Unemployment Insurance and Pensions.—Unemployment Insurance, Health Insurance, and schemes of Old Age and Widows' and Orphans' Pensions operate in Northern Ireland in the same way as Great Britain. The contributions, benefits and pensions are identical with those of Great Britain, and contributions paid in one area are valid in the other.

A general outline of the insurance and pensions provisions is set out in the paragraph dealing with 'National Insurance' in Great Britain. The number of persons in Northern Ireland insured under the various schemes is approximately: Health Insurance and Contributory Pensions, 364,000; Unemployment Insurance, 263,000.

Agreements, confirmed by Acts of both Parliaments, came into force in 1926 and 1929 for maintaining the Unemployment Funds of Great Britain and Northern Ireland in a state of parity on the basis of the respective insured populations. The Northern Ireland Government annually brings the Northern Irish Fund into parity with the British Fund by an 'equalisation payment,' and recovers from the United Kingdom Exchequer three quarters of the amount, if any, required to equalise, per head of total population in the respective areas, the whole Exchequer charges for unemployment insurance.

Non-contributory Pensions.—Old Age Pensions (non-contributory) and Blind Persons' Pensions are granted to individuals who are not eligible for Contributory Pensions provided they have reached the age of 70 (50 in case of blind persons), and comply with certain conditions as regards British nationality and residence in the U.K.

The number of persons in Northern Ireland in receipt of non-contributory Pensions is approximately 36,000.

Communications.

The total first track railway mileage of Northern Ireland amounts to 754 miles. The area is also well served by inland waterways, and possesses 180 miles of canals. Total length of roads is 12,996 miles; road budget for year ending March 31, 1934, was 1,500,000*l.*

ISLE OF MAN.[1]

The Isle of Man is administered in accordance with its own laws by the Court of Tynwald, consisting of the Governor, appointed by the Crown; the Legislative Council, composed of the Lord Bishop of Sodor and Man, two Deemsters, the Attorney-General, two members appointed by the Governor, and four members elected by the House of Keys, total 11 members, including the Governor; and the House of Keys, a representative assembly of 24 members chosen on adult suffrage with six-months residence for 5 years by the 6 'sheadings' or local sub-divisions, and the 4 municipalities. Women have the franchise as well as men. Number of voters 1930–31, 38,679. The island is not bound by Acts of the Imperial Parliament unless specially mentioned in them.

Lieut.-Governor.—Sir Montagu *Butler*, K.C.S.I., C.B., C.I.E., C.V.O., C.B.E. (Appointed 1933.)

The population (census, 1931) numbered 49,308 (22,459 males, 26,849 females).

The principal towns are Douglas (population, census 1931, 19,329), Ramsey (4,198), Peel (2,476), Castletown (1,713). Births (1932), 631; deaths, 754. In 1934 there were 33 elementary schools (40 departments), 30 being provided schools. The enrolled pupils numbered 5,773, and the average attendance 5,210. The gross expenditure of the Education Authority on elementary education for the year 1933–34 amounted to 69,202*l.* There are 5 secondary schools (1,159 registered pupils), and 5 evening institutes (516 registered pupils). The gross expenditure on higher education for 1933–34 was 26,477*l.* In 1932 the police force numbered 65; in the year 1928 there were 816 persons convicted.

Revenue is derived mostly from Customs. In 1933–34 the revenue amounted to 493,394*l.*; and expenditure to 437,368*l.*

The principal agricultural produce of the island consists of oats, barley, turnips and potatoes, and grasses. The total area of the island, excluding water, is 145,325 acres; the total area of arable land in 1934 was 78,436 acres and of rough grazings, 39,493 acres. The total acreage under corn crops in 1934 was 16,484 acres, including 15,645 under oats, 305 under wheat, and 363 under barley or bere. There were also 5,522 acres under turnips and swedes, 1,942 under potatoes, and 31,295 under clover, sainfoin and grasses under rotation. The number of agricultural holdings in 1934 was 1,294. The live stock in 1934 consisted of 3,505 horses; 21,321 cattle; 93,725 sheep; and 3,875 pigs. Total value of minerals raised in 1923, 47,496*l.* Persons employed in mining numbered 414.

The registered shipping (1933) comprised 3 sailing vessels and 34 steamers and 20 motor vessels; total tonnage, 30,631 gross tons, 12,727 net tons; also 104 fishing boats. The tonnage of vessels arrived at ports of the island in

[1] Area and population, *see* p. 11.

1931 was 1,053,412 tons (960,847 tons coastwise), and departed 1,055,020 net tons (981,856 tons coastwise). The railways have a length of 46½ miles, and there are 25 miles of electric railway.

CHANNEL ISLANDS.[1]

The Channel Islands are situated off the north-west coast of France, and are the only portions of the 'Dukedom of Normandy' now belonging to the Crown of England, to which they have been attached since the Conquest. The islands are administered according to their own laws and customs. Jersey has a separate legal existence; it is administered by a Lieutenant-Governor appointed by the Crown, and a Bailiff also appointed by the Crown. The Lieutenant-Governor has a veto on certain forms of legislation. He and the Crown officers may address the States but not vote. The Bailiff is the Chief Magistrate and President of the States Assembly. The Royal Court consists of a tribunal of first instance and an appeal court. The States for deliberation and legislation consist of 12 Jurats, 12 rectors, 12 constables (who are the mayors of the parishes), 17 deputies, and 2 Crown officers. Guernsey, Alderney, and Sark are under one Lieutenant-Governor, but Guernsey and Alderney have a government of their own, and Sark is a dependency of Guernsey and under its jurisdiction. On May 10, 1905, a law was passed for the Island of Guernsey requiring the approval of the Lieut.-Governor and of the Royal Court of the Island previously to the acquisition, or leasing, or occupation of immovable property by aliens or alien companies, registration and liability to local rates, &c., being also provided for. The Channel Islands are not bound by Acts of the Imperial Parliament unless specially named in them.

Births: 1933:—Jersey, 850; Guernsey, 712; deaths:—Jersey, 790; Guernsey, 578.

Lieutenant-Governor of Jersey.—Major-General H. de C. *Martelli*, C.B., D.S.O. Appointed May 28, 1934.

Lieutenant-Governor of Guernsey, &c.—Major-General E. N. *Broadbent*, C.B., C.M.G., D.S.O. Appointed January, 1934.

Finance.—Jersey (financial year ended January 31, 1933): revenue, 458,531*l.*; expenditure, 406,707*l.*; public debt, 932,500*l.*; 1932: revenue, 399,081*l.*; expenditure, 368,270*l.* Guernsey, &c. (1933): revenue, 385,789*l.*; expenditure, 311,463*l.*; public debt (1933), 1,403,711*l.*

The total area of agricultural holdings and outside land, etc., in Guernsey (1930) was 10,795 acres.

Jersey 1933, exports, 172,124 tons; imports, 166,166 tons; 1932, exports, 130,911 tons; imports, 156,777 tons.

The imports from Guernsey into the United Kingdom in 1933 were:—granite, 82,505 tons; tomatoes, 27,359 tons; potatoes, 676 tons; fruit, 982 tons; flowers, 4,977 tons.

Guernsey registered shipping (1933), 32 vessels, 3,532 tons (net).

INDIA, THE DOMINIONS, COLONIES, PROTECTORATES, AND DEPENDENCIES OF THE BRITISH EMPIRE.

In the following pages the various sections of the British Empire outside Gt. Britain and Northern Ireland are arranged in alphabetical order under the divisions of the world to which they belong:—1. Europe; 2. Asia; 3. Africa; 4. America; 5. Australasia and Oceania.

The term 'Dominion' is used officially as a convenient abbreviation of the complete designation 'self-governing Dominion.' The Dominions are Australia, Canada, Irish Free State, Newfoundland, New Zealand, and South Africa.

The Imperial Conference of 1926 defined the Dominions as 'autonomous Communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations.' The Conference further laid down that, as a consequence of this equality of status, the Governor-General of a Dominion 'is the representative of the Crown, holding in all essential respects the same position in relation to the administration of public affairs in the Dominion as is held by His Majesty the King in Great Britain,' and that 'it is the right of the Government of each Dominion to advise the Crown in all matters relating to its own affairs.' The Conference also recognised certain treaty-making rights as appertaining to the Dominions.

On December 11, 1931, the Statute of Westminster, which by legal enactment recognises the status of the Dominions, defined at the Imperial Conference of 1926, became law. The Dominions had in their turn also passed the Statute of Westminster in 1931.

The term 'Colony' is an abbreviation of the official designation 'Colony not possessing responsible Government,' and includes all such Colonies whether or not they possess an elective Legislature, but does not include Protectorates or Protected States. The term 'Crown Colonies' is properly applicable only to those Colonies in which the Crown retains control of legislation.

Under the recent Peace Treaties certain ex-German and ex-Turkish territories are administered by parts of the British Empire under mandates

approved by the League of Nations. These territories include Samoa, New Guinea, Iraq, Palestine, and parts of the former German Colonies in Africa.

Up to July, 1925, all sections of the British Empire outside of Great Britain and Ireland were dealt with by the Colonial Office. In that month a new Secretaryship of State, for Dominion Affairs, was created, and as a result the Dominions Office was set up, to take over from the Colonial Office business connected with the self-governing Dominions, the self-governing Colony of Southern Rhodesia, and the South African territories (Basutoland, Bechuanaland Protectorate, and Swaziland), including business relating to the Imperial Conference.

The Colonial Office now deals with the administrative work of the Colonies, Protectorates, and Mandated Territories other than those for which the Dominions Office is responsible. It contains seven Departments—the West Indian, Far Eastern, Ceylon and Mauritius, East African, Tanganyika and Somaliland, Nigeria, Gold Coast and Mediterranean—dealing with the affairs of various groups of Dependencies; a Middle Eastern Division, which was established in March, 1921, to conduct business relating to Iraq, Palestine, Aden, and Arab areas under British influence; and a General Department, which is concerned with correspondence of a general and miscellaneous character including questions of promotion, postal, telegraph, and copyright matters, international conventions and commercial treaties, Letters Patent and Commissions, etc.

EUROPE.

THE IRISH FREE STATE (SAORSTAT EIREANN).

In 1920 an Act was passed by the British Parliament, under which separate Parliaments were set up for 'Southern Ireland' (26 counties) and 'Northern Ireland' (6 counties). The Unionists of the six counties accepted this scheme, and the Northern Parliament was duly elected on May 24, 1921. The rest of Ireland, however, having proclaimed a Republic in January, 1919, ignored the Act.

On December 6, 1921, a Treaty between Ireland and Great Britain was signed which was embodied in the Irish Free State (Agreement) Act, 1922. The Treaty contains the following provisions among others:—

Ireland to have the same constitutional status 'in the community of nations known as the British Empire' as the Self-Governing Dominions, and to be called the Irish Free State.

Its position in relation to the Imperial Parliament and Government to be that of the Dominion of Canada, and the representative of the Crown in Ireland to be appointed in like manner as the Governor-General of Canada.

Until an arrangement is made whereby the Irish Free State undertakes its own coastal defence, the defence by sea of Great Britain and Ireland is undertaken by the Imperial forces. The Free State to afford, in time of 'war or strained relations' with other powers, such harbour and other facilities as the British Government may require. The establishments of the Irish defence force not to exceed such proportion to the British military establishment as the population of Ireland bears to the population of Great Britain.

The ports of Great Britain and of Ireland to be freely open to the ships of 'the other country' on payment of the customary dues.

By the Treaty 'Northern Ireland' was given the option of continuing its separate existence under the Act of 1920, subject to the award of a 'Boundary Commission.' On December 3, 1925, the British Government and the two Irish Governments signed an agreement by the terms of which the partition of 1920 continues in force as determined in that Act, the Boundary Commission being discharged from the duty of delivering an Award.

By the same agreement the provisions of the Treaty relating to a Council of Ireland and stipulating the liability of the Irish Free State for a share of the National Debt of the United Kingdom were cancelled.

Constitution.

Under the Treaty of December 6, 1921, a Provisional Government was constituted on January 14, 1922, to carry on for a period not exceeding twelve months from the date of the Treaty. In September, 1922, the Provisional Parliament met as a Constituent Assembly to adopt a Constitution for the Irish Free State. The Constitution was enacted by the Provisional Parliament on October 25, 1922 (Constitution of the Irish Free State [Saorstat Eireann] Act, 1932), and by the British Parliament on December 5 (Irish Free State Constitution Act, 1922 [Session 2], 13 Geo. V. ch. 1d), and came into effect by Royal Proclamation on December 6, 1922.

The Constitution declares that the Irish Free State is a co-equal member of the Community of Nations forming the British Commonwealth of Nations, and that 'all powers of Government, and all authority, legislative, executive, and judicial, in Ireland are derived from the people of Ireland.' Every person domiciled within the area of the Free State on December 6, 1922, who was born in Ireland, or either of whose parents was born in Ireland, or who had been ordinarily resident within the area of the Free State for at least seven years, automatically became a citizen of the new State unless he or she elected not to accept such citizenship. The Irish language is declared to be the national language, but English is equally recognized as an official language. Liberty of person and the dwelling of the citizen are inviolable. There is to be no endowment of any religion. Freedom of conscience and the free profession and practice of religion are guaranteed to each citizen, as well as the right of free expression of opinion and the right to assemble peacefully and to form associations or unions for purposes not opposed to public morality. Elementary education is free.

The Legislature, known as the Oireachtas, consists of the King, a Chamber of Deputies (Dáil Eireann), and a Senate (Seanad Eireann). There must be at least one Session each year. Provision is made for payment of members. Legislative authority in respect of money Bills is reserved to the Chamber alone, but the Senate may make recommendations. Every Bill (other than a money Bill) initiated in and passed by the Chamber of Deputies is sent to the Senate, and if amended there the Chamber shall consider the amendments. An elaborate machinery of procedure is established by the Constitution (Amendment No. 13) Act, 1928, to prevent the exercise of a veto by the Senate or a protracted deadlock between the Senate and the Chamber.

The Representative of the Crown signifies the King's assent to Bills passed or deemed to have been passed by both Houses of the Oireachtas. He cannot signify such assent save upon the advice of the Executive Council.

Two articles, namely Articles 47 and 48, containing respectively provisions relating to a Referendum of the people and the initiation of proposals for legislation by the people have been removed from the Constitution by the Constitution (Amendment No. 10) Act, 1928.

The Constitution originally provided that all members of the Oireachtas must take the prescribed oath of allegiance to the Constitution. This provision was removed by the Constitution (Removal of Oath) Bill, 1933, which became law in April, 1933.

Citizens of 21 years of age or over, without distinction of sex, who comply with the prevailing electoral laws, can vote for members of Dáil Eireann; each voter has only one vote, and voting is by secret ballot.

Every citizen of 21 years of age or over, not otherwise disqualified, is eligible for election to Dáil Eireann. Election is upon principles of Proportional Representation. The number of Deputies is fixed on a popular basis, and is at present 153. Each of the Universities existing in the year 1922 (the year in which the Constitution was enacted) is entitled to elect three Deputies. The General Election is to be held on the same day throughout the country, and Dáil Eireann, unless the Oireachtas is sooner dissolved, continues for 'six years or such shorter period as may be fixed by legislation.' The period fixed by legislation is at present five years.

The Senate consists of 60 members. The first Senate consisted of 30 members elected by Dáil Eireann, and 30 nominated by the President of the Executive Council. Of the latter, 15 held office for 12 years and 15 held office for 6 years.

To be eligible for membership a citizen must be at least 30 years of age and eligible for election to Dáil Eireann. The term of office of a member of Seanad Eireann is normally nine years. One-third of the members retire every three years, and their places are filled by an election 'at which the electors are the members of Dáil Eireann and the members of Seanad Eireann voting together on principles of proportional representation.'

A person may not be a member of both Houses.

The executive consists of a Council of not more than twelve nor less than five ministers. They are responsible to the Dáil, and must include the President and Vice-President of the Council, and the Minister for Finance. The President of the Council, the Vice-President of the Council, the Minister in charge of the Department of Finance, and the other members of the Executive Council must be members of the Dáil, save that one of such other members may be a member of the Senate. The President is nominated by the Dáil. He nominates the Vice-President and other members of the Council, who must be approved by the Dáil. Every minister may speak in the Dáil and Senate.

The Chairman of the Dáil (Ceann Comhairle) receives a salary of 1,000*l.* a year; the Deputy-Chairman 750*l.*, the Chairman of the Senate (Cathaoirleach) receives 1,200*l.* and the Deputy-Chairman 750*l.* a year; members, except ministers and officials, 30*l.* a month, and free first-class railway facilities between Dublin and their constituencies. Ministers receive a salary of 1,000*l.* a year, and the President a salary of 1,500*l.* a year.

The representative of the King is the Governor-General of the Irish Free State (Saorstát Eireann).

In December, 1934, legislative proposals were before the Oireachtas for the abolition of the Senate as a constituent house of the Oireachtas, for the abolition of University representation in the Dail and for reduction of the membership of the Dail.

The Free State Parliament met for the first time, as such, on December 6, 1922. At the Election held in January, 1933, the state of the parties was: Fianna Fail, 77; Cumann na nGaedheal, 48; Labour, 8; Farmers, 11; Independent, 9; Total, 153. The state of parties on December 1, 1934, was as follows: Fianna Fáil, 76; United Ireland Party, 57; Labour, 8; Independents, 10; Ceann Comhairle (Speaker), 1; 1 vacancy; total, 153.

The Ceann Comhairle (Speaker) is not required by law to vacate his seat at a General Election.

Governor-General.—Donal *Buckley* (Domhnall Ua Buachalla), appointed November 26, 1932. Salary, 10,000*l.*

Cathaoirleach (Chairman of Seanad Eireann).—T. Westropp *Bennett.*

Local Government.

The Irish Free State is divided into twenty-seven administrative counties and four county boroughs governed by councils which, with a few exceptions, are elected triennially. The county councils administer county affairs generally, can hold property, levy rates, borrow money and must meet the demands of other authorities, such as the boards of health and public assistance and mental hospital committees, whom they are required by law to subsidise. The county borough council possesses with certain exceptions the powers of a county council, and is also a sanitary authority under the Public Health Acts.

The administrative counties include the urban county districts which are urban areas that have been constituted sanitary districts. Each such district is governed by an elected council that administers the Acts relating to public health, housing, libraries, maternity and child welfare, etc., and is the sole rating authority within its area. There are sixty-five urban sanitary districts, comprising the four county boroughs, six municipal boroughs, two towns constituted under special Acts and fifty-three towns under the Towns Improvement Act, 1854. There are twenty-three towns constituted under the Towns Improvement Act, 1854, which are not urban sanitary districts. These towns have elected town commissioners who exercise certain minor powers and can levy a limited rate. There are, therefore, altogether eighty-eight areas under municipal government.

An enlarged rural sanitary district, called the county health district, was created by the Local Government Act, 1925. This district generally extends over the county with the urban districts excluded. The county council performs its duties as a health authority through a board composed of ten members of the council, and is required to appoint a county medical officer of health for the effective administration of the sanitary code.

The health authority is also, with certain exceptions, the public assistance authority, and is called the board of health and public assistance. Public assistance is organised on a county basis; the poor law unions within each county have been amalgamated, boards of guardians have been abolished and workhouses closed as such. County homes have been established for the aged and infirm and chronic invalids, and county and district hospitals for the sick. Home assistance has become the normal method of poor relief. Old age pensions are a charge on State funds, but local authorities assist in the administration. The insane poor are under the care of statutory committees of the county and county borough councils who maintain nineteen mental hospitals. Industrial and reformatory schools are managed by religious communities, but maintained principally out of capitation grants from State and Local funds. Religious communities and voluntary associations also maintain schools for the deaf and dumb, the blind, the mentally deficient and other afflicted classes which local authorities have power to utilise and subsidise.

The county boroughs of Dublin and Cork, and the borough of Dun Laoghaire, have a system of government which combines an elected council with a manager. These councils have certain specified functions, including the making of a rate, raising loans, and making bye-laws. All functions formerly exercised by the councils other than those now specifically reserved by law are exercised by the manager, a paid official, who has control over all officers, and whose removal from office is subject to the sanction of the central authority.

Elected members of local authorities are not paid, but provision is made for a contribution towards travelling expenses.

Elections to public bodies are held according to the principle of proportional representation. The franchise extends practically to all persons of either sex who are of full age and have during a qualifying period occupied as owners or tenants any land or premises in the area, except premises let as furnished lodgings. Any married woman of 30 years or over residing with her husband in premises in respect of which the husband is entitled to be registered as a local government elector is also qualified for the franchise. Women are eligible for election as members of all local government bodies in the same manner and on the same conditions as men. Five members of the Dublin County Borough Council of 35 are elected by the commercial electors.

In order to abolish patronage and to ensure that only qualified persons are appointed to local offices a central body called the Local Appointments Commissioners is charged with the duty of selecting suitable persons to be appointed by local authorities to chief executive offices, to professional and technical offices and to other prescribed offices. Before making an appointment to a prescribed office which cannot be filled by promotion the local authority must request the Commissioners to recommend to them a suitable person. The Commissioners select persons for appointment by means of competitive examinations or by the machinery of selection committees.

A scheme of combined purchasing has been established in order to enable local authorities to obtain commodities of standard quality at the lowest possible price. The central authority appoints official contractors after obtaining competitive tenders.

Education.—*Elementary Education.*—Elementary Education is free and is given in the National Schools.

Since the establishment of the Saorstát the Irish language has been included as an essential part of the curriculum for all National Schools. Approximately 11,500 teachers have already qualified to teach the language. The use of Irish as a medium of instruction in the schools has also largely increased.

The latest statistics available show that the number of schools in operation is 5,334. The number of pupils enrolled in the schools is 504,521; the percentage average daily attendance is 83·7; the number of teachers of all classes is approximately 14,336.

There are five State-aided Training Colleges. The number of qualified teachers who issued from the Colleges in 1932–33 was 363.

The estimated State expenditure on Elementary Education for the year 1934–35 is 3,753,430*l.*, excluding the cost of administration.

Secondary Education.—The Secondary or Intermediate Schools are under private control and are conducted in many cases by Religious Orders; all schools receiving grants from the State are open to inspection by inspectors of the Education Department. The number of recognised Secondary Schools during the school year 1933–34 was 314, and the number of pupils between the ages of 12 and 20 years in attendance was 32,346. Estimated total expenditure for 1934–35, 368,435*l.*, excluding the cost of administration.

Technical Education.—Technical Schools are established in all the cities and in the principal towns. These schools are controlled by the local authorities, and are maintained partly by the rates and partly by State Grants. Estimated total expenditure for Technical Education for 1934–35 is 202,645*l.* (State grants), excluding the cost of administration, and 132,168*l.* (rates).

Agricultural Education.—Winter agricultural classes for the sons of farmers are provided by statutory County Committees of Agriculture, which are financed partly out of State Grants and partly out of the rates. Residential courses of agricultural instruction for farmers' sons and courses of instruction in rural domestic economy for farmers' daughters are provided at institutions of which the principal are managed and financed by the Department of Agriculture or are managed by religious orders, and receive grants from State funds. Higher agricultural education is provided for in the Universities.

University Education is given at the University of Dublin (Trinity College), founded in 1591, and at the National University of Ireland, founded in Dublin in 1909. The latter has three constituent colleges, namely, the University Colleges of Cork, Galway, and Dublin. The numbers of professors, &c. and students, in 1932–33, were as follows:—

Universities	Professors, Lecturers and Assistants	Students
Trinity College, Dublin	127	1,624
University College, Cork	91	781
,, ,, Galway	52	592
,, ,, Dublin	135	1,957

Justice.

Justice is administered by Courts set up by the Courts of Justice Act, 1924, pursuant to the Constitution. They consist of a Supreme Court, a High Court, a Court of Criminal Appeal, a Central Criminal Court, a Circuit Court and a District Court.

The Supreme Court, which consists of the Chief Justice (who is *ex-officio* an additional Judge of the High Court) and two other Judges, has appellate jurisdiction from all decisions of the High Court. The High Court, which consists of a President (who is *ex-officio* an additional Judge of the Supreme Court of Appeal) and five ordinary Judges, has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise touching the validity of any law having regard to the provisions of the Constitution, the High Court alone exercises original jurisdiction. The Court of Criminal Appeal consists of the Chief Justice or some other Judge of the Supreme Court and two ordinary Judges of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial Judge that the case is a fit one for appeal, or, in case such certificate is refused, where the Court itself, on appeal from such refusal, grants leave. Where leave to appeal is granted, the appeal is heard and determined by the Court of Criminal Appeal on the report of the official stenographer present at the trial, with power to the Court to hear further evidence or to refer any matter back for report by the trial Judge. The decisions of the Court of Criminal Appeal are final, unless that Court or the Attorney-General certifies that the decision involves a point of law of exceptional public importance, and that it is desirable that an appeal should be taken to the Supreme Court of Appeal. The Central Criminal Court consists of a Judge of the High Court, to whom is assigned, for the time being, the duty of acting as such Court. It is held at such times and in such places as the President of the High Court may direct, and at it are tried criminal cases which are outside the jurisdiction of the Circuit Court or which may be sent forward to it for trial from the Circuit Court.

The Saorstát is divided into eight Circuits, each of which is presided over by a Judge of the Circuit Court. There are also two 'unattached' or additional Circuit Judges who assist in the various Circuits as required. The jurisdiction of this Court in civil proceedings is limited as to amount, save by consent of the parties, in which event the jurisdiction is unlimited. In criminal matters, it has jurisdiction in all cases save murder, attempt to murder, conspiracy to murder, high treason, treason felony, treasonable conspiracy or piracy.

The District Court consists of thirty-three Justices of the District Court and three Assistant Justices. Three of such Justices are assigned to the Dublin Metropolitan area; the remainder of the country is divided into

thirty districts, to each of which a Justice of the District Court is assigned. The District Court is a Court of summary jurisdiction with a small civil jurisdiction—in contract cases up to 25*l.*, and in cases of tort, with certain exceptions, up to 10*l.*

All Judges and Justices of the District Court are appointed by the Governor-General on the advice of the Executive Council.

Defence.

Article 46 of the Constitution of the Irish Free State enacts that the exclusive right to the raising, maintenance and control of the armed forces in the Irish Free State is vested solely in the Oireachtas.

The command in chief of, and all executive and administrative powers

in relation to, the forces is by the Acts mentioned vested in the Executive Council and exercised through and in the name of the Minister for Defence.

The Defence Forces as at present constituted are organised in three main components, viz.: The Permanent Force, the Reserve Force and the Volunteer Force. The forces are organised by the following arms of the Service: Infantry, Artillery, Air Corps, Cavalry, Engineers, Signals, Ordnance, Medical, Supply and Transport and Military Police.

In peace time the Irish Free State is divided into four Command areas, namely, the Eastern, Southern, Western and Curragh Commands. The Curragh Command comprises the principal permanent training centre, the Curragh Training Camp, where the Military College and most of the Service Schools are located.

Enlistment is voluntary in all components. In general the terms of engagement are as follows:—

Permanent Force.—2 years in Army Service, 10 years in Reserve. Regular soldiers under certain conditions and if specially qualified may be permitted to extend their service up to a maximum of 21 years. Boys between the ages of 14 and 18 years may be enlisted for specialist training for periods of from 5 to 12 years.

Reserve Force.—Comprising the Reserve of Officers, the Reserve Officers' Training Corps, the Class 'A' Reserve and the Class 'B' Reserve. The Reserve of Officers consists of officers of the Permanent Force who have retired therefrom and have been commissioned in the Reserve, of Reserve officers trained in the Reserve Officers' Training Corps and commissioned therefrom. The Reserve Officers' Training Corps is organised in the different Universities, among the student bodies. The Class 'A' Reserve comprises N.C.O's and men of the Permanent Force who have completed their term of Army Service and are transferred to the Reserve. The Class 'B' Reserve comprises short service soldiers who normally complete 3 months in Army Service and 6 years in Reserve. All classes of the Reserve may be called out for active training for a period not exceeding 30 days in any one year, or at any time in a national emergency or in aid of the civil power.

Volunteer Force.—Is organised in 3 classes or lines. All classes are enlisted for 5 years with extensions. The 1st Line comprises men between the ages of 18 and 25 years, who complete 14 days to 9 months in Army Service, and balance of their period of enlistment in Volunteer Service. In addition to initial training, the 1st Line is required to complete a minimum number of weekly drills, overnight camps, and 14 days annual training. The 2nd Line consists of men transferred from the 1st Line, or of men possessing special qualifications and not over 45 years, who are enlisted direct into this class. Such personnel have certain limited liabilities in respect of weekly drills, overnight camps, etc. The 3rd Line consists of men between the ages of 45 and 55 years who possess specialist qualifications. This class has no compulsory training commitments in peace time.

The strength provided (1934–35) for the different components is as follows: Permanent Force, 589 officers, 5,790 N.C.O's. and men; Reserve Force, 239 officers, 700 cadets, 7,700 N.C.O's. and men; Volunteer Force, 20,000 all ranks.

The estimated total expenditure for national defence for the year ending March 31, 1935, is 1,476,731*l.*

Production.

Agriculture.—General distribution of surface (in acres) in 1933: crops and pasture, 11,702,902; woods and plantations, 244,355; other land, including grazed mountain, 5,077,224; total, 17,024,481.

The following table shows the area under the principal crops, with the estimated yield:—

The Irish Free State joined the International Postal Union in 1925.

Banking and Currency.

The unit of currency in the Free State is the Free State *pound*, which has the same value as the pound sterling. Apart from the metallic currency, the circulating medium consists of legal tender notes and consolidated bank notes, issued by the Currency Commission. This body consists of three representatives of the banks, three members nominated by the Minister for Finance (two of whom must not be in the permanent service of the State), and a Chairman elected by the members of the Commission.

Consolidated bank notes are a first charge on all the assets of the banks, and are also secured by a reserve held by the Currency Commission. They are convertible into legal tender notes which in turn are convertible into equivalent British legal tender at the Bank of England. Total notes in circulation on March 31, 1934, amounted to 13,170,848*l.*, as against 13,576,000*l.* on March 31, 1933.

Banking returns (representing an average of figures for a selected date in each of the three months, April–June, 1934):—Liabilities: capital, 8,062,000*l.*; reserves, 8,953,000*l.*; notes in circulation, 8,364,000*l.*; current, deposit and other accounts, 168,472,000*l.*; acceptances, 141,000*l.*; other liabilities, 5,004,000*l.*; total, 198,996,000*l.* Assets: cash, 12,784,000*l.*; money at call, 9,136,000*l.*; bills, 7,307,000*l.*; loans and advances, 69,271,000*l.*; investments, 92,382,000*l.*; premises, 3,147,000*l.*; other assets, 4,969,000*l.*; total, 198,996,000*l.*

The Bank of Ireland, founded in 1783, has a capital of 2,769,230*l.*; reserve fund, 3,180,000*l.*; deposits (excluding Government accounts), 31,658,596*l.* Other banks are Hibernian Bank, Munster and Leinster Bank, Provincial Bank of Ireland, the Royal Bank, the Ulster Bank, the Northern Bank, the National City Bank (affiliated to the Bank of Ireland), and the National Bank. The latter is a London clearing bank.

MALTA.

Governor and Commander-in-Chief.—General Sir David *Campbell*, K.C.B., A.D.C., appointed June 27, 1931.

Lieut.-Governor.—Sir Harry Charles *Luke*, C.M.G.

Malta was held in turn by Phœnicians, Greeks, Carthaginians and Romans, and was conquered by Arabs in 870. From 1090 it was joined to Sicily until 1530, when it was handed over to the Knights of St. John, who ruled until dispersed by Napoleon in 1798. The Maltese rose in rebellion against the French and the Island was subsequently blockaded by the British Fleet, aided by the Maltese, from 1798 to 1800, and with the free will of the Maltese was finally annexed to the British Crown by the Treaty of Paris in 1814. It is one of the most important ports of call in the world, and is the base and resort for repair and refitment of the British fleet in the Mediterranean.

Constitution.—Under the Malta Constitution Letters Patent, 1921, there is an elected Legislature to control local affairs, consisting of a Senate (partly nominated) of 17 members, and a Legislative Assembly of 32 elected members. Elections are on a proportional representation basis.

Certain matters, including control of Naval, Military and Air Forces, Imperial interests, external trade, coinage, emigration, treaties, and relations with foreign States, are styled 'Reserved Matters,' and are under the Constitution dealt with by the Imperial side of the dyarchy, namely by the Governor, assisted by the Nominated Council. The Nominated Council

consists of the Lieutenant-Governor, the Legal Adviser, and a senior officer of the Navy, Army and Air Force.

The Executive Council consists of the Governor sitting with the Ministry. There is also a Privy Council, consisting of the Governor and the Executive and the Nominated Councils sitting jointly.

Responsible Government, which was suspended between 1930 and 1932, was again suspended in November, 1933.

The English language is the official language of administration, and all official records and public documents and all notices of general public importance or interest issued by the Malta Government are in that language, without prejudice, however, to the use of the Maltese or Italian languages accompanying the English text in such records, documents and notices in so far as may be found desirable and convenient. English and Italian are recognized as equal languages of culture in the University and in secondary schools as subjects of study. The Maltese language is the language of general intercourse in the Islands, and English and Maltese are the only languages that may be taught in elementary schools. In 1934 Maltese was substituted for Italian as the principal language of the Courts of Law.

Area and Population.—Malta is 17·4 miles long; area, 95 square miles; and the neighbouring island, Gozo, 26 square miles; total area (with Comino), 122 square miles. Population, Census April 26, 1931, 241,621; civil population on December 31, 1933, 251,832. Births, 1933, 8,321; deaths, 5,091; number of marriages, 1,643. Chief town and port, Valletta.

ASIA.

ADEN, PERIM, SOKOTRA, AND KURIA MURIA ISLANDS.

Aden is a volcanic peninsula on the Arabian coast, about 100 miles east of Bab-el-Mandeb. It forms an important bunkering station on the highway to the East, and is fortified. The settlement includes Little Aden, a peninsula very similar to Aden itself, and the settlement and town of Shaikh Othmán on the mainland, with the villages of Imad and Hiswa.

Aden has been separated from the Bombay Presidency and formed into a separate province under a Chief Commissioner under the direct control of the Government of India from April 1, 1932.

Area 75 square miles; including the Protectorate and the Hadhramaut about 42,000 square miles; of Perim, 5 square miles. Population of Aden and Perim in 1931, 48,338 (29,358 males and 18,980 females), against 54,923 in 1921.

The only Government revenue is from duties on liquor, opium, and salt, and from income tax, court fees and judicial fines; local taxes go to the Aden Settlement Fund. There is a Port Trust. The total revenue during the year 1933–34 amounted to Rs. 10,73,625, and the expenditure to Rs. 11,28,977. Imports (1933–34), by sea, Rs. 4,91,03,388; by land, Rs. 12,27,188; treasure (sea and land), Rs. 29,53,049; total imports, Rs. 5,32,83,625 (total, 1932–33, Rs. 5,46,65,576). Chief imports: Fuel oil, petrol, kerosene, cotton piece goods, grains, gums, hides and skins, tobacco, coal, coffee, sugar, fruits, vegetables and other provisions. Exports, by sea, Rs. 3,15,61,866; by land, Rs. 6,17,773; treasure (sea and land), Rs. 30,23,269; total exports, Rs. 3,52,03,008 (total, 1932–33, Rs. 3,47,72,647). Chief exports: Salt, coffee, gums, hides and skins, cotton piece goods, tobacco, grains, sugar and other provisions. These statistics are exclusive of government stores and treasure. In 1933–34, 1,524 merchant vessels of 6,367,139 tons (net) entered the port of Aden, of which 856 were British; in the same year 1,294 country (local) craft of 43,630 tons entered. At Perim 274 vessels entered, of which 20 were Government vessels. Aden itself produces little, its chief industries being the manufacture of salt and cigarettes, and building of dhows. The trade is largely a transhipment. There is a branch of the

National Bank of India, Limited, and there is also one firm of private bankers.

Aden Protectorate (area about 42,000 square miles) comprises the territories and dependencies of the hinterland Chiefs who are in treaty relations with His Majesty's Government. In April, 1905, after demarcation of the frontier, Turkish and British Commissioners signed an agreement that determined the boundary between the Aden Protectorate and the (then) Turkish Yemen, from Sheikh Murad, opposite Perim Island, to Bana river, and thence north-east to the Great Desert (Rub' al Khali). With certain modifications this frontier has been accepted by the Treaty of San'ā signed on February 11, 1934, as the boundary between the Aden Protectorate and the territories of the King of the Yemen, who became ruler of the former Turkish possessions in S.W. Arabia after the conclusion of the Great War. The eastern limit of the Aden Protectorate is the boundary between Oman and the territories of the Sultan of Qishn, who is also Sultan of **Sokotra Island**, which lies off Cape Guardafui on the African coast. Sokotra is 1,400 square miles in extent, population said to be about 12,000, mostly pastoral inland, fishing on the coast. Religion formerly Christian, but Moslem since the end of the seventeenth century. Chief products, dates and various gums; sheep, cattle (hump-less) and goats are plentiful; butter is exported. The Sultan entered into protectorate treaty relations with His Majesty's Government in 1886. Principal village, Tamarida.

The Aden Protectorate, which is not directly administered, is under the control of the Resident and Commander-in-Chief, Aden, on behalf of the Colonial Office.

Chief Commissioner and Resident and Commander-in-Chief.—Lieut.-Col. Sir Bernard *Reilly*, K.C.M.G., C.I.E., O.B.E. Appointed April 18, 1931.

The **Kuria Muria** islands, which were formerly attached to Aden, were transferred to the control of the Persian Gulf Residency in 1931.

The island of Kamaran in the Red Sea, about 200 miles north of Perim, was taken by the British from the Turks in 1915, and is administered by the Government of India through a Civil Administrator under the control of the Chief Commissioner of Aden. It has an area of 22 square miles and a population of about 2,200. A Quarantine station for pilgrims travelling to Mecca from the East is maintained on the island under the joint control of the Government of India and the Government of the Dutch East Indies.

Civil Administrator.—Captain G. V. Wickham.

BAHRAIN ISLANDS.

The Bahrain islands form an archipelago in the Persian Gulf 20 miles off al Hasa on the Arabian coast. Bahrain, the largest island, is 27 miles long and 10 miles wide. About a twentieth part of its area is cultivated. Other islands are Muharraq, to the north-east of Bahrain, 4 miles long and

½ mile wide ; Sitra, to the east, 3 miles long and 1 mile wide ; Nebi Saleh, about 2 miles in circumference, and several uninhabited islets. The islands are low lying, the highest ground being a hill in the centre of Bahrain 400 feet high.

The Ruling Family, the Al Khalifa, came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The present chief, Shaikh Hamad bin Isa al Khalifa, C.S.I., became the Ruling Shaikh on December 9, 1932. The Ruler is in treaty relations with the Government of India, which is represented by a Political Agent.

The total population is estimated at about 120,000, of which three-quarters are the original inhabitants of the islands, of the Shia sect, the remainder, including the Ruling Family, being Sunnis. The Sunnis live mainly in the towns of Manama and Muharraq. There is a wealthy Persian community in Manama and a number of Indian merchants.

Manama, the capital and commercial centre, extends for 1½ miles along the shore. Manama contains two hospitals, schools, a branch of the Eastern Bank, Post Office, wireless station, and the official residence of the Ruler. Wide roads connect the various quarters of the town. There is a municipal council in Manama and also in the town of Muharraq, on the adjacent island. The two islands are connected by a service of motor launches, which also ply to the mainland. The population of Manama is about 25,000 and that of Muharraq is about the same. There is a community of some 70 Europeans in Manama, including members of the (American) Dutch Reformed Church Mission. Water in the two towns is supplied by artesian wells and nearly 200 fresh-water springs on the various islands are used for irrigation. Motor traffic is in use and roads exist between the towns and villages, which number about 129. An electric power station has been installed at Manama ; the power is carried over on a causeway to Muharraq.

Bahrain is the centre of the famous pearl fishing industry of the Persian Gulf. Over 500 boats and 15,000 divers from Bahrain are engaged in fishing during four months of the summer. During the season Bahrain is visited by numerous arab and continental pearl buyers from Europe. In 1932 oil was discovered in Bahrain by an American Company who held a concession from the Shaikh of Bahrain. The Bahrain Petroleum Company, which holds this concession, is a branch of the Standard Oil Company of New York. Other industries are : boat-building, manufacture of sailcloth and reed mats, date cultivation and breeding of particularly fine white donkeys.

The greater part of the trade of Nejd and Hasa passes through Bahrain. The revenue of the State is obtained from a duty of 5 per cent. on general merchandise : 10 to 15 per cent. is levied on certain luxury articles including carpets, cycles, electrical goods, motor cars, boots and shoes and tobacco.

In 1933–34, the total imports amounted to Rs. 92,75,050 ; and exports to Rs. 67,54,800. The chief imports were : rice, Rs. 1,400,220 ; wheat flour, Rs. 242,590 ; coffee, Rs. 579,840 ; dates, Rs. 354,700 ; sugar, Rs. 358,380 ; loaf sugar, Rs. 306,520 ; tea, Rs. 186,710 ; cotton goods, Rs. 1,371,430 ; silk goods, Rs. 277,840 ; building material, Rs. 143,870 ; petrol, Rs. 213,360. The chief exports were : pearls, Rs. 674,820 ; rice, Rs. 907,980 ; wheat flour, Rs. 48,140 ; coffee, Rs. 313,710 ; sugar, Rs. 237,120 ; loaf sugar, Rs. 135,940 ; tea, Rs. 154.590 ; cotton goods, Rs. 708,690.

There is a weekly mail service (B.I.S.N.C. Slow Gulf) from and to India, Persia and Iraq, and Imperial Airways East and West bound aeroplanes call every Thursday. Import of arms and ammunition is subject to special permission.

The principal coins in use are Indian rupees, but Austrian (Maria

Theresa) dollars (worth 1*s.* 11*d.*) and Turkish liras (worth about 18*s.*) are current. The measures employed are: dhara (= 19 inches). The weights are: roba (4 lbs.), maund (56 lbs.) and ruffa (560 lbs.).

Political Resident, Persian Gulf.—The Hon. Lieut.-Col. T. C. W. *Fowle,* C.B.E.

Political Agent at Bahrain.— Lieut.-Col. Gordon *Loch.*

BORNEO (BRITISH).

British North Borneo.—*Governor.*—D. J. *Jardine,* C.M.G. O.B.E. (September, 1934).

British North Borneo occupies the northern part of the island of Borneo. The interior is mountainous, Mount Kinabalu being 13,455 feet high.

The territory is under the jurisdiction of the British North Borneo Company, being held under grants from the Sultans of Brunei and Sulu (Royal Charter in 1881). It is administered by a Governor (appointed with the approval of the Secretary of State) in Borneo, and a Court of Directors in London, appointed under the Charter. On May 12, 1888, the British Government proclaimed a formal protectorate over the State of North Borneo. In 1898 certain border lands were acquired from the Sultan of Brunei, and more recently certain inland territories have been occupied. For administrative purposes the whole country is divided into four Residencies, which are sub-divided into Districts. In December 1904, an area of about 200 square miles was transferred to Sarawak in exchange for rights over coal mines on Brunei Bay.

Area, about 31,106 square miles, with a coast-line of over 900 miles. Population (1931 census) 270,223, consisting mainly of Mohammedan settlers on the coast and aboriginal tribes inland. The Europeans numbered 340; Eurasians, 236; Chinese, 47,799; natives of Malay Archipelago, 11,494. The number of natives of Borneo was 205,218. The most numerous are the Dusuns, 97,862; the Bajaus, 31,640; and the Muruts, 14,959. Chief towns, Sandakan (population 13,826), on the east coast, and Jesselton, on the west coast.

There are Protestant and Catholic missions. The laws are based on the Indian Penal, Criminal, and Civil Procedure Codes, and local Ordinances. There is an Imam's Court for Mohammedan law. Native and Indian constabulary, 500 men under European officers.

A railway, 127 miles, runs from Jesselton on Gaya Bay to Melalap in the interior, with a branch from Beaufort to Weston on Brunei Bay. There is communication by telegraphy, telephone, and wireless telegraphy.

At Jesselton and Sandakan there are agencies of the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia, and China, and the Bank of Taiwan. A State Bank has been established, with Head Office in Sandakan and an agency at Jesselton.

The Government issues its own copper coinage (cents and half-cents); nickel coinage of 1, 2½ and 5 cents, and silver coinage of 25 cents; also notes of one, five, ten, and twenty-five dollars, and of 25 and 50 cents. Accounts are kept in Singapore dollar currency.

Brunei.—In 1888 the neighbouring territories on the north-west coast of Borneo, Brunei and Sarawak, were placed under British protection. On January 2, 1906, by treaty, the Sultan of Brunei handed over the general administration of his State to a British Resident. The present Sultan Ahmed Tajudin Akhazul Khairi Wad-din succeeded, at the age of eleven years, to the throne on the death of his father in September, 1924. The Pengiran Bendahara and Pengiran Pemancha were appointed Joint Regents during his minority. On September 19, 1931, His Highness the Sultan assumed full power and the Regency terminated. The Sultan receives an allowance of 2,100*l.* a year from State funds, and his two principal ministers 1,190*l.* a year each. Area about 2,500 square miles, and population, 1931 Census, 30,135 (Europeans, 60; Malays and Bornean races, 26,972; Chinese, 2,683; Indians, 377; others, 33). Estimated population at end of 1933 was 32,900. The chief town is Brunei (pop. 10,453). The old town is built over the water on the Brunei river, and a new town has developed on the mainland since 1910. There were fifteen vernacular schools in 1933, with 897 pupils, of whom 14 were girls. In addition there were 2 private Chinese schools with 128 pupils and 2 private English schools with 72 pupils. Police force, 1933, 1 Chief Inspector, and 77 non-commissioned officers and men. The climate is hot and moist, with cool nights. Average annual rainfall is a little over 100 inches. The native industries in Brunei town include boat building, cloth weaving, brass foundries, and manufacture of silver ware. The principal products are cutch (mangrove extract), rubber, jelutong, and sago. Most of the interior is under jungle, comprising numerous kinds of serviceable timber. Oil has been found in commercial quantity at Seria on the coast and the field is being explored and developed.

Revenue 1933, 67,755*l.* (Customs, 20,798*l.*, monopolies, 6,234*l.*, licences, 2,589*l.*; lands and forests and oil royalties, 30,052*l.*, cession moneys, 1,773*l.*); expenditure, 60,061*l.* Public debt, Dec. 31, 1933, 44,683*l.*

The post office dealt with 116,657 articles in 1933.

There is a central Wireless Station at Brunei, and a subsidiary station at Labuan, which enable telegraphic communication to be maintained with Labuan and thence by cable with Singapore and Europe. There is also a Wireless Station in the Temburong District and another in the Belait District.

The distance from Labuan is about 43 miles. Communication by steam launches from Brunei is regularly maintained. The passage between Singapore and Labuan takes about 4 days.

Straits Settlements Currency, 1 dollar = 2*s.* 4*d.*

British Resident.—T. F. *Carey*, M.C.S.

Sarawak.—Area about 50,000 square miles, coast line 500 miles, many rivers navigable. The government of part of the present territory was obtained in 1842 by Sir James Brooke from the Sultan of Brunei. Various accessions were made between 1861 and 1905. Under an agreement of 1888 Sarawak is recognised as an independent State under the protection of Great Britain. The present Rajah, H. H. Sir Charles Vyner Brooke, G.C.M.G. (born September 26, 1874) succeeded his father, H. H. Sir Charles Johnson Brooke, G.C.M.G., in 1917. Heir presumptive, Bertram Brooke (H.H. the Tuan Muda), born August 8, 1876. Population estimated at about 475,000, Malays, Dyaks, Kayans, Kenyahs, and Muruts, with Chinese and other settlers. The chief towns are the capital, Kuching, about 23 miles inland, on the Sarawak River, Sibu, 60 miles up the Rejang River, which is navigable by large steamers, and Miri, the headquarters of the Sarawak Oilfields, Ltd. At Kuching are Church of England and Catholic missions with schools. The revenue is derived chiefly from Customs, the Govt. opium monopoly, gambling, arrack and pawn farms, royalty on oil, land revenue, timber royalty, exemption tax payable by Malays, and from Dyak and Kayan revenue. The revenue in 1933 was 3,558,580 dollars; expenditure, 3,549,074 dollars. Public debt, *nil.* Coal exists in large quantities, and a syndicate has been formed for developing the coal fields at Selantik. A considerable oil field is being developed at Miri and Bakong in the Baram district. Foreign trade, 1933: imports, 11,348,622 dollars; exports, 14,335,898 dollars. The chief exports (1933) included (in dollars) sago flour, 754,696; pepper, 1,106,178; plantation rubber, 2,210,375; gutta jelutong, 879,162; gutta percha, 2,518; cutch, 395,754; benzine, 1,749,761; kerosene, 646,348; liquid oil fuel, 1,693,558; crude oil, 898,316; fish, 80,698; damar, 60,320; rattans, 30,754. The trade is mostly with Singapore. Shipping entered in the foreign trade, 1933, 777,082 tons. There is a constabulary consisting of about 900 men, principally Dyaks and Malays, under British army officers. Round Kuching are about 45 miles of roads, besides bridle paths. There are 30 post offices. The Government offices have a telephone system extending over Kuching and Upper Sarawak, and there is communication by wireless with Singapore, &c. There are also wireless stations at Kuching, Kuching (6th mile), Miri, Sibu, Lundu, Mukah, Simanggang, Bintulu, Binatang, Kapit, Limbang, Baram, Saratok, Belangian, Tatau, Lawas and Kanowit. Distance from London, 8,700 miles; transit, 25 to 30 days. Telegrams are sent by wireless from Singapore.

Sarawak and Straits Settlements currency, 1 dollar = 2*s.* 4*d.*

There is a Special Commissioner for Sarawak as well as a Government Agent in England whose offices are at Millbank House, Westminster, London, S.W. 1. There is also a Sarawak Pilgrim Officer at Jeddah.

CEYLON.

Constitution and Government, &c.

Ceylon, the ancient Taprobane (Tamraparni, the island of 'dusky leaves'), is an island in the Indian Ocean, by the south of India, lying between 5° 55′ and 9° 50′ N. lat., and 79° 42′ and 81° 53′ E. long. Its area is 25,332 square miles.

In 1505 the Portuguese formed settlements on the west and south, which were taken from them about the middle of the next century by the Dutch. In 1796 the British Government annexed the foreign settlements to the Presidency of Madras; in 1802 Ceylon was separated from India and formed into a Crown colony.

According to the terms of the Constitution established in 1833, modified on various occasions, and now embodied in the Order in Council dated March 20, 1931, the administration is in the hands of a Governor, aided by a State Council which deals with administrative as well as legislative matters and therefore sits in executive as well as legislative session; the control of departments is decentralised and the old Colonial Secretariat is replaced by groups of departments in charge of ten Ministers, of whom seven are elected members of the Council, the remaining three, called Officers of State, being the Chief (formerly Colonial) Secretary, the Legal Secretary,[1] and the Financial Secretary. In the administration of his departments each of the seven elected Ministers is associated with a Standing Executive Committee of the State Council; communal representation has been abolished; and the territorial franchise, which was limited to adult males possessing certain literary and property qualifications, has been extended—subject to certain specified qualifications—to adults of both sexes. The State Council is composed of 50 members elected on a territorial basis, with 8 Nominated Unofficial Members, and the 3 Officers of State.

Governor.—Sir Reginald Edward *Stubbs*, G.C.M.G. (appointed October 7, 1933). Salary 8,000*l.* (including entertainment allowance of 1,500*l.*).

Colonial Secretary.—Sir F. G. Tyrrell, K.B.E., C.M.G.

For purposes of general administration, the island is divided into nine provinces, presided over by Government Agents, with assistants and subordinate headmen. There are three municipalities, with twenty-seven Urban District Councils and one local board, mainly for sanitary purposes.

[1] Or the Attorney-General, until a Legal Secretary is appointed (Article 6 of the Order in Council).

Area and Population.

The population of Ceylon (exclusive of the military and the shipping) at the partial Census held on February 26, 1931, showed an increase of 18·0 per cent. since 1921. The distribution by Provinces, and the average number of persons per square mile in each Province, are shown in the following table :—

Provinces	Area: English sq. miles	Population, 1931		Provinces	Area: English sq. miles	Population, 1931

				Grand Total.	—	5,312,548	—

The population on the principal estates, mainly consisting of immigrant Tamils from Southern India, numbered, at the census of 1931, 790,376, and formed 14·9 per cent. of the total population. The Indian Tamils on estates numbered 692,540.

Marriages registered, 1933, 25,886[1]; births registered, 209,032 (107,054 males and 101,978 females); deaths registered, 114,690 (57,894 males and 56,796 females).

The urban population is 13·5 per cent. of the total population. The principal towns and their population (exclusive of the military, shipping, and estates), according to the census of 1931, are :—Colombo, 284,155 ; Galle, 38,424 ; Jaffna, 45,708 ; Kandy, 36,541.

Religion and Education.

Buddhism was introduced from India in the third century B.C., and is still the religion of the majority of the inhabitants, especially in the southern part of the island. It is (unlike Buddhism in Tibet, China, and Japan) materialistic and atheistic, and in popular usage has a large admixture of the doctrines and practices of popular Hinduism and of the aboriginal wild tribes.

Education is free in vernacular schools, but fees are charged in English schools.

The number of vernacular schools in 1933 was: Government schools, 1,452 (attendance, 136,624 boys and 75,849 girls); Aided schools, 2,269 (attendance, 168,505 boys and 125,696 girls); Unaided schools, 933 (attendance, 24,626 boys and 11,336 girls). There were also 351 English and Bilingual schools, attended by 59,569 boys and 21,505 girls.

The total sum spent by Government on vernacular education in 1932–33 was 8,788,742 rupees.

The Royal College and the Government Training College with the English school attached to it are Government institutions. The other English schools are grant-in-aid schools; the total grants to which in 1932–33 amounted to 1,923,324 rupees. A University College opened in

[1] This is exclusive of Muslim marriages, which are seldom registered.

January, 1921, has (1932–33) 417 students on the roll. Technical education is given in the Technical College (543 students in 1933). There are 68 industrial schools.

Justice, Crime, and Pauperism.

The law is Roman-Dutch, modified by colonial ordinances. Kandyan Law is to a certain extent in force in the Kandyan Provinces, and special systems of personal law are recognised for the Muslim community, and for the Tamils of the Jaffna District. The criminal law has been codified on the principle of the Indian Penal Code. There are a Supreme Court, police courts and courts of requests, and district courts, intermediate between the latter and the Supreme Court. Village councils deal with petty offences. In 1932 the number of cases instituted in the police courts and municipal magistrates' courts was 142,446. Offences against the Penal Code dealt with during the year 1933 numbered 20,532; of these, the number disposed of by the courts as true cases was 14,603, and the convictions 5,856[1]; 24,445 convicted persons were sent to prison. Police force, December 31, 1933, 3,119 of all ranks.

There is no poor law, though a few old persons receive a charitable allowance from the Government varying from Re. 1 to Rs. 12·50 each per mensem.

Defence.

In normal times Ceylon pays three-fourths of the cost of the Imperial garrison. The regular troops consist of detachments of engineers and artillery, strength all ranks 257. The Ceylon Defence Force comprises 2 squadrons mounted rifles, 3 batteries garrison artillery, 3 companies engineers, 8 companies infantry and supply and medical services; strength all ranks 3,200.

Production and Industry.

The area of the Island is 16,212,400 acres, of which it is estimated that about 3,300,000 acres are under cultivation, and about 456,000 acres pasture land. The approximate areas under the principal products in 1933 were: paddy, 850,000 acres; other grain, 105,000 acres; cacao, 34,000 acres; cinnamon, 26,000 acres; tea, 457,000 acres; coconuts, 1,100,000 acres; rubber, 534,000 acres. In 1933, the exports of tea were 216 million lbs., of which 149 million lbs. were sent to the United Kingdom and 12 million lbs. to the U.S.A. The exports of desiccated coconuts were 790,000 cwts., copra, 1,287,000 cwts., and coconut oil, 1,061,000 cwts. In the same year, 142,317,000 lbs. of rubber were exported, of which 19,299,000 lbs. went to the United Kingdom and 74,793,000 lbs. to the United States of America. In 1933, 6,340 acres of crown land were granted and sold by the Revenue Officers. The live stock in 1933 was reported to amount to 1,100 horses, 1,577,000 horned cattle, 63,000 sheep, 19,000 swine, and 209,000 goats. There is a Government Dairy, possessing nearly 300 head of cattle. There were 20 plumbago mines reported to be working at end of 1933. The exports of plumbago in 1933 were 191,170 cwts. Other minerals, such as gold, thorium, and monazite, exist, but, except the last-named, so far have not been found in quantities of commercial importance. There are some hundreds of small-gem quarries, from which sapphires, rubies, moonstones, catseyes, and other gems are obtained. Ceylonese manufactures, which are at present of very minor importance, are soap and candle making, weaving, basket work, tortoise-shell boxes, &c., earthenwares, jewellery, metal work, lacquer work, carving, &c. Manufactures on any large scale are confined to the products of agriculture, such as the production of coconut oil. In 1933 there were about 1,950 tea and rubber factories, mills, &c., 1,200 cardamoms, cinnamon, citronella, coconut, fibre, oil, &c., factories, 20 saw mills, and 70 aerated water, ice, &c., factories.

Commerce.

The values of the imports and exports for six years are given in the following table (Rate of Conversion: 1*l.* = Rs. 15):—

Dependency.

The **Maldive Islands**, 400 miles south-west of Ceylon, are a group of 13 coral islets (atolls), richly clothed with coconut palms, and yielding millet, fruit, and edible nuts. The old form of government was abolished in 1932, and a new Constitution was introduced. The Sultan, Agga mge Maniffulu, was elected on March 12, 1935. According to

the modified Constitution there is a Peoples' Assembly, consisting of 33 members, of whom 28 members are elected and 5 are nominated, and a Cabinet of 5 ministers. The Prime Minister is selected by the Sultan from the members of the Peoples' Assembly and he selects his colleagues—the Cabinet. Population over 79,000 Muslims at the 1931 census. The people are civilised, and are great navigators and traders.

CYPRUS.

Governor.—Sir Herbert Richmond *Palmer*, K.C.M.G., C.B.E. (Appointed October, 1933.) Salary, 3,600*l.*, of which amount 600*l.* is payable to the officer from time to time administering the Government.

Colonial Secretary.—H. *Henniker-Heaton*, C.M.G. Salary, 1,400*l.*

Constitution and Government.—Cyprus is 40 miles from the coast of Asia Minor and 60 from the coast of Syria. At a very early date important Greek and Phœnician colonies were established in Cyprus and later it formed part of the Persian and Roman Empires. Its government frequently changed hands until 1571, when the Turks conquered the island from the Venetians, and retained possession of it until its cession to England for administrative purposes under a convention concluded with the Sultan at Constantinople, June 4, 1878. On the outbreak of hostilities with Turkey on November 5, 1914, the island was annexed. On May 1, 1925, the Island was given the status of a colony by Letters Patent, and the High Commissioner became Governor. There is an Executive Council, consisting, at present, of the Colonial Secretary, the Attorney-General, the Treasurer, together

with one other official and two non-official members. On November 13, 1931, under Letters Patent, the Legislative Council ceased to exist, and power to make laws was granted to the Governor. Municipal corporations exist in the principal towns, elected practically by all resident householders and ratepayers. Since December 1, 1931, the appointment of the mukhtars (headsmen) of villages has been vested in the Governor.

Area and Population.—Area 3,584 square miles. Population at 1931 Census:—Moslems (Ottoman Turks), 64,238; Christians (Orthodox of the Autocephalous Church of Cyprus under the Orthodox Archbishop of Cyprus and three Bishops; Maronites under a Uniat Archbishop of Cyprus, who resides in the Lebanon; Armenians under an Armenian Archbishop residing in Cyprus; and Anglicans under the Bishop in Jerusalem), 283,562; others, 159; total, 347,959. Population at 1921 Census: 310,715; at 1911 Census: 274,108. Inhabitants per square mile, 97·08. Births registered 1933, 9,765; deaths, 4,918.

The principal towns are Nicosia (the capital), 23,677; Larnaca, 11,872; Limasol, 15,349; Famagusta and Varosha, 9,979; Paphos and Ktema, 4,517; Kyrenia, 2,137. There are six administrative districts named after these towns.

Education.—There is a separate educational system for each religion. Elementary schools are under the control of the Government, assisted by an advisory Board of Education for each religious community. In 1933 there were 1,023 elementary schools (720 Orthodox-Christian, 283 Moslem, 6 Armenian, 7 Maronite, 5 Latin, 2 Jewish) with 1,494 teachers (1,038 Orthodox-Christian, 372 Moslem, 84 of other denominations) and 56,677 pupils enrolled (44,517 Orthodox-Christian, 10,901 Moslem, 1,259 of other denominations).

Secondary Schools (nearly all State-aided) included:—For Orthodox-Christians, 5 Gymnasiums, 6 Commercial Schools, 7 High Schools for boys and 3 for girls, 2 private girls' schools; for Moslems, a Lycée for boys and a High School for girls; undenominational, the English School, Nicosia (for boys), the American Academy, Larnaca (mixed) and the American Academy, Nicosia (for girls). The total expenditure on elementary and secondary education in 1933 was 172,924*l.*, of which 126,572*l.* was from Colonial Revenue. There are 2 newspapers in Turkish, 15 in Greek.

Languages spoken are a local dialect of Modern Greek; Osmanli Turkish by Moslems; English and French by educated classes. English is becoming more and more widely spoken.

Justice.—The law courts have been reconstituted by an Order in Council of 1927, which divided the Colony into three judicial districts, viz., Nicosia–Kyrenia, Famagusta–Larnaca, and Limasol–Paphos. There now are: (1) a supreme court of civil and criminal appeal, with original civil jurisdiction in disputed claims of 300*l.* and over, patents and admiralty actions, and election petitions; (2) three assize courts, having unlimited criminal jurisdiction; (3) three district courts, having, subject to (1) above, an unlimited civil jurisdiction; (4) magisterial courts with summary jurisdiction; (5) three assistant district judges' courts. In all the courts Cypriot (Christian and Moslem) judges take part. There are also three *Sheri* Courts, for Moslems only, which administer the Moslem *Sheri* or religious law, and a *Sheri* Tribunal of Appeal. In the year 1933 the number of offences was 29,134, and the number of persons committed to prison was 18,735. Strength of police force and prisons staff, December 31, 1933, 26 officers and 783 men; total, 809.

Finance.—The revenue and expenditure for five years, exclusive of Grant-in-Aid, and share of the Turkish debt charge, were:—

—	1929	1930	1931	1932	1933
	£	£	£	£	£

HONG KONG.

Constitution and Government.

The Crown Colony of Hong Kong was ceded by China to Great Britain in January, 1841; the cession was confirmed by the treaty of Nanking, in August, 1842; and the charter bears date April 5, 1843. Hong Kong is a great centre of world commerce with China and other countries in the Far East, and a military and naval station of first-class importance.

The administration is in the hands of a Governor, aided by an Executive Council, composed of the General Officer Commanding the Troops, the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Treasurer, and the Director of Public Works (the last being a special appointment), and three unofficial members. There is also a Legislative Council, presided over by the Governor, and composed of the General Officer Commanding the Troops, the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Treasurer, the Director of Public Works, the Inspector-General of Police, the Harbour Master, and the Director of Medical and Sanitary Services (the last four being special appointments), and eight unofficial members, viz., six nominated by the Crown (three of whom are Chinese), one nominated by the Chamber of Commerce, and one by the Justices of the Peace.

Governor.—Sir William *Peel*, K.C.M.G., K.B.E. Appointed February, 1930. Salary 7,000*l.*, including 2,200*l.* allowance.

Colonial Secretary.—Sir W. T. *Southorn*, K.B.E., C.M.G.

Area and Population.

Hong Kong is situated at the mouth of the Canton River, about 90 miles south of Canton. The island is an irregular and broken ridge, stretching nearly east and west about 11 miles, its breadth from 2 to 5 miles, and its area rather more than 32 square miles; separated from the mainland by a narrow strait, the Lyeemoon Pass, about half a mile in width. The opposite peninsula of Kowloon, on the mainland, was ceded to Great Britain by treaty in Oct. 1860, and now forms part of Hong Kong. The city of

Victoria extends for upwards of five miles along the southern shore of the extensive harbour. By a convention signed at Peking on June 9, 1898, there was leased to Great Britain for 99 years a portion of Chinese territory mainly agricultural, together with the waters of Mirs Bay and Deep Bay and the island of Lan-tao. Its area is about 356 square miles, including islands, with about 94,000 inhabitants, exclusively Chinese. Area of Old Kowloon is 3 square miles. Large areas have also recently been reclaimed at Kowloon Bay, Wanchai, and North Point. Total area of colony, 391 square miles.

Estimated population of Hong Kong, excluding the Military and Naval establishments, at middle of 1932 was as follows:—Non-Chinese civil population, 19,984; Chinese civil population: City of Victoria (including Peak), 364,279; villages of Hong Kong, 43,513; Kowloon (including New Kowloon), 273,244; New Territories (land), 89,776; population afloat, 100,000; total Chinese population, 880,812; total civil population, 900,796.

The registered births and deaths for five years were as follows:—

Year	Births	Deaths	Births per 1,000 [1]	Deaths per 1,000 [1]
1929 . . .	10,223	17,565	9·8	16·8
1930 . . .	11,134	19,260	9·7	14·2
1931 . . .	12,443	18,787	15·93	24·08
1932 . . .	13,597	19,829	16·89	24·74
1933 . . .	15,362	18,161	18·7	22·1

[1] Birth and death rates are calculated only on the population of Hong Kong and Kowloon, there being no jurisdiction by the sanitary authorities over the New Territories (except New Kowloon).

In 1930 the number of Chinese emigrants was 188,900, and the number of immigrants 223,136; in 1931, 100,869 and 283,890; in 1932, 55,639 and 232,396; and in 1933, 57,515 and 141,133 respectively.

Education.

Education is not compulsory, but all schools are State-inspected, and required to maintain a certain standard of efficiency. There are 4 Government schools, including 1 first-class secondary school, for children of British parentage, with an average attendance of 438 (1933), and 12 Government schools for Chinese boys and two for Chinese girls, with a total average attendance of 3,646. There is one school for Indians, with an average attendance of 167 (1933). There are also numerous schools in receipt of grants. The total number of pupils in all schools in 1933 was 72,917. The total expenditure on education in 1933 was 1,617,274.40 dollars, net.

The Hong Kong University in 1933 had 366 students, of whom 38 were women. The majority of the students are Chinese. The University is a residential teaching University with seven halls of residence.

Justice and Crime.

There are a Supreme Court, the second court or Court of Summary Jurisdiction, and a third court or Appeal Court, three police magistrates' courts, and a marine magistrate's court. In 1933, 2,218 were committed to Victoria gaol for criminal offences; in 1932, 2,279. The daily average of prisoners in gaol was 1,114 in 1932, and 1,472 in 1933. There is a police force in the colony numbering (1933) 2,202 men, of whom 258 are Europeans, 750 Indians, and 1,194 Chinese.

Finance.

The public revenue and expenditure of the colony were as follows in recent years:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	dollars	dollars		dollars	dollars
1930	27,818,473	28,119,646	1932	33,549,716	32,050,283
1931	33,146,724	31,160,774	1933	32,099,278	31,122,715

The revenue is derived chiefly from land-taxes, licences, quarry rent, liquor, tobacco and motor-spirit duties, and an opium monopoly.

Public debt, 341,800*l.*, raised in 1887 and 1893 for public works. Another loan, 1,143,933*l.* in Inscribed Stock at 3½ per cent., was raised in 1906 for purposes of railway construction, also a 6 per cent. Public Works (1927) Loan of 5,000,000 dollars was authorised. An amount of 4,838,000 dollars was converted into 4 per cent. Conversion Loan and 89,000 dollars redeemed in 1933. On December 31, 1933, the balance of assets over liabilities was 13,823,625 dollars.

Defence.

The military expenditure for 1933 was 5,826,250 dollars. The Volunteer Defence Corps consists of 1 battery, 1 engineer company, 1 troop (m.-g.), 1 armoured car company, 1 motor machine-gun company, 3 machine-gun companies, 1 infantry company and 1 air arm.

Hong Kong is the headquarters of the China Squadron.

Industry, Commerce, Shipping, and Communications.

The chief industries are sugar refining, ship-building and repairing, rope-making, tin refining, tobacco manufacture, the manufacture of cement, the manufacture of knit goods, canvas shoes with rubber soles, flashlight torches. The manufacture of lard is also an important local industry. Deep-sea fishing is important, especially for the New Territories.

The commerce of Hong Kong is chiefly with Great Britain, India, Burma, and Ceylon, Straits Settlements and F.M.S., Australia, United States, China, Dutch East Indies, Japan, Indo-China, and Siam. Hong Kong is a free port (except as regards the importation of intoxicating liquor, and other spirituous liquor, tobacco and motor-spirit). Under the Ottawa Conference Agreements, a registration fee of 20 per cent. of their value is charged on non-British motor vehicles. Preference is also extended to Empire brandy and tobacco and tobacco manufactures. Principal articles of trade are sugar and flour, rice, cotton yarn and thread, and cotton and woollen piece goods, silk and silk piece goods, hemp, leather, tin, wolframite, mild steel, bulk and case oil (kerosene), oils and fats, Chinese medicines, fertilisers, fish and fishery products, tea, coal, cement, condensed milk, matches. Hong Kong is a port of call for steamship lines operating across the Pacific; it is also in direct communication with Europe, South Africa, Australia and the two Americas, via the Pacific seaboard, the Panama Canal and the Suez and Atlantic routes. Numerous vessels ply between Hong Kong and the countries immediately to the north and south; the river steamer trade is also extensive both by steamers and by towed junks.

There is at present no regular air service operating from Hong Kong. The Hong Kong government, with the approval and financial support of H.M. government, has constructed an aerodrome at Kai Tack, on the main-

land of Kowloon, where are housed flying machines of the Royal Air Force, commercial machines and machines of the Hong Kong Flying Club. Additional facilities are being provided with a view to making Hong Kong a fully-equipped airport, capable of dealing with an air mail service.

The trade of Hong Kong and the United Kingdom (Board of Trade returns) for five years is given as follows:—

—	1930	1931	1932	1933	1934[1]
Imports (consignments) into Gt. Britain from Hong Kong	£ 22,490	£ 406,335	£ 243,596	£ 280,887	£ 421,732
Exports of British produce to Hong Kong .	4,354,270	4,435,340	4,817,734	3,228,927	2,512,629
Exports of Foreign and Colonial produce . .	95,132	59,289	54,910	48,078	48,766

[1] Provisional figures.

Imports, 1933, into Hong Kong from British Empire (excluding Great Britain), 3,124,003*l.*; exports to British Empire (excluding Great Britain), 2,479,054*l.*; imports from foreign countries, 27,261,241*l.*; exports to foreign countries, 24,506,682*l.*

In 1932, 52,449 vessels (including 22,559 junks and 7,294 steamships under 60 tons), representing altogether 41,794,005 tons, entered and cleared in the foreign trade. Of these, 5,014 with a tonnage of 12,201,690 were British ocean-going steamers.

There is an electric tramway of 9¼ miles, and a cable tramway connecting The Peak district with the lower levels of Victoria. There is a 4′ 8½″ gauge Government railway on the mainland, connecting Kowloon with Canton, of which 22 miles are in British territory and 89 miles in Chinese. The receipts for the British section in 1933 were 1,630,611 dollars, and operating expenses 919,558 dollars.

There were 20 post offices in Hong Kong in 1933; revenue (1933) postal, 1,238,963 dollars; telegraphic, 678,272 dollars; expenditure, postal, 486,367 dollars; telegraphic, 501,206 dollars. Telegraph and telephone routes, including cables, in 1933, 634 miles; telephone wires, excluding military lines, 70,375 miles. There is a wireless telegraph service under the control of the Post Office, besides a military and naval wireless station.

Money, Weights, and Measures.

The British banking institutions in the Colony are the Hong Kong and Shanghai Banking Corporation, whose head office is at Hong Kong, the Chartered Bank of India, Australia and China, the Mercantile Bank of India, Ltd., and the P. & O. Banking Corporation, Ltd. Note circulation of the three former banks, end of 1933, 157,583,718 dollars. There are also several Chinese and foreign banks.

The currency of the Colony consists of the notes of the above-mentioned banks, and of British, Hong Kong, and Mexican dollars, besides subsidiary coins. The British dollar is of 416 grains of silver 900 fine, as compared with 417·74 grains of 902·7 fineness of the Mexican dollar.

Subsidiary coins are 50 cent pieces (209·52 grains 800 fine), 20 cent pieces (83·81 grains 800 fine), 10 cent pieces (41·90 grains 800 fine), 5 cent pieces (20·95 grains 800 fine), and 1 cent copper pieces of 115·75 grains of copper or mixed metal. A new 1 cent copper coin of 62·5 grains was put into circulation on December 1, 1931.

Weights and Measures are:

The *Tael* = 1⅓ oz. avoirdupois; the *Picul* = 133⅓ lbs.; the *Catty* = 1⅓ lbs. avoirdupois; the *Chck* = 14⅛ inches; the *Cheung* = 12$\frac{9}{10}$ feet.

Besides the above weights and measures of China, those of Great Britain are in general use in the Colony.

INDIA AND DEPENDENCIES.

India, as defined by Parliament (52 and 53 Vict. c. 63, s. 18), comprises all that part of the great Indian Peninsula which is directly or indirectly under British rule or protection. In a popular sense it includes also certain countries such as Nepal, which are beyond that area, but whose relations with India are a concern of the Foreign and Political Department of the Government, whose envoy resides in the country concerned. These countries will be found included in the third part of the Year-Book among Foreign Countries. The term British India includes only the districts subject to British law, and does not include Indian States. The term is so used, unless otherwise stated, in the tables, &c., that follow.

Government and Constitution.

The present form of government of the Indian Empire is established by various Parliamentary Statutes which are now consolidated in the Government of India Act, 1915, as amended by the Government of India (Amendment) Act, 1916, the Government of India Act, 1919, the Government of India (Leave of Absence) Act, 1924, the Government of India (Aden) Act, 1929, and other amending Acts of no great intrinsic importance. All the territories originally under the government of the East India Company are vested in His Majesty, and all its powers are exercised in his name. Under the Royal Titles Act, 1876, the King of Great Britain and Ireland has the additional title of Emperor of India.

It is the declared policy of Parliament, as stated in the preamble of the Act of 1919, implementing the Declaration of August 20, 1917, to provide for 'the increasing association of Indians in every branch of the administration and the gradual development of self-governing institutions with a view to the progressive realisation of responsible government in British India as an integral part of the British Empire.' The Royal Statutory Commission (the Simon Commission) which was appointed on

November 8, 1927, made two visits to India in 1928–29, and its report was published in June, 1930.

In October, 1929, it was agreed between the Commission and H.M.G. that the Commission's terms of reference covered consideration of the relations of the Indian States with British India, and that after the Commission had reported a tripartite conference of representatives of the British Government, British India and the Indian States should be held to formulate proposals for the new Constitution of India. The decision to hold this Conference was announced by the Viceroy in India in a Gazette Extraordinary on October 31, 1929, together with the statement that 'it is implicit in the Declaration of 1917 that the natural issue of India's constitutional progress, as there contemplated, is the attainment of Dominion Status.' The Conference met in London for a first session (November 12, 1930, to January 19, 1931), a second session (September 7, 1931, to December 1, 1931), and a third session (November 17, 1932, to December 24, 1932). In March 1933, H. M.'s Government announced their proposals for constitutional reforms in the form of White Paper, which were scrutinized in consultation with Indian representatives by a Joint Select Committee of both Houses of Parliament.

Government in England.—The administration of the Indian Empire in England is entrusted to a Secretary of State for India, assisted by a Council of not less than eight and not more than twelve members, appointed for five years by the Secretary of State, though he may, for special reasons of public advantage to be communicated to Parliament, re-appoint a member for another five years. At least one-half of the members must be persons who have served or resided ten years in India, and have not left India more than five years previous to their appointment. No member can sit in Parliament. The duties of the Council, which has no initiative authority, are to conduct the business transacted in the United Kingdom in relation to the government of India. Subject to the Government of India Act and rules made thereunder, the expenditure of the revenues of India, both in India and elsewhere, is subject to the control of the Secretary of State in Council, and no appropriation can be made without the concurrence of a majority of votes of the Council. The Secretary of State regulates the transaction of business. The existence of a Legislative Assembly in India with a large elected majority renders it desirable that the Secretary of State should intervene only in exceptional circumstances in matters of purely Indian interest, where the Government and Legislature of India are in agreement.

In exercise of the power given by the Government of India Act, a High Commissioner for India in the United Kingdom was in 1920 appointed to act as agent of the Governor-General of India in Council, and on behalf of provincial governments in prescribed cases, and to conduct any business assigned to him by the Secretary of State in Council.

The salary of the Secretary of State, and the cost of the India Office for other than agency services are borne by the British, and not, as formerly, by the Indian Exchequer. The cost of the High Commissioner and his staff is charged to Indian Revenues.

Central Indian Government.—The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, commonly styled the Government of India. The Governor-General, or Viceroy (so called since 1858), is appointed by the Crown, and usually holds office for five years. The Governor-General is the sole representative of the Crown in India; he is assisted by a Council,

composed of high officials, each of whom is responsible for a special department of the administration, who are appointed by the Crown. No limit of time is specified for their tenure of office, but custom has fixed it for five years. The Capital of India and the seat of government were moved from Calcutta to Delhi in 1912, the latter being formed into a separate territory under a Chief Commissioner. The creation of the new Capital at New Delhi was completed in December, 1929, by the entry of the Viceroy into his new residence 'The Viceroy's House,' planned by Sir Edwin Lutyens, R.A. The formal opening took place in February, 1931. The summer seat of the Government is at Simla [April to October].

Viceroy and Governor-General of India.—His Excellency the Rt. Hon. Freeman Freeman-Thomas, Earl of *Willingdon*, P.C., G.M.S.I., G.M.I.E., G.C.M.G., G.B.E. (April, 1931). Salary, Rs.2,56,000 a year.

The following is a list of the past Governors-General of India, with the dates of their assumption of office:—

Warren Hastings	1774	Earl of Elgin	1862
Sir John Macpherson	1785	Sir John (Lord) Lawrence	1864
Earl (Marquis) Cornwallis	1786	Earl of Mayo	1869

Lord Ellenborough	1842	Lord (Viscount) Chelmsford	1916
Sir H. (Lord) Hardinge	1844	Earl (Marquis) of Reading	1921
Earl (Marquis) of Dalhousie	1848	Lord (Baron) Irwin	1926
Lord Canning	1856		

Until 1834 these were Governor-Generals of Fort William in Bengal, not of India.

There is an Indian Legislature consisting of the Governor-General and two Chambers, the Council of State and the Legislative Assembly (opened 1921). The Council of State consists of 60 members, of whom 33 are elected and 27 nominated: not more than 20 may be officials. The Legislative Assembly contains 145 members, 41 nominated, of whom 26 are to be official members, and 104 elected. The life of the Council of State is five years, and of the Assembly three years, but dissolution may occur sooner, or the period may be specially extended by the Governor-General. Joint sittings of the two Chambers may be held for the settlement of differences between them. The Legislative Assembly was presided over for the first four years by a President appointed by the Governor-General; thereafter he is to be elected. This Legislature has power, subject to certain restrictions, to make laws for all persons within British India, for all British subjects within other parts of India, and for all native Indian subjects of the King in any part of the world. The Governor-General, with the assent of His Majesty signified, after copies of the proposed enactment have been laid before both Houses of the British Parliament, may enact measures essential for the safety, tranquillity, or interests of British India or any part thereof, against the wish of the Council or Assembly.

The Members of the Governor-General's Executive Council are appointed by the Crown: three must have had ten years' service in India, and one must be a barrister or pleader of not less than ten years' standing. They have charge of the following Portfolios:—

Home.—Sir Henry D. *Craik.*, Bt., K.C.S.I., I.C.S. (July 28, 1934).
Finance.—Sir James *Grigg*, K.C.B. (May 6, 1934).
Education, Health and Lands.—Khan Bahadur Mian, Sir *Fazl-i-Husain*, K.C.S.I., K.C.I.E., Kt. (April 1, 1930).
Law.—Sir Nripendra Nath *Sircar*, Barr. (May 4, 1934).
Railways and Commerce.—Sir Joseph *Bhore*, K.C.S.I., K.C.I.E., C.B.E., I.C.S. (April 30, 1930).
Industries and Labour.—Sir Frank *Noyce*, K.C.S.I., C.B.E., I.C.S. (April 8, 1932).

The salary of each member is Rs. 80,000 a year.

The *Foreign and Political* Department is directly under the Governor-General. The Commander-in-Chief is also the *Army* Member of the Executive Council. At the head of each Department (except the Railway Department which is under the Chief Commissioner of Railways) is one of the Secretaries of the Government of India.

British India is now divided into fifteen administrations. Madras, Bombay, Bengal, the United Provinces of Agra and Oudh, the N.W. Frontier Province, the Punjab, Burma, Bihar and Orissa, the Central Provinces and Berar, and Assam are each under a *Governor*; and Ajmer-Merwara, Coorg, Baluchistan, Delhi, and Andaman and Nicobar Islands are each under a *Chief Commissioner* as far as British territory is concerned.

High Commissioner for India in the United Kingdom.—Sir Bhupendra Nath *Mitra*, K.C.S.I., K.C.I.E., C.B.E. (appointed 1931), India House, Aldwych, London.

Provincial Government.—According to the Government of India Act, 1919, which came into operation in December, 1920, and January, 1921, the various functions of government are classified as Central and Provincial subjects, the latter being practically definitely committed to the Provincial Governments, while for purposes of convenience certain Central subjects, such as the collection of income tax, may be dealt with by the Provincial Governments as the agents of the Central Government. The Governor-General in Council retains unimpaired powers of control over the Provincial Governments in their administration of 'reserved' subjects, but in 'transferred' subjects is only competent to intervene where it is necessary to safeguard Central subjects or to decide questions where two or more Provinces are concerned, or to safeguard the due exercise and performance of any powers and duties possessed by or imposed on the Governor-General in Council in regard to the High Commissioner, to the raising of loans by local Governments, or under rules made by the Secretary of State in Council. The list of subjects transferred to Indian Ministers, with certain reservations, includes local self-government, medical administration, public health and sanitation, education, public works, agriculture, fisheries, co-operative societies, excise, registration, development of industries, adulteration, weights and measures, and religious and charitable endowments. Certain sources of revenue are definitely allocated to the Provinces, which are required to contribute to the Central Government certain annual sums which are to be the first charge on their revenues.

The Provincial Governments are based upon a scheme of dyarchy, or dualised form of government, and consist of the Governor-in-Council and the Governor acting with Ministers. The Ministers, who are elected members of the Legislative Council, have charge of certain Departments of Government known as 'transferred subjects,' while others, the 'reserved subjects,' are administered by the Governor-in-Council. Thus each side has

its share in the conduct of the Government, with responsibility for its own work, while co-ordination is achieved by the influence of the Governor, who is associated with both sections.

The Governor's Executive Council consists of not more than four members, to be appointed by the Crown, one being qualified by twelve years' public service in India. The Legislative Council contains not more than 20 per cent. of official members and at least 70 per cent. (in Burma 60 per cent.) elected members, and, in addition to its legislative functions, votes all expenditure, subject to certain specified exceptions and to the power of the Local Government to incur expenditure, on reserved subjects without the Council's assent if the Governor certifies such expenditure to be necessary. The normal duration of the Legislative Council is three years, but it may be dissolved sooner by the Governor, or its term specially extended. The Ministers are appointed by the Governor to administer the transferred subjects, and are not to be officials. The Governor may not be a member of the Legislative Council, but may address the Council.

The Provinces to which this new form of government has been applied are Bengal, Madras, Bombay, Bihar and Orissa, United Provinces, Punjab, Central Provinces, Coorg, Assam, the N.W. Frontier Province, and Burma. The minimum number of members in each Legislative Council is: Madras, 132; Bombay, 111; Bengal, 125; United Provinces, 118; Punjab, 83; Bihar and Orissa, 98; Central Provinces, 70; Coorg, 17; Assam, 53; Burma, 92. There are 7·8 million voters out of the population of 247 millions in British India, including Burma. In Madras, Bombay, Bengal, United Provinces, Punjab, Central Provinces, Assam, Burma, and Bihar and Orissa the franchise has been extended to women; and women are eligible as candidates for the Madras, Bombay, United Provinces, Central Provinces, and Punjab Councils and for these constituencies in the Legislative Assembly.

The provinces are usually formed into divisions under Commissioners, and then divided into districts, which are the units of administration. At the head of each district is an executive officer (collector and magistrate, or deputy-commissioner), who has entire control of the district, subject to the control of his official superior. Subordinate to the magistrate (in most districts) there are a joint magistrate, an assistant-magistrate, and one or more deputy-collectors and other officials. There are 273 of such districts in British India.

Relations with Indian States.—The control which the Supreme Government exercises over the Indian States varies considerably in degree. Except in matters which affect India as a whole, such as Posts and Telegraphs, Customs and in nearly all cases Currency, the Government of India does not ordinarily interfere with the administration of the States. The Princes have no right to make war or peace, or to send ambassadors to each other or to external States; they maintain military forces within certain limits; the sanction of the Government of India is required before Europeans of certain classes can be employed; and the Supreme Government can exercise control in case of misgovernment. Some of the States, but not all, make fixed annual payments to the Supreme Government.

The total area is 712,508 square miles, with a population of 81 millions.

Local Self-Government.

There were at the end of 1931–32, 785 municipalities, with a population of 22 millions. The total number of members of the municipal bodies was 13,019, of whom 12,240 were non-official. The municipal bodies have the care and lighting of the roads, water supply, drainage, sanitation, medical

relief, vaccination, and education, particularly primary education; they impose taxes, enact bye-laws, make improvements, and spend money, with the sanction of the Provincial Government. Their aggregate income in 1931–32 was Rs. 17,20,99,357, exclusive of loans, sales of securities, and other extraordinary receipts amounting to Rs. 19,07,07,463. The aggregate expenditure was Rs. 17,64,35,243, excluding extraordinary and debt expenditure of Rs. 19,08,31,865. By the Local Self-Government Acts of 1883–84, the elective principle was introduced, in a large or small measure, all over India; and has since been further extended by recent legislation. In all larger towns, and in many of the smaller towns, the majority of members of committees are elected by the ratepayers; everywhere the majority of town committees consists of Indians, and in many committees all the members are Indians. In many municipalities women have the right to vote, and in a few they are eligible for election. For rural tracts, except in Burma, there were 792 district and sub-district Boards or Councils, and 455 Union Panchayats in Madras, with 21,246 members in 1931–32, 15,835 being elected. These Boards are in charge of roads, district schools, markets, public health institutions, &c. Their aggregate income in 1931–32 was Rs. 15,52,47,649, and expenditure Rs. 15,80,83,427.

Ajmer-Merwara	33·63	34·04	27·93	30·10
Total	35·09	34·38	26·85	24·89

The registered deaths in 1931 numbered 6,615,099, of which cholera accounted for 220,909; plague, 45,626; fevers, 3,956,100; dysentery and diarrhœa, 263,881; and respiratory diseases, 419,068. The births registered were 9,135,890 (4,741,321 males and 4,394,569 females).

The number of emigrants from India under the Indian Emigration Act, 1922, was 10,814 during 1932. The emigration of unskilled labour is at present lawful to Ceylon and Malaya only, and of skilled labour to all countries, subject to certain safeguards.

V. Principal Towns.

The urban population of India (excluding Aden) in 1931 was as follows:—

Towns with	No.	Population
Over 100,000	38	9,674,032
50,000—100,000	65	4,572,113
20,000— 50,000	268	8,091,288
10,000— 20,000	543	7,449,402
5,000— 10,000	987	6,992,832
Under 5,000	674	2,205,760
Total	2,575	38,985,427

The population (1931) of the principal towns of India was as follows:—

Towns	Population	Towns	Population	Towns	Population
Calcutta [1]	1,485,582	Poona	250,187	Bareilly	144,031
Bombay	1,161,383	Cawnpore	243,755	Trichinopoly	142,843

The persons with a knowledge of English numbered 3·6 millions.

Educational institutions in India are of two classes :—(*a*) those in which the course of study conforms to the standards prescribed by the Department of

Public Instruction or by the Universities or Boards of Secondary and Intermediate Education, and either undergo inspection by the Department, or regularly present pupils at the public examinations held by the Department, Universities or the Boards. These institutions are called 'Recognised,' but may be under public or private management. (*b*) Those that do not fulfil these conditions. These are called 'Unrecognised.' As regards recognised institutions, the system of education operates, in general, through (i) the Primary Schools, which aim at teaching, through the vernacular languages, reading, writing, and other elementary knowledge; (ii) the Secondary Schools, in which the instruction does not go beyond the matriculation or school-leaving certificate standard. The schools are divided into English or vernacular, and also into high and middle schools; (iii) the Intermediate Colleges; and (iv) the Colleges. The colleges are affiliated to eight federal universities—Calcutta (1857), Madras (1857), Bombay (1857), Punjab (1882), Patna (1917), Nagpur (1923), Andhra (1926), and Agra (1927). There are also six unitary teaching and residential universities—Allahabad (1887), Lucknow (1920), Rangoon (1920), Dacca (1921), Delhi (1922), and Annamalai (1929); two denominational universities—the Hindu University at Benares (1916), and the Muslim University at Aligarh (1920); and two universities in Indian States—Mysore (1916) and Hyderabad (Osmania) (1918). In some provinces, secondary or secondary and intermediate education is controlled by Boards. The number of Boards operating in 1932–33 was six.

There are in addition, various institutions of a special character, such as technical schools teaching arts and industries, agriculture, engineering, &c.; law schools; medical schools and colleges; and training colleges and normal schools for the training of teachers, schools for adults, defectives, criminal and hill tribes, labourers and factory children; and reformatory schools for juvenile offenders. There are also special 'European' schools, which are primarily intended for the children of the Anglo-Indian and domiciled European community in India. The military authorities maintain separate schools for the education of the soldiers and their children.

The following table gives the number of institutions and scholars in 1932–33 in British India, including Ajmer-Merwara, British Baluchistan, the Civil and Military Station of Bangalore, and the administered areas in Indian States:—

Grand Total	255,347		12,853,532	

[1] Boards of Secondary or Intermediate Education are not included in this table.

There were in 1932–33, in British India, 222,566 'recognised' institutions with 12,192,137 scholars, and 34,781 'unrecognised' with 661,395 scholars.

The following was the educational expenditure for recognised institutions in recent years from fees, provincial resources, local rates, municipal funds, endowments, etc. :—

Year	Rs.	Year	Rs.
1927–28	25,82,78,819	1930–31	28,31,64,460
1928–29	27,07,32,253	1931–32	27,18,56,622

A system of State Scholarships exists by which it is possible for a boy to pass from the village school to the University. There are also State Scholarships, awarded by local Governments and the Government of India, to enable the holders to study in the United Kingdom for two or more years.

During 1930–31 the following newspapers and periodicals were published : in Madras, 285 ; Bombay, 290 ; Bengal, 704 ; United Provinces, 632 ; Punjab, 439 ; Burma, 177 ; Bihar and Orissa, 139 ; Central Provinces and Berar, 58 ; Assam, 46 ; Delhi, 104 ; N.W.F.P., 18. The percentage of newspapers and weekly and monthly publications published in various languages is as follows:—English, 17·8 ; Urdu, 23·2 ; Gurmukhi, 2·2 ; Hindi, 14·7 ; Bengali, 13·8 ; Tamil, 3·9 ; Assamese, 0·34 ; Gujerati, 2·5 ; Orya, 0·89 ; Marhati, 4·2 ; Kanarese, 0·92 ; Sindhi, 1·4 ; Telugu, 1·5 ; others, 12·05. The number of printing presses was 5,919 ; and 2,332 books in English or other European languages and 14,815 in Indian languages were published.

Justice and Crime.

The Presidencies of Madras, Bombay, and Bengal, and also the Province of Agra, the province of Bihar and Orissa, the province of the Punjab and the Province of Burma, have each a supreme high court, with 14, 11, 10, 11, 10, 13 and 11 judges, respectively, in 1933. There is appeal to the Privy Council in England. Oudh has a chief court. The Central Provinces and Berar, North-West Frontier Province, Coorg, Sind, and Chota Nagpur have judicial commissioners. For Assam the high court of Calcutta is the highest judicial authority. Below these courts are, for criminal cases, Courts of Session, and below these, Courts of Magistrates (first, second, and third class). The inferior civil courts are determined by special acts or regulations in each province. The most extensive system consists of the sessions judge acting as a 'District Judge'; subordinate judges ; and below them 'Munsifs.' There are also numerous special courts to try small causes. Side by side with the civil courts there are revenue courts, presided over by officers charged with the duty of settling and collecting the land revenue. The number of civil suits instituted in 1932 was 2,524,394, and of persons under trial in criminal cases 2,022,036.

Nearly all the civil judges, and the great majority of the magistrates, in the courts of original jurisdiction are Indians ; in Bengal, Madras, and Bombay the proportion of Indians in the appellate court is considerable.

The civil police in 1932 were 197,302 in strength, varying from 3·8 per 10,000 of the population in Bihar and Orissa to 25·6 per 10,000 in the North-West Frontier Province.

[1] Since the introduction of the Reforms from April 1, 1921, definite sources of revenue are now allocated to Provincial Governments. Hence the accounts and estimates of the Government of India now embrace only the transactions of the Central Government. The figures for 1931 and 1932 include the provision for the North-West Frontier Province which has, as from April 18, 1932, been constituted into a Governor's province. The figures for 1933 onwards therefore exclude the transactions of the new North-West Frontier Province. An annual subvention of Rs. 1 crore is to be paid by the Central Government to this Province for a period of three years from 1932-33, or until the new constitution is introduced, whichever is earlier. Provincial Governments used to pay annual contributions to the Central Government. The contributions in the first year were Rs. 983 lakhs. These were reduced to Rs. 608 lakhs in 1926-27. In 1927-28 there was a permanent remission of 350 lakhs, and a non-recurring remission of the balance Rs. 258 lakhs. There was complete and final remission of Provincial contributions from 1928-29.

The estimated capital expenditure of the Central Government on State railways in 1934–35 was Rs. 3,46,00,000. The project estimate for the new capital at Delhi was closed with effect from April 1, 1932, but was re-opened in 1933. A provision of Rs. 67,67,000 has been made for this purpose in the estimates for 1934–35.

The following table shows the receipts of both the Central and Provincial Governments from the most important sources of revenue in recent years:—

[1] Exclusive of Portion of Land Revenue due to irrigation.

[2] The salt duty was raised in 1923, and reduced to previous level in 1924. A temporary surcharge of 25 per cent. was imposed in 1931. An additional duty was also levied in 1931 on imported foreign salt. About $\frac{7}{8}$ of this additional duty is paid to Provincial Governments.

[3] The Excise revenue is derived from intoxicating liquors, hemp drugs, and opium consumed in the country. The bulk of the revenue comes from indigenous spirits. The excise systems and rates of duty vary from province to province.

[4] Liquors, oils, motor cars and cycles, sugar, tobacco, cotton and silk manufactures, metals (including silver bullion, coin, &c.), manufactured articles and articles of food and drink are the chief items from which the customs revenue is derived. Under this head are also included the proceeds of export duties on rice, on jute (imposed in 1916), and on raw skins (imposed in 1919); and of excise duties on motor spirit (imposed in 1917), on silver (imposed in March, 1930), on kerosene (imposed in 1922), and on sugar and matches (imposed in March, 1934). The import of silver bullion and coin except under licence was prohibited in July, 1917, but the prohibition was withdrawn during 1920–21. The various import, export and excise duties levied by Government will be found in the Indian Tariff Act 1894, the various Export Duty and Excise Duty Acts respectively as subsequently modified by the Indian Tariff (Ottawa Trade Agreement) Amendment Act, 1932, and the Indian Finance Act, 1934.

[5] Includes the proceeds of a super-tax imposed in 1917, and an excess profits duty imposed in April, 1919. The rates of assessments have varied from year to year. The rates at present applicable are those as shown in the Indian Finance Act, 1934.

[6] Revised estimates. [7] Budget Estimates.

Land Revenue.—This is levied according to an assessment on estates or holdings. In the greater part of Bengal, and Bihar and Orissa, about one-fourth of Madras, and some districts of the United Provinces of Agra and Oudh, the assessment was fixed permanently at the end of the 18th century; while it is fixed periodically at intervals of from twelve to forty years over the rest of India. For details as to the nature of the different tenures of land that prevail in India *see* the YEAR-BOOK for 1886, p. 799. *See* also under AGRICULTURE.

The land revenue was contributed in 1933–34 (revised estimate) as follows:—

Administrations	Rs.	Administrations	Rs.
India, General	10,58,000	Burma	4,35,35,000
Baluchistan	9,59,000	Shan States Federation	2,51,000
Madras	4,63,41,000	Bihar and Orissa	1,77,91,000
Bombay	4,70,36,000	Central Provinces	2,47,90,000
Bengal	3,18,32,000	N.W. Frontier Province	19,67,000
United Provinces	5,69,65,000	Assam	1,09,20,000
Punjab	2,56,85,000	Coorg	3,75,000

Opium.—In British territory the cultivation of the poppy for the production of opium is practically confined to the United Provinces, and the area under cultivation in that Province is being gradually reduced. Opium is also grown in many of the Indian States of Central and Northern India. The question of suppressing poppy cultivation in these States has been investigated by a Committee, which started work in November, 1927. After giving careful consideration to the report submitted by the Committee, the Government of India have entered into fresh contracts with the States for the supply of crude opium to Government on a quota system with an assurance that these quotas will not be reduced except *pari passu* with the diminution of production in British India. These agreements will remain in force for a period of four years ending on June 30, 1936, during which period the States will submit to effective restriction or prohibition of cultivation otherwise than for the Government of India. Public auctions at Calcutta were discontinued from April, 1926. Export to China was prohibited in 1913; and in June, 1926, the Government of India decided to reduce progressively exports of opium from India, except for strictly medical and scientific purposes, so as to extinguish them altogether at the end of 1935. The maximum for each country is fixed, and a reduction of 10 per cent. of the 1926 exports is made each year.

Army Expenditure.—The net expenditure in recent years on defence services is given as follows:—

Year ended March 31	—	Year ended March 31	—
	Rs. Crores		Rs. Crores
1928	54.79	1932	51.76
1929	55.10	1933	46.74
1930	55.10	1934 (Revised Estimates)	44.42
1931	54.30	1935 (Budget Estimates)	44.38

Debt.—On March 31, 1934, out of a total debt of 1,212,38 crores (sterling portion converted at 1*s.* 6*d.* = R. 1), 800.95 crores were productive in railways, telegraphs and irrigation; 207.83 crores were unproductive; 26.88 crores on account of cash, bullion and securities held on Treasury account; and 176.72 crores were incurred on behalf of Provincial Governments.

Finance of Separate Governments, and Local Finance.—The revenue and expenditure of each Government, Central and Provincial, in 1933–34 (revised estimates) were as follows:—

Government	Revenue	Expenditure
	Rs.	Rs.
India, Central	1,19,30,94,000	1,19,30,94,000
Madras	15,76,37,000	15,75,76,000
Bombay	15,64,62,000	15,60,76,000
Bengal	9,06,56,000	10,94,49,000
United Provinces	11,38,88,000	11,30,48,000
Punjab	10,78,78,000	10,21,04,000
Burma	7,76,15,000	9,10,20,000
Shan States Federation	30,82,000	31,20,000
Bihar and Orissa	5,00,60,000	5,10,91,000
Central Provinces	4,58,96,000	4,73,24,000
N.W. Frontier Province	1,67,93,000	1,67,92,000
Assam	1,96,70,000	2,39,38,000
Coorg	12,42,000	14,03,000

Local Funds.—The above excludes the revenue and expenditure of municipalities and of district and local boards. The income of the former is derived mainly from rates, octroi, taxes on houses, lands, vehicles and animals, tolls, and assessed taxes; and of the latter from cesses on land. The gross income for 1930-31 of all municipalities was Rs.36,59,70,350. The gross expenditure was Rs.36,24,59,576. The income of district and local boards was Rs.16,57,04,942, and the expenditure Rs.16,88,41,735.

Defence.

The defence forces of India consist of units of the Royal Air Force, units of the British Regular Army, the Indian Army, the Auxiliary and Territorial Forces, the Indian Army Reserve and the Indian State Forces. With the exception of the last, these forces are administered by the Air Vice-Marshal and the headquarters staff of the Army in India respectively, under the supreme control of the Commander-in-Chief, who is the Army-Member of the Viceroy's Executive Council. The military forces are organised into the Northern, Southern, Eastern and Western Commands, and the Burma Independent district; each Command contains a number of districts and independent brigades. The garrison of Aden was transferred in 1927 from the Indian to the Home Command.

The British regular forces in India are paid by the Indian exchequer. They are organised in brigades and divisions with the Indian Army, the normal proportion being 1 British battalion to 3 Indian. There are 19½ Indian Pack Batteries. The formation of first Indian field artillery brigade is in process. The personnel of the remaining batteries of Horse, Field and Garrison Artillery is wholly British except for a proportion of Indian drivers. The Tank Corps and Royal Air Force are wholly British.

The Auxiliary Force, organised under the Indian Auxiliary Force Act, 1920, is confined to persons of British extraction. Enrolment is voluntary, but entails periodical training extending to 64 hours annually for infantry and 80 hours for other arms. The force, which comprises all arms, is liable to be called out or embodied for local service within strictly defined limits, and acts as a second line to the permanent garrison of India. Its strength in 1934 was about 30,000.

The Indian Territorial Force was brought into existence in 1920, and is organised on the lines of a militia, with an annual training of 28 days. It is intended to form a second line to the regular Indian Army in time of war, the

whole of its personnel being liable to general service. Its strength in 1934 was about 12,000. There is besides an university training corps with a strength of 4,260.

The Army in India Reserve has been recently re-constituted. The former classes A and B are being eliminated. There is now an Army in India Reserve of officers with a strength of 1,850, and class C of the army in India Reserve comprising reservists of all arms with a strength of about 40,000.

The Indian State Forces are raised and maintained by Indian States, and are trained under the supervision of British officers, who act in an advisory capacity. Strength, in 1933, about 44,000.

The composition of the forces in India was, in 1933, except for Indian State Forces, as follows:—

	Cavalry Regiments	R.H.A. Batteries	R.F.A. Batteries	Medium Batteries	Pack Batteries	S. & M. Field Troops	S. & M. Field Companies	Infantry Battalions	Pioneer Battalions	Armoured Car Companies

Auxiliary Force	10	21	¾	18	25	7	4	—
Territorial Force	—	—	—	—	22	—	—	11

The strength of the British army in India in 1934 was 57,665, and of the Indian Army 166,600. The Field Army is organised in 4 divisions and 5 cavalry brigades.

The supply and transport services are provided by the Indian Army Service Corps. The medical services of the British troops are provided by the Royal Army Medical Corps, and those of the Indian Army by the Indian Medical Service.

There are 2 battalions of the Indian Army serving in China and Malaya. These are paid by the British exchequer.

The 4th division of the army has been selected for gradual Indianisation. Ten Indian gentlemen are now nominated annually to the Royal Military College, Sandhurst, to enable them to qualify for commissions in the Indian Army. The Prince of Wales' Royal Indian Military College at Dehra Dun was opened in 1934 as the Indian Sandhurst.

The Royal Air Force in India comprises 6 squadrons organised in 3 wings of 2 squadrons each; the Aircraft Depot and Aircraft Parks are directly under R.A.F. Headquarters, India. Its establishment is 168 officers and

1,094 British and 165 Indian other ranks. The military estimates for 1934–35 amounted to 419,600,000 rupees.

The Royal Indian Navy is the oldest service in India, tracing its origin to the formation of a squadron by the East India Company in 1612. Formerly known as the Royal Indian Marine, it was given its present status by the Indian Navy (Discipline) Act of 1934, which provides that the discipline of the force shall be regulated by the British Naval Discipline Act, amended to suit local conditions.

At present the seagoing units comprise the 5 sloops *Indus, Hindustan, Cornwallis, Clive* and *Lawrence*, a surveying vessel, a patrol vessel and a trawler, used for target towing. Rear-Admiral Arthur E. F. Bedford, C.B., is the flag-officer commanding.

Agriculture and Industry.

Agriculture, Land Tenure, &c.—The chief industry of India has always been agriculture. The total number of the population supported by agriculture, including forestry and raising of livestock, and excluding non-working dependents, was, according to the census of 1931, about 110 millions out of a total population of 353 millions. In most of the provinces there is a Department of Land Records, and in every province a Department of Agriculture. There are staffs of experts in the provinces; an Imperial staff of experts with a fully equipped central station, Research Institute and College for post graduate training of private students and of those who have completed the Agricultural Course in provincial colleges; a Civil Veterinary Department for the prevention and cure of cattle diseases; an Imperial Institute for veterinary research for the preparation of sera and antitoxins, and an Imperial Institute of Animal Husbandry and Dairying. Following the recommendations made by the Royal Commission on Agriculture, an Imperial Council of Agricultural Research has been established by the Government of India with the object of promoting, guiding and co-ordinating agriculture and veterinary research throughout India. Improved varieties of crops had been introduced in 1929–30 in about 14 million acres, the average increased value of the produce being some Rs. 15 crores.

In provinces where the *zamíndárí* tenure prevails (*i.e.*, where single proprietors or proprietary brotherhoods possess large estates of several hundreds or thousands of acres), the State land revenue is assessed at an aliquot part (usually about one-half) of the ascertained or assumed rental, this aliquot part being itself the land tax. The revenue is payable on each estate as a whole, the assessment remaining unchanged for the period of settlement. In the greater part of Bengal, and Bihar and Orissa, and in parts of the United Provinces and Madras the settlement is a permanent one and not liable to revision. In provinces where the *raiyatwárí* (or *ryotwarí*) tenure prevails (*i.e.*, where each petty proprietor holds directly from the State, and has no landlord between himself and the Government), the revenue is separately assessed on each holding, and land revenue becomes payable at once (or after a short term of grace in the case of uncleared lands) on all extensions of cultivation. The *raiyatwárí* proprietor may throw up his holding, or any portion of it, at the beginning of any year after reasonable notice, whereas the *zamíndár* or large proprietor engages to pay the revenue assessed upon him throughout the term of the settlement.

The following table shows in 1930–31 the latest available returns of the land surveyed under the two types of tenure, and the land revenue assessed:—

Of the total area under irrigation in 1931–32, 25,217,156 acres were irrigated by canals; 6,246,811 acres by tanks; 11,653,323 acres by wells; and 5,747,586 acres by other sources. The total area irrigated by Government Works of all classes in India during 1930–31 was about 31 million acres, as compared with 31·6 million acres irrigated in 1929–30. The net return on capital outlay was 4·7 cent. in 1930–31.

Livestock Census, in British India (exclusive of Baluchistan), 1930–31: oxen, 121,450,000; buffaloes, 31,418,000; sheep, 25,295,000; goats, 35,743,000; horses and ponies, 1,683,000; mules, 75,000; donkeys, 1,371,000; camels, 526,000.

Forests.—The lands under the control of the Provincial Forest Departments are classified as 'Reserved Forests' (forests intended to be permanently maintained for the supply of timber, &c., or for the protection of water supply, &c.), 'Protected Forests,' and 'Unclassed' forest land. The following table shows the extent of these areas in 1932–33:—

The net revenue from the State forests in 1932–33 was about Rs. 86,14,468.

Industries.—The most important indigenous industry, after agriculture, is the weaving of cotton cloths. Other important indigenous industries are silk rearing and weaving, shawl and carpet weaving, wood-carving and metal-working. One of the most important industries connected with agriculture is the tea industry, the average number of persons employed being about 859,700. The area under tea in 1932 was about 807,700 acres, distributed as follows: Assam, 428,100; Bengal, 198,100; Bihar and Orissa, 3,700; United Provinces, 6,300; Punjab, 9,600; Madras, 73,500; Coorg, 400; Tripura (Bengal), 8,900; Travancore, 74,400; Mysore, 4,200; and the Cochin State, 500. The production was, in 1932, 434 million lb. The exports of Indian tea from British India (including the State of Travancore) in 1933–34 were: to United Kingdom, 276,679,000 lb.; Canada, 15,129,000 lb.; United States, 8,327,000 lb.; Persia, 1,075,000 lb.; and to Australasia, 4,504,000 lb. The total exports were 342,385,000 lb. in 1931–32; 379,827,000 lb. in 1932–33; and 318,291,000 lb. in 1933–34.

The railways open on March 31, 1934, included 31,696 miles of Imperial State lines and 6,970 miles of Indian State lines. There were 12 miles of new railway lines opened in 1933–34.

The gauges of the Indian railways in 1933–34 were: (1) The Standard, or 5ft. 6in. (21,132 miles); (2) The Metre, or 3ft. 3⅜in. (17,644 miles); and (3) The Special gauges of 2ft. 6in. and 2ft. (4,177 miles).

The total capital at charge on Railways to the end of 1933-34, including lines under construction and survey, &c., was Rs. 8,84,41,05,000. From 1924–25 Railway Finance has been separated from the general finances of Government. The Delhi–Umballa–Kalka Railway was purchased by the State in April, 1926, and the Southern Punjab Railway on January 1, 1930.

Passengers carried in 1933–34, 489,613,000; aggregate tonnage of goods and live stock, 76,513,000; gross earnings on railways, Rs. 99·56 crores; working expenses, Rs. 69·53 crores; net earnings, Rs. 30·03 crores; average return on the capital at charge 3·40 per cent. The net loss to the State, after meeting all charges for interest, &c., was Rs. 8·39 crores. The railway staff at the close of 1933–34 numbered 3,906 Europeans and 701,362 Indians; total, 701,362.

India and Ceylon are connected by rail and steamer ferry combined, the steamers plying between Dhanushkodi Point on Rameswaram Island and Talaimannar in Ceylon.

II. Posts, Telegraphs, and Telephones.

On March 31, 1934, there were 23,676 post-offices and 59,372 letter-boxes.

In the year 1933–34, the number of letters, post-cards, and money-orders passing through the post-offices was 936,911,000; of newspapers 69,723,000; of parcels 13,734,000; and of packets 116,904,000; being a total of 1,137,272,000.

There were 13,229 telegraph offices in India on March 31, 1934. Statistics of the Government telegraphs for 1933–34 :—Miles of wire, 593,555; miles of line, 107,216.

The number of wireless stations maintained and worked by the Indian Posts and Telegraphs Department on March 31, 1934 was 27, of which six were coast stations available for general public correspondence with ships at sea, and the remainder were inland stations. Eleven of these stations provided regular communication with aeroplanes in connection with Air

Services. At three of the coast stations and seven others direction-finding installations were working.

The telephone system is in the hands of the Indian Posts and Telegraphs Department, but telephone exchanges have been established in Calcutta, Madras, Bombay, Ahmedabad, Karachi, Rangoon, and Moulmein, by private companies, under licences from the Government. On March 31, 1934, there were 25 telephone exchanges, with 37,400 connections, established by the licensed companies, and 330 exchanges with 22,804 connections established by the Department.

Money and Credit.

The value of money coined at the Calcutta and Bombay Mints in five years was as follows :—

Year ended March 31	Silver	Nickel	Copper	Bronze	Total
	Rs.	Rs.	Rs.	Rs.	Rs.
1929	52,66,573	32,15,475	—	7,45,490	92,27,538

A branch of the Royal Mint was established at Bombay at the end of 1917, but since April, 1919, the Branch Mint has been closed.

In August, 1926, the Royal Commission on Indian Currency and Finance submitted their report, including the recommendation of the stabilisation of the rupee at a rate corresponding to an exchange rate of 1*s.* 6*d.* (gold). In March, 1927, the Indian Currency Act made this stabilization statutory.

Since 1900, rupees have been coined as required to meet public demands. The entire profit accruing to Government on the coinage up to March 31, 1907, and during the year 1912–13, and half such profit for the years 1907–08 and 1908–09 were placed to the credit of a separate fund termed the Gold Standard Reserve, with the object of ensuring the stability of the currency policy of Government. The net profits arising from rupee coinage as well as from the investment of the Reserve were credited to the Reserve up to 1922–23 when it reached the limit of 40,000,000*l.*, at which figure the Reserve is being maintained at present. There has been no coinage from purchased silver since 1921–22 ; therefore no profit accrued from this source since that year.

Notes of the values of one, two-and-a-half, five, ten, fifty, hundred, five hundred, and thousand rupees are legal tender throughout British India. The total value of notes in circulation on March 31, 1933, including the notes held in Government treasuries and the Head Offices of the Imperial Bank of India, was Rs. 176,89,58,188.

BRITISH PROVINCES.

Information concerning the Provinces in British India is given below, in alphabetical order.

AJMER-MERWARA.

An agency subordinate to the factory at Surat was established at Ajmer early in the 17th century. The British received the tract by cession after the Pindari War in 1818. This small province of Ajmer-Merwara consists of one district with three sub-divisions, Ajmer, Kekri, and Merwara, with an area of 2,711 sq. miles and a population of 560,292 (1931 census). The administration is under a Chief Commissioner, who in the capacity of Agent to the Governor-General in Rajputana resides at Mount Abu. The local administration is under a Commissioner. The city of Ajmer has a population of 119,524. The income of the province was Rs. 18·95 lakhs in 1932–33, and the expenditure Rs. 31·86 lakhs. In 1933 there were 17,786 scholars in 269 recognised educational institutions for males; and 3,546 in 53 similar institutions for females. The Government College at Ajmer had 298 students in 1933.

Chief Commissioner.—The Hon. Lt.-Col. G. D. Ogilvie, C.S.I., C.I.E. (appointed October 29, 1932); salary, Rs. 48,000 per year.

Administration Report. Annual. Calcutta.

ANDAMAN AND NICOBAR ISLANDS.

The **Andaman Islands** lie in the Bay of Bengal, 120 miles from Cape Negrais in Burma, the nearest point on the mainland. Five large islands closely grouped together are called the Great Andaman, and to the south is the island of Little Andaman. There are some 200 islets, the two principal groups being the Ritchie Archipelago and the Labyrinth Islands. The total area is 2,508 square miles. The Great Andaman group is about 219 miles long and, at the widest, 32 miles broad. The group, densely wooded, contains many valuable trees, the best known of which is the *padauk* or Andaman redwood. The islands possess a number of harbours and safe anchorages, notably Port Blair, Port Cornwallis, and Bonington, the last being most favourably situated for forest trade. The aborigines, 474 (255 males and 219 females) in 1931, live in small groups over the islands; some are savages of a low Negrito type. The total population of the Andaman Islands (excluding the aborigines) in 1934 was 14,924 (11,248 males and 3,676 females). In 1933–34 the forest receipts amounted to Rs. 14,01,064. The coconut, rubber, Manila hemp, and Bahamas aloe are successfully cultivated. In 1934 there were 9,273 head of cattle and 3,789 goats. There is wireless telegraphy with Burma and Madras. Mail steamers connect Port Blair with Calcutta, Rangoon, and Madras. The islands have been used since 1858 by the Government of India as a penal settlement for life and long-term convicts, but the practice is being discontinued, the island being left to develop on free lines. The settlement possesses about 72,362 acres of cleared land. There were, in 1934, 5,986 convicts (including 86

women) in the place, of whom 1,711 (including 88 women) were on ticket-of-leave in the settlement supporting themselves. The Andaman Islands are under the Government of India, and the Officer in Charge is the Chief Commissioner.

Man (E. H.) and *Ellis* (A. J.), On the Aboriginal Inhabitants of the Andaman Islands. (Reprinted from the Journal of the Anthropological Institute, 1932).

The **Nicobar Islands** are situated to the South of the Andamans, 75 miles from Little Andaman. The British formally took possession in 1869. There are twenty-one islands, nine uninhabited; total area, 635 square miles. The islands are usually divided into three groups, Southern, Central, and Northern, the chief islands in each being respectively, Great Nicobar, Camorta with Nankauri, and Car Nicobar. There is a fine land-locked harbour between the islands of Camorta and Nankauri, known as Nankauri Harbour. The Nicobarese inhabitants numbered 9,481 (4,889 males and 4,592 females) in 1931. The islanders are known to have pursued the coconut trade for at least 150 years. The coconut production is estimated at 15 million nuts per annum, of which some 8 million are sold by barter and exported in small native craft and Chinese junks in the form of copra. The Government is represented by a permanent Assistant Commissioner at Car Nicobar and a Tahsildar at Nankauri. The islands are attached to the Chief Commissionership of the Andamans and Nicobars.

Chief Commissioner at Port Blair.—J. W. Smyth, Esq., C.I.E., I.C.S.: salary, Rs. 36,000 per year.

ASSAM.

Constitution and Government.—Assam first became a British Protectorate at the close of the first Burmese War in 1826. In 1832 Cachar was annexed: in 1835 the Jaintia Hills were included in the East India Company's dominions, and in 1839 Upper Assam was annexed to Bengal. In 1874 Assam was detached from the Administration of the Lieut.-Governor of Bengal, and made a separate Chief Commissionership. On the partition of Bengal in 1905, it was united to the Eastern Districts of Bengal under a Lieut.-Governor. From 1912 the Chief Commissionership of Assam was revived; and from 1921 a Governorship was created. There are two Members (one an Indian) of the Governor's Executive Council for 'reserved' subjects, and two Indian Ministers for the 'transferred' subjects. The Legislative Council consists of 53 Members, 39 elected, and 14 nominated and *ex-officio* (not more than 7 may be officials). For the purposes of administration there are two Commissionerships with 12 Districts and 3 frontier tracts. There are 19 Local Boards; and there are 17 Municipalities and 9 Town Committees. The territories comprising the hill districts (except the Shillong municipality and cantonment in the Khasi and Jaintia Hills district), the frontier tracts, the Mikir Hills (in Nowgong and Sibsagar), and the North Cachar Hills (in Cachar), are declared 'backward tracts.'

Governor.—H.E. Sir Michael Keane, K.C.S.I., C.I.E., I.C.S.; appointed May 11, 1932; salary Rs. 66,000 per year.

Area, Population and Religion.—The plains districts, the hill districts and the administered portions of the frontier tracts, exclusive of the State of Manipur and the Khasi States, which are not British territory, cover an area of 55,014 square miles, with a population of 8,622,251 in British territory. Of these, 57 per cent. are Hindus, 32 per cent. are Muslims, and 8 per cent. follow tribal religions. The capital is Shillong. Manipur State with an area of 8,620 square miles and a population of 445,606, and the Khasi States, consisting of 25 chieftainships of various degrees of importance, with an area of 3,700 square miles and a population of 180,000, are under the political control of the Assam government.

Instruction.—There were two Government Art Colleges, affiliated to the Calcutta University, with 1,295 students in 1932–33; also the Earle Law College, at Gahuati, founded in 1914, with 53 students on its roll. There were also two new private colleges up to the intermediate standard. The number of secondary schools for boys was 464 with 65,281 pupils: primary schools for boys numbered 5,263, with 249,119 pupils. The number of girls at school was 65,728. There were 3,093 pupils in 101 Tea Garden schools of 'A,' 'B' and 'C' classes.

Justice and Crime.—The Province (Manipur State and the hill and frontier areas, other than the areas within the Municipality and Cantonment of Shillong in respect of criminal cases, excepted) is under the jurisdiction of the High Court of Calcutta. For criminal work there were, in 1932, 2 Sessions Judges and 118 other Officers. In 1932, 28,044 criminal cases were brought to trial, and 49,935 civil suits were instituted. The Assam Rifles, with 4 Battalions—formerly known as the Military Police—supply garrisons for the frontier. There is a civil Police Force of 4,388 under an Inspector-General.

Finance.—The gross revenue for 1932–33 was 238 lakhs of rupees, to which Land Revenue contributed 118 lakhs, Excise 40 lakhs, Forests 16 lakhs, and Stamps 18 lakhs. The total expenditure in 1932–33 was 248 lakhs. General Administration cost 27 lakhs, Education 31 lakhs, Police 26½ lakhs, Land Revenue Administration 19 lakhs, and Forests 14 lakhs.

Production and Industry.—The cultivation and manufacture of tea is the principal industry in Assam. Agriculture employs nearly 89 per cent. of the population. Silk-weaving and Cotton-weaving are the most important of the Home Industries. At the end of 1932 there were 998 Tea Gardens with 428,012 acres under tea. The area of tea plucked in 1932 was 399,307 acres; the total out-turn was 257 million lb., and the daily average number of persons employed was 522,072. All-India statistics regarding the tea industry are given on p. 135. In 1932–33 there were 6,184 sq. miles of reserved forests. In 1933, 52,771,987 gallons of crude oil were extracted from the oil fields of the province.

Commerce and Communications.—In 1932–33 there were 606·8 miles of metalled roads, 1,648 miles of unmetalled roads, and 2,196 miles of bridle roads. The open mileage of railways was 1,332 miles.

BALUCHISTAN.

Government.—After the Afghán War, 1878–81, the districts of Pishín, Shorarúd, Duki, Sibi, and Sháhrig were assigned to the British and in November, 1887, were formally constituted as British Balúchistán. In 1883, the districts of Quetta and Bolán were made over by the Khán to the British on an annual quit-rent of Rs. 25,000 and Rs. 30,000 respectively. In 1886, the Bori valley, in which is now the cantonment of Loralai, was occupied. In 1887, the Khetrán country, now known as the Bárkhán tahsil, was brought under British control; in 1889 British authority was established in the Zhob valley and Kákar Khurásán; in 1896 Chágai and Western Sinjráni were included in administered territory; in 1899, the Nuskhi Niabat was made over by the Khán of Kalát on an annual quit-rent of Rs. 9,000; and in 1903 the Nasirábád tahsil was acquired from the Khán on an annual quit-rent of Rs. 117,500. The area of British and administered territory, including tribal areas, is 54,228 sq. miles, and the population (1931) 463,508. The chief town is Quetta, with a population (1931) of 60,272 (town proper 34,881, and cantonment 25,391). It is the only municipality. The head of the civil administration is the Agent to the Governor-General and Chief Commissioner in Balúchistán. The area under his direct administration is divided as follows: Quetta-Pishín, Sibi, Zhob, Loralai, Chágai districts and Bolán Sub-division. The revenue administration of the Province is entrusted to an officer who is styled the Revenue and Judicial Commissioner.

Regular troops are cantoned at Quetta, Chaman, Fort Sandeman, and Loralai, and detachments are stationed at different places, principally in the Zhob and Loralai Districts, for the preservation of law and order. There is also a police force, supplemented by levies. The Indian Staff College was opened in Quetta in 1907.

Agent to the Governor-General and Chief Commissioner in Balúchistán.—Hon. Sir Alexander N. L. Cater, K.C.I.E., I.C.S.: salary, Rs. 48,000 per year.

Area and Population.—Area, 134,638 square miles; population (1931 census), 868,617. The main divisions are: (1) British Balúchistán proper, with an area of about 9,084 square miles, consisting of tracts assigned to the British Government by treaty in 1879; (2) Agency Territories, with an area of about 45,144 square miles, composed of tracts which have from time to time been acquired by lease, or otherwise brought under control, and placed directly under British officers; and (3) the States of Kalát and Las Bela, with an area of about 80,410 sq. miles, the former consisting of a confederation of tribes under the Khán of Kalát, and stretching westwards to Persia, while the latter occupies the alluvial valley between the Pab and Hálá ranges from the sea to Bela.

Religion and Education.—The religion of the population is either Musalman, in general of the Sunni sect, or Hindu. The Musalmans numbered (1931 census) 798,093; Hindus, 53,681; Christians, 8,059; Sikhs, 8,425; others, 359. At the close of 1931–32 there were 108 public schools and 172 private schools, of which 9 and 2 respectively are girls' schools. There are also 2 European schools for boys and girls. Of the 10,225 pupils 2,103 were girls.

Justice.—Almost all cases in which local men are concerned are referred to 'councils of elders' (locally called *jirga*) for settlement along the well-tried lines of the ancient customary and tribal law.

Finance.—In the directly administered territory the chief items of revenue are: Taxes on income, land revenue, excise and stamps. In some places the land revenue is levied in money in accordance with a fixed assessment, but generally it is levied in kind. The revenue from all sources in 1933–34 was Rs. 20·71 lakhs; and the expenditure Rs. 95·29 lakhs.

Production and Industry.—The country consists largely of barren mountains, deserts and stony plains; its climate is subject to the extremes of heat and cold, and the rainfall is uncertain and scanty. The agricultural products are wheat, barley, millet, lucerne, rice, maize, and potatoes; while grapes, apricots, peaches, apples, pears and melons are grown in abundance. Panjgúr in Mekrán is famous for its dates.

Commerce and Communications.—Registration of trade was discontinued from April, 1925. There are 1,059 miles of motor-roads (continuously maintained), 1,486 miles of motor tracks (put in order as required), and 119 miles of pack-tracks (cleared when required), and 709 miles of broad gauge and 174 miles of narrow gauge railway.

The North-Western railway, gauge 5ft. 6in., enters Balúchistán near Jhatpat and crosses the Kachhi plain to Sibi, where it bifurcates, one branch going by Harnai and the other by Quetta, and reunites at Bostán, whence the line runs to Chaman. There is a line of railway to Nushki 82½ miles long, and an extension from Nushki up to Nok Kundi on the Persian border, and also a short narrow gauge line from Khanai to Fort Sandeman, a distance of about 174 miles.

There is a complete and frequent postal service in British and administered territory, extending to Kalát and through Nok Kundi to Zahedan, Seistan and Meshed.

A network of telegraph wires covers the north-eastern portion of the Province and extends to Kalát, and westwards *via* Nushki to Killá Robát, while two land lines, formerly part of the Indo-European system but now worked by the Indian Department of Posts and Telegraphs, connect Karachi with the Gulf Ports *via* Ormara–Pasni–Gwadur and Las Bela–Panjgur–Bahri respectively.

BENGAL PRESIDENCY.

Constitution and Government.—The British first came to the shores of Bengal in 1633, when the first factories were established. A new centre of trade was fixed by Job Charnock at Calcutta in 1690. In 1699 Bengal was constituted a separate Presidency, and there were Presidents and Governors of Fort William from 1700 to 1774, the last being Warren Hastings. There were Governors-General of Fort William from 1774 to 1834. In 1834 the Bengal Presidency was divided into two Presidencies, 'Agra' and 'Fort William in Bengal.' In 1854 the Government of Bengal was entrusted to a Lieutenant-Governor, the offices of Governor-General of India and Governor of Bengal having previously been united in one person. In 1874 the Bengal Province was reduced to Bengal proper, Bihar and Orissa. In 1905 a portion of Bengal proper together with Assam went to form a new Province, Eastern Bengal and Assam. In 1910 the Government of the remainder of Bengal with Bihar and Orissa was constituted into a Lieutenant-Governorship with

an Executive Council consisting of three Members. A new Presidency of Bengal, reuniting all the Bengali-speaking districts, was established in 1912 under a Governor in Council (three Members). Finally, from 1921, in accordance with the Government of India Act of 1919, the administration consisted of the Governor with four Executive Councillors (two being Indians) for the 'reserved' subjects and of the Governor with three Indian Ministers for the 'transferred' subjects. The hot weather capital is Darjeeling. There is a Legislative Council of 140 Members consisting of 114 elected and 26 nominated and *ex-officio* Members (not more than 20 may be officials). For administrative purposes there are five divisions, under which there are 27 districts, exclusive of Calcutta. For the purposes of Local Self-Government there are 26 District Boards, all except two with non-official Chairmen; 82 Local Boards; and 2,217 smaller units called Union Boards. There are 115 Municipalities. The Calcutta Corporation was reconstituted by an Act of 1923 with a Mayor, Chief Executive Officer and other officials, all of whom are to be elected by the Corporation; there are 85 Councillors and 5 Aldermen.

Governor.—H.E. The Rt. Hon. Sir John Anderson, G.C.B.: appointed November, 1931: salary Rs. 120,000 per year.

Area, Population and Religion.—Bengal in its present form, as reconstituted in 1912, covers 82,955 square miles, of which 77,521 square miles are British territory. The population (1931) is 50·1 million in British territory and 973,336 in two Indian States. Calcutta with its suburbs accounts for 1,196,734; the urban population of the remainder of the Province is only 4 per cent. of the whole. Howrah has a population of 224,873; and Dacca of 138,518. Mohammedans constitute 55·5 per cent. and Hindus 43 per cent. Of the 183,067 Christians, 22,955 were Europeans. Bengali is the mother tongue of 92 per cent. of the total population, though altogether 80 different languages are found spoken in Bengal.

Education.—Recognised Educational Institutions in 1926–27 numbered 58,833, and unrecognised 1,610. The number of pupils in all classes of Institutions was 2,343,380. The Calcutta University is both an affiliating and a teaching University, dating from 1857. Dacca University is a teaching University, founded in 1921. Art Colleges for males number 41 with 22,131 students; of these 9 were maintained by Government. There were 2,675 secondary schools for Indian boys. The primary schools for boys numbered 38,187. Of the total number of pupils in primary schools 53·3 per cent. were Muhammedans and 45·9 per cent. were Hindus. There were 98 Institutions for the training of teachers. There were 731 students in Engineering in 2 Institutions. There were 14,748 Institutions of all kinds for Indian girls. For children of Europeans and Anglo-Indians there were 62 Institutions.

Justice and Crime.—The High Court consists of a Chief Justice and 16 Judges. For Criminal and Civil justice there were in 1927 42 District and Sessions Judges (including Additional Judges). For Criminal justice there were 411 stipendiary and 635 honorary Magistrates, and for Civil justice 44 Subordinate Judges and 235 Munsifs (Civil Judges of the first instance). There were 295,039 criminal cases brought to trial in 1927; and outside Calcutta 588,164 civil suits were instituted. The Bengal Police has a strength of 24,325 under an Inspector-General. The Calcutta force is a separate force under a Commissioner of Police who is directly under Government.

Finance.—The Revenue (revised estimates) collected in 1927–28 was 1,077 lakhs of rupees. To this sum Stamps furnished the largest contribution, nearly 350 lakhs; next, Land Revenue, 315 lakhs, and then Excise, 224 lakhs. Registration fees gave 40 lakhs and Bengal Forests 34 lakhs. On the expenditure side the total was 1,103 lakhs. Police cost 188 lakhs, Education 138 lakhs, General Administration 119 lakhs, and Medical Department 55 lakhs. The administration of Justice cost 108 lakhs. Forests gave a surplus of income over expenditure of 17 lakhs. As a special measure, the annual contribution of 63 lakhs to the Central Government has been remitted for six years from 1922–23.

Production and Industry.—During the close of 1926 there were 1,234 registered factories of all kinds. There were 85 jute mills and a daily average of 325,190 operatives. Cotton mills numbered 12 with 12,781 operatives. The Coal Mining Industry in Bengal had in 1926–27 209 mines, employing 43,506 operatives with an output of 5,137,688 tons. Seventy-seven per cent. of the population depend on agriculture.

Commerce and Communications.—The foreign trade of Bengal in 1927–28 amounted to 89 crores of rupees of Imports and 148 crores of Exports. Cotton goods accounted for 34·06 per cent. of the Imports. Of the Exports, jute manufactures and raw jute accounted for 62·2 per cent. The United Kingdom sent 55·9 per cent. of the Imports, and received 21·6 per cent. of the Exports.

In 1926–27 the length of metalled roads was 3,434 miles and of unmetalled roads 34,261 miles. Bengal possesses no less than 1,876 miles of navigable canals. The length of railways within the province on March 31, 1927, was 3,288 miles.

BIHAR AND ORISSA.

Constitution and Government.—The Province, containing the three different ethnic areas, Bihar, Chota Nagpur and Orissa, was taken from the old Province of Bengal and constituted under a Lieut.-Governor in Council in 1912. After the Reforms Act of 1919, the administration was changed into a Governorship. For the 'reserved' subjects there is an Executive Council with two Members (one an Indian), and for the 'transferred' subjects two Indian Ministers. There is a Legislative Council of 103 Members, 76 elected and 27 nominated and *ex-officio* (of whom no more than 18 may be officials). For the purposes of administration there are 5 divisions, covering 21 districts.

Governor.—H.E. Sir James David Sifton, K.C.S.I., K.C.I.E., I.C.S., appointed April 7, 1932; salary Rs. 8,333.5.7 per month.

Area, Population and Religion.—The British territories cover 83,054 square miles, with a population of 37,677,576. The States of Orissa and Chota Nagpur attached to the Province of Bihar and Orissa have an area of 28,648 square miles and a population of 4,652,007.

The three principal towns are Patna, the capital (159,690), Bhagalpur (83,847), and Gaya (88,005). The hot weather seat of the Government is at Ranchi. Hindus form the great majority of the population.

Education.—At the census of 1931 the proportion of literates was only 5·3 per cent. as compared with 10·6 for the rest of India. The percentage of Indian boys attending school reached 5·2 in 1932–33 The University of Patna constituted in 1917 is an affiliating University. A Board of Secondary Education was constituted in 1922. In 1932–33 there were 3,533 students in Arts and Science Colleges. There were 139,062 pupils in 971 secondary schools, and 891,231 pupils in 27,426 primary schools. There is a College for Engineering at Patna (Bihar) and a School at Cuttack (Orissa); also the Tirhut Technical Institute and the Ranchi Technical School.

Justice and Crime.—There is a High Court (constituted in 1916) at Patna with a Chief Justice and 8 Judges. On the Criminal side there are Sessions Judges, Stipendiary and Honorary Magistrates. For the administration of Civil Justice there are District Judges, Subordinate Judges, and Munsiffs (Courts of first instance). The Police Force is under an Inspector-General; there is one policeman to 2,624 of the population and to 5·7 square miles of the area of the Province, the combined proportion being less than in any other Province of India.

Finance.—The revenue (revised estimates) for the Bihar and Orissa Province in 1933–34 was Rs. 501 lakhs, including Rs. 122 lakhs from Excise, Rs. 178 lakhs from Land Revenue, Rs. 112 lakhs from Stamps, and nearly Rs. 7 lakhs from the Forest Department. The expenditure was Rs. 511 lakhs. The chief items were: Police Rs. 85·7 lakhs, Education Rs. 82 lakhs, and General Administration Rs. 69 lakhs. No contribution is required for the Central Government. Budget, 1934–35: Revenue, 522 lakhs; expenditure, 537 lakhs.

Production and Industry.—The Province is principally agricultural; 814 persons per mille depend on agriculture for their livelihood, and 963 per mille live in villages. The principal crop, rice, covers nearly half the cropped area; then come sugar-cane and maize. The area under indigo in Bihar was 4,800 acres in 1930. The principal coal area is in the Manbhum and Hazaribagh districts of Chota Nagpur. The total output was a little more than 11·6 million tons out of 18·72 million for the whole of British India in 1932. The districts of Hazaribagh, Monghyr and Gaya form the most important source of mica in the world. In Singbhum are the Tata Iron and Steel Works at Jamshedpur, with a pay-roll of 30,000 employees, and an additional 16,000 engaged in collieries, mines and quarries. The reserved forests cover an area of 1,799 square miles. In 1930 there were 9,404 Co-operative Societies with a working capital of Rs. 5,88,89,304.

Commerce and Communications.—There was in 1924-25 a trans-frontier trade of 526 lakhs with Nepal, and a small maritime trade in Orissa. The total mileage in 1932–33 of metalled roads was 4,311 and of unmetalled roads 28,960. There are also 507 miles of navigable canals in Bihar and Orissa. The East Indian, Bengal and North-Western, Bengal Nagpur and Eastern Bengal Railways traverse the province. There are also 4 light railways with 150·67 miles.

BOMBAY PRESIDENCY.

Constitutional Government.—The English obtained a factory at Surat in 1616. Bombay was acquired by the Portuguese in 1530, and given in 1661 to Charles II as part of the dowry of Catherine of Braganza. In 1668 the king granted the Island of Bombay to the East India Company for the small annual rent of £10: it was placed under the President of the factory at Surat. The headquarters of the Bombay Governor were transferred from Surat to Bombay in 1708. The early summer seat of Government is at Poona; for the hottest months the Governor resides at Mahableswar. The administration is in the hands of the Governor and an Executive Council of two (of whom one is an Indian) for the 'reserved' subjects, and of the Governor with two Indian Ministers for the 'transferred' subjects. The Legislative Council consists of 114 Members, including the 2 Members of Council. There are 86 elected Members and 28 nominated and *ex-officio* Members, of whom not more than 16 may be officials. There are, in addition to Bombay City, 5 administrative Divisions—Northern, Central and Southern, Bombay Suburban, and Sind—under which are 28 Districts. In 1932-33 there were 154 Municipalities, 27 District Local Boards, and 222 Taluka Boards. The Commissioner in Sind has considerable independent powers. His headquarters is at Karachi.

Governor.—H.E. Lord Brabourne, G.C.I.E., M.C., appointed December, 1933. Salary Rs. 1,20,000 per year.

Area, Population and Religion.—The British Districts cover an area of 123,599 sq. miles: population (1931), over 21·8 millions, mainly Hindus. All Indian States in the Bombay Presidency are now under the control of the Government of India. In Sind, the Mohammedans are in the majority. Parsis are 0·004 per cent. of the population in British territory. The density varies from 84 per sq. mile in Sind to 48,390 in Bombay City. The chief languages are Sindhi, Gujarati, Marathi, and Kanarese in the South. The principal towns are Bombay (1,161,383), Ahmedabad (313,789), Poona (250,187), Karachi (263,565), and Sholapur (135,574).

Education.—The Bombay University founded in 1857 is an affiliating University. Under the University are 20 Arts Colleges and 11 Professional Colleges, for Engineering, Medicine, Agriculture, Commerce, and Law. In 1932-33 the number of students in the Arts Colleges was 9,589 (British Districts), and in the Professional Colleges 3,113. Recognised and unrecognised Educational Institutions numbered, in 1932-33, 16,871 with 1,332,087 scholars. Secondary schools numbered 686 with 127,698 pupils, and primary schools 14,694 with 1,140,359 pupils. To the total expenditure on education Government contributed 44·4 per cent., local authorities 18·9 per cent., and fees 22·2 per cent.

Justice and Crime.—The High Court of Bombay has a Chief Justice and 9 Judges. In Sind there is the Court of the Judicial Commissioner. Criminal justice is administered by the High Court, the Sessions Judges and 960 Magistrates. The number of persons tried was 311,134, of which 204,928 were convicted in the year 1933. The Stipendiary Police Force of 18,104

men is under an Inspector-General; but Bombay City is under the control of a Commissioner of Police who commands a force of 4,100 men. Outside of Bombay City the incidence of the Police Force is one to every 926 inhabitants. The Sind Police Force numbered 5,453 (1933).

Finance.—The estimated revenue of the Government of Bombay for 1934–35 is Rs. 1,899 lakhs (including Debt heads), the chief contributions being Rs. 477 lakhs from Land Revenue, Rs. 352 lakhs from Excise, Rs. 156 lakhs from Stamps, and Rs. 48 lakhs from Forests. The estimated expenditure for 1934–35 is Rs. 1,873 lakhs. General Administration was estimated to cost Rs. 206 lakhs, Education Rs. 180 lakhs, and Police Rs. 176 lakhs. The contribution of the Bombay Government to the Central Government has now been remitted. Under the head of Capital Expenditure Rs. 166 lakhs have been provided for the construction of Irrigation Works.

Production and Industry.—Sixty-four per cent. of the population are dependent on agriculture. The textile trade is dominant in production. The number of looms in 1933 in Bombay Island was 76,950, and in the rest of the Bombay Presidency 64,292. The number of factories of all kinds was 1,868 in 1933, and the number of operatives in all industries was 354,637, including 66,158 women and 2,112 children. There is a steady decline in the number of child operatives. There are 13,736 sq. miles of reserved forests.

Irrigation.—There are two spheres, the Deccan and Gujarat, and the Sind. The Lloyd Barrage at Sukkur is intended to provide for the irrigation of 1·83 million acres in British territory which had hitherto received an indifferent supply from inundation canals and also new irrigation to a further area of 3·62 million acres in Sind, the Khairpur State and the Nasirabad Tehsil in Baluchistan. The total expenditure on the project to the end of March was about Rs. 18·85 crores. In Sind 3,060,051 acres were irrigated in 1931–32, and in the Deccan and Gujarat 194,438 in 1931–32.

Commerce and Communications.—In 1932–33 Bombay had 9,735 miles of metalled roads and 20,229 miles of unmetalled roads. In 1932–33 the total length of railway open in the Bombay Presidency was 3,856 miles (exclusive of Baroda and the Western India States).

The total foreign trade in 1932–33 was Rs. 142 crores, and the total coasting trade Rs. 51½ crores. Bombay had Rs. 56¼ crores of Imports and Rs. 85⅝ crores of Exports; Karachi had Rs. 14 crores of Imports and Rs. 14¼ crores of Exports in 1933–34. India cotton to the extent of 237,164 tons left Bombay for abroad in 1933–34, and from Sind 200,404 tons left for abroad during 1933–34.

BURMA

Constitution and Government.—As far back as 1612 the East India Company had agents and factories at Syriam (near Rangoon), Prome and Ava. From 1796 there was a Resident at Rangoon. The first Burma War gave in 1826 Arakan and Tenasserim to the British ; in 1852 Pegu was annexed by Lord Dalhousie ; in 1862 the Provinces in Burma were amalgamated under a Chief Commissioner ; and in 1886 Upper Burma was annexed. In 1897 the charge was changed to a Lieut.-Governorship. From 1923 the Province has been constituted a Governor's Province under the Government of India Act of 1919. In the hot weather season the Government moves from Rangoon to Maymyo. The Governor and two Members of the Executive Council (one a Burman) are in charge of the 'reserved' subjects, and the Governor and two non-official Ministers are in charge of the 'transferred' subjects. There are seven administrative Divisions, exclusive of the Shan States (four Lower Burma, three Upper Burma) under Commissioners, and under these again 37 Deputy Commissioners of Districts. The Northern and Southern Shan States, which form part of British India, are administered by their Chiefs under the supervision of the Commissioner of the Federated Shan States. These groups were federated in 1922 ; and since 1923 there has been a Council of Chiefs. In 1930 the unadministered area between the Lushai Hills District, the Chin Hills District, the Akyab District, and the Hill District of Arakan, was absorbed into the Chin Hills District and the newly constituted Arakan Hill Tracts, and also taken under administration, the Chin Hills Regulation being applied to it. The newly constituted Arakan Hill Tracts are administered by a Superintendent who corresponds with the Commissioner, Arakan Division, but he is drawn from the inferior cadre of the Burma Frontier Service. The first step towards direct administration in the Triangle and Hukawng Valley was taken in 1930 by the application of the Kachin Hill Tribes Regulation, with slight modifications.

The Legislative Council of Burma consists of 103 Members, of whom 80 are elected and 23 nominated and *ex-officio*. Not more than 14 may be officials.

Governor.—H.E. Sir Hugh Lansdown Stephenson, K.C.S.I., K.C.I.E. : appointed December 22, 1932 : salary, Rs. 1,00,000 per year.

Area, Population and Religion.—The area of the Province is 261,610 sq. miles. Burma proper, inclusive of the Chin Hills and Kachin Hill Tracts, covers 192,158 sq. miles. The Shan States cover 62,335 sq. miles ; and there are 7,117 sq. miles of unadministered territory. The total population (1931) was 14,667,146. The leading towns are Rangoon, the capital (400,415), and Mandalay (147,932). The proportion of religions per 1,000 in 1931 was : Buddhists, 843 ; Animists, 52 ; Hindus, 39 ; Mohammedans, 40 ; Christians, 23 ; and others, 3. The Burmans belong to the Tibetan group. Occupations connected with cultivation were returned at the 1931 Census by 4,127,772 persons as their principal occupation, and by 118,725 persons as a subsidiary occupation.

Education.—The number of pupils in the 7,356 recognised colleges and schools was 524,864 in 1932–33 ; and 203,970 in the unrecognised institutions Burma is the most literate Province in the Indian Empire ; far ahead of India in primary education. Higher education is controlled by the University, Anglo-Vernacular and English schools by Government, and Vernacular education by Local Bodies. In almost every village there is a Buddhist monastery where the three R's are taught. There were in 1932–33, 290,041

pupils in upper and lower primary schools, and 201,914 pupils attending 1,343 secondary schools of all kinds. The teaching University of Rangoon was constituted in 1920, with two Arts Colleges; and there is an Intermediate College at Mandalay. The Medical College and the Teachers Training College, which were opened in 1929 and 1931 respectively, are constituent colleges of the Rangoon University. There is also a Forest School at Pyinmana, an Agricultural College and Research Institute at Mandalay, and a Technical Institute and a Veterinary College at Insein (near Rangoon).

Justice and Crime.—There is a High Court at Rangoon (constituted 1922) for the control of the administration of Civil and Criminal Justice; there are a Chief Justice and 10 Judges. Besides Sessions Judges there were 654 Stipendiary Magistrates in 1931; 112,753 criminal cases were brought to trial in 1931. The number of civil suits instituted was 54,956 in 1931. There is a Civil Police Force of 13,365 officers and men under an Inspector-General; a Rangoon Town Force of 1,544 under a Commissioner of Police; and—the special feature of Burma—several battalions of Military Police, the strength of which is 12,174 men.

Finance.—The revenue receipts (revised estimates) of 1933–34 were Rs. 796 lakhs, to which Land Revenue contributed Rs. 456 lakhs, Forests Rs. 73 lakhs, Excise Rs. 79 lakhs, Stamps Rs. 47 lakhs, and Irrigation Rs. 34 lakhs. The expenditure charged to revenue (revised estimates) in 1933–34 totalled Rs. 965 lakhs, the largest item being Police Rs. 177 lakhs; next, Forests Rs. 117 lakhs; General Administration Rs. 100 lakhs; Civil Works Rs. 92 lakhs; and Education Rs. 82 lakhs. There was no contribution to the Central Government by the Provincial Government in 1933–34.

Production and Industry.—The area of reserved Forests at the end of 1932–33 was 31,516 sq. miles. The out-turn of teak by lessees was 223,904 tons. In 1933 the output of tin was, in the Tenasserim area, 2943·62 tons; of tungsten ore, 893·55 tons; of silver, entirely from the mines of the Burma Corporation, Ltd., in the N. Shan States, 6,054,907 ounces. The total provincial output of petroleum (1933) was 249,000,899 gallons. The total number of factories of all kinds was 942 in 1933; and the total number of persons employed in factories was 86,433.

Commerce and Communications.—In 1932–33 the whole sea-borne trade of Burma was Rs. 30·74 crores. Customs duty realised Rs. 391·32 lakhs. The length of metalled roads was 2,120 miles, and there were 7,729 miles of unmetalled roads. Burma had also 60 miles of navigable canals. Its great river, the Irrawaddy, is navigable up to Bhamo, 900 miles from the sea; and its tributary, the Chindwin, is navigable for 300 miles. The railways of the Province were taken over by the Government of India in January, 1929. The open mileage for the year 1933–34 was 2,056 miles.

CENTRAL PROVINCES AND BERAR.

Constitution and Government.—In 1853 the Maratha Raja of Nagpur died, and the territories of the Kingdom of Nagpur were declared by Lord Dalhousie to have lapsed to the Paramount Power. This area was at first administered as the Nagpur Province by a Commissioner under the Government of India, but in 1861, in the administrative readjustments which followed the Mutiny, it was united to the Nerbudda territories, and the whole area was named 'the Central Provinces' and placed under a Chief Commissioner. In 1853 the inability of the Hyderabad State to maintain the Hyderabad contingent led to a treaty by which, in return for their upkeep of the contingent, the districts called 'the Hyderabad Assigned Districts,' which comprised the area now known as Berar, were assigned to the British. These Districts constituted a separate administrative unit until 1902, when the Treaty of Assignment was superseded by a perpetual lease of Berar to the Government of India on an annual rent of 25 lakhs of rupees. The administration of Berar was thereupon transferred to the Chief Commissioner of the Central Provinces. Berar, however, still remains under the suzerainty of H.E.H. the Nizam, and is not regarded as forming part of British India. It is now governed by the Governor-General in Council, acting through the Central Provinces Government in exercise of powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902.

In 1920 a Governorship was created. Associated with the Governor are two Executive Councillors for the 'reserved' subjects, and two Ministers for the 'transferred' subjects. One at least of the Executive Councillors must be a person who at the time of his appointment has been for at least twelve years in the service of the Crown in India. The Legislative Council consists of 73 members, of whom 38 are elected from the Central Provinces, 17 are elected from Berar and nominated after election, 2 are members of the Executive Council, 8 are nominated officials, and 8 are nominated non-officials. There are four main administrative divisions in charge of Commissioners, and 19 districts, each under a Deputy Commissioner. For Local Self-Government there are 18 District Councils and 2 Independent Local Boards in the Central Provinces, 4 District Councils and one Independent Local Board in Berar, and 74 Municipalities.

The seat of Government is at Nagpur, but in April and September, it is transferred to Pachmarhi for periods of three months and one and a half months respectively.

Governor.—His Excellency Sir Hyde Clarendon C. S. Gowan, K.C.S.I., C.I.E., V.D.: appointed September 16, 1933: salary Rs. 72,000 per year.

Area, Population and Religion.—The British Districts of the Central Province have an area of 82,149 sq. miles and a population (1931) of 12,065,885; Berar an area of 17,708 sq. miles and a population of 3,441,838. The urban population is only 97 per mille. The leading towns are: Nagpur, the capital, 215,165; and Jubbulpore, 124,382. The Hindus in 1931 numbered 13·33 millions (a little over five-sixths of the total population); the Animists 1·35 millions; Mohammedans 0·68 million; and Christians 0·05 million.

Education.—The Nagpur University was established in 1923: to this the Colleges at Nagpur, Jubbulpore and Amraoti are affiliated. There were 2,678 collegiate students in 1932–33. There is a High School Board for regulating and supervising high school education. There were 107,357 pupils in

secondary schools for males in 1932–33. Under the head of primary education there were 4,126 recognised Institutions for boys with 303,884 pupils, and 417 similar Institutions for girls with 32,466 pupils. For Technical Education there is an Engineering School at Nagpur with 134 students. There are 44 pupils at the Rajkumar College, Raipur. The Agricultural College at Nagpur had 111 students in 1932–33.

Justice and Crime.—The Court of the Judicial Commissioner at Nagpur, with a Judicial Commissioner and four Additional Judicial Commissioners, is the highest Criminal and Civil Court. There were in 1933 9 District and Sessions Judges, with 801 Magistrates for criminal cases, and 112 Subordinate Judges for civil cases. There were 45,789 criminal cases tried; and 151,012 civil suits were instituted.

Finance.—The revenue (revised estimates) for 1933–34 was Rs. 459 lakhs. Towards this total Land Revenue was estimated to contribute 259 lakhs, Excise Rs. 59 lakhs, Stamp Duties Rs. 60 lakhs, and Forests Rs. 43 lakhs. On the expenditure side the total was Rs. 473 lakhs; General Administration is expected to cost Rs. 66 lakhs; Police Rs. 59 lakhs; Education Rs. 50 lakhs; Civil Works Rs. 55 lakhs, including Rs. 2 lakhs from the Road Development account; Superannuation allowances and pensions Rs. 38 lakhs; and Forests Rs. 35 lakhs. The contribution of Rs. 22 lakhs payable by the Provincial Government of the Central Provinces and Berar to the Central Government of India was remitted permanently with effect from the year 1928–29. There was no assignment on account of famine relief, as the Famine Relief Fund was over 45 lakhs.

Production and Industry.—The principal crops are cotton, rice and wheat. In 1933 exports were cotton, raw, 3,360,000 maunds, valued at Rs. 5,14,00,000; rice, 4,090,000 maunds, valued at Rs. 1,33,00,000; and wheat, 2,040,000 maunds, valued at Rs. 67,00,000. Cotton is grown chiefly in Berar and the west, rice in the east, and wheat in the north. The area irrigated from State works in 1932–33 was 386,827 acres. The Forest Department controls 19,606 sq. miles of forests. In 1932–33 the forests yielded a surplus revenue of Rs. 10·5 lakhs. Nagpur is the centre of the cotton-spinning and weaving industry. There were 956 factories of all kinds in 1933, with a daily average of 61,781 employees. There are 3 cement factories in the Jubbulpore district, and they exported 4,400,000 maunds of cement during the year ending March 31, 1934. In 1933 the number of mines working was 65, namely 23 coal mines, 4 manganese mines, and 38 mines for other minerals. The coal output in 1932 was 10,49,298 tons, and the manganese output, 77,186 tons. There is a *biri* making industry in the centre of the province which gives employment to over 40,000 hands.

Communications.—In 1933–34 there were 5,149 miles of metalled roads, and 3,473 unmetalled. The railway mileage is 2,572, of which 1,748 miles are broad gauge and 838 narrow and metre gauge.

COORG.

This Province came under British control in 1834, when, at the wish of the inhabitants, the reigning Raja, a cruel tyrant, was deposed. At first

there was a Superintendent of Coorg, acting under the Commissioner of Mysore and Coorg. In 1881 the Resident in Mysore became the Chief Commissioner of Coorg. The local Administrator is the Commissioner of Coorg at the capital, Mercara. A Legislative Council of 20 was created in 1924. The area is 1,593 sq. miles; and the population (1931) is 163,327. Kanarese is the chief language: Kodagu (Coorg language) is a dialect of old Kanarese. In 1934–35 the estimated revenue is Rs. 11·91 lakhs and the expenditure Rs. 12·40 lakhs. There were, in 1933, 839 boys in high schools and 8,980 in primary schools, and 269 girls in high schools and 818 in primary schools. There are 40,345 acres under coffee.

Chief Commissioner.—The Hon. Lieut.-Col. C. T. C. Plowden, C.I.E.: salary, Rs. 48,000 per year.

Administration Report. Annual. Bangalore.

DELHI.

The Delhi Province, with an area of 573 sq. miles, was part of the Punjab Province before October, 1912, when the enclave was created into a separate province under a Chief Commissioner. In 1915 a tract of land in the United Provinces comprising 65 villages was added to the Delhi Province, and is included in the above-mentioned area. The population is 636,246 (1931); the population in Delhi town itself is 447,442.

The new Capital Project which was closed in 1932, was reopened and a total expenditure of Rs. 1,611 lakhs incurred up to March 31, 1934. The revised estimate for the new Capital may be put roughly at Rs. 1,700 lakhs. Accommodation is required for a population of about 66,000.

The University of Delhi, intended to be a unitary, teaching and residential institution, was founded in 1922. There are four Arts Colleges affiliated. There is also the All-India Lady Hardinge Medical College for the Medical Education of Indian Women (opened 1916). A Board of Secondary Education was established in 1926.

The revenue of the Province in 1933–34 (estimate) was Rs. 62 lakhs; and the expenditure (estimate) Rs. 44·9 lakhs.

Chief Commissioner.—The Hon'ble Mr. J. N. G. Johnson, C.I.E.; appointed March 21, 1932: salary, Rs. 36,000 per year.

MADRAS PRESIDENCY.

Constitution and Government.—The first trading establishment made by the British in the Madras Presidency was at Peddapali (now Nizampatam) in 1611 and then at Masulipatam. In 1639 the English were permitted to make a settlement at the place which is now Madras; and Fort St. George was founded. By 1801 the whole of the country from the Northern Circars to Cape Comorin (with the exception of certain French and Danish settlements) had been brought under British rule. The administration is now in the hands of the Governor in Council (four members, two being Indians) for 'reserved' subjects, and of the Governor acting with three Indian Ministers for the 'transferred' subjects. The Legislative Council at present consists of 132 Members, of whom 98 are

elected, and 34 nominated and *ex-officio*. The maximum number of officials is 23. There are 26 Districts each under a District Collector and Magistrate, except Madras and Chingleput districts, which are under a single District Collector and Magistrate as a temporary measure. Under the head of Local Self-Government there are 25 District Boards (under non-official Presidents), 81 Municipal Councils, and the Corporation of Madras. The summer capital is Ootacamund.

Governor.—His Excellency the Rt. Hon. Lord Erskine; assumed office November 16, 1934; salary Rs. 120,000 per year.

Area, Population and Religion.—Area, 142,277 sq. miles. There are also five Indian States which are separately described (p. 179). Population (1931), 46·7 millions. Principal languages, Tamil, Telugu, Malayalam and Kanarese. The first two account for 78 per cent. of the population. The principal towns are, Madras with 647,220 inhabitants, Madura with 182,018, Trichinopoly with 142,843, and Salem with 102,181. Hindus form 89 per cent., Mohammedans 7 per cent., Christians 3 per cent., and Animists 1 per cent.

Education.—There are three Universities, the Madras University, the Andhra University, and the Annamalai University. The first of these, founded in 1857, is an affiliating University and since 1923 has been discharging teaching functions to a limited extent. The Andhra University, founded in 1926, was only an affiliating university in the earlier stages, but has recently undertaken teaching work in certain subjects. The Annamalai University, founded in 1929, is the first attempt in South India at organising a unitary residential type of University. The number of Colleges affiliated to or recognised by the two affiliating Universities in 1930–31 was as follows:—Madras 48, of which 15 were maintained by Government; Andhra 12 (3 maintained by Government). On March 31, 1932, male Arts students numbered 12,143, and women Arts students numbered 503. Public educational institutions numbered 53,545, with 2,877,504 scholars. There were 46,681 public elementary and 530 secondary schools for Indian boys, and 5,672 elementary and 73 secondary schools for Indian girls. Public funds contributed 61 per cent. of the total expenditure on education in 1931–32.

Justice and Crime.—There is a High Court with a Chief Justice and 13 Judges. There were in 1931 in all 969 Criminal Courts; and 326,260 criminal cases were instituted in 1931. The Police Force in 1932 numbered 28,928, under an Inspector-General, while there was a force of 2,180 for Madras City. The total number of civil suits instituted in the Courts, including village and panchayat Courts, was 627,465 in 1931.

Finance.—The revenue (revised estimates) of the Government of Madras was Rs. 1,689 lakhs in 1932–33, the chief contributions being Rs. 758 lakhs from Land Revenue, Rs. 427 lakhs from Excise, Rs. 240 lakhs from Stamps and Rs. 50 lakhs from Forests. The expenditure (revised estimates) in 1932–33 was Rs. 1,626 lakhs. General Administration accounted for Rs. 262 lakhs, Police for Rs. 163 lakhs, and Education for Rs. 246 lakhs. The contribution to the Central Government was completely and permanently remitted from 1927–28. The proportion of the expenditure in the 'transferred' departments to the total expenditure (excluding the contribution to the Central Government) was 48 per cent. in 1932–33.

Production and Industry.—Agriculture engages 71 per cent. of the population. There were in 1932–33, 27 cotton mills with 44,138 workers.

The total number of factories working in 1932 was 1,452 with 132,960 operatives. The Madras Government in 1931–32 treated at the Government Quinine Factory 517,564 lb. of cinchona bark. The area irrigated in 1931–32 was 7,437,460 acres: productive irrigation works showed a return of 6·61 per cent. on the capital outlay. The output of timber by the Forest Department was 63,740 tons in 1931–32.

Commerce and Communication.—In 1931–32, Madras Presidency had 22,340 miles of metalled roads, and 11,571 miles of unmetalled roads, as well as 1,426 miles of navigable canals. There were 4,961 miles of railway, in addition to 136 miles of District Board lines. The imports of private merchandise under the head of Seaborne Foreign Trade were valued in 1930–31 at Rs. 20·70 crores, and the exports at Rs. 32 crores. Trade to the United Kingdom represented 37 per cent. of the total trade of the Presidency in 1929–30. In 1929–30 the Madras Port accounted for 70 per cent. of the total trade; its imports and exports amounted to Rs. 50·62 crores in 1929–30. Cochin is the chief of the other ports.

LACCADIVE ISLANDS.

(ATTACHED TO MADRAS PRESIDENCY.)

A group of 14 islands (9 inhabited), about 200 miles off the west of Malabar coast of the Madras Presidency. The northern portion is called the Amindivis and is attached to the collectorate of South Kánara, the remainder to the administrative district of Malabar. Population (1931) 16,046, nearly all Mohammedans. The language is Malayalam, but the language in Minicoy, which is considerably to the south of the other islands, is Mahl. The staple products are coconut husk fibre (coir) and coconuts.

NORTH-WEST FRONTIER PROVINCE.

In 1849 the territory on the frontier was annexed and placed under a Board of Administration at Lahore in the Punjab. The frontier districts were separated in 1901 from the Punjab under the name of the North-West Frontier Province: the districts are Hazara, Peshawar, Kohat, Bannu and Dera Ismail Khan. The British territory represents one-third of the whole area of 39,310 sq. miles now under a Governor appointed on April 18, 1932; the remaining area is tribal territory, partly under Political Agents, and partly under the political control of the Deputy Commissioners of the British districts. The British territory in the five districts has an area of 13,518 sq. miles and a population of 2,425,076 (1931). About 91 per cent. are Mohammedans. Peshawar, the capital, had in 1931 a population of 121,866. The summer seat of the local government is Nathia Gali, in the Hazara district. The chief language is Pashtu, an Iranian tongue with many Punjabi words. The chief Court is that of the Judicial Commissioner and Additional Judicial Commissioner; and there are three Sessions Judges. In 1932–33 the total

number of offences reported was 41,696. The total number of civil suits instituted was 19,361. The gross revenue in 1933–34 was Rs. 72·33 lakhs, of which Rs. 21·29 lakhs was Land Revenue, and 9·52 lakhs from Stamps. The gross expenditure in 1933–34 was Rs. 320·47 lakhs; Rs. 27·06 lakhs being Political expenditure, Rs. 110·41 lakhs on Frontier Watch and Ward, Rs. 31·07 lakhs expenditure on Police, and Rs. 35·93 lakhs on Civil Works. In 1933–34 there were 851 recognised educational institutions for males with 75,102 scholars, and 152 similar Institutions for females, with 13,938 scholars. The percentage of scholars to the total population is 5·9 for males and 1·3 for females. The expenditure on Education was Rs. 28·63 lakhs, of which 67·4 per cent. is from Government Funds. Wheat covered 38 per cent. of the total acreage sown in 1932–33. The irrigated area in that year was 963,974 acres. The railway line through the Khyber, 27 miles long, with 34 tunnels, from Jamrud to the frontier of Afghanistan, was opened in November, 1925.

Governor (and Agent to the Governor-General in respect of tribal area) North-West Frontier Province (April 18, 1932).—His Excellency Lieut.-Col. Sir Ralph Griffith, K.C.S.I., C.I.E.: appointed 1931; salary, Rs. 66,000 per annum.

PUNJAB.

Government and Constitution.—Punjab denotes the land of the five rivers, viz. Jhelum, Chenab, Ravi, Beas and Sutlej. British power in the Punjab began with the dissipation by the successors of Ranjit Singh of the power consolidated by him. In 1849 the country was annexed, and placed under a Board of Administration. In 1853 it was placed under a Chief Commissioner, and by 1859 the Punjab and the Delhi Territory constituted the charge of a Lieut.-Governor. The N.W. Frontier area was separated in 1901, and the Delhi province in 1911. Since 1921 the administration has been under the control of a Governor, with an Executive Council of two Members (one an Indian) in charge of 'reserved' subjects, and the Governor with three Indian Ministers in charge of 'transferred' subjects. The Legislative Council consists of 94 Members, 2 *ex-officio*, 71 elected, and 21 nominated: of the latter not more than 14 may be officials. There are 29 districts grouped for administrative purposes under five Commissioners. The system of election has been introduced in the membership of all the District Boards, except Simla. There are 118 Municipalities. Lahore is the capital, but from May to October the Government Offices are transferred to Simla, where the Governor's residence is known as Barnes Court.

Governor.—His Excellency Sir Herbert William Emerson, K.C.S.I., C.I.E., C.B.E.: appointed January 17, 1933; assumed office, April, 1933; salary Rs. 1,00,000 per annum.

Area, Population and Religion.—The Punjab proper has an area of 97,797 sq. miles and a population of 23·58 millions (1931). Its Indian states, 34 in number, have an area of 37,061 sq. miles and a population of 4·91 million. Of the population 56·5 per cent. is Muhammadan, 26·8 per cent. Hindu and 13 per cent. Sikh. The leading towns are: Lahore,

the capital (429,747), Amritsar (264,840), Multan (119,457), Rawalpindi (119,284), and Sialkot (100,973).

Education.—The University of the Punjab was constituted as an examining University in 1882. It has always maintained an Oriental College and a Law College, and since 1920 various departments of University teaching have been added. A College of Commerce was instituted in 1927. In 1932–33 there were 13,382 male students in Arts Colleges, 602,841 in secondary schools, and 370,413 in primary schools. The total expenditure on education in 1932–33 was Rs. 300 lakhs, of which Rs. 154 lakhs were provided by Government and Rs. 77 lakhs by fees.

Justice and Crime.—The Chief Court of two Judges created in 1866 was converted in 1919 into a High Court at Lahore, which at present consists of a Chief Justice, 8 Puisne Judges, and 3 additional judges. There are 25 permanent District and Sessions Judges, including one employed at Delhi. In 1933 the number of criminal cases brought to trial was 229,647, and the number of civil suits instituted was 227,688. The Provincial Police Force consists of nearly 23,000 officers and men and is under the command of an Inspector-General.

Finance.—The revenue in 1933–34 was Rs. 1,145 lakhs, to which the receipts from Irrigation Works contributed the large proportion of Rs. 517 lakhs, Land Revenue Rs. 250 lakhs, Stamps Rs. 113 lakhs, and Excise Rs. 97 lakhs. The expenditure was Rs. 1,098 lakhs. The chief items of expenditure were: Education Rs. 159 lakhs, Police Rs. 122 lakhs, and General Administration Rs. 102 lakhs. The entire contribution of the Punjab to the Central Government was permanently remitted in 1928–29. The net profit earned by the Irrigation Department has been:—

	Lakhs		Lakhs
1925-26 . . .	Rs. 357	1929–30 . . .	Rs. 268
1926–27 . . .	Rs. 270	1930–31 . . .	Rs. 231
1927–28 . . .	Rs. 289	1931–32 . . .	Rs. 247
1928–29 . . .	Rs. 254	1932–33 . . .	Rs. 233

Production and Industry.—Agriculture affords subsistence to 65 per cent. of the population of the Punjab (including Punjab States). In 1934 there were 3,323,596 acres of Forests under the Forest Department. The total receipts of the Department from 1869–1934 amount to Rs. 1,069 lakhs, and the expenditure to Rs. 850 lakhs. The total surplus during this period was thus Rs. 219 lakhs. In 1933–34 there was a deficit of Rs. 1·9 lakhs owing to capital expenditure on irrigated plantations. Next to agriculture, hand-loom weaving is the most important industry, both as regards the number of workers engaged and the value of the products: it is estimated that about 150,000 rely on weaving as their main occupation. Agricultural prosperity is mainly due to irrigation: the canal-irrigated area rose from 3 million acres in 1893 to 13·7 million acres in 1933–34, out of which 11·3 million acres is in British territory and the rest in Indian States.

There is a Punjab Arts and Crafts depôt at Lahore which serves a dual purpose; the provision of art craftsmen with a market for their wares, and the improvement of design and workmanship. The total number of factories registered under the Indian Factories Act is 712, which provide employment for 47,972 operatives.

Commerce and Communications.—The Punjab possesses an extensive system of railway communications. During the year 1933–34 the

route mileage of the North-Western Railway stood at 6,950 miles (excluding 137 miles of the Nok Kundi Zahidan section and 5 miles of the Khyber Railway from Landi Kotal to Landi Khana, both of which were closed for public traffic). No additions were made to the open line during the year under review and there were no new lines under construction. The main source of wealth lies in the export of wheat and cotton. The wheat traffic to Karachi on the North-Western Railway fluctuates, and in 1933–34 there was no export from Karachi port. The export of cotton was 1,225,612 bales. The passenger traffic on the North-Western Railway was 60·9 million in 1933–34. There are about 5,000 miles of metalled roads and about 21,000 miles of unmetalled roads in the province, excluding village roads. The Punjab has also 189 miles of navigable canals.

UNITED PROVINCES OF AGRA AND OUDH.

This territory grew out of various cessions and acquisitions. In 1833 the then Bengal Presidency was divided into two parts, one of which became the Presidency of Agra. In 1835 the Agra area was styled the North-West Province and placed under a Lieut.-Governor. Oudh was annexed in 1856. The two provinces of Agra and Oudh were placed, in 1877, under one administrator, styled Lieut.-Governor of the North-West Province and Chief Commissioner of Oudh. In 1902 the name was changed to 'United Provinces of Agra and Oudh,' under a Lieut.-Governor, and the Lieut.-Governorship was altered to a Governorship in 1921. The administration of the 'reserved' subjects is in the hands of the Governor and an Executive Council of two Members, one of whom is an Indian; and the 'transferred' subjects are under the Governor with two Indian Ministers. The Legislative Council consists of 123 Members. There are 100 elected Members, and 23 nominated and *ex-officio* Members: of the latter not more than 16 may be officials. There are 10 administrative divisions, covering 48 districts, the average size of which is 2,200 square miles and the average population just over a million. The Municipalities in 1930–31 numbered 85, and the District Boards 48. There are three Indian States, one of which, Benares, came into existence in 1911.

Governor.—His Excellency Sir Harry Haig, G.C.S.I., G.C.I.E., I.C.S.; appointed December 16, 1934; salary Rs. 120,000 a year.

Area, Population and Religion.—The area of the British districts is 106,248 square miles: population (1931) 48,408,763; 1,206,070 are in the 5,943 square miles of the three Indian States. The population is rural to the extent of 88·8 per cent. Lucknow (274,659 in 1931) is the largest city: but the second place is now taken by Cawnpore (243,755) instead of Benares (205,315). Agra had in 1931 229,764, and Allahabad 183,914 inhabitants, Bareilly 144,031, Meerut 136,709, Moradabad 110,562. Brahmins or orthodox Hindus during the last decade have lost somewhat to Christianity, but still cover 83·8 per cent. Mohammedans form 14 per cent.

Education.—The University of Allahabad, first constituted as an affiliating University in 1887, was recognized in 1921 as a unitary teaching and residential University: at the same time it exercised control over the affiliated colleges. Since July, 1927, these colleges have been transferred to the new Agra University, which is a purely affiliating and examining University. The Benares Hindu University was constituted in 1916; Lucknow University in 1920; and the Aligarh Muslim University in 1920, all being unitary teaching and residential Universities. All four had 6,373 students in 1931–32. Government maintains an Engineering College at Roorkee, an Agricultural College, and a Technological Institute at Cawnpore, and a Medical College at Lucknow, besides three Training Colleges for English Teachers at Allahabad, Lucknow and Agra. Educational Institutions of all kinds numbered 25,846 in 1931–32. For secondary education there were 1,018 Institutions with 179,921 scholars; and for primary education 19,768 schools with 1,136,601 scholars. On March 31, 1933, technical and industrial schools numbered 25 and had 1,424 students on their rolls. There were 2,241 institutions for Indian girls with 105,860 scholars. There was compulsory primary education in 37 Municipalities, Government supplying two-thirds of the extra cost involved. The percentage of scholars to the population is 5·30 for males and 0·72 for females. Government contributed 56 per cent. of the total cost of education in 1931–32.

Justice and Crime.—There is a High Court of the Agra Province with a Chief Justice and 11 Judges, sitting at Allahabad; also a Chief Court of Oudh (constituted November, 1925) with a Chief Judge and 4 Judges, at Lucknow. There are 19 Sessions divisions in Agra and 8 in Oudh. The persons brought to trial were 144,738 in the Agra Province and 97,493 in Oudh in the year 1931. The entire police force, consisting of nearly 33,650 officers and men and 39,423 village chaukidars is under an Inspector-General.

Finance.—The revenue (revised estimates) of the United Provinces in 1932–33 was 1,126 lakhs of rupees. To this total the main contributions were: 570 lakhs from Land Revenue, 180 lakhs from Stamps, 119 lakhs from Excise, 46 lakhs from Forests, and 121 lakhs from Irrigation. On the expenditure side the total (revised estimates) for 1923–33 was 1,145 lakhs. On Education were spent 185 lakhs; on Police 159 lakhs; and on General Administration 127 lakhs. No less than 108 lakhs were spent on the interest on debt incurred on Irrigation Works for which Capital Accounts are kept. On the construction of new Irrigation work, 9 lakhs went in capital expenditure in 1932–33.

Produce and Industry.—Agriculture absorbs 76 per cent. of the population; over 35 million acres were under cultivation in 1931–32, and

about 4·75 million acres were irrigated from wells and 3·5 from canals. The productive canals (excluding the Sarda Canal) gave a net revenue of 6·11 per cent. on the total capital outlay. The Sarda canal was completed in March, 1930, and is estimated to irrigate 1,350,000 acres ; during 1931–32 it irrigated 600,205 acres and during 1932–33 851,679 acres. The great centre of industry is Cawnpore. In 1932 there were 505 factories in the United Provinces. The textile factories employ most labour ; then follows sugar and engineering. Scores of new sugar factories have been set up during 1931–32 and 1933.

Communications.—There were, in 1932–33, 3,288 miles of metalled and 718 of unmetalled roads, maintained by the Public Works Department of Government. In addition some 4,500 miles of metalled roads and 22,000 miles unmetalled roads were maintained by district boards. The River Ganges was kept open for navigation between Chunar and Benares.

INDIAN STATES AND AGENCIES.

Within the limitations described on p. 117, the Indian States are governed by their native rulers, with or without the aid of Ministers and Councils. The system of Government is in theory autocracy, but the practice varies greatly. Consequently the administration also varies in kind and in degree from the highly organised Mysore to the backward Hill State of Manipur.

In 1921 a Chamber of Princes was established as a permanent consultative body to discuss matters relating to affairs of Imperial or common concern, so far as they affect the States. In 1929 a Committee under the chairmanship of Sir Harcourt Butler reported on the relations between the Paramount Power and the Indian States. Action on its recommendations is under consideration.

Chancellor (1932).—H.H. the Maharaja of Nawanagar.

Information is given below regarding the leading States and Agencies, arranged in alphabetical order.

Assam States.—The only feudatory States with which the Assam Administration has political relations are Manipur and the petty States in the Khasi Hills. Manipur has an area of 8,638 square miles and a population (1931) of 445,606. About one-third are animistic tribes. The revenue is nearly Rs. 8 lakhs. There is a tribute of Rs. 5,000. The ruler is H.H. Maharaja Sir Chura Chand Singh, K.C.S.I., C.B.E., born 1885 ; succeeded 1891 ; salute of 11 guns. Capital, Imphal. The State Administration is under a Darbar consisting of a President (whose services are lent by the Government), three ordinary and three additional Members.

Baluchistan States.—There are two States—Kalat and Las Bela. Their relations with the Agent of the Governor-General, who is also the Chief Commissioner of Baluchistan and resides at Quetta are conducted

through the Political Agent, Kalat. The Kalat State, unlike the other Indian States is a confederacy of partially independent chiefs, whose head is the Khan of Kalat, at present. His Highness Mir Ahmad Yar Khan, who was born in 1904 and succeeded in 1933, has a personal salute of 19 guns. The area of Kalat State is 73,278 square miles, and the population 342,101 (1931). The Khan's revenue, including the subsidies and rents for the leased areas paid by the British Government, amounts to nearly Rs. 14·5 lakhs annually. Private property in slaves in Kalat was abolished in 1926.

The ruling chief of Las Bela is Mir Ghulam Muhammed Khan, Jam of Las Bela, who was born in 1895 and succeeded in 1921. The area of the State is 7,132 square miles; population, 63,008 (1931); and revenue about Rs. 3·8 lakhs.

Bengal States.—There are two semi-independent States, Cooch Behar and Tripura, in respect of which the Governor of Bengal acts as Agent to the Governor-General. Cooch Behar is under a Regent, H.H. the Maharani of Cooch Behar, on behalf of her son, H.H. Jagaddipendra Narayan Bhup Bahadur, who, when only seven years of age, succeeded in 1922. The ruler has a salute of 13 guns. There is a Regency Council, the Vice-President of which is an officer lent by the British Government who resides at Cooch Behar. The area is 1,318 square miles; population (1931) 590,866; the approximate annual revenue is 40 lakhs of rupees.

Tripura State covers 4,116 square miles; the population is (1921) 304,437; the approximate revenue Rs. 29 lakhs (inclusive of the revenue of the landed properties owned by the State in British India). The ruler is H.H. Maharaja Manikya Bir Bikram Kishor Deb Barman Bahadur; born 1908; succeeded 1923; salute of 13 guns. He was formally invested with the powers of a Ruling Chief by the Governor of Bengal in August, 1927.

Burma States.—The 6 Northern and the 35 Southern Shan States, federated since 1922, are not States on the same footing as States in other parts of the Indian Empire, but are an integral part of British India, forming, as they did, part of the old Burmese Kingdom. They do not, however, form part of Burma proper, and are specially administered. The total area is 57,816 sq. miles, with a population of 1,506,337.

To the south of the Southern Shan States are the three Karen-ni States, with an area of 4,519 sq. miles and a population of 58,761. They form a group of Feudatory States, and are not part of British India. They are administered by their own Chiefs under the advice of the Commissioner of the Federated Shan States through his representative, an Assistant Political Officer, who resides at Loikaw.

Central India Agency.—This Agency, covering 51,597 sq. miles, with a population of 6,637,329, includes 28 Salute States and 59 Minor States and Guaranteed Estates. The bulk of the population is Hindu. The Government of India is represented by an Agent to the Governor-General at Indore; and under him are Political Agents for Bundelkhand, Bhopal, and Malwa. The territories of the different States are much divided and intermingled, and their political relations with the Indian Government and with one another are very varied.

Indore has an area of 9,902 sq. miles, a population of 1,325,089, and an approximate revenue of Rs. 1,24,21,000. The Ruler is H.H. Maharajadhiraja Raj Rajeshwar Sawai Yeshwant Rao Holkar Bahadur; born September 6, 1908; succeeded 1926, and was granted Ruling powers on May 9, 1930; permanent salute of 19 guns.

Bhopal has an area of 6,924 sq. miles, a population of 729,955, and an

approximate revenue of Rs. 80,00,000. The Ruler is Lt.-Col. H.H. Nawab Haji Sir Muhammad Hamidulla Khan Bahadur, G.C.S.I., G.C.I.E., C.V.O., permanent salute of 19 guns. In 1927 the King Emperor recognised the right of a daughter of a Ruler to succeed in the absence of a son; and a Legislative Council was established.

Rewa has an area of 13,000 sq. miles, a population of 1,587,445, and an approximate revenue of Rs. 60 lakhs. The ruler is H.H. Maharaja Sir Gulab Singh Bahadur, G.C.I.E., K.C.S.I.; born March 12, 1903; succeeded 1918 and was granted Ruling powers on October 31, 1922; salute of 17 guns.

Deccan States.—As from April 1, 1933, in political relations with the Government of India through the Agent to the Governor-General for the Deccan States and Resident at Kolhapur. Headquarters, Kolhapur. Consists of 6 salute and 11 non-salute States and one Estate. The premier State is Kolhapur, with an area of 3,217 sq. miles, a population (1931) of 957,137, and a revenue approximately of Rs. 76 lakhs. The Maharaja of Kolhapur is Lieut.-Colonel H.H. Shri Rajaram Chhatrapati Maharaja, G.C.S.I., G.C.I.E.; born 1897; succeeded 1922; salute of 19 guns. From 1926 the Prime Minister of Kolhapur and three Ministers have constituted the Council of the State. Other salute States are: Janjira, area 377 sq. miles; population 98,530; revenue Rs. 4 lakhs. Sawantwadi, area 925 sq. miles; population 206,440; revenue Rs. 6¾ lakhs. Sangli, area 1,136 sq. miles; population 258,442; revenue Rs. 16 lakhs. Mudhol, area 368 sq. miles; population 62,860; revenue Rs. 5½ lakhs. Bhor, area 925 sq. miles; population 130,420; revenue Rs. 6 lakhs.

Agent to the Governor-General for the Deccan States and Resident at Kholapur.—Lieut.-Colonel J. C. Tate.

Eastern States.—The 40 States in the Eastern States Agency are in direct political relations with the Government of India through an Agent to the Governor-General stationed for the present at Ranchi. In his dealings with the smaller States he is assisted by a Political Agent posted at Sambalpur. The total population of the States is 7,108,736, and the total area 59,680 square miles. These States pay Rs. 3,35,549 to Government. Their total income is Rs. 1,47,67,000.

Gujarat States and Baroda.—Consequent upon the establishment of direct relations between the Government of India and the Bombay States since April 1, 1933, many States and Estates which were previously included in the various Political Agencies of the Bombay Government have been included in a newly-formed Political Agency of the Government of India, designated the Gujarat States Agency. The charge of this new Agency has been added to the charge of the Resident at Baroda, who is now known as the Agent to the Governor-General for the Gujarat States and Resident at Baroda. The Political Agencies thus amalgamated were the Rewa Kantha Agency, the Kaira Agency, the Surat Agency, the Nasik Agency, and the Thana Agency.

The following are the full-powered salute States now in direct political relations with the Government of India through the 'Agent to the Governor-General for the Gujarat States and Resident at Baroda':—

Balasinor (old Rewa Kantha Agency).
Bansda (old Surat Agency).
Baria (old Rewa Kantha Agency).
Baroda.
Cambay (old Kaira Agency).
Chhota Udepur (old Rewa Kantha Agency).
Dharampur (old Surat Agency).
Jawhar (old Thana Agency).
Lunawada (old Rewa Kantha Agency).
Rajpipla (old Rewa Kantha Agency).
Sachin (old Surat Agency).
Sant (old Rewa Kantha Agency).

The headquarters of the Agency are at Baroda and consist of:—

Agent to the Governor-General, Gujarat States Agency and Resident at Baroda.—Lieut.-Colonel J. L. R. Weir, C.I.E.

Secretary to the Agent to the Governor-General, Gujarat States and Resident at Baroda.—Capt. G. A. Falconer, I.A.

Brief accounts of the Salute States are given below:—

Balasinor.—This State has an area of 189 square miles, a population of 52,525 and an annual revenue of about Rs. 2½ lakhs. The ruling Prince belongs to the Babi family. The State pays Rs. 9,766-9-8 to the British Government and Rs. 3,077-11-1 to the Baroda Government. The name of the present ruler is Babi Shri Jamiatkhanji Manvarkhanji, Nawab of Balasinor. He was born on the 10th November, 1894, and succeeded to the gadi in 1899. In 1890, the ruler of the State received a Sanad guaranteeing succession according to Muhammadan Law in the event of failure of direct heirs. The Nawab is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Bansda.—This State has an area of 215 square miles, a population of 48,807, and an annual revenue of about Rs. 7½ lakhs. The rulers of Bansda are Solanki Rajputs of the Lunar Race and descendants of the Great Sidhraj Jaysing. The present ruler Maharaval Shri Indrasinhji was born on 16th February, 1888, and succeeded to the gadi in September, 1911. The ruler of the State has received a Sanad guaranteeing succession to an adopted heir in the event of failure of direct heirs. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Baria.—This State has an area of 813 square miles, with a population of 159,429, and is situated in the heart of the Panchmahals District. The capital, Devgad Baria, is reached by the Baria State Railway from Piplod Station on the Bombay, Baroda and Central India Railway at a distance of 10 miles. The average revenue of the State is about 12 lakhs. The ruler, Major H.H. Maharaol Shri Sir Ranjitsinhji, K.C.S.I., is the direct descendant of the Great House of Khichi Chowhan Rajputs who ruled over Gujarat for 244 years with their capital at Champaner, enjoying the proud title of Pavapatis. The State makes no payment either to the British Government or to any other Indian State. His Highness served in France and Flanders in the Great European War and in the Afghan War, 1919. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns and a personal salute of 11 guns.

Baroda.—This State claims to be one of the most important, if not the leading State in India, north of Bombay. It includes all the territories of H.H. the Gaekwar. The province of Gujarat was at one time included in the Mughal Empire, but, in the early part of the 18th century, the Mahrattas, under the leadership of Damaji Gaekwar, and afterwards of his nephew, Pilaji, succeeded in wresting all powers out of the hands of the Mughal officers. From that time Baroda has remained continuously under the sway of the Gaekwar family, who held it in the first instance under the Peshwa, subject to a tributary payment, but afterwards threw off their allegiance and became feudatory to the British Government under the guarantee of a treaty executed in the year 1817. The Gaekwar, Malhar Rao, installed in 1870, was deposed in 1875, and on May 27, 1875, the widow of Khande Rao, his brother, adopted as heir the present ruler, a descendant of the founder of the family, who was invested with full ruling powers in 1881.

The ruler is H.H. Farzand-i-Khas-i-Daulat-i-Inglish-i-a Maharaja Sir Sayaji Rao Gaekwar, Sena Khas Khel Shamsher Bahadur, G.C.S.I., G.C.I.E., born 1863; succeeded 1875; salute of 21 guns. The area of the State is 8,164 square miles; the population, 2,443,007, the great majority of whom are Hindus. Baroda City, the capital, has a population of 112,862. The receipts in 1931–32 were Rs. 249 lakhs. Education is compulsory. There were 2,643 educational institutions with 253,664 pupils, including Baroda College with 978 students. There is a High Court of Justice with a well organised subordinate service. There were 1,063 Co-operative Societies of all kinds, with 39,552 members and a working capital of Rs. 76 lakhs. There is an Executive Council of 4 or more members according to the Maharaja's discretion, and a Legislative Council of 27 members, 10 being elected.

Cambay.—This State has an area of 350 square miles, a population of 87,761, and an annual revenue of about Rs. 10½ lakhs. The founder of the ruling family was Mirza Jafar Najamud-Daulah Mominkhan I., the last but one of the Muhammadan Governors of Gujarat. The present ruler is H.H. Mirza Hussain Yavar Khan Saheb. He was born on May 16, 1911, succeeded to the gadi on January 21, 1915, and was invested with ruling powers on December 13, 1930. His Highness is a member of the Chamber of Princes, and enjoys a dynastic salute of 11 guns.

Chhota Udepur.—This State has an area of 890 square miles, a population of 144,640, and an annual revenue of about Rs. 14½ lakhs. The ruling family belongs to the Khichi Chavan Rajput clan, and claims descent from the last Patai Raja of Pawagadh or Champaner, the State being founded shortly after the fall of that fortress in 1484. The name of the present ruler is Maharawal Shri Natwarsinhji. He was born on November 16, 1906, and succeeded to the gadi on August 29, 1923, on the death of his father. He is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns.

Dharampur.—This State has an area of 704 square miles, a population of 112,051, and an annual revenue of about Rs. 12 lakhs. The rulers of Dharampur trace their descent from Ramchandraji of Hindu Mythology. They belong to the Solar Sisodia Rajput dynasty. The present Raja, H.H. Maharana Shri Vijaydevji Mohandevji, was born on December 3, 1884, and succeeded to the gadi on March 26, 1921. His Highness is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns and a personal salute of 11 guns.

Jawhar.—This State is situated to the north of the Thana District of the Bombay Presidency on a plateau above the Konkan plain. It has an area of 310 square miles, a population of 57,288, and an average annual revenue of about Rs. 5½ lakhs. Up to 1924, the period of the first Mahomedan invasion of the Deccan, Jawhar was held by a Varli, not a Koli Chief. The first Koli Chief obtained his footing in Jawhar by a device similar to that of Dido when he asked for and received as much land as the hide of a bull would cover. The Koli Chief cut a hide into strips, and thus enclosed the territory of the State. The present Chief, Raja Patangsha, alias Yeshwantrao Vikramsha, is a minor, and the State is at present under minority administration. The Raja is entitled to become a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns.

Lunawada.—The State has an area of 388 square miles, a population of 95,162, and an annual revenue of about Rs. 5½ lakhs. The rulers of Lunawada belong to the historic Solanki clan of Rajputs, claiming their descent from the famous Sidhraj Jaysinh of Anhilwad (Gujarat). Besides having fine patches of good agricultural land, the State contains a considerable forest area yielding rich timber. The present Raja, Maharana Shri Virbhadrasinhji, was invested with full powers on October 2, 1930. He is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns.

Rajpipla.—This important State lies to the south of the Narbada. It has an area of 1,517½ square miles, a population of 206,114, and an average annual revenue of about Rs. 24½ lakhs. The lands are rich and very fertile, and, except for a few forest-clad hills, are suitable and available for cultivation in large quantities in the south-east talukas. The family of the Maharaja of Rajpipla, Major H. H. Maharana Shri Sir Vijaysinhji, K.C.S.I., is said to derive its origin from a Rajput of the Gohel clan. Cotton is the most important crop in the State. In the hills there are valuable teak forests. The capital is Rajpipla, which is connected with Ankleshwar by railway built by the State. His Highness is a member of the Chamber of Princes, and enjoys a dynastic salute of 13 guns.

Sachin.—This State has an area of 49 square miles, a population of 22,107, and an annual revenue of about Rs. 4 lakhs. The ancestors of the Nawab of Sachin were the rulers of Janjira. The founder of the Sachin family was Abdul Karim Yakut Khan, commonly called Balu Miyan. In 1784, on the death of his father Abdul Karim (Nawab of Janjira), the Chiefship was seized by Sidi Jawhar, and Balu Miyan fled to Poona, where he sought the protection of Nana Furnavis, who managed to secure for him a tract of land near Surat, then estimated to yield Rs. 75,000 a year. Balu Miyan was granted the hereditary title of Nawab by the Emperor of Delhi. The present ruler is Nawab Mohamed Hyder Khan, who was born on September 11, 1909, and succeeded to the gadi in November, 1930. He is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns.

Sant.—This State has an area of 394 square miles, a population of 83,538, and an annual revenue of about Rs. 5½ lakhs. The ruling family belongs to the Mahipavat branch of the Puvar or Parmar Rajputs. The rulers used to pay Rs. 5,384-9-10 to Scindia. This amount is now paid by the State to the British Government. The present ruler, Maharana Shri Jorarwarsinhji Pratapsinhji, was born on March 24, 1881, and succeeded to the gadi in 1896. He is a member of the Chamber of Princes, and enjoys a dynastic salute of 9 guns.

Rewa Kantha Agency, including the Surgana State and the Dangs.—This Agency is a subordinate Political Agency of the Gujarat States Agency. It is comprised of all the non-salute States and Estates of the old Rewa Kantha Agency, the State of Surgana, previously in the Nasik Agency, and the petty States known as the Dangs, previously in the Surat Agency. Rewa Kantha means the district or province situated on the banks of the river Rewa or Narmada or Narbuda. This river is held in high veneration among the Hindus, especially in the Bombay Presidency. All the States comprised in the Province of Rewa Kantha are not on the banks of the Narbada, for some of the Northern States, *i.e.* Kadana, and the States in Pandu Mewas are on the banks of the Mahi River. In fact, the Rewa Kantha Agency comprises territories watered both by the Rewa and Mahi Rivers. The population consists of the following main classes: Hindus, Jains, Muhammadans, Animistic (Bhils, Dhankas, Kolis and Naikdas). Surgana is situated on the

borders of the Nasik District. The Dangs consist of a tract of country between the Sahyadris and the Surat District which is parcelled out among 14 petty chiefs. Of these 13 are Bhils and 1 is a Kokani. The headquarters of the Agency which is situated at the Baroda Residency in view of the fact that the Secretary to the Agent to the Governor-General Gujarat States and Resident at Baroda is also *ex-officio* Political Agent of this Agency.

Political Agent.—Capt. G. A. Falconer, I.A.
Assistant Political Agent for the Dangs.—Mr. E. O. Sampson.

Many of the States and Estates are small and only a few enjoy restricted jurisdictional powers. The four Chiefs of Kadana, Bhaderwa, Surgana and Jambughoda are, however, larger and more important, the first three named being included in the list of electorates for representative members of the Chamber of Princes.

The following sixteen States conduct their relations through the Political Agent:—

Name of the State	Area in Sq. Miles	Population	Revenue
			Rs.
Agar	17	3,586	32,000
Bhaderwa	27	11,048	81,894

Uchad	8·50	3,362	36,000
Umeta	24	5,622	71,000
Vajiria	21	5,968	62,265

All these States were in the old Rewa Kantha Agency except Surgana, which was in the Nasik Agency.

The remaining Talukas and Estates of the old Rewa Kantha Agency (40 in number) are grouped in two Thana Circles known as the Sankheda Mewas and the Pandu Mewas with headquarters at Wadia and Pandu respectively. The jurisdiction and administration of these Estates are exercised for them, by the Thanadars concerned under the control of the Deputy Political Agent and Political Agent.

Gwalior.—This State is the premier Mahratta State in Central India. The founder of the dynasty, Ranauji Scindia, held military rank under Peshwa Baji Rao (1720) and established his headquarters at Ujjain. In 1782, Mahadji Scindia was recognised by Lord Hastings as an independent ruler. In 1886, Gwalior Fort was restored to Maharaja Scindia by Lord Dufferin.

The area of the State is 26,367 sq. miles, the population 3,523,070 (1931); Hindus form the bulk of the population. The approximate revenue is Rs. 23,204,000.

In 1932–33 there were 1,282 educational institutions with 71,383 pupils. These institutions include 2 colleges, viz. Victoria College, Lashkar, and Madhav College, Ujjain, with 421 students, and 5 high schools, 4 for boys and 1 for girls. The Scindia Public School has been newly started. There is also a Technical Institute at Lashkar, which provides for technical education. There were 47 municipalities, 4,110 co-operative societies with 71,834 members and a working capital of Rs. 62·04 lakhs. Up to the end of 1932–33 the capital outlay on Gwalior State Railways was Rs. 2·89 crores. The length of the metalled roads maintained by the State is about 2,220 miles. Important archæological monuments in the State are at Bagh, Bhilsa, Chanderi, Gwalior, Gyaraspur, Mandsour, Udaypur, and Ujjain.

The total number of dispensaries was 91 and the amount expended on them was over 5 lakhs. Special irrigation works are in progress, the most important of which is Parwati Project, with an estimated cost of Rs. 125·25 lakhs. The irrigation works within the State number 880 (major 155, minor 725). The total cultivated area during the year 1932–33 was 7,130 sq. miles, out of which 340 sq. miles were under irrigation, excluding Jagirs.

The ruler is His Highness Maharaja George Jivaji Rao Scindia Alijah Bahadur; born 1916; succeeded 1925; salute of 21 guns. The State is now in direct relation with the Government of India through a Resident, who resides at Morar (Gwalior). The administration is carried on by a Council of Regency under the presidency of Her Highness Maharani Gajra Raja Scindia during the minority of the Maharaja.

Hyderabad.—The territory of this State, the largest (next to Kashmir, which, however, contains vast areas of almost uninhabited land), and most populous of Indian States, had become a province of the Moghul Empire in 1687. In 1713 the Emperor appointed Mir Kamruddin Ali Khan, otherwise known as Chin Killij Khan, of Turkoman descent, as Subadar or Viceroy of the Deccan with the title of Nizam-ul-Mulk (administrator of the land). Nizam-ul-Mulk became independent, and founded the present dynasty of the Nizam in 1724; and Hyderabad, founded in 1589 by a descendant of the Golconda dynasty which gave way to the Moghuls, became the capital. The present ruler is a direct descendant of the original Nizam-ul-Mulk.

The area is 82,698 sq. miles; and the population, 14,436,148 (1931). Most of the people are Hindus. The administration is carried on, subject to the orders of H.E.H. the Nizam, by an Executive Council. There is a Legislative Council of 20 members, in addition to the President. Of these, 12 are official, 6 non-official and 2 extraordinary members. The Government of India is represented by a Resident whose headquarters are at Hyderabad. Besides the Hyderabad Municipality, there are 15 District and 107 Sub-district Boards. There are Regular Troops, Imperial Service Troops and the Golconda Brigade.

In 1931–32 there were 1 Chief Justice and 7 Puisne Judges and 146 officers administering criminal and civil justice, besides 1 Honorary Sessions Judge, 9 Honorary Magistrates and 2 Honorary Nazims. In 1933, 38,213 criminal cases were instituted and 42,134 civil suits. The District and City Police numbered 16,444. The number of public educational institutions in 1933 was 4,541, with 326,906 pupils. There were 7 Arts Colleges, including 1 for women, and 3 Professional Colleges. The total expenditure on public instruction amounted to Rs. 71·76 lakhs. The revenue for 1932–33 was Rs. 811·14 lakhs (Service receipts) and Service expenditure Rs. 758·06 lakhs. The number of co-operative credit societies was 2,532. Under industries there were in 1928–29, 5 cotton mills, 282 ginning and pressing factories, and 270 flour and other mills. The number of factories permitted to be opened in 1933 was 497, of which 143 were flour mills, 115 ginning factories, 68 oil and rice mills, 47 decorticators, 21 hullers, and 10 shellers. Four joint-stock companies were registered with a total nominal capital of Rs. 5·20 lakhs. Trade covered Rs. 1,326·80 lakhs imports, and Rs. 1,304·18 lakhs exports. The State has its own currency.

The ruler is Lieut.-General H.E.H. Sir Mir Usman Ali Khan, Faithful Ally of the British Government, G.C.S.I., G.B.E., Nizam of Hyderabad; born 1886; succeeded 1911; salute of 21 guns.

Jammu and Kashmir.—The State of Kashmir, which had been under Hindu rulers and Mohammedan Sultans, became part of the Moghul Empire under Akbar from 1581. After a period of Afghan rule from 1756 it was overrun by the Sikhs in 1819. Ranjit Singh entrusted in 1820 the territory of Jammu to a feudatory, Gulab Singh, and after the decisive battle of Sobraon in 1846 Kashmir was made over to the latter by Lord Hardinge on payment of the indemnity demanded from the Sikhs. British supremacy was then recognised. The bulk of the population are Mohammedans, though the ruling race is Hindu. The area is 84,471 sq. miles; the population 3,646,243. Geographically the State may be divided into (1) the Tibetan and semi-Tibetan tracts which contain the districts of Ladakh and Gilgit; (2) the Jhelum valley, within which is situated the lovely and world-famous 'Happy valley' of Kashmir; (3) the submontane and semi-mountainous tract which includes Jammu, the winter capital of the State, which is connected with the railway system of India; and (4) the outer Hills, in which are comprised the Poonch Ilaqa and Bhadarwah: a miniature 'Happy valley.'

The Government of India is represented by a Resident, who resides at Srinagar. In 1927–28 there were in addition to the High Court 128 Criminal Courts and 14,192 offences were tried. There were also 22,597 civil suits instituted in 67 courts. In 1927–28 there were 9,451 sq. miles of demarcated forests. The trade in 1928–29 was: Imports, 332 lakhs; Exports, 184 lakhs, and the total receipts 251 lakhs. The revenue of the State in 1928–29 was Rs. 251 lakhs. The Civil List amounted to Rs. 24,69,060. In 1927–28 there were two Arts Colleges at Srinagar and Jammu with 868 students. There were in all 1,012 educational institutions with 55,914 pupils, including 4,610 girls.

In addition to agriculture the chief industry is sericulture, which dates back to the 15th century. There are considerable mineral resources which have not yet been fully surveyed. A Department of Industry was created in

1922. It is equipped on modern lines and an up-to-date laboratory has been attached to it. The State has great natural resources and the Department of Industries is intended to help in their scientific development. Industries are being fostered by the Government. In recent years the State has made rapid strides in the field of progress. Primary education for boys has been made compulsory in the cities. A High Court Bench has been constituted. The Agriculturist's Relief Regulation and other legislations have been designed for the protection of the ryots. The marriage of boys below the age of 18 and girls below the age of 14 has been penalised. His Highness' Government has done much to protect the interests of the hereditary State subjects. A Board called the Civil Service Recruiting and Scholarship Selection Board has been set up for regulating appointments and selections for training. The Jammu and Kashmir State Assembly held its first session in November, 1934.

The present ruler is Colonel H.H. Maharajadhiraja Sir Hari Singh Bahadur, G.C.S.I., G.C.I.E., K.C.V.O., Maharaja of Jammu and Kashmir; born 1895; succeeded 1925; salute of 21 guns; heir apparent: Yuvaraj Karansinghji Bahadur, born 1931.

Mysore.—According to tradition the ancestors of the present dynasty came to Mysore in 1399, and established themselves in Hadinad, a few miles from the present capital of the State. By successive conquests, the family extended the kingdom till it reached a position of eminence during the seventeenth century. In the latter part of the eighteenth century the real power passed into the hands of Hyder Ali. Under him and his son, Tippu Sultan, the territories of Mysore were largely extended. On the defeat of Tippu in 1799, the territories were partitioned and the Mysore State, in its present shape, was handed back to the old Hindu dynasty, in the person of H.H. Krishnaraja Wadiyar III. As a result of an inquiry made by a Committee into the

administration, Lord William Bentinck assumed direct administration of the State in 1831; and for fifty years Mysore was administered by Commissioners. In 1865, the father of the present ruler was adopted as heir by the Maharaja, and in 1881 he was placed on the throne of Mysore, and invested with powers under an Instrument of Transfer. In 1913 this was replaced by a treaty. In 1927, the Government of India announced the remission from the financial year 1928 in perpetuity Rs. 10½ lakhs of the annual subsidy, which had till that time amounted to Rs. 35 lakhs.

The area is 29,483 sq. miles; and the population (exclusive of the civil and military station of Bangalore) 6,423,189 (1931), a large majority being Hindus. The administration is carried on under H.H. the Maharaja by the Dewan (Prime Minister), and two Members of Council. There is a Representative Assembly of 264 members and a Legislative Council of 50 members. The Government of India is represented by a Resident at Bangalore. In 1932–33, there were besides the High Court, 72 criminal and 37 civil courts. There were 27,096 offences reported and 43,783 civil cases instituted in that year. There were 2,180 co-operative societies with 144,481 members. In 1932–33 the University of Mysore had 5 constituent colleges and 3 intermediate colleges and a medical school with a total strength of 2,834 students. The number of educational institutions, public and private, on March 31, 1933, was 7,737, with 311,371 scholars. The total revenue in 1932–33 was Rs. 3,38,27,523 and the expenditure chargeable to revenue was Rs. 3,56,15,671. The State forests cover 4,320 sq. miles. The mines in the Kolar Gold Fields area produced 329,575 ounces of fine gold in 1932.

The Ruler is Colonel H.H. Maharaja Sir Sri Krishnaraja Wadiyar Bahadur, G.C.S.I., G.B.E.; born 1884; succeeded 1895; salute of 21 guns.

North-West Frontier Agencies and Tribal Areas.—Between the border of the British Districts of the N.W. Frontier Province and the Afghan frontier is the tribal territory. The Government of India exercises the minimum of interference. The region is divided into five Political Agencies: Malakand (Dir, Swat and Chitral), Khyber, Kurram, North Waziristan and South Waziristan. There are, further, areas known as Tribal Areas under the political control of the Deputy Commissioners of the five British Districts. All are under the Governor of the N.W. Frontier Province in his capacity of Agent to the Governor-General. Chitral is ruled by H.H. Sir Shuja-ul-mulk, K.C.I.E., the Mehtar of Chitral.

The area under tribal territory, including that of the Agencies, beyond the British border is approximately 25,792 sq. miles, with a population of 2,259,288. The protective units are the North Waziristan Scouts, South Waziristan Scouts, Kurram Militia and the Chitral Scouts in the Frontier Corps; a Frontier Constabulary; and Levies and Khassadars.

THE STRAITS SETTLEMENTS.

Constitution and Government.

Malaya.—The Straits Settlements, a Crown Colony, comprise the Settlement of Singapore (including the Cocos Islands, Christmas Island), Penang (including Province Wellesley and the Dindings), Malacca and Labuan. Malacca, one of the oldest European settlements in the East, was occupied by the Portuguese under Albuquerque in 1511, and held by them till 1641, when it passed into the possession of the Dutch, remaining in the hands of the Dutch till 1795 when it was captured by the English. It was restored (under the Treaty of Vienna) to the Dutch in 1818, being finally retroceded to the East India Company in 1824.

Penang (Prince of Wales' Island) was the first British Settlement in the Malay Peninsula, being ceded by the Sultan of Kedah to the East India Company in 1786, Province Wellesley being added in 1800.

The early history of Singapore is obscure; in the thirteenth and fourteenth centuries it occupied a position of independence and importance till destroyed by the Javanese about 1377, after which date it remained almost uninhabited until 1819, when Sir Stamford Raffles founded the trading settlement which is now the free port and city of Singapore. The original lease of the site of a factory to Raffles, on behalf of the East India Company, by the Sultan of Johore, and the Temenggong, Chief of Singapore, was followed in 1824 by a Treaty ceding the entire Island in perpetuity to the Company. In 1826, the three Settlements were incorporated under one Government as an Indian Presidency with headquarters at Penang. In 1830, the Settlements were incorporated under the Presidency of Bengal, headquarters being transferred in 1836 to Singapore. On April 1, 1867, the Settlements were transferred from the control of the Indian Government to that of the Secretary of State for the Colonies. The Cocos Islands in 1868, Christmas Island in 1889, and the former Colony of Labuan in 1905, were brought under the control of the Governor of the Straits Settlements, being incorporated in the Colony, in the Settlement of Singapore in 1900, 1903 and 1907 respectively.

Labuan was constituted a separate settlement in 1912.

The administration of the Colony is in the hands of a Governor, aided by an Executive Council, composed of the General Officer commanding the Troops, the Colonial Secretary, the Resident Councillors of Penang and Malacca, the Attorney-General, and the Treasurer, official members nominated by the Governor, at present three in number, and three unofficial members. There is a Legislative Council, presided over by the Governor, consisting of the General Officer commanding the Troops, twelve other official members, and thirteen unofficial, eleven of the latter nominated and two elected by the Chamber of Commerce at Singapore and Penang. The municipalities of Singapore, Georgetown (Penang), and Malacca are administered by Municipal Commissioners appointed by the Governor.

The Governor of the Straits Settlements is also *High Commissioner* for the Malay States and the Bornean State of Brunei, and *British Agent* for the States of North Borneo and Sarawak.

Governor.—Sir Cecil *Clementi*, G.C.M.G. (February, 1930).

Colonial Secretary.—A. *Caldecott*, C.M.G., C.B.E. (1933).

Area and Population.

The total area of the Colony, with dependencies, is 1,531 sq. miles. Singapore is an island about twenty-six miles long by fourteen wide,

with an area of 220 square miles, separated from the southern extremity of the Malay Peninsula by a strait three-quarters of a mile in width. A number of small islands adjacent form part of the Settlement. The seat of government is the town of Singapore, at the south-eastern point of the island. Penang is an island of 110 square miles, off the west coast of the Malay Peninsula, at the northern entrance of the Straits of Malacca. On the opposite shore of the mainland, distant about two miles, is Province Wellesley, a strip of territory forming part of the Settlement of Penang, averaging eleven miles in width, and extending thirty-one miles along the coast, including ten miles of territory to the south of the Krian; total area 280 square miles. The capital of Penang is George Town. Off the coast of Perak is the small island of Pangkor, which, together with a strip of the mainland, is British territory, the whole being known as the Dindings. The Settlement of Malacca, with a capital town of the same name, is on the west coast of the peninsula between Singapore and Penang—about 110 miles from the former and 240 from the latter; it is a strip of territory 42 miles in length, and from eight to 24 miles in breadth, with an area of 640 square miles. Population of Malacca town (1932) is 38,042.

The population of the Straits Settlements, according to the census of 1931, inclusive of the garrison, was 1,114,015 (671,080 males and 442,935 females).

The population as estimated at June 30, 1934, was estimated to be as follows:—

Settlement or Province	Malays	Europeans	Eurasians	Chinese	Indians	Others	Total

In 1933 there was an excess of departures over arrivals of Chinese, Javanese and Southern Indian labourers amounting to 70,393.

Education.

There is an Education Board consisting of official and unofficial members, and provision exists for an Education Rate. Vernacular instruc-

tion is provided in the Malay language free of charge, and attendance is compulsory for Malays. Instruction in English for all nationalities is provided in Government and numerous aided schools, and fees are charged. All the Government schools are unsectarian. There is a reformatory in Singapore for juvenile offenders and vagrants, where industrial instruction is provided.

The numbers of schools and scholars in 1933 were as follows:—

—	No. of Schools	Enrolment	Attendance
Government English schools (boys and girls) . .	24	9,463	9,026

In Singapore are Raffles College, formally opened in 1929, giving a higher education of a University standard in arts and science, and King Edward VII. College of Medicine.

Justice and Crime.

The law in force is contained in local ordinances and in such English and Indian Acts and Orders in Council as are applicable to the colony. The Indian Penal Code, with slight alterations, has been adopted, and there is a Civil Procedure Code based on the English Judicature Acts. There is a Supreme Court which holds assizes at Singapore and Penang every two months, and quarterly at Malacca, civil sittings monthly at Singapore and Penang, and once a quarter at Malacca. The Supreme Court is composed of the Chief Justice and three or more Puisne Judges. It is a Court of Record, and exercises civil and criminal jurisdiction, in each case both original and appellate. When exercising appellate civil jurisdiction, the Court is styled the Court of Appeal. An appeal may lie from the Court of Appeal to the Privy Council.

There are, besides, district courts, police courts and marine magistrates' courts. Police force, actual strength 3,911 in 1933.

Commerce.

The trade of the Colony of the Straits Settlements is not now separately distinguished; the foreign trade of British Malaya which includes the Colony, the Federated Malay States and the States of Johore, Kedah, Perlis, Kelantan and Trengganu passes principally through the two free ports of Singapore and Penang in the Colony and of Port Swettenham in the F.M.S.

Rubber, coconuts, rice, pineapples, tobacco and fruit are the principal agricultural products.

The output of rubber amounted in 1933 to 415,836 tons.

The principal imports comprise foodstuffs, clothing and machinery; the chief exports, raw materials and articles partly manufactured. There is an important transit trade in the ports of Singapore and Penang.

The following shows the total values of Malayan trade for five years:—

[1] Provisional figures.

The principal exports to the United Kingdom in 1933 were tin, 455,602*l.*; rubber, 1,595,179*l.*; preserved pines, 650,839*l.* The principal imports from the United Kingdom were:—cotton piece goods, 552,885*l.*; iron and steel manufactures, 609,339*l.*; tobacco, 1,017,579*l.*; machinery, 186,702*l.*

Shipping and Navigation.

The total net tonnage of merchant vessels, with cargo and in ballast, which entered into and cleared from Malayan waters during 1933 was 28,338,000, of which 34 per cent. was British, 23 per cent. Dutch, 17 per cent. Japanese, and 26 per cent. other nationalities.

Communications.

The Straits Settlements at the end of 1933 had 978 miles of metalled roads and 131 miles of gravel road, natural road and hill-path. There is a railway from Singapore to Woodlands on the Johore Straits, and thence across the Johore Causeway to Johore Bahru. The Federated Malay States Railway extends from Parit Buntar in Krian to Prai in Province Wellesley, whence are steam ferries to Penang. There is a railway from Malacca to Tampin in Negri Sembilan. All the railways have a gauge of one metre, and form a part of the Federated Malay States Railway system. A continuation through Johore was opened in 1909, and the east coast section connecting Pahang with Kelantan and Siam was opened in August, 1932.

The estimated number of letters, postcards, newspapers and other packets and parcels posted and delivered during the year 1933 was 39,767,277. The number of letters sent to China in clubbed packets was 1,007,877. Parcels posted and delivered numbered 235,212 as compared with 248,480 in 1932.

The Straits Settlements have telegraph and telephone communications with each other, with the Malay States and with foreign countries which are important from the point of view of foreign trade.

There are wireless stations on Singapore Island and Province Wellesley, by means of which weather reports and other information of importance are broadcasted for the benefit of shipping and aircraft services. Wireless is also used in case of land line or cable interruption.

Money, Weights and Measures.

There are twenty-seven banks with establishments in the Colony. The amount of deposits in the Post Office Savings Bank on December 31, 1933, was 798,360 dollars.

The dollar, value 2*s.* 4*d.*, is the standard coin of the Colony, and with the half-dollar and the British sovereign is legal tender for the payment of any amount. Subsidiary silver coins are 20, 10, and 5 cent pieces; nickel five cent pieces; copper cents, half-cents, and quarter-cents. On December 31, 1933, Government currency notes to the value of 66,964,286 Straits dollars were in circulation.

The measure of length in use in the Settlements is the English yard, with its divisions and multiples, and land is measured by the English acre. The native terms are, however, still in use. Commercial weights are:—

1 Kati	= 16 Tahil =	1⅓ lbs. avoirdupois
1 Pikul	= 100 Kati =	133⅓ ,, ,,
1 Koyan	= 40 Pikul =	5,333⅓ ,, ,,

The kati of 1⅓ lbs. is known as the Chinese kati. Another weight, known as the Malay kati, and still in partial use in Penang, is equal to the weight of 24 Spanish dollars, or 9,984 grains. This gives 142·628 lbs. as the weight of the pikul, and 5,705·143 lbs. as the weight of the koyan. The measures of capacity throughout the Colony are the gantang or gallon, and chupak or quart.

The **Cocos** or **Keeling Islands**, a group of about twenty small coral islands. Latitude 12° 5′ S. and Longitude 96° 53′ E., 581 miles distant from Java Head (S. 56° W.), and 1,161 miles from Singapore (S. 30° W.). The largest is 5 miles by ¼ mile. They were declared a British Possession in 1857, were placed by Letters Patent of October 13, 1878, under the control of the Governor of Ceylon, and by Letters Patent of February 1st, 1886, under the Governor of the Straits Settlements. In 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. Population on April 1, 1931, 1142 (males, 608; females, 534). The principal cultivation consists of coconuts, and copra, coconut-oil and nuts are exported. In 1902 a station on the Cape–Australia cable route was established on Direction Island in the north-eastern part of the group.

Christmas Island.—In the Indian Ocean. Latitude 10° 30′ S. and Longitude 105° 40′ E. It lies 223 miles S. 8° E. of Java Head, and 529 miles N. 79° E from the Cocos Island. It is of irregular shape, about 11 miles long (at the longest point), and about 4½ miles wide (at the narrowest point). Area about 60 square miles. The climate is healthy. Average daily maximum and minimum temperatures 87° F. and 75° F. There is a prevalent E.S.E. trade wind. Known to navigators since about the middle of the seventeenth century. The Island was formally annexed on June 6, 1888. The Island was placed under the administration of the Governor of the Straits Settlements in January, 1889. In 1900 it was annexed to the Straits Settlements and incorporated with the Settlement of Singapore. The Island is administered by a District Officer who is a member of the Malayan Civil Service. There is a small force of Sikh Police drafted from the Straits Settlements Police Force. All the inhabitants (mainly Chinese and Malays), with the exceptions of the District Officer and his staff, are employed by the Christmas Island Phosphate Company, Limited, registered in London, which works the large natural deposits of phosphate of lime to which the Island owes its importance. In 1923 a wireless station was installed, and the Island is now in direct communication with Singapore. A school was established in 1931, and a teacher supplied by the Government. Population, December 31,

1933, 872 (males, 720; adult females, 81; children, 71). Expenditure of District Office in 1933, 1,237*l.* Imports, 1933, 9,682*l.*, chiefly machinery and engineering stores; exports in 1933 consisted solely of phosphate of lime. Tonnage entered and cleared in 1932. 96,474 tons; and in 1933, 86,477 tons; of the latter 7,409 tons were for British ports, and 79,068 tons were for Japanese ports.

The island of **Labuan** lies about 6 miles from the north-west coast of Borneo. It was ceded to Britain in 1846; on January 1, 1907, was incorporated with Singapore, and on December 1, 1912, was created a separate Settlement. Area 40 sq. miles; the estimated population in 1934 was 7,497, including 23 Europeans, 5,054 Malays, and 2,171 Chinese. Capital, Victoria, which has about 1,500 inhabitants. Revenue (1933), 9,814*l.*; expenditure (excluding Government monopolies) (1933), 14,230*l.* Shipping entered and cleared, 1933, 284,120 tons. Gross trade (1933), 139,445*l.*, including foreign trade, 79,484*l.*

THE FEDERATED MALAY STATES.

Constitution and Government.—The Federated Malay States of Perak, Selangor, Negri Sembilan, and Pahang, in the Malay Peninsula, are under British protection. The Governor of the Straits Settlements is *ex officio* H.M.'s High Commissioner for these States and for the other Malay States in the British sphere (Johore, Kedah, Kelantan, Trengganu and Perlis).

High Commissioner.—Sir Cecil *Clementi*, G.C.M.G.

Chief Secretary to Government.—M. B. *Shelley*, M.C.S. (Acting).

The following are the Rulers and British Residents of the four States:—

Ruler of Perak.—H.H. Paduka Sri Sultan Iskandar Shah, G.C.M.G., K.C.V.O., ibni Idris. *Resident.*—G. E. *Cator*, M.C.S.

Ruler of Selangor.—H.H. Sultan Ala'idin Sulaiman Shah, G.C.M.G., ibni Al-Marhum Raja Muda Musa. *Resident.*—T. S. *Adams*, M.C.S.

Ruler of Negri Sembilan.—H.H. Tuanku Abdulrahman, K.C.M.G., ibni Al-Marhum Tuanku Muhammad, Yang Di-Pertuan Besar. *Resident.*—G. E. *London*, M.C.S.

Ruler of Pahang.—H.H. Al-Sultan Abu Bakar Ri'ayatu'd-din Al-Mu'addzam Shah, C.M.G., ibni Al-Marhum Al-Sultan Abdullah. *Resident.*—H. G. R. *Leonard*, M.C.S.

In Perak, Selangor, and Sungei Ujong, which State was subsequently amalgamated with other States to form the Confederation of Negri Sembilan, British Residents were appointed in 1874, with a staff of European officers whose duty was to aid the Rulers by advice, and to exercise executive functions. The supreme authority in each State is vested in the State Council, consisting of the Sultan, the Resident, the Secretary to the Resident, the principal Malay chiefs and representatives of other communities. The policy of the four States is co-ordinated by the Chief Secretary, who is the senior Resident executive authority, and by the High Commissioner.

In 1883 the relations of the Straits Settlements with the States on the frontier of Malacca were consolidated. These States were confederated in 1889, under the name of Negri Sembilan (signifying Nine States). In January, 1895, Sungei Ujong (including Jelebu, which had been administered by a Collector and Magistrate under the Resident of Sungei

Ujong since 1888) and Negri Sembilan were placed under one Resident; and in July, 1895, a treaty was signed by which the administrations were amalgamated. The new federation, which retains the ancient name of Negri Sembilan, comprises the States of Sungei Ujong, Johol, Jelebu, Rembau and five smaller States. In 1887, by agreement with the Raja of Pahang, the control of his foreign relations, &c., was surrendered to the British Government. This was followed by a further agreement in 1888 with the Raja (now styled Sultan), under which Pahang was taken under British protection, on the same terms as the Protected States on the west coast of the peninsula. Pahang is situated on the east coast, within 200 miles by sea from Singapore. In July, 1896, the treaty between the four Protected States, Perak, Selangor, Pahang, and Negri Sembilan, and the British Government came into force by which the administrative federation of these States under a Chief Secretary to Government is provided for, and the States agree to furnish a contingent of troops for service in the Colony should His Majesty's Government be at war with any foreign nation.

The laws of each State are contained in enactments passed by the State Councils, up to December, 1909, and from that date, in matters common to the four States, by the Federal Council; the State Councils may still legislate in purely State matters.

The Federal Council was created in 1909 in order to give effect to a desire for the joint arrangement of all matters of common interest to the Federation or affecting more than one State, and for the proper enactment of all laws intended to have force throughout the Federation or more than one State. The Federal Council, which was reconstituted in 1927, consists of the High Commissioner as President, the Chief Secretary to Government, Federated Malay States, the four British Residents, the Legal Adviser, the Financial Adviser, the Adviser on Medical and Health Services, the Controller of Labour, Malaya, the General Manager for Railways, the Director of Education, the Commissioner of Trade and Customs, the Secretary for Chinese Affairs, the Director of Agriculture, one additional official member, and twelve unofficial members, who are nominated by the High Commissioner with the approval of His Majesty the King. The Federal Council generally meets at least three times a year. All Federal legislation is passed by it, and the estimates of expenditure and revenue require its approval.

Area.—The areas of these States are approximately:—Perak, 7,740 sq. miles; Selangor, 3,160 sq. miles; Negri Sembilan, 2,560 sq. miles; Pahang, 13,970 square miles; total, 27,430 sq. miles.

Population.—Estimated, June, 1934: Perak, 726,231; Selangor, 503,012; Negri Sembilan, 223,437; Pahang, 178,839; total 1,631,519. The population consisted of 6,504 Europeans, 4,487 Eurasians, 627,461 Malays, 653,771 Chinese, 322,089 Indians, and 17,210 others. The decrease in the population since the census 1931 is chiefly due to the repatriation of Chinese, Indian and Javanese labourers, as a result of the general depression in trade. The largest town is Kuala Lumpur (in Selangor) with about 104,032 inhabitants. Births, 1933, 56,787; deaths, 32,340.

Education.—Schools which are either Government, aided by Government, or private, provide facilities for the study of various vernacular languages such as Malay, Chinese and Tamil, besides that of English. In 1933 there were 49 English schools (36 for boys and 13 for girls), with an average enrolment of 11,898 boys and 4,350 girls (1932, 12,946 boys and 4,530 girls). Of the vernacular schools, there were for the Malays 530

schools with an average enrolment of 41,119; for the Chinese 358 registered schools with a total enrolment of 22,270; and for the Tamils 13 Government schools and 204 aided schools. In addition there are Technical Schools, Trade Schools and Evening Classes, which are conducted by the Government and which provide vocational and industrial education. Expenditure on education (excluding building and upkeep of schools) was 335,575*l.* in 1933.

Justice and Crime.—The courts in the States are:—(1) The Supreme Court, comprising the Court of a Judge and the Court of Appeal. (2) The Court of a Magistrate of the first class. (3) The Court of a Magistrate of the second class. (4) The Court of a Kathi and the Court of Assistant Kathi. (5) The Court of a Penghulu. The Court of Appeal consists of two or more Judges, the Chief Justice being President. There is a final appeal in civil matters to the Privy Council.

The number of cases of serious crime (murder, gang-robbery and robbery) reported in 1933 was 153. On December 31, 1933, there were 1,364 prisoners, as against 1,633 on December 31, 1932.

The Police Force, with European and Malay officers, consists of an Indian and Malay contingent. The strength at the close of 1933 was: British officers, 103; Malay and other Asiatic officers, 55; Malay rank and file, 2,301; N. Indian subordinate police officers and constables, 1,251; Detectives (of various nationalities), 224; total, 3,934.

Finance.—The revenue of the States in 1933 was 5,506,527*l.*, and expenditure, 5,863,512*l.*

Leading items of revenue in 1933 were:—customs, 1,965,842*l.*; fees of court, 711,550*l.*; excise, 631,934*l.*; lands and mines, 443,756*l.*; electric light, power and water, 329,997*l.*; municipal, 322,886*l.*; interest, 313,131*l.*; licenses and internal revenue, 307,005*l.*; posts, telegraphs and telephones, 233,569*l.*; rent on government property, 84,895*l.* Expenditure—charges on account of public debt, 810,232*l.*; pensions, retired allowances, gratuities, etc., 772,914.; public works, 485,139*l.*; medical and health, 441,599*l.*; police, 359,495*l.*; education, 331,901*l.*; municipal, 278,051*l.*; posts and telegraphs, 241,729*l.*; railways, 237,989*l.*; clerical service, 214,474*l.* Public debt on December 31, 1933, 11,221,667*l.*

Production.—The staple products are coconuts, rice, rubber, tapioca, palm oil and pineapples. The chief industrial enterprises are the cultivation of rubber, and the mining of tin. The Krian irrigation works in Perak irrigate 70,000 acres of rice (padi) land and supply drinking water to the district. The canal is 21 miles long with 16½ miles of branches and 188½ miles of distributory channels. The forests produce many excellent timbers, which are finding an increasing market in Europe, besides gutta-percha, gums, oils, resins and canes. The outturn of timber, firewood and charcoal during the year, expressed in solid cubic feet, amounted to 12,555,581, as compared with 12,673,387 in 1932. In 1933 the tin export amounted to 22,825 tons, and in 1932 to 27,091 tons. In 1933, 29,036 ounces of gold, and in 1932, 29,296 ounces were produced in the Federated Malay States. Besides gold and tin, many minerals are found, including lead, iron, copper, arsenic, manganese, wolfram, scheelite, plumbago, silver, zinc, and coal, of which only coal, iron, arsenic, wolfram and scheelite have been found in workable form. The exports of tungsten ore in 1933 were 951 tons. The labour force engaged in mining at the end of 1933 was 51,890.

Commerce.—The trade (excluding bullion and specie) was as follows in 1933, with total for 1932:—

—	Perak	Selangor	Negri Sembilan	Pahang	Total 1933	Total 1932
	£	£	£	£	£	£
Imports . .	2,808,096	4,139,616	680,836	203,186	7,831,734	8,298,885
Exports, including Re-exports	6,095,467	4,828,902	1,597,986	531,004	13,053,359	10,249,316

Chief imports, 1933: Rice, 1,422,553*l.*; motor spirit, 772,022*l.*; cotton yarn and manufactures (including cotton piece goods), 491,643*l.*; tobacco, cigars and cigarettes, 476,470*l.*; chemicals, drugs, dyes and colours, 352,891*l.*; kerosine, 248,482*l.*; iron and steel manufactures, 239,903*l.*; sugar, 202,448*l.*; milk condensed, sweetened and unsweetened, 190,529*l.*; live animals for food, 170,268*l.*; liquid fuel, 159,289*l.*; spirits, wines and malted liquors, etc., 144,544*l.*; feeding stuffs for animals, 141,103*l.*; machinery, 137,188*l.*; vehicles (including locomotives, ships and aircraft), 130,912*l.* Chief exports (excluding re-exports): Para rubber, 1933, 248,356 tons, 6,718,007*l.* (1932, 234,769 tons, 4,350,386*l.*); tin and tin-ore, 1933, 4,394,302*l.* (1932, 3,655,967*l.*); copra, 1933, 659,482*l.* (1932, 831,155*l.*); palm oil, 1933, 7,765 tons, 110,525*l.* (1932, 6,850 tons, 117,452*l.*); pine-apples (canned), 1933, 105,998*l.* (1932, 106,465*l.*); wood and timber, 1933, 70,852*l.* (1932, 93,668*l.*).

Trade with United Kingdom: imports, 1933, 993,357*l.* (1932, 1,000,588*l.*). Exports, 1933, 1,299,475*l.* (1932, 948,800*l.*).

Bullion and specie imported in 1933, 755*l.*; exported 1933, 134,298*l.*

Shipping, 1933.—The total number of vessels (exclusive of steamers of 75 tons net register and under, and native craft), entered and cleared at Port Swettenham was 1,676 with a tonnage of 5,357,858. The tonnage of steamers of 75 tons net register and under, and native craft entered and cleared at the various ports of the Federated Malay States was 278,251.

Communications.—The total mileage of roads on December 31, 1933, was 2,863 miles, of which 1,871 miles or 65·4 per cent. were bituminously treated. In addition, there were 150 miles of unmetalled roads and 1,535 miles of bridle-paths.

The Government has made, purchased, or leased, the railway systems of the whole peninsula south of the Siamese boundary, including the railway on Singapore Island. It has leased the Johore State Railway (121 miles) extending from Johore Bahru at the southern extremity of the Peninsula and opposite Singapore, to Gemas on the boundary between Johore and the Federated Malay States. At Gemas the line branches into the West Coast and the East Coast Lines; the West Coast Line runs north-north-west through Negri Sembilan, Malacca, Selangor, Perak and Province Wellesley to Prai—the port opposite Penang Harbour—488 miles from Singapore. From Bukit Mertajam near Prai the line proceeds northwards through the Unfederated States of Kedah and Perlis, to the Siamese frontier station of Padang Besar, 580 miles from Singapore. Through traffic with the Royal State Railways of Siam was opened on July 1, 1918, the distance between Singapore and Bangkok being 1,195 miles. Through services are in operation between Penang and Bangkok, the journey occupying 26 hours.

The East Coast Line proceeds northward from Gemas through Negri Sembilan, Pahang and Kelantan to Tumpat on the north-east coast of the Unfederated Malay State of Kelantan, 328 miles from Gemas.

Through working between the Federated Malay States and Kelantan via

the Royal State Railways of Siam commenced on November 1, 1921, and via the East Coast Railway on September 6, 1931.

An extension from Pasir Mas in Kelantan runs in a westerly direction for 11¾ miles to the Golok River at the Siamese boundary, where it joins the Siamese line running to Haad Yai Junction, on the main Bangkok–Penang line. Branch lines connect the main line with the ports on the west coast at Malacca, Port Dickson, Port Swettenham, Teluk Anson Wharf and Port Weld.

A causeway carrying two lines of rails and a roadway has been built across the Johore Strait, connecting the island of Singapore with the Peninsula.

The line is of metre gauge. On the mail trains on the West Coast main line there are sleeping saloons and restaurant cars, and on the East Coast Line sleeping saloons run from Tumpat to Singapore and vice-versa on the through weekly express.

The total route mileage open for traffic is 1,067 miles.

There were, in 1933, 99 post offices and 69 other places for postal business. In that year 26,058,953 postal packets (registered letters, 977,047, and parcels, 171,975) were received and delivered. In 1933 there were 2,918 miles of telegraph and telephone lines, and 26,811 miles of overhead wire, In addition there were 176 miles of underground cables containing 15,751 miles of wire single line. The net revenue collected by the department amounted to 233,569*l.*, and expenditure 243,683*l.* Savings Banks: 51,539 depositors and 635,187*l.* deposits on December 31, 1933.

Money, &c.—The current money consists of Straits Settlements dollars with subsidiary silver and copper coins. In February, 1906, the value of the dollar was fixed at 2*s.* 4*d.* or 60 dollars = 7*l.* Currency notes and bank notes also circulate, and the sovereign is legal tender for any amount at the above rate. Weights and measures (as well as currency) are the same as those as in the Straits Settlements.

THE UNFEDERATED MALAY STATES.

The Unfederated Malay States are five in number namely, Johore, Kedah, Perlis, Kelantan, and Trengganu.

The relations of Johore with Great Britain are defined by a treaty dated December 11, 1885; and, by an amendment to this treaty made on May 12, 1914, the Sultan agreed to accept, and to act upon the advice of, a British officer called the General Adviser. The Sultan is assisted in the administration of the State by an Executive Council, and by a Legislative Council consisting of official and unofficial members.

The rights of suzerainty, protection, administration and control of the other four States were transferred from Siam to Great Britain by the Anglo-Siamese treaty of March 10, 1909. In all four States the Rulers are assisted in the administration by State Councils, and by British Advisers appointed by the British Government.

In these States the currency, weights and measures are the same as in the Straits Settlements and the Federated Malay States. Their trade is almost entirely carried on with the Straits Settlements.

The religion of the Malays is Mohammedanism.

Johore (area 7,320 square miles, population at mid-year 1934, 499,870, of whom 249,982 were Malays, 201,205 Chinese, and 43,273 Indians) lies at the southern extremity of the Malay Peninsula. Births registered (1933), 20,181; deaths, 9,741. There were (1933) 6

English Government schools and 115 Government vernacular schools, besides other aided and private schools.

Revenue (1933), 1,377,384*l.* (from Customs, 360,627*l.*, licences 315,401*l.*, lands 267,616*l.*); expenditure, 1,352,108*l.* Imports (1933), 2,632,174*l.* (animals, food, drink and tobacco, 1,349,388*l.*; raw materials and articles mainly unmanufactured, 94,936*l.*; articles wholly or mainly manufactured, 1,179,944*l.*; parcel post, 7,904*l.* Exports, 4,198,343*l.* (rubber, 2,639,346*l.*, and 96,796 tons).

At the end of 1933, 730 miles of metalled road had been constructed. The railway from Penang to Singapore traverses Johore for a distance of 121 miles. The Johore section has been leased to the Federated Malay States Government for a term of years. Rubber estates are situated on either side along practically the whole length, and thus, with the help of roads and navigable rivers, good communication is available. A causeway across the Straits of Johore and connecting Johore with the island of Singapore was opened to railway traffic in October, 1923, and to vehicular traffic in June, 1924.

An efficient medical service and public hospitals are maintained by the Government. Police force, end of 1933, 1,322.

The Postal revenue (1933) was 27,448*l.* Letters, papers and parcels dealt with numbered 3,114,134.

Ruler.—His Highness Sir Ibrahim, G.C.M.G., K.B.E.
General Adviser.—R. O. *Winstedt*, C.M.G., M.C.S.

Kedah, on the west coast of the Peninsula, and north of Province Wellesley and Perak, has an area of 3,640 square miles. The population (estimated mid-year 1934) is 433,632, of whom 302,691 are Malays, 73,254 Chinese, 43,259 Indians, 401 Europeans, 110 Eurasians, and 13,917 other races. The capital is Alor Star on the Kedah River, about 70 miles from Penang by sea, and 59 by rail or road. Owing to the Sultan's ill-health, the head of the Government is the Regent. The police force had a strength (April, 1933) of 688 men (principally Malays). There were English schools for boys at Alor Star and Sungei Patari, 8 Malay vernacular schools (10,882 pupils), and 20 post offices. A telephone system extends throughout the State, two trunk lines being completed and opened to traffic during the year. The railway connecting the Federated Malay States and Siam passes through the State. A metalled road (26 miles) connects Alor Star with Perlis, and (29 miles) with the Senggora frontier (Siam), and a metalled road (44 miles) connects it with Province Wellesley. Another metalled road (7 miles) connects Baling with Upper Perak in one direction and with Province Wellesley in the opposite direction. The total mileage of metalled road (1933) is 402. 225 miles of canal were maintained. The revenue of the State for the year 1932–33 (Mohammedan year A.H. 1351) was 581,890*l.*, including Customs, 191,875*l.*; lands, 101,092*l.*; and opium monopoly, 88,525*l.*; and the expenditure, 591,430*l.* Public debt, May, 1933, nil. The principal produce of North Kedah is rice. There are rubber (export, 1933, 41,629 tons), coconut, and tapioca estates in South Kedah. Several steamers ply between Penang and the various ports of Kedah. Kedah trade (1932–33): imports, 781,526*l.*; exports, 1,231,955*l.* Postal and telegraph revenue, 1932–33, 15,183*l.*; expenditure, 23,808*l.* Postal articles dealt with numbered 2,421,848 (excluding registered articles, 116,965*l.*; parcels, 14 343).

Ruler.—H.H. Sultan Sir Abdul Hamid Halim Shah, K.C.M.G., ibni Almerhum Sultan Ahmad Tajudin Mukarram Shah (succeeded in 1881).
Regent.—H.H. Tunku Ibrahim, C.M.G., C.V.O.
British Adviser.—J. D. *Hall*, M.C.S.

Perlis, on the west coast of the Peninsula and north of Kedah, has an area of about 310 square miles and a population (estimated mid-year 1934) of 49,962. Malays numbered 41,328 of the population, Chinese 5,797, Indians 861, and other races 1,968. Police force (1933) 67 N.C.O.'s and others. 20 boys' and 4 girls' Malay vernacular schools were maintained, with average enrolments of 89 and 57 respectively. The principal products are rubber, rice, tin, and coconuts. There are guano deposits. There are 36½ miles of metalled roads and 28½ miles of paths and gravelled roads in the State. The revenue for A.H. 1351 (1932–33) was 59,952*l.* (customs 29,551*l.*), and the expenditure 48,600*l.* Public debt, 1933, nil.

Ruler.—H.H. Raja Syed Alwi, C.B.E., C.M.G.
British Adviser.—O. E. *Venables*, M.C.S.

Kelantan, on the east coast of the Peninsula, has an area estimated at 5,720 square miles and a population (estimated mid-year 1934) of 374,486, including 16,260 Chinese and 345,185 Malays. Kota Bharu, the capital, had a population of about 14,700 (1931). There are 65 Government elementary schools in the State. The High Court, the Central Court, and the Small Court are at Kota Bharu, and there are District Courts at Kuala Krai, Pasir Puteh, Pasir Mas, and Tumpat respectively. Police force, 1933, 332. The revenue of the State in 1933 amounted to 210,165*l.* (customs, excise and marine, 101,367*l.*; land revenue, 58,656*l.*; municipal, 17,434*l.*), and the expenditure to 182,441*l.* Public debt (1933) 645,913*l.*

The chief industry is agriculture. Chief products: rice (147,330 acres), coconuts (57,271 acres), rubber (75,491 acres); oil palm (700 acres). Pepper, tapioca, sugar-cane, and maize are grown in smaller quantities for local consumption. The jungle which covers a large part of the State produces some serviceable timber, resin and rattans and bamboos. The State supports cattle (113,935 in 1933), buffaloes (37,898 in 1933), sheep, goats, and poultry. Numerous estates are owned by British companies. Mineral resources are said to comprise gold, manganese, and tin, of which 2 059 oz., 2,866 tons and ·47 tons were exported in 1933. The principal manufacturing industries are silk-weaving, boat-building, matches, and brick-making. In 1933, total exports were 473,357*l.*, and total imports 402,978*l.* (1932, 368,821*l.* and 283,289*l.* respectively). Chief imports, 1933: textiles, 114,313*l.*; tobacco, 38,680*l.*; petroleum, 19,070*l.*; benzene, 16,478*l.*; tinned milk, 14,975*l.*; drugs and medicines, 13,323*l.* Chief exports, 1933: rubber 222,369*l.*; copra, 33,888*l.*; betel nuts, 17,880*l.*; fish, 13,692*l.*; cattle, 10,823*l.*; gold, 9,001*l.*

The gross tonnage of steamers calling at the ports of the State during 1933 was 184,762 as against 122,886 in 1932; and the gross capacity of sailing vessels was 4,227 tons, as against 5,417 tons in 1932. There is regular steamship communication with Bangkok and Singapore. Internal communication is by means of rivers, roads and railways. The total road mileage at the end of the year was 212 as against 208 in 1932. The Federated Malay States Railway Administration maintains a railway line between Tumpat, the chief port of the State, and Gua Masang, near the Pahang border, a distance of 126 miles. By rail the State has been for some years connected with Bangkok, and also with Penang through lower Siam and Kedah. Since the opening in 1931 of the East Coast Railway, there has been direct communication with Singapore through Pahang. There were (1933) 6 post offices and 12 postal agencies in the State.

Ruler.—H.H. Sultan Sir Ismail ibni Almarhum Sultan Mohamed, IV, K.C.M.G.
British Adviser.—A. C. *Baker*, M.C.S. (acting).

Trengganu, with an area of about 5,050 square miles, and a population (estimated mid-year 1934) of 186,001, lies on the east coast between Pahang and Kelantan. The capital is Kuala Trengganu, with a population of 13,953 in 1931. There are 21 Malay and Arabic vernacular schools (2,017 pupils enrolled in 1933, average attendance 1,603, teachers 61), 1 Government English school (92 pupils) and 3 Chinese schools (307 pupils, teachers 11). Police force 285 in 1933. There are 145 miles of road in use, and a 66 mile trunk road connecting Kuala Trengganu with Kelantan has been completed and opened to traffic. There are 5 post offices and 8 Postal Agencies in the State. There is telegraphic communication with other parts of Malaya. There are no railways, except 3 light railways on mines, and communication with the interior is by rivers and good native paths. Steamers connect regularly with Singapore and Bangkok, and locally-built motor-boats maintain passenger services along the Trengganu coast. The industries are similar to those of Kelantan, and the country is of the same general character.

Revenue (1933), 135,948*l.*, and expenditure, 123,702*l.* Debt (1933), 487,429*l.* Exports in 1933 totalled 533,254*l.* Imports in 1933 totalled 314,294*l.* Chief exports: iron ore, 176,268*l.*; dried fish, 81,931*l.*; rubber, 67,400*l.*; tin ore, 47,086*l.*; copra, 18,635*l.* The values of imports under the various main heads were: animals, food, drink and tobacco, 183,001*l.*; raw materials and articles mainly unmanufactured, 22,768*l.*; articles wholly or mainly manufactured, 102,019*l.*; coin and bullion, 105*l.*; sundries, 6,402*l.*

Ruler.—H.H. Sir Sulaiman Badaru'l-'alam Shah, K.C.M.G. He is assisted by a State Council.
British Adviser.—C. C. *Brown*, M.C.S.

MANDATED TERRITORY IN ASIA.

PALESTINE.

THE natural and historic boundaries of Palestine run from the desert on the east, along the slopes of Mount Hermon over to the Litani on the west, where the Lebanon and Anti-Lebanon first break into a series of elevated plateaux, and thence over to the Mediterranean coast, and on the south from the Gulf of Akaba across the Desert of Sinai.

For the present political boundaries, see THE STATESMAN'S YEAR BOOK, 1928, p. 185.

Government.—After its conquest in 1917–18, by the British Forces, the country remained under British Military Administration till July 1, 1920, when a Civil Administration was set up.

High Commissioner and Commander-in-Chief.—Lieut.-General Sir Arthur Grenfell *Wauchope*, G.C.M.G., K.C.B., C.I.E., D.S.O. (Appointed Nov. 12, 1931.)

Chief Secretary.—John Hathorn *Hall*, D.S.O., M.C. (Appointed June 1, 1933.)

The country is administered by Great Britain under a Mandate, which was confirmed by the Council of the League of Nations on July 24, 1922, and came officially into force on September 29, 1923. This embodies the Balfour Declaration of November 2, 1917, to the effect that 'His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of that object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country.'

Constitution.—On September 1, 1922, a new constitution was promulgated. It provides for the appointment of a High Commissioner and Commander-in-Chief and an Executive Council.

A Legislative Council will replace the Advisory Council and have authority to pass such Ordinances as may be necessary for the peace, order, and good government of Palestine, provided (1) that no Ordinance shall restrict complete freedom of conscience and the free exercise of all forms of worship, save in so far as is required for the maintenance of public order and morals, or tend to discriminate in any way between the inhabitants of Palestine on the ground of race, religion, or language; (2) that no Ordinance shall take effect until either the High Commissioner or His Majesty has assented thereto; (3) that the High Commissioner may reserve any Ordinance for the signification of His Majesty's pleasure, and shall so reserve any Ordinance which concerns matters dealt with specifically by the provisions of the Mandate; and (4) that His Majesty may disallow any Ordinance to which the High Commissioner may have assented within one year of the date of the High Commissioner's assent.

In exercise of the powers vested in him by the Palestine (Amendment) Order in Council 1923, the High Commissioner has appointed an official Advisory Council composed of the heads of the principal Government Departments and the District Commissioners

of the three Districts. Owing to the abstention from the elections of considerable numbers of the Arab inhabitants, the Legislative Council under the new constitution has not yet been formed, and the Advisory Council will remain in being until such time as the election of a Legislative Council becomes possible.

All Ordinances are laid before the official Advisory Council and made public, as Bills, in the Official Gazette, for at least one month, before promulgation.

Regulations were made by the High Commissioner in 1927 for the organisation of the Jewish population of Palestine as a religious community and its recognition as such by the Government. The Jewish community thus enjoys autonomy for its internal affairs, religious, cultural and communal, and has power to levy taxes on its members. The organs of the community are a Chief Rabbinate and local rabbinical offices, an Elected Assembly, a General Council, which is elected by the Assembly and represents the community in its dealings with the Government, and local committees. A number of Jews have opted out of this community.

The British Government and Palestine Administration recognise the Jewish Agency (consisting both of Zionists and non-Zionists), which in Palestine is represented by a local executive, as the Agency of the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home.

There is a Moslem Supreme Council to control Moslem religious affairs.

English, Arabic, and Hebrew are the official languages of the country.

Area and Population.—Palestine under British Mandate is about 10,000 square miles in extent. The population, taken by official census on November 18, 1931, was 1,035,821, of whom 759,712 were Moslems, 174,610 Jews, 91,398 Christians, and 10,101 of other confessions, mainly Druze. The estimated population at June 30, 1934, was 1,171,000 (Jews, 307,312).

The country is divided into three districts: Southern (Jaffa), Northern (Haifa) and Jerusalem.

The chief town, Jerusalem, which had been in Moslem hands since 1244, and under Turkish rule since 1517, surrendered on December 9, 1917. Its population in 1932 was 90,502. The population figures for the other principal towns were (1931): Jaffa, 51,366; Tel-Aviv, 46,116; Haifa, 50,533; Gaza, 17,069; Nazareth, 8,719; Nablus, 17,171; Safed, 9,446; Tiberias, 8,633; Hebron, 17,532; Ramleh, 10,417; Bethlehem, 6,817; Lydda, 11,249; Acre, 7,893. Total recorded immigrants (1933) 29,101, of whom 27,862 were Jews.

There are some 750 Arab villages and a considerable number of Arab tribes, and three German Templar (Christian) settlements, Wilhelma, Sarona and Neuhardthof, apart from those in the three principal towns.

The Jewish Settlements number 133 large and small, and are grouped in four districts, namely, Judea, Samaria, Lower Galilee and Upper Galilee. The total population of these settlements is now about 46,000. More than 30 of them are built on land belonging to the Jewish National Fund, which was established by the Zionist Organisation for the purpose of acquiring land to remain the property of the Jewish people, and were founded with the assistance of the *Keren Hayesod* (Foundation Fund), also created by the Zionist Organisation. The total area of the Jewish settlements exceeds 1,200,000 dunums (4¼ dunums equal one acre). The local affairs of the smaller Jewish setttlements are controlled by *Vaadim* or Councils elected by the male and female residents who own registered holdings or pay taxes. The larger villages, Arab and Jewish, are, for internal order and rates, administered by Local Councils, constituted under Ordinance, which exercise modified municipal powers. Satisfactory progress is being maintained in cadastral survey and in land settlement.

Births and deaths for recent years are given in the following table :—

Year	Estimated [1] Population (mid-year)	No. of Births	No. of Deaths	Infantile Mortality (per 1,000 births)
1930	843,132	44,587	19,513	154·3
1931	872,165	46,011	21,149	170·1
1932	986,319	43,538	21,958	153·2
1933	1,038,331	46,049	20,884	144·4

[1] Excludes nomad population and His Majesty's Forces.

The total number of immigrants in 1933 was 31,977, of whom 30,327 were Jews.

Religion.—Jerusalem, being a Holy City for three Faiths, is the seat of a number of Prelates and religious bodies. There are three Christian Patriarchs, Orthodox, Latin and Armenian having the style of 'Beatitude,' and, in addition to the Anglican Bishop in Jerusalem, a Jacobite and a Coptic Bishop.

The Moslems have the Mufti of Jerusalem, who is President of the Moslem Supreme Council, and the Jews have two joint Chief Rabbis, one for the Sephardim, the other for the Ashkenazim. These three dignitaries have the style of 'Eminence.' In Nablus there is a Samaritan High Priest.

Education.—The schools under the Arab public system maintained in 1933 by the Government numbered 310, of which 13 had secondary sections, and contained 26,850 scholars, the great majority of whom were Moslems. In the Government Training Colleges for teachers there were 71 men and 63 women students. Technical education is being carried out in some of the Government town schools. A Law School exists in Jerusalem, in which lectures are given in the three official languages.

The Christian and Jewish Communities provide, the former to a very large extent, and the latter almost entirely, for the education of their own children.

The Jewish Agency controlled, in 1932, 272 schools attended by 23,911 pupils with 930 teachers (these were transferred to the General Council of the Jews of Palestine at the end of 1932), and other Jewish bodies controlled 111 schools attended by 11,970 pupils, making a total of 383 Jewish schools attended by 35,881 pupils. These institutions include secondary schools in Jerusalem, Tel-Aviv and Haifa, Teachers' Training Colleges (General, Orthodox, Women's and Kindergarten), Schools of Music in Jerusalem, Tel Aviv, and Haifa, Agricultural Schools, an Arts and Crafts Institute (Bezalel), Evening Classes, and a Technical College at Haifa.

There were 154 Christian Schools (excluding schools maintained by Palestinian and foreign bodies), including Orthodox, 27 schools with 2,678 pupils; Catholic, 74 schools with 9,923 pupils; Protestant, 46 schools with 4,335 pupils; miscellaneous, 7 schools with 307 pupils.

There are also 137 private Moslem schools mainly maintained by local committees; these provide for about 7,319 children. Two of these schools include secondary classes.

Non-Government schools receive a capitation grant-in-aid from the Department of Education. The schools of the Jewish General Council receive a block grant of £P25,257 a year.

The Hebrew University on Mount Scopus, Jerusalem, was inaugurated on April 1, 1925, and has 71 teachers and 305 students. The new library building houses some 260,000 volumes.

Antiquities.—A new Antiquities Ordinance was passed in 1929 to give better effect to the provisions of the Mandate as regards excavation and preservation of antiquities. During the year 1932, 20 expeditions conducted excavations under licences issued by the Government. The new Museum presented by Mr. John D. Rockefeller, Jun., is nearing completion.

Justice.—The Courts in Palestine are either civil or religious courts. The former have jurisdiction over local subjects in all matters save those of personal status and *Waqfs* or charitable endowments, and over foreign subjects in all matters, subject to the provisions mentioned below.

There is a Magistrate's Court in every sub-district, and in the larger towns such as Jerusalem, Jaffa, and Haifa, two such courts.

There are four District Courts, each composed of a British President and two Palestinian judges seated at Jerusalem, Jaffa, Haifa and Nablus respectively. They go on circuit within the area of their jurisdiction. A District Court has jurisdiction in first instance over all crimes except those punishable with death, and civil cases outside the jurisdiction of a magistrate; it also hears appeals from the decisions of magistrates both in civil and in criminal cases. Crimes punishable with death are tried by the Court of Criminal Assize, which consists of the Chief Justice or senior British Judge of the Supreme Court sitting with the District Court.

The highest Court in Palestine is the Supreme Court, which is composed of a British Chief Justice and two other British judges and four Palestinian judges. The Court sits in two forms: (1) as a Court of Appeal, in which capacity it has appellate jurisdiction in civil and criminal matters decided in first instance by the District Courts, the Land Courts and the Court of Criminal Assize; (2) as a High Court of Justice, in which capacity it hears applications of the nature of habeas corpus and of mandamus proceedings.

The Court of Appeal is composed normally of three judges, while the High Court may sit with two judges. In either case a British judge presides.

Benches of honorary magistrates have been established in Jerusalem, Jaffa, and other towns, to try contraventions for which the maximum penalty does not exceed £P5 fine or 15 days imprisonment. In addition to the bench of honorary magistrates, stipendiary magistrates have been appointed to try such contraventions in the Municipal Areas of Jerusalem and Jaffa.

Special arrangements exist in the Beersheba sub-district, where minor cases are disposed of according to tribal custom by the Court of Sheikhs. The District Court of Jerusalem visits Beersheba every month to hear appeals from the local courts and to try more serious criminal cases. Liaison Boards have recently been established for the settlement of disputes between Beduin tribes of Palestine and those of adjacent countries.

All matters of personal status affecting Moslems are within the jurisdiction of the Sharia Courts. A Sharia Court consists of a Qadi, and appeals from his decision lie to the Moslem Court of Appeal, which is composed of a President and two members.

Jewish Religious Courts have exclusive jurisdiction in certain matters of personal status of Palestinian and other Eastern Jews, and jurisdiction by consent with regard to other nationals except in matters of marriage and divorce. An appeal from the decision of the Jewish Religious Courts lies to the Rabbinical Council.

The different Christian communities (such as the Orthodox and the Latin), have similar jurisdiction to that of the Jewish courts.

Questions of jurisdiction as between the Civil and Religious Courts are

decided by a Special Tribunal composed of two British judges of the Supreme Court and the President of the Highest Court of the Religious Community concerned.

In 1933 the Ottoman Code was superseded by the Palestine Criminal Code, which is based on English criminal law.

The police establishment at December 31, 1932, was 127 officers and 2,179 other ranks; of the other ranks 637 were British.

4,133 heinous crimes were reported in 1932, and 6 death sentences were carried out.

Finance.—Revenue and expenditure for 5 years:—

—	1929	1930	1931	1932-33[1]	1933-34
	£P	£P	£P	£P	£P
Revenue . .	2,328,572	2,389,546	2,333,895	3,015,917	2,859,745
Expenditure . .	2,140,032	2,536,505	2,374,867	2,516,394	2,848,418

[1] As from April 1, 1932, the financial year was changed from the calendar year to April 1.

The main heads of revenue for 1932–33 were: customs, £P1,286,945; licences, taxes, &c., £P824,443; fees of court or office, &c., £P332,489; posts and telegraphs, £P229,819; grant-in-aid, £P127,788; interest, £P83,775; miscellaneous, £P79,938.

Defence.—Palestine falls under the Middle East Command of the R.A.F. Two squadrons of aircraft and four sections of armoured cars are available for Palestine and Transjordan. Two battalions of British infantry are distributed over various centres in Palestine. The Transjordan Frontier Force, the cost of which is borne by the Imperial Treasury and Palestine Government, has its headquarters at Zerka, Transjordan, and detachments at Samakh, Beisan, and at certain other stations in Palestine. Its actual strength (excluding reserve of 149 other ranks) on December 31, 1934, was 61 officers (31 British) and 856 other ranks. The force is partly mechanised and partly mounted on horses and camels.

Production and Industry.—Palestine comprises four zones of country. On the west, along the shores of the Mediterranean, which are deficient here in good natural harbours, is the maritime plain, which varies in width from 15 to 20 miles at Gaza to about 2 miles at Acre, and at the Plain of Esdraelon stretches for a considerable distance into the interior, and separates the highlands of Galilee from those of Samaria and Judæa. From the coastal plain the country rises into a plateau intersected by deep wadis or valleys, which drop steeply to the east to the third zone, formed by the great depression down which the river Jordan runs to the Dead Sea, and which is prolonged for another 100 miles to the Red Sea as the Wadi Araba. This depression reaches a depth below sea-level of 2,600 feet in the deepest portion of the Dead Sea, the surface of which is about 1,300 feet below sea-level. The Dead Sea is 46 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers and has no outlet, the surplus being carried off by evaporation. It is intensely salt, with a specific gravity one-sixth greater than water, and with 24 per cent. of salt. East of the Jordan Valley the country rises again steeply to a plateau and merges into the Arabian desert.

Palestine is essentially an agricultural country. In 1931 the area

under British Administration, exclusive of Trans-Jordan, produced:—Wheat, 79,650 tons; barley, 41,200 tons; durra, 16,862 tons; olives, 33,906 tons; lentils, 3,758 tons. The tobacco crop in 1932 amounted to 565,317 kilos. In 1930 there were in the country 146,397 cattle, 252,773 sheep, 440,132 goats, 25,321 camels, 13,825 horses, 76,858 donkeys, and 5,247 buffaloes.

Limestone is found all over the country; sandstone abounds on the coast; gypsum of good quality is found at Mount Usdum and at Mount Gipsia near Melhamia (Galilee). Rock salt abounds in the Jordan Valley and on the shores of the Dead Sea, where also sulphur is obtainable. The Dead Sea contains cooking salt, carnallite, and bromide. A concession for the exploitation of these minerals was granted in 1929. There are medicinal springs near Tiberias and also at El Hamme, for both of which leases have been granted.

The principal industries of export importance are those of wine-making, especially in the Jewish villages of Zichron Jacob and Rishon le Zion; soap-boiling in Nablus, Jaffa and Haifa; olive oil in Nablus, Acre, and the district round Jaffa and cement at Haifa. Oranges, grown chiefly in the coastal plain, are exported to England and Europe. The orange crop exported in 1933 was 4,199,915 cases. The wine export was 1,376,198 litres. Bananas are being successfully grown in the Jordan Valley.

Further progress has been made in the reservation of state forests; nearly 821,262 dunums have been reserved out of a total area of 1,500,000 dunums of natural forest land. Extensive planting of timber, fruit and shade trees has been effected by Government and private agency. Approximately three million trees were planted during 1929—both timber trees and fruit trees, including vines, oranges and olives; 21 nurseries have been maintained during 1929 for the free issue and sale of stock to the public and the provision of material to Government plantations.

Commerce.—Trade for 4 Calendar years was as follows:—

Shipping and Communications.—The ports of Palestine are Jaffa, Haifa and Acre. For the calendar year 1933, 1,312 steamers, totalling 3,223,959 tons, and 2,060 sailing vessels, totalling 69,675 tons, entered in foreign trade at Palestinian ports. Palestine possesses no shipping of its own, other than some small sailing vessels and power launches. A modern harbour at Haifa was opened in 1933.

A regular passenger service to Palestinian ports is provided by some 30 shipping lines.

The total length of the Palestine railways is 529 kilometres, divided as follows: standard gauge (4′ 8½″)—Rafa-Lydda-Tulkarem-Haifa, 238 kilometres; Jaffa-Lydda-Jerusalem, 87 kilometres; narrow gauge (3′ 6″): Haifa-Samakh, 88 kilometres; Nassib Haifa-Acre, 18 kilometres; Afule-Jenin-Nablus-Tulkarem, 98 kilometres. The section Kantara to Rafa, known as the 'Sinai Military Railway' (203 kilometres), is being worked by the Palestine Railways on behalf of the Air Ministry. There is through communication with Egypt, and trains connect at Kantara West daily with Cairo, Alexandria, Port Said, and Suez and other parts of Egypt, railway vehicles being sent across the canal by means of a truck transporter.

East of Haifa the Palestine Railways system terminates at Samakh, and the section Samakh-Deraa (Junction of the Hejaz Railway to Medina) is operated by the Hejaz Railway, which in turn is controlled by the Governments of the territories through which it passes. Steam rail cars of the Sentinel-Cammell type have been introduced on certain sections of the railway with success. Goods traffic handled during 1932 was 1,098,723 tons; passengers carried, 1,125,439.

There are 445 miles of metalled roads in Palestine extensively used by motor transport, and, in addition, many hundreds of miles of tracks passable for wheeled traffic of all kinds during dry weather.

The Imperial Airways, Ltd., have established an aerodrome at Gaza, from which passengers and mails are carried to Egypt and Iraq once weekly in each direction.

Posts and Telegraphs.—In 1933 there were conveyed 17,716,800 letters, 1,376,400 postcards, 9,604,000 printed communications and samples, 156,873 parcels, and 307,000 telegrams. Length of telegraph and telephone trunk lines, 13,434 km.; local lines, 18,172 km. Number of telephone subscribers, 3,862; number of telephone stations, 6,155.

Banking and Currency.—Barclay's Bank has branches at Jerusalem, Jaffa, Haifa, Nazareth, Tel-Aviv, Nablus, and Acre. The Anglo-Palestine Bank has its head office in Tel-Aviv, with branches in Jerusalem, Jaffa, Haifa, Tiberias, and Safad. The Banco di Roma has branches in Jerusalem,

Jaffa and Haifa. The Ottoman Bank has branches in Jerusalem, Jaffa, Haifa, Nablus, Tel-Aviv and Amman (Transjordan).

There are also established, in addition, a number of smaller banks and financial and co-operative institutions.

The standard of currency from November 1, 1927, is the Palestine pound (£P), divided into 1,000 mils, and equivalent in value to the pound sterling. Palestinian notes, consisting of £P½, £P1, £P5, £P10, £P50, £P100 notes, are legal tender for any amount. Silver coins, 720 fine, of 100 and 50 mils, weighing 180 and 90 grains respectively, nickel of 20, 10 and 5 mils, and bronze of 2 and 1 mils are used. The 2-mil coin is about equal in value to the United States cent. Gold coins are not being issued for the time being. About £P2,500,000 is in circulation.

The metric system is followed by the Government and local authorities, but the local weights and measures are still largely employed by the public.

1 *Dunam* = 1098·76 sq. yards = 0·2270 acre.

Transjordan.—This territory, which roughly corresponds to the area of the old Seljuk Kingdom of Kerak and of the Lordship of Montreal or Oultrejourdain in the Latin Kingdom of Jerusalem, is governed by a local Arab Administration under His Highness the Amir Abdullah Ibn Hussein, K.C.M.G., G.B.E., born in Mecca, 1882, second son of ex-King Hussein of the Hijaz and elder brother of the late King Feisal of Iraq, who became its ruler in April, 1921, and is assisted by an Executive Council. The country is covered by the Palestine Mandate, but the clauses relating to the establishment of a national home for the Jews are expressly excluded from operation therein. In April, 1923, a Declaration was made that subject to the approval of the League of Nations, His Majesty's Government will recognise the existence of an Independent Government in Transjordan, under the rule of His Highness the Amir Abdullah, provided such government is constitutional and places His Britannic Majesty's Government in a position to fulfil its international obligations in respect of the territory by means of an Agreement to be concluded between the two Governments. This agreement was signed in Jerusalem on February 20, 1928, and having been accepted by the Legislative Assembly set up under Article 11 was ratified by the High Contracting Parties on October 31, 1929. The Organic Law has been published, and the Legislative Council assembled for the first time in April, 1929. In 1928 a separate commission was issued to the High Commissioner for Palestine appointing him High Commissioner for Transjordan; he is thus High Commissioner for both areas.

For the frontiers of Transjordan, see the STATESMAN'S YEAR BOOK, 1929, pp. 191–2.

The population is probably about 300,000. Of these, 260,000 are Arab Moslems, 30,000 Arab Christians; the remaining 10,000 are Caucasian elements (chiefly Circassian) settled by the Turks in Transjordan some 45 years ago following the Turco-Russian war. Most of the towns and larger villages have schools, and the Budget provision for education in 1934–35 is £P24,464. The Arab Legion, which comprises Gendarmerie, Police and Prisons, and Passport personnel, and a specially recruited Desert Patrol, is a body of 990. Detachments of the Royal Air Force are located at Amman and Maán, and there is a military force of some 700 men raised in Palestine and Transjordan, but officered largely by British Officers stationed in the country. This Force is known as the Trans-

jordan Frontier Force. The country to the east of the Hedjaz Railway line is largely desert, but to the west of this line is potentially of high agricultural value. The resources of the country are agricultural and pastoral products, while several antiquity sites, of which the most notable are Amman, Jerash, Kerak and Petra, are becoming an essential part of the itinerary of Eastern tourists. There are also phosphate deposits (undeveloped, though examined). Potash is found in the Dead Sea, and possibly there is oil in the southern area. A metalled road, fit for motor traffic, connects Amman with Jerusalem while unmetalled roads have been constructed making motor traffic possible from Amman to all the chief towns in the country. The road running from Amman to Maan has been continued to Aqaba, and, from this main road, branches run to Madeba, Kerak, Tafileh and Wady Musa (Petra). The towns of Jerash, Irbid, Ajloun, Kufrinji, Remte and Deraa, the last named being in Syrian territory, are joined by good roads to Amman. From Irbid a branch runs to Jisr Mejamie and Jisr Sheikh Hussein on the Palestine boundary. An alternative route from Amman to Deraa may be taken, the road running via Zerka and Mafrak. From this latter, a branch road runs to Remte, El Hosn and Irbid. The oasis of Azrak may be reached by motor car from Mafrak, Zerka or Amman, and from Azrak cars can pass across the desert via Rutba to Baghdad. The Hejaz Railway from Deraa to Kalaat Mudawara runs, with the exception of the first few miles, through Transjordan territory. South of Maan, however the Railway is in disrepair. The Cairo-Baghdad air route traverses the country from west to east, and there is an aerodrome with a Royal Air Force detachment at Amman, while at Zizia there is a landing ground used by the Imperial Airways Co. as a fuel replenishing station. The estimated revenue of the country in 1934–35 is 383,112*l.* including reimbursements and an estimated Grant in Aid from the Imperial Government of 96,125*l.*, expenditure, 379,112*l.* Great Britain is represented by a British Resident subordinate to, and the agent of, the High Commissioner for Transjordan. The official language of the country is Arabic.

AFRICA.

ASCENSION ISLAND. *See* ST. HELENA.

BRITISH EAST AFRICA.

British East Africa consists of a large area on the mainland, together with the Islands of Zanzibar and Pemba. For details as to international agreements, &c., with regard to the British sphere in East Africa, *see* the STATESMAN'S YEAR BOOK for 1907, pp. 216 and 217.

KENYA COLONY AND PROTECTORATE.

Government.—The Kenya Colony and Protectorate extend, on the Indian Ocean, from the Umba River to Dick's Head, and inland as far as Lake Victoria and Uganda. The Protectorate consists of the mainland dominions of the Sultan of Zanzibar, viz., a coastal strip of territory ten miles wide, to the northern branch of the Tana River; also Kau, Kipini, and the Island of Lamu, and all adjacent islands between Rivers Umba and Tana, these territories having been leased to Great Britain in 1895 for an annual rent of 10,000*l*. The colony and protectorate were formerly known as the East Africa Protectorate. On April 1, 1905, this was transferred from the

authority of the Foreign Office to that of the Colonial Office, and in November, 1906, the Protectorate was placed under the control of a Governor and Commander-in-Chief and (except the Sultan of Zanzibar's dominions) was annexed to the Crown as from July 23, 1920, under the name of 'The Colony of Kenya,' thus becoming a 'Crown Colony.' The territories on the coast rented from the Sultan of Zanzibar were proclaimed as the Kenya Protectorate.

A treaty was signed (July 15, 1924) with Italy under which Great Britain ceded to Italy the Juba River and a strip from 50 to 100 miles wide on the British side of the river. Following on ratification of the treaty, cession took place on June 29, 1925.

In 1906 Executive and Legislative Councils were constituted, the former consisting of 4 members, in addition to the Governor, the latter of 8 official and 4 unofficial members. In 1919 the Legislative Council was enlarged to consist of 11 elected representatives of the European community, three nominated members, two representing the Indian population and one the Arabs, and a sufficient number of official members to give a majority in the Council. A new constitution was adopted in July, 1928, under which the Executive Council consists of 12 members, in addition to the Governor, while the Legislative Council consists of 11 elected European members, 5 elected Indian members, 2 nominated unofficial members, 1 nominated unofficial member to represent Arab interests, 11 *ex-officio* official members and nominated official members not exceeding nine in number. The constituencies for Europeans, Indians and Arabs are separated from one another (*i.e.* communal franchise). Legislation is by Ordinances made by the Governor with the advice and consent of the Legislative Council. In 1908 foreign consular jurisdiction in the Zanzibar strip of coast was transferred to the British Crown.

There are 4 provinces, which are as follows: Coast (capital Mombasa), Central (capital Nairobi), Rift Valley (capital Nakuru), and Nyanza (capital Kisumu). There are also 3 extra-provincial districts, *i.e.* Northern Frontier, Turkana and Masai.

Area and Population.—The territory has an area of 224,960 square miles; population in 1933 estimated at 3,076,343, including 17,249 Europeans, 38,335 Asiatics, and 11,752 Arabs. European population, March 6, 1931, was 16,812. On the coast the Arabs and Swahilis predominate; further inland are races speaking Bantu languages, and non-Bantu tribes such as the Nilotic Kavirondo, the Nandi, the Lumbwa, the Masai, the Somali, and the Gallas. Mombasa is the second largest town; population about 52,700, of whom 981 are Europeans. The harbour is situated on the eastern side of an island of the same name, and is the terminus of the Kenya and Uganda Railway. Kilindini harbour on the south-western side of the island is the finest land-locked and sheltered harbour on the east coast of Africa and is accessible to vessels of deep draught. The principal river in the North is the Tana, which flows into the Indian Ocean. It is navigable for about 400 miles by shallow-draught steamers. Nairobi, the capital and the headquarters of the administration, has 70,960 inhabitants, of whom about 7,090 are European. There are about 2,102 European farmers in the Colony.

Religion, Education, Justice.—The prevailing religious beliefs are Pagan; but on the coast Mohammedanism has made great progress. There are many Christian mission societies, British, French, Italian, Swedish, and American, several being Roman Catholic. There were 76

(including 14 European) Government schools in operation in 1933, and 1,527 mission and native schools. The Supreme Court is at Nairobi, and sessions are held at Mombasa, Nakuru, Eldoret, Kisumu, and other places. District Courts presided over by magistrates are held in each district. In native cases local ideas and customs are considered. The legal status of slavery has been abolished throughout East Africa.

Finance.—Revenue and expenditure for 6 years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1928	3,020,694	2,834,647	1931	3,066,930	3,216,089
1929	3,333,742	3,505,072	1932	3,010,214	3,119,723
1930	3,241,600	3,438,874	1933 [1]	3,121,496	3,168,035

[1] Estimated.

Of the revenue for 1933, customs and excise accounted for 600,417*l.*; licences, duties, taxes, etc., 940,469*l.*; posts and telegraphs, 170,024*l.*; fees, &c., 117,266*l.*; earnings of Government departments, 67,651*l.*; sale of Government property, 17,342*l.*; revenue from Government property, 78,408*l.*; miscellaneous receipts, 11,342*l.*; Forest Department, 25,158*l.*; reimbursements, 1,037,835*l.*; and land sales, 18,776*l.* Public debt, December 1933, 17,305,000*l.*

Agriculture and Mining.—As the pursuit of agriculture is possible from sea level to altitudes of over 9,000 feet, climatic conditions are extremely varied, and tropical, sub-tropical and temperate crops are grown. The main producing areas are in the highlands where coffee, maize, wheat, sisal, tea and wattle are crops of major importance. At lower altitudes where conditions are tropical, maize, sisal, sugar, coconuts and cotton are crops of principal importance. The dairy and wool industries are increasing their outputs, and considerable quantities of hides are exported annually. In addition to the above, groundnuts, simsim, potatoes, beans, essential oils, barley and other miscellaneous crops are grown accordingly to elevation and rainfall both for export and home consumption. In February, 1934, livestock in the possession of Europeans numbered: 256,167 cattle of all descriptions, 252,250 wool-bearing sheep and 14,973 pigs.

The merchantable forest area extends over 3,300 square miles. At the coast are found mangroves, ebony, copal and other trees, but 95 per cent. of the forests are in the Highlands. They are mainly coniferous (juniper and podocarpus), but also contain valuable hardwoods such as camphor and olive. Pencil cedar is abundant, and the export of pencil slats promises to be an important industry, as does also the exploitation of the large bamboo forests for paper pulp.

The mineral resources are not yet fully explored. Production for 1933 was: gold, 14,147 ozs. (value 67,664*l.*); marble, 250 tons (value 2,500*l.*); lime, 750 tons (value 750*l.*)

Commerce and Shipping.—There is a uniform Customs tariff in Kenya, Uganda and Tanganyika. The Colony and Protectorate of Kenya and Uganda Protectorate are one administrative unit for Customs purposes, and complete freedom of trade exists between the two territories and Tanganyika, Customs Revenue being allocated to the consuming territory.

Imports into Kenya and Uganda (excluding Government stores and Government bullion and specie), the domestic exports of Kenya and Uganda,

and the tonnage entered and cleared—Colony and Protectorate of Kenya—were :—

Years	Trade Imports	Domestic Exports	Customs Revenue	Tonnage registered of vessels entered and cleared

1933	4,686,022	5,711,609	871,909	3,817,836

In 1933 the main imports were: grain and flour, 159,845*l.*; beer, wines, and spirits, 112,817*l.*; cigarettes, cigars and tobacco, 173,668*l.*; coal, 96,818*l.*; cement, 46,638*l.*; iron sheets (galvanised and corrugated), 56,384*l.*; tools and implements, 67,833*l.*; electrical goods and apparatus, 44,864*l.*; machinery, 224,623*l.*; cotton piece goods, 745,320*l.*; woollen and worsted yarns and manufactures, 33,531*l.*; silk and artificial tissues and manufactures, 100,468*l.*; jute bags and sacks, 127,919*l.*; haberdashery and wearing apparel, 115,248*l.*; chemicals, drugs, dyes, paints and colours, 139,584*l.*; fuel oil, 110,736*l.*; lubricating oils and greases, 50,742*l.*; motor spirit, 99,106*l.*; mineral oil, illuminating or burning, 45,270*l.*; stationery and other paper manufactures, 72,208*l.*; motor cars, parts and accessories, 134,426*l.*; motor lorries, tractors, parts and accessories, 72,436*l.*; tyres and tubes for vehicles, 93,520*l.*

The principal countries of origin were: United Kingdom, 38·28 per cent.; British Possessions, 25·14 per cent. (Total British Empire, 63·42 per cent.); Germany, 3·13 per cent.; Belgo-Luxemburg Economic Union, 1·85 per cent.; France, 1·24 per cent.; Italy, 1·13 per cent.; Netherlands, 3·43 per cent.; Japan, 12·92 per cent.; Persia, 2·97 per cent.; United States of America, 4·34 per cent.; Dutch East Indies, 1·83 per cent.; other foreign countries, 3·74 per cent. (Total foreign countries, 36·58 per cent.).

The principal domestic exports of Kenya and Uganda during 1933 were: maize, 212,986*l.*; coffee, 1,041,835*l.*; sugar, 195,537*l.*; tea, 78,022*l.*; tin ore, 57,503*l.* (Uganda); cotton and cotton seed, 2,968,642*l.* (mainly Uganda); sisal, fibre and tow, 249,868*l.*; sesame seed, 67,143*l.*; hides and skins, 174,945*l.*; wattle bark and extract, 66,764*l.*; ivory, 21,579*l.*; wool, 38,481*l.*

The chief countries of destination were: United Kingdom, 35·67 per cent.; British Possessions, 42·32 per cent. (Total British Empire, 77·99 per cent.); Germany, 1·48 per cent.; France, 0·64 per cent.; Belgo-Luxemburg Economic Union, 3·06 per cent.; Italy, 0·89 per cent.; Netherlands, 1·06 per cent.; Hadramaut, 0·24 per cent.; Japan, 7·88 per cent.; Egypt, 0·71 per cent.; United States of America, 1·65 per cent.; Italian Somaliland and Colonia Erytrea, 1·84 per cent.; other foreign countries, 2·56 per cent. (Total foreign countries, 22·01 per cent.).

1934 exports to the United Kingdom (Board of Trade Returns), 1,168,647*l.*; imports from the United Kingdom, 1,532,579*l.*; re-exports, 33,696*l.*

Communication between the ports of Kenya is kept up by small steamers owned by the British India S.S. Co., Messrs. Cawasji Dinshaw Brothers, at Aden, and the African Wharfage Co., Ltd., at Mombasa and by dhows.

Communications.—The Kenya and Uganda Railways and Harbours are State Owned; the Railway, which is Metre Gauge, consists of: Main

Line, Mombasa island to Kampala, in Uganda, 886 miles, other lines in Kenya are: the Nakuru-Kisumu line, 131 miles; the Voi-Kahe Branch, 92 miles, with running powers over the Tanga line (Tanganyika Territory) between Kahe Junction and Moshi; the Magadi Branch, 91 miles; the Thika-Nyeri-Nanyuki line, 145 miles; the Lake Solai Branch, 27 miles; the Kitale Branch, 41 miles, the Thomson's Falls Branch, 48 miles, and the Kisumu-Butere Branch, 43 miles. In Uganda, Mbulamuti-Namasagali line, 17 miles; Port Bell-Kampala Railway, 6 miles; Tororo-Soroti Line, 100 miles. Surveys have been made for Kedowa-Sotik-Kericho line, 66 miles, and the Bukonte-Jinja diversion, 53 miles.

The Harbours comprise the following: the Port of Mombasa, which includes Kilindini Harbour, Mombasa Old Port, Ports Reitz and Tudor; and the Ports of Lamu, Malindi and Kilifi. Kilindini Harbour possesses 5 deep-water quay berths, a bulk oil jetty and a lighterage berth. The quays are equipped with electric cranes.

The Kenya and Uganda Railways and Harbours also operate steamer services on Lakes Victoria, Kioga, Albert, and on the River Nile; and a motor transport service, 75 miles, between Masindi Port on Lake Kioga, and Butiaba, on Lake Albert.

During the year ending December 31, 1933, 771,714 tons of goods and 512,999 passengers were carried; revenue, 2,083,162*l.*; expenditure, 1,990,054*l.* Telegraphic communications exist along all lines of rail. Through bookings are in operation between Kenya and Uganda Railways and Harbours and Tanganyika Railways and Harbours via Moshi and Mwanza. The country is fairly well provided with roads and tracks. There is a motor road from Nairobi, across Uganda, to Mongalla in the Sudan.

The Post Office of the Colony and Protectorate received and despatched 13,881,200 letters, packets, &c., and 388,543 telegrams during 1932. The telegraph and telephone system has 15,309 miles of wire (exclusive of Uganda). A cable connects Mombasa with Zanzibar.

A short-wave wireless station, owned by Imperial and International Communications, Ltd., is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain.

Money.—The currency of the Colony and Protectorate, which is the same as that of the Uganda Protectorate and the Tanganyika Territory, is controlled by the East African Currency Board domiciled at 4 Millbank, London, S.W. 1, who maintain a stable rate of sterling exchange. The standard coin is the East Africa shilling of one hundred cents, introduced as from January 1, 1922, which is legal tender to any amount. Twenty East African shillings equal one East African pound. The subsidiary coins consist of 50 cent (silver), 10 cent, 5 cent and 1 cent (bronze). The paper currency consists of notes of the following denominations: 5, 10, 20, 100, 200, 1,000 and 10,000 shillings. Three banks operate in the colony.

Governor and Commander-in-Chief.—Brig.-Gen. Sir Joseph A. *Byrne*, G.C.M.G., K.B.E., C.B. (October, 1930). Salary, with allowances, 8,500*l.*

Colonial Secretary.—A. de V. *Wade*, O.B.E.

THE UGANDA PROTECTORATE.

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the

Imperial British East African Company. In 1894 a British Protectorate was declared over the kingdom of Buganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn from Mt. Zulia on the Sudan boundary along the Turkana escarpment over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya to the eastern shores of Lake Victoria; on the south by Tanganyika Territory (late German East Africa); and on the west by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area 94,204 square miles, including 13,616 square miles of water. For administrative purposes it is divided into 4 provinces: (1) the Eastern Province, comprising the districts of Busoga, Teso, Karamoja, Bugwere, Bugishu, and Budama; (2) the Northern Province, comprising the districts of Bunyoro, Gulu, Lango, Chua, and West Nile; (3) the Western Province, comprising the districts of Toro, Ankole, and Kigezi; and (4) Buganda Province, with islands in Lake Victoria, comprising the districts of Mengo, Masaka, Mubende, and Entebbe.

The whole Protectorate is now under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of Buganda is recognised as a native kingdom under a 'Kabaka,' with the title of 'His Highness.' He is assisted in the government by three native ministers and a Lukiko, or native assembly. In Buganda, and in Bunyoro, Ankole and Toro, also ruled over by native 'Kings,' purely native matters are dealt with by the various Lukikos, but in serious cases there is an appeal to British courts. For Europeans and non-natives justice is administered by His Majesty's courts. The principal British representative is the Governor, who is assisted by a Legislative Council and an Executive Council in carrying out the functions of Government. The headquarters of the British Administration is at Entebbe; the commercial centre is Kampala.

The total population of Uganda is estimated to be 3,620,193, composed as follows: Native, 3,604,135; Asiatic, 14,204; European, 1,854. Among the natives approximately 874,000 are Baganda, the tribe from which the Protectorate takes its name, and which was the most powerful and civilised at the time when the first explorers visited the country. At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c., for students and teachers. Their efforts have now for some years been supplemented by a Government educational scheme, and a University College is established by Government at Makerere (Kampala) for the higher education of natives. 232,070 children attended schools during 1933. About 2,400,000 natives speak Bantu languages; there are a few Congo pygmies living near the Semliki river; the rest of the natives belong to the Hamitic Nilotic, and Sudanese groups.

There are local and special courts of justice, and a High Court with civil and criminal jurisdiction. The appeal court consists of judges of the High Courts of the Colony of Kenya, Uganda, Nyasaland, Zanzibar and Tanganyika territory In 1933, 6,221 criminal cases were tried. There is an armed constabulary force under a British Commissioner of Police and British officers. A battalion of the King's African Rifles is stationed in the Protectorate.

Cotton is the principal product, and is grown almost entirely by natives. The area under cotton in the 1933–34 season was estimated at about 1,090,502 acres. Other products are coffee, chillies, oil-seeds, tin ore, hides, ivory, sugar and tobacco. There are valuable forests.

Total exports in 1933, 3,464,610*l.* (1932, 2,224,878*l.*); cotton, 2,682,210*l.*; coffee, 210,638*l.*; cotton seed, 262,539*l.*; ivory, 13,290*l.*; hides and skins, 22,363*l.*; tin ore, 57,503*l.*; sugar, 128,802*l.* The total value of imports for consumption in 1933 was 1,367,049*l.*, consisting mainly of cotton fabrics and manufactures, 337,871*l.* Total imports in 1932 amounted to 1,326,220*l.* The trade is chiefly with Great Britain, Japan, the United States, and India. There is a uniform Customs tariff in Kenya, Uganda, and Tanganyika.

The revenue and expenditure (exclusive of loan disbursements) for 6 years were :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1928	1,519,237	1,368,188	1931	1,399,913	1,456,752
1929	1,682,918	1,315,997	1932	1,402,527	1,332,751
1930	1,412,242	1,643,293	1933	1,350,070	1,275,593

In 1933 the poll-tax amounted to 542,102*l.*, customs to 308,968*l.*, and cotton excise 58,191*l.* Debt, 2,235,600*l.*

There are steamer services on Lakes Victoria, Kioga, and Albert. The steamers on Lake Albert descend the Nile to Nimule, on the Sudan boundary, whence there is a motor road (about 100 miles) round the rapids extending to Rejaf, the terminus of the Nile steamers from Khartum. The main line of the Kenya and Uganda Railway now extends to Kampala, by way of Nakuru, Eldoret, Turbo, Tororo and Jinja. Lines from Jinja to Namasagali on Lake Kioga, and from Tororo to Soroti serve as feeders to bring in the important cotton crop of the Eastern Province. There is a railway from Port Bell to Kampala, 7¾ miles in length. A network of all-weather motor roads has been constructed, and a fleet of Government motor vans serves those main routes on which a regular private transport service does not exist.

Mail services by motor and relays of runners radiate from Entebbe, Kampala and Jinja. The Sudan-Egyptian telegraph and telephone system is established to Rejaf. The Uganda telegraph line connects with the Belgian Congo via Fort Portal and the Semliki. The length of telegraph and telephone line in the Protectorate is (1933) 4,247 miles. Telephone exchanges are installed at Entebbe, Kampala, Jinja, Iganga and Mbale, with trunk communication between. There is a wireless station, used mainly for messages in connexion with the aeroplane services and the meteorological service, at Kololo Hill, near Kampala. It is also used for communication with certain outstations at which wireless sets have been established. The weekly air mail service between London and Cape Town connects Uganda with both places.

The currency unit is the shilling, introduced in 1921 and standardized, with subsidiary coinage of silver 50 cent pieces, and bronze 10 cent, 5 cent, and 1 cent pieces. East African Currency Board notes of shillings 10,000, 1,000, 200, 100, 20, 10, and 5 are also in circulation. The Savings Bank had a balance of 56,282*l.* due to 4,794 depositors on December 31, 1933. The National Bank of India (Limited) has branches at Entebbe, Kampala

and Jinja, and the Standard Bank of South Africa and Barclays Bank (Dominions, Colonial and Overseas) have branches at Kampala and Jinja.

Governor and Commander-in-Chief.—Sir Bernard Henry *Bourdillon*, K.C.M.G., K.B.E. (Appointed April, 1932.)

Chief Secretary.—E. L. *Scott*, C.M.G., O.B.E., M.C.

ZANZIBAR.

The Island of Zanzibar is situated in 6° S. latitude, and is separated from the mainland by a channel 22½ miles across at its narrowest part. It is the largest coralline island on the African coast, being 53 miles long by 24 broad, and having an area of 640 square miles. To the north-east, at a distance of some 25 miles, lies the Island of Pemba in 5° S. latitude, 42 miles long by 14 broad, having an area of 380 square miles.

In the sixteenth century the Arabs of the East Coast sought the assistance of the Imams of Muscat to drive out the Portuguese. The subsequent allegiance to Muscat, however, was of a more or less nominal character until Seyyid Said transferred his capital to Zanzibar in 1832. On his death in 1856 the African possessions were, under an arbitration by Lord Canning (then Governor-General of India), declared independent of the parent State. In 1890 the supremacy of the British interests in the Islands of Zanzibar and Pemba was recognised by France and Germany, and they were declared a British Protectorate in accordance with conventions by which Great Britain waived all claims to Madagascar in favour of France and ceded Heligoland to Germany. In the same year the mainland possessions, which extended over the coast from Warsheikh in 3° N. latitude to Tunghi Bay in 10° 42′ S. latitude, were ceded to Italy, Great Britain, and Germany, respectively, Great Britain and Italy paying rent for the territories under their protection, while Germany acquired the Sultan's rights by the payment of a sum of 200,000*l.* At a later date Italy also acquired similar rights by payment of a sum of 144,000*l.* The British-rented territories on the mainland were included in the East Africa Protectorate, and now form the Protectorate of Kenya (see above under Kenya). Thus the Zanzibar Protectorate is confined for administrative purposes to Zanzibar, Pemba, and adjacent small islands. In 1891, a regular Government was formed for the Protectorate with a British representative as first minister. In 1906 the Imperial Government assumed more direct control over the Protectorate and reorganised the Government. On July 1, 1913, the control of the Protectorate was transferred from the Foreign Office to the Colonial Office, legal effect being given to the change in the following year.

Constitution and Government.—The Sultan, Seyyid Sir Khalifa bin Harub, K.C.M.G., K.B.E. (born 1879), succeeded on the abdication of his brother-in-law, Ali bin Hamoud bin Mahomed, December 9, 1911. The Government is administered by a British Resident, who is appointed by commissions under His Majesty's Sign Manual and Signet, and exercises his functions under the Zanzibar Order-in-Council, 1924, as amended by the Zanzibar Order in Council, 1925.

Legislation consists of Decrees of His Highness the Sultan, which are binding on all persons when countersigned by the British Resident under the Order-in-Council.

In 1926 Executive and Legislative Councils were established. The

former is presided over by His Highness the Sultan, and the latter by the British Resident. The Legislative Council consists of three *ex-officio* and five official members. There are six unofficial members, representing various communities.

Population, Religion, Education, &c.—The population of Zanzibar and Pemba, according to the census of 1931, was 235,428 (Zanzibar, 137,741; Pemba, 97,687). The registered birth rate in 1930 was 16·93 per 1,000 for Zanzibar and 16·65 for Pemba; and the death rate 23·37 and 13·01 respectively. The Arabs are the principal landlords and employers of labour. The black population is mostly Swahili, but there are representatives of nearly every African tribe. According to the 1931 census there were 48,962 non-native inhabitants, including 278 Europeans, most of whom are English, and about 14,000 British Indian subjects, through whose hands almost the whole trade of East Africa passes, and 33,400 Arabs. Zanzibar town has a population of 45,276.

Most of the natives are Mohammedans (Sunnis of the Shafi school); the Sultan and the principal Arabs are of the Ibadhi sect. There are 3 Christian Missions: the Universities Mission to Central Africa (Church of England), the Mission of the Holy Ghost (Roman Catholic), and the Friends' Industrial Mission.

Education is free. Subjects of H.H. the Sultan are liable to compulsion, but for others education is voluntary. There are Government schools mainly for Moslems, a number of mission schools, Indian schools supported by different communities for the children of their sects, private schools and a non-sectarian school. The total number of children attending these schools in 1933 was 5,747. There is a Teachers' Training School and a Commercial School. In 1927 education for Arab girls was started under the auspices of Government.

Justice.—In cases in which persons subject to the Zanzibar Order-in-Council, 1924, are concerned, justice is administered by His Britannic Majesty's High Court and the Courts subordinate to it, and in other cases by H.H. the Sultan's Court for Zanzibar and the Courts subordinate to that Court. Subordinate Courts are held by Resident Magistrates, Administrative Officers and Arab Kathis, and an appeal lies from those Courts to the British or Zanzibar Court as may be required. In addition, there are native District Courts, presided over by Arabs. An appeal lies from the British Court and from the Zanzibar Court in the exercise of their original civil and criminal jurisdiction to His Majesty's Court of Appeal for Eastern Africa and thence to the Privy Council.

Finance.—The revenue and expenditure for 6 years were as follows:—

Year	Revenue from Customs	Total Revenue (excluding loans)	Expenditure	Year	Revenue from Customs	Total Revenue (excluding loans)	Expenditure
	£	£	£		£	£	£
1928	256,342	471,771	598,791	1931	295,299	536,389	580,961
1929	290,365	514,000	561,944	1932	223,524	442,580	458,166
1930	267,627	494,461	507,500	1933	256,505	475,465	449,070

Besides Customs, the chief sources of revenue in 1933 were: interest on loan to Kenya and other investments, 12,502*l.*; electricity department, 24,015*l.*; agriculture, 8,119*l.*; court fees, &c., 80,542*l.*; rent of Mainland

Territory, 11,000*l.*; rent of Government property, land and houses, 11,432*l.* The chief heads of expenditure in 1933 were: public works, 58,679*l.*; port and marine, 30,134*l.*; police and prisons, 32,825*l.*; electricity and wireless department, 20,454*l.*; judicial department, 22,894*l.*; agricultural department, 29,336*l.*; provincial administration departments, 27,065*l.*; medical, 49,245*l.*; education, 27,704*l.*; pensions, 50,646*l.*

Production and Industry.—The clove industry is by far the most important in the Protectorate, the Islands of Zanzibar and Pemba yielding the bulk of the world's supply. It is estimated that there are in both islands about 48,000 acres under cloves and over 3 million trees in bearing, the average output of the last 35 seasons being 17,991,225 lbs. The exports in 1933 were 215,325 cwts., and clove-stems 53,606 cwts. The large plantations are chiefly owned by Arabs, but many natives possess small holdings. The coconut industry ranks next in importance after cloves. It is estimated that there are about 55,000 acres under cultivation and about 3½ million trees in both islands. The export of copra amounted in 1933 to 336,083 cwts.

The manufactures are pottery, coir fibre and rope, soap, oil (coconut and simsim), jewellery, and mats. There are no mines in the Protectorate.

Commerce.—The total imports, exports, and shipping for 5 years were:—

Years	Imports (Including bullion and specie)	Exports (Including bullion and specie)	Shipping entered (gross tonnage)
	£	£	Tons
1929	1,664,242	1,722,498	2,763,830

[1] Provisional.

Shipping and Communications, &c.—Several British and foreign Steamship Companies have regular services to Zanzibar and all the important ports on the coast of East Africa. The Zanzibar Government steamers maintain regular weekly connection with Pemba, as well as making calls at Dar-es-Salaam.

Ocean-going shipping dealt with in 1933, 1,427,148 tons net (315 vessels); coastwise, 132,907 tons (329 vessels); dhows, 64,924 tons entered and 65,494 tons cleared. Excellent water supplied at 3·5 tons per minute is available for shipping.

There is cable communication with Europe either via Aden or via Durban.

There are 238 miles of roads throughout the Islands of Zanzibar and Pemba suitable for motor traffic.

The Government maintains wireless stations in Zanzibar and Pemba, and a telephone system in the town of Zanzibar, which is connected with the District and Agricultural stations in the country. There is also a Telephone Service connecting the three Administrative Districts in the island of Pemba. There are five post offices in the two islands. The number of articles dealt with at the post office in 1933 was 1,283,900 (letters, 971,500). The Government Savings Bank at the end of 1933 had 4,083 depositors, with 7,01,237 rupees on deposit.

The British Indian rupee is universally current; currency notes of Re to 500 rupees are in circulation. The value of notes in circulation on December 31, 1932, was 26,07,051 rupees. Seyyidieh copper pice are legal tender up to 64 pice (= one rupee). A frasla (or frasila) of cloves is equivalent to 35 lbs. av.

MAURITIUS.

Mauritius was known to Arab navigators at an early date, probably not later than the tenth century. It was no doubt visited by Malays in the fifteenth century, and was discovered by the Portuguese between 1507 and 1512, but the Dutch were the first settlers. In 1710 they abandoned the island and it was occupied by the French under the name of Isle de France. The British occupied the island in 1810, and it was formally ceded to Great Britain by the Treaty of Paris of 1814.

Constitution and Government.—Under Letters Patent of 1885, 1901, 1904, 1913, and 1933, partially representative institutions have been established. The government of the Colony, with its dependencies, Rodrigues, the Oil Islands, &c., is vested in a Governor, aided by an Executive Council, consisting of the senior officer in command of His Majesty's troops, the Colonial Secretary, the Procureur and Advocate-General, the Treasurer, and such other persons as the Governor, through instructions from the Secretary of State, may from time to time appoint, usually two unofficial members. There is also a Council of Government, consisting of the Governor and twenty-seven members, ten being elected under a moderate franchise, eight *ex-officio*, and nine nominated by the Governor. Two-thirds of the nominated members are unofficial, and have a free vote on all occasions, but the Governor is given power to enact legislation considered by him to be essential in the interests of good government. The *ex-officio* councillors comprise the four Executive official members, the Collector of Customs, the Protector of Immigrants, the Director of Public Works and Surveys, and the Director of the Medical and Health Department.

Governor of Mauritius.—Sir W. E. Francis *Jackson*, K.C.M.G. (Appointed March 7, 1930.)

Area, Population, &c.

Mauritius, in the Indian Ocean, 500 miles east of Madagascar, has an area of about 720 square miles. According to the census of 1931, the population of the island was 393,418. The estimated population of Mauritius at end of 1933 was 401,007, including 10,310 in the Dependencies.

Birth-rate (exclusive of Indians) in 1933, 36·2, Indian birth-rate, 33·9 per thousand; death-rate (exclusive of Indians) in 1933, 24·6, Indian death-rate, 28·6 per thousand. Population of Port Louis, the capital, with its suburbs, 54,459 (1933).

In 1931 there were 126,153 Roman Catholics, 4,466 Protestants (Church of England and Church of Scotland). State aid is granted to the Churches, amounting yearly to Rs. 202,931; the Indians are mostly Hindus.

Education, &c.

Primary education is free but not compulsory. At the end of 1933 there were 51 Government and 75 aided schools. Average attendance at Government schools, 1933, 10,259 (14,867 on roll); at State-aided schools, 16,340 (23,900 on roll, of whom more than three-fourths were in Roman Catholic schools). For secondary education there is a Royal College and a School with (1933) 391 pupils. There were also in 1933 nine aided secondary schools for boys and girls. The total Government actual expenditure in 1932–33 on education was Rs. 1,301,041·49; the estimated expenditure for 1934–35 is Rs. 1,394,885.

The total number of convictions at the inferior courts in 1933 was 10,264 and at the Supreme Court (Assizes) 20.

currency notes of all denominations. All accounts are kept in Indian rupees. Average note circulation in 1933-34, Rs. 7,606,727. The metric system is in force.

Dependencies.

Rodrigues (under a Magistrate) is about 350 miles north-east of Mauritius, 18 miles long, 7 broad. Area, 42 square miles. Population (census 1931, 8,202) on December 31, 1933, 8,950. Actual revenue (1933-34), Rs. 68,590 and actual expenditure, Rs. 112,444; imports (1933), Rs. 266,734; exports, Rs. 254,414. There are two Government and two Aided schools.

The Lesser Dependencies are Diego Garcia, Six Islands, Peros Banhos, Solomon Islands, Agalega, St. Brandon Group, Trois Frères. The nearest island is 230 miles from Mauritius, and the most remote about 1,200 miles. Total population of the lesser dependencies, census 1931, 1,457 (806 males, 651 females). Estimated population on December 12, 1933, 1,360.

Diego Garcia (the most important of the Oil Islands Group), in 7° 20′ S. lat., 72° 26′ E. long., is 12½ miles long, 6¼ miles wide, with 445 inhabitants (census 1931), a large proportion are labourers from Mauritius. 336,746 litres of coconut oil were exported in 1933 from the Lesser Dependencies. Other exports are coconuts, copra, guano, and salted fish.

NYASALAND PROTECTORATE (BRITISH).

The Nyasaland (until 1907 British Central Africa) Protectorate, constituted on May 14, 1891, lies along the southern and western shores of Lake Nyasa, and extends towards the Zambezi. It is administered under the Colonial Office by the Governor and Commander-in-Chief, assisted by an Executive and a Legislative Council, both consisting of nominated members, the Governor having the right of veto (Order in Council of September 4, 1907). The Laws consist of local Ordinances duly enacted, with such British Acts as are of general application.

Land area, 37,596 square miles, divided into two Provinces, each in charge of a Provincial Commissioner, and nineteen districts, each administered by a District Commissioner and his assistant. Population on Dec. 31, 1933, 1,817 Europeans (mostly in the Shiré Highlands), 1,474 Asiatics, and 1,608,023 natives. The chief settlements are Blantyre and Limbe in the Shiré Highlands, with about 700 European inhabitants; others are Zomba (the seat of Government), Cholo, Lilongwe, and Mlanje; on Lake Nyasa are

Fort Johnston, Kota-Kota, Bandawe, Chintechi, Nkata, Likoma, and Karonga. There are good motor roads in all directions, and life and property are safe. Education is controlled by the Education Department. Grants in aid are paid to mission societies for native education and there are three elementary schools for European children, which are maintained as private establishments and receive grants from Government. The Government has established a training centre for native teachers. Twelve Christian missions are at work; in 1933 there were 3,186 native schools with a total roll of 146,390 pupils and an average attendance of 89,720. The total grant in aid paid by Government to missionary societies in 1933 was 10,465*l.* in respect of native education. The grant in aid for European education was 902*l.* These grants were distributed in accordance with the provisions of the Education Ordinance, 1930.

Justice is administered in the High Court, which has jurisdiction in civil and criminal matters, and also as a Court of Admiralty. Subordinate courts are held by magistrates and assistant magistrates in the various districts. Appeals from decisions of the High Court are heard in H.B.M.'s Court of Appeal for Eastern Africa, sitting at Mombasa.

Coffee is cultivated in the Shiré Highlands; in 1933, 39,993 lbs. and in 1932, 88,354 lbs. were exported. Tobacco exported: in 1933, 10,394,498 lbs. and in 1932, 15,082,035 lbs. Cotton exported in 1933, 2,423,791 lbs., and in 1932, 2,094,962 lbs. The area under tea in 1932 was 12,596 acres (exported 2,573,871 lbs.); in 1933, 13,830 acres (exported 3,276,477 lbs.). Cattle in the Protectorate (1933), goats, 241,765; horned cattle, 198,082; sheep, 85,225; pigs, 69,682; asses and mules (mostly belonging to the natives), 195; horses, 5.

The trade ports are Port Herald (Lower Shiré), Kota-Kota, Fort Manning, Karonga, and Fort Johnston (Lake Nyasa).

Direct imports from Great Britain and British Possessions, 1933, 63 per cent. of total; direct exports to the United Kingdom, 1933, 93·8 per cent. of total.

The revenue in 1933 was derived chiefly from Customs, 140,093*l.*; Road and River Dues, 17,229*l.*; Licences, Excise and Internal Revenue, 155,194*l.*; Fees of Court, 18,403*l.*; Interest, 3,310*l.*; Posts, Telegraphs 16,275*l.*; Rents, 10,290*l.*; Miscellaneous, 254,403*l.*

Public debt, December 31, 1933, 3,308,935*l.*

There are military, volunteer reserve, and civil police forces. Police force, December 31, 1933, 15 European officers and 496 African ranks. There is a Marine Transport Department on Lake Nyasa, consisting of three vessels. For ordinary traffic there are small steamers, besides small sailing vessels.

There are 37 post offices through which, in 1933, about 1,751,198 postal packets passed. The postal savings bank had 1,361 depositors at end of 1933; deposits, 27,358*l.* There is a 3 ft. 6 in. gauge railway from Chindio on the Zambezi in Portuguese East Africa to Blantyre (174 miles). A railway from Murraça on the southern bank of the Zambezi

to the Port of Beira (175 miles) in Portuguese East Africa was opened for traffic in April, 1922, thus establishing direct railway communication between Blantyre and Beira. A bridge across the Zambezi to connect these two railways is in course of erection, as is also an extension of the railway system northwards to Lake Nyasa. The road system of the Protectorate comprises 3,250 miles and serves all the principal centres of production, European and native. Good motor road communication with South Africa exists and the recently completed extension northwards links Nyasaland with the Great North Road through Northern Rhodesia, Tanganyika Territory, and Kenya Colony. Several aerodromes, landing grounds, and emergency landing grounds have been constructed, and the principal centres of Chileka, Zomba and Lilongwe are full sized and suitable for all types of aircraft. There is a telegraph line through the Protectorate connecting southwards with Cape Town and northwards with Tanganyika, Kenya and Uganda. Telegraphs are controlled by the Government. Electric light and power plants have been installed at Zomba, Blantyre and Limbe.

At Blantyre, Zomba, and other centres there are branches of the Standard Bank of South Africa and at Blantyre and Limbe there are branches of Barclays (Dominion, Colonial and Overseas) Bank. The currency consists of British coin, gold, silver, and bronze, and Rhodesian bank-notes and silver coin.

Governor and Commander-in-Chief.—Sir H. B. *Kittermaster*, K.B.E., C.M.G.

Chief Secretary.—K. L. *Hall.*

ST. HELENA.

Governor.—Sir Steuart Spencer *Davis*, C.M.G.
Government Secretary.—G. C. *Kitching*, O.B.E.

St. Helena, of volcanic origin, is 1,200 miles from the west coast of Africa. Area, 47 square miles. It is administered by an Executive Council consisting of the Governor and two unofficial members, together with three unofficial members chosen from among the residents of the island. Population (1931 census), 3,995. Births (living), 1933, 160; deaths, 68. Civil emigrants (1933), 148; immigrants 127. There are 4 Episcopal, 4 Baptist, 1 Roman Catholic chapels. Education, 8 elementary schools (of which 3 are Government schools), with 718 pupils in 1933. Police force, 6; cases dealt with by the Supreme Court, 5; by police magistrate, 54 in 1933. A detachment of the Royal Marine Artillery is stationed on the island. The port of the island is called Jamestown.

The following table gives statistics for St. Helena:—

[2] Including specie. [3] Including specie, but excluding Government stores.

The revenue from customs in 1932 was 4,248*l.*; in 1933, 4,754*l.*

Public debt, nil; the Colony's assets at December 31, 1933, exceeded the liabilities by 2,630*l.*

The principal exports are fibre, tow, rope and twine.

Savings-bank deposits on December 31, 1932, 20,620*l.*, belonging to 216 depositors.

Fruit trees, Norfolk pines, eucalyptus, and cedars flourish in St. Helena. Cattle do well, but there is no outside market for the meat. The flax (*phormium*) industry is established at a Government mill and 8 private mills. The area of land under flax was estimated at 3,250 acres in 1933. A lace-making industry was started in 1907. The number of vessels that called at the Island was 40 in 1933. Total tonnage entered and cleared was 158,470 in 1933.

The Post Office in 1931 received 283 bags of mail, 1,725 parcels and 1,150 registered articles, and despatched 88 bags of mail, 331 parcels and 1,865 registered articles.

The Eastern Telegraph Company's cable connects St. Helena with Cape Town and with St. Vincent. There are telephone lines, with 41 miles of wire.

Ascension is a small island of volcanic origin, of 34 square miles, in the South Atlantic, 700 miles N.W. of St. Helena. Down to November, 1922, it was under the control and jurisdiction of the Lords Commissioners of the Admiralty, but it was then transferred to the administration of the Colonial Office and annexed to the colony of St. Helena. There are 10 acres under cultivation providing vegetables and fruit. Population (census, 1931), 188.

The island is the resort of the sea turtle, which come to lay their eggs in the sand annually between January and May. Rabbits, wild goats, and partridges are more or less numerous on the island, which is, besides, the breeding ground of the sooty tern or 'wideawake,' these birds coming in vast numbers to lay their eggs about every eighth month. The island is included in the Postal Union.

Resident Magistrate.—L. S. *Bartlett.*

Tristan da Cunha, a small group of islands in the Atlantic, half-way between the Cape and S. America, in 37° 6′ S. lat. 12° 1′ W. long. Besides Tristan da Cunha and Gough's Island, there are Inaccessible and Nightingale Islands, the former two and the latter one mile long, and a number of rocks. Tristan consists of an extinct volcano rising to a height of 8,000 feet, with a circumference at its base of 21 miles. The habitable area is a small plateau on the north-west side of about 12 square miles, 100 feet above sea-level. Here the struggle for life is great: it is now impossible to grow corn owing

to the depredation of rats, which came from a wreck in 1882; and fuel is scarce owing to deforestation. The staple food appears to be the potato. There are apple and peach trees; bullocks, sheep and geese are reared, and fish are plentiful. Besides being inhospitable, the island is extremely lonely. Since 1900 the annual visits of a warship have been discontinued. Despite these disadvantages, the community is a growing one. In 1880 it numbered 109, in 1932, 163. The characteristics of the people are longevity, good health, and a certain shyness of disposition. The original inhabitants were shipwrecked sailors and soldiers who remained behind when the garrison from St. Helena was withdrawn in 1817. Many attempts have been made to induce the inhabitants to leave. The lack of educational facilities for their children was the sole argument which carried weight in the eyes of the inhabitants. In 1932, the Rev. A. G. Partridge who visited the island at the request of the Colonial Office, set up before he left, a Chief of the islanders and 3 officers to work under him. The Chief is chairman of the Island Council. The Chief's mother was also appointed Head Woman and chairman of the Women's Council, a body which is concerned with the welfare of women and children.

SEYCHELLES.

Seychelles and its Dependencies consist of 92 islands and islets with a total estimated area of 156 square miles. The principal island is Mahé (55 square miles), smaller islands of the group being Praslin, Silhouette, La Digue, Curieuse, and Félicité. Among dependent islands are the Amirantes, Alphonse Island, Bijoutier Island, St. François, St. Pierre, the Cosmoledo Group, Astove Island, Assumption Island, the Aldabra Islands, Providence Island, Coetivy, Farquhar Islands, and Flat Island.

The islands were first colonised by the French in the middle of the eighteenth century, the object being to establish plantations of spices to compete with the lucrative Dutch monopoly. They were captured by the English in 1794 and incorporated as a dependency of Mauritius in 1810. In 1888 the office of Administrator was created, an Executive Council of 2 *ex-officio* members and 1 nominated member was appointed, with a Legislative Council of 3 official and 3 unofficial members, the Administrator being president of both Councils and having an original and casting vote in the Legislative Council. In 1897 the Administrator was given full powers as Governor, and in November, 1903, he was raised to the rank of Governor. In 1931 the constitution of the Executive Council was altered by the addition of an 'unofficial' member.

Governor and Commander-in-Chief.—G. J. *Lithem*, C.M.G.

The population at December 31, 1933, was estimated to be 28,731; census of April 26, 1931, 27,444 (13,289 males and 14,155 females). The death-rate

for 1933 was 12·04; the birth-rate 28·57. The number of births in 1932 was 874; deaths, 363; marriages, 185. The capital is Victoria, which has a good harbour. Education is not compulsory. There were in 1932, 26 grant-in-aid schools and 2 other primary schools. In addition, there are 2 secondary schools with a total of 313 pupils. Total number of children attending school in 1933 was 2,958; average attendance, 77·7 per cent. In 1933, 143 cases were brought before the Supreme Court (Criminal Side). The police force numbered 88 of all ranks (1933).

Revenue, expenditure and debt for four years:—

Year.	Revenue.	Expenditure.	Debt.
	Rs.	Rs.	£
1930	754,174	838,068	Nil.
1931	692,412	814,351	Nil.
1932	701,164	685,631	Nil.
1933	592,043	658,459	Nil.

Chief items of revenue: customs, 1931, Rs. 227,910; 1932, Rs. 252,531. Crown lands, 1931, Rs. 22,722; 1932, Rs. 28,068; licences, taxes, excise and internal revenue, 1933, Rs. 267,677; 1932, Rs. 420,565.

Chief products, coconuts (over 28,300 acres under cultivation and this area is being extended in the outlying islands) and cinnamon, patchouli and other essential oils. Efforts are being made to develop the essential oil industry by improving methods of distillation and cultivation of other essential oil plants. On some islands mangrove-bark and the yolk of birds' eggs are collected and phosphate deposits worked. Live-stock at end of 1932: Cattle, 1,000; goats, 300; horses, 100; asses, 100; pigs, 7,500. Fishing is actively pursued, chiefly for local supply.

Imports, 1933: Rs. 834,943; 1932: Rs. 1,008,111. Exports, 1933: Rs. 903,981; 1932: Rs. 1,347,338. Principal imports, 1933: Rice, 2,285 tons, Rs. 157,064; cotton piece goods, 564,665 yards, Rs. 84,704; sugar, 639 tons, Rs. 68,596; wheat flour, 248 tons, Rs. 26,052; coffee, 18 tons, Rs. 24,372; provisions, unenumerated, Rs. 22,296; wines, 359 dozen bottles and 45,070 litres, Rs. 21,179; machinery, Rs. 20,935; motor spirits, 79,569 litres, Rs. 20,579; potable spirits, 13,385 litres, Rs. 17,919; haberdashery, Rs. 16,237; tobacco (all kinds), Rs. 14,945; gunny bags, 57,800, Rs. 13,511; boots and shoes, 11,817 pairs, Rs. 12,780; drugs, Rs. 12,427; kerosene, 111,370 litres, Rs. 12,325. Principal exports, 1933: Copra, 3,217 tons, Rs. 408,315; guano, 12,307 tons, Rs. 215,897; cinnamon oil, 60,713 kilos, Rs. 202,256; tortoiseshell, 1,191 kilos, Rs. 25,401; patchouli oil, 614 kilos, Rs. 5,865. Imports in 1933 from: United Kingdom, Rs. 256,478; India, Rs. 247,003; Japan, Rs. 63,039; Dutch Possessions, Rs. 52,417; Portuguese Possessions, Rs. 45,389; France, Rs. 38,743; Arabia, Rs. 21,250; Australia, Rs. 16,850; Kenya, Rs. 13,305. Exports in 1933 to: United Kingdom, Rs. 390,681; United States of America, Rs. 181,466; India, Rs. 145,784; New Zealand, Rs. 112,940; Germany, Rs. 19,690; France, Rs. 12,972.

Shipping (1933) entered, 179,938 tons; cleared, 174,208 tons, mainly British, exclusive of coasters trading between Mahé and the dependencies. The British India steamers call every four weeks from Bombay on their way to Mombasa, and every eight weeks on their way from Mombasa to Bombay, and the Royal Dutch Steam Packet Co. steamers call every four weeks on their way to Batavia from Mombasa. There is fairly regular communication between the islands.

There is a good road system in Mahé, and further road-making is temporarily in abeyance. In 1932 the post office despatched and received

86,872 letters and post cards, 73,012 newspapers, &c., and 2,221 parcels. There is direct telegraphic communication with Mauritius, Zanzibar, Aden, and Colombo. The Government Wireless Station at Victoria is open for the exchange of radiotelegrams with ships at sea, but the service between Victoria and the Praslin group of islands is still suspended.

At the end of 1933 the Savings Bank deposits amounted to Rs. 181,858 to the credit of 819 depositors.

Current money in the islands consists of rupees and notes.

SOMALILAND PROTECTORATE.

The **Somali Coast** stretches from Loyi Ada, west of Zeilah, to Banda Ziada, 49° E. long. After 1884, when Egyptian control ceased, the territory was administered by the Government of India, but was taken over by the Foreign Office on October 1, 1898, and was transferred to the Colonial Office on April 1, 1905.

By an arrangement with Italy in 1894 the limits of the British Protectorate were defined; but in 1897, by an arrangement with Abyssinia, a fresh boundary as required by that country was determined, and about 15,000 square miles were ceded to Abyssinia. An agreement for the regulation of Anglo-Italian relations in Somaliland was concluded on March 19, 1907. The area is about 68,000 square miles; population about 344,700—Mohammedan, and entirely nomadic, except on the coast, where considerable towns have sprung up during the British occupation.

No census of the population other than the non-natives has been taken, but the Somali population in 1933 was estimated to be 344,700 (non-native, 2,683). A rough estimate of the main towns of the Protectorate is as follows: Berbera, between 15,000 (hot season) and 30,000 (cold season); Hargeisa, 15,000 to 20,000; Burao, 10,000; Zeilah, 5,000. Convictions in 1933, 959. Revenue in 1933, 111,886*l.*, reckoned at 1*s.* 6*d.* to one rupee. Customs in 1933, 73,318*l.*; expenditure, 1933, 153,820*l.* Free Grant-in-aid in respect of military expenditure, 1933, 29,000*l.* Imports, 1933, 323,830*l.*; exports, 1933, 193,010*l.* Bullion and specie are included. The imports are chiefly rice (160,215 cwt.), dates (43,125 cwt.), sugar (62,044 cwt.), textiles (2,019,172 yds), and specie; the exports, skins and hides, gum and resins, ghee, cattle, sheep and goats, and specie. Tonnage entered in 1933, 58,306; cleared, 57,898. The rupee is the basis of the currency. Government of India notes are also in circulation. Transport is by camel and motor-car; there are no porters. Besides ordinary telegraphs there are wireless telegraph stations at Berbera, Burao, Hargeisa, Erigavo, and Buramo.

The Protectorate forces now comprise a Camel Corps of 437 officers and men, with a reserve of 150 men, and 555 Police.

Commissioner and Commander-in-Chief.—Sir Arthur *Lawrance*, K.B.E., C.M.G., D.S.O. Appointed June 18, 1932.

SOUTH AFRICA.

BASUTOLAND.

Basutoland, an elevated but rugged plateau, forms an irregular parallelogram on the north-east of the Cape of Good Hope Province. The provinces of the Orange Free State, Natal, and the Cape of Good Hope form its boundaries. Area, 11,716 square miles. The territory, which is well watered and has a fine climate, is stated to be the best grain-producing country in South Africa, and the abundant grass enables the Basutos to rear large herds of cattle.

Basutoland has been under the authority of the Crown since 1884, and is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The country is divided into seven districts, namely: Maseru, Leribe, Mohale's Hoek, Berea, Mafeteng, Quthing, and Qacha's Nek. Each of the districts is subdivided into wards, mostly presided over by hereditary chiefs allied to the Moshesh family.

According to the census of 1921 the population numbered 495,937 natives, 1,603 Europeans, 172 Asiatics, and 1,069 coloured. European settlement is in general prohibited, and is more or less limited to the few engaged in trade, Government, and missionary work. Maseru, the capital and largest town, has a population of 1,890 natives and 399 Europeans.

There were 591 Government and Government aided schools in the Territory during 1932, of which 10 were Institutions (Normal, Industrial and Agricultural), 39 Intermediate Schools and 542 Elementary Vernacular Schools. The number of pupils on the roll for 1932 was 59,103 and the average attendance was 44,359. The Education vote for the year ending March 31, 1933, was 45,310*l.* There were 9 small primary schools for European children.

The police force at December 31, 1932, numbered:—12 European officers, 1 chief constable, 30 non-commissioned officers (native) and 268 men (natives).

The revenue arises mainly from the Post Office, native tax, licences, and income tax customs rebate from neighbouring territories. Under the Native Tax Law every adult male native pays 1*l.* 5*s.* per annum, and if he has more than one wife by native custom he pays 1*l.* 5*s.* per annum for his wives up to a maximum of 3*l.* 15*s.* A levy of 3*s.* for educational purposes is paid by every adult native. An Income Tax has been enacted on the lines of that existing in the Union of South Africa. The collections for the year 1932–33 amounted to 4,040*l.*

	1928–29	1929–30	1930–31	1931–32	1932–33
	£	£	£	£	£
Revenue	324,790	326,540	281,801	266,743	275,410
Expenditure . . .	316,573	332,949	322,418	280,407	263,625

Native tax yielded 121,795*l.* in 1932-33, and customs, 86,160*l.*; education levy, &c., 13,853*l.* Balance of liabilities over assets, March 31, 1933, was 38,129*l.*

The products are wool, wheat, mealies, and Kaffir corn. There are indications of iron and copper, and coal has been found and is used in some parts.

Basutoland is in the South African Customs Union. The total trade in recent years was:—

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports . .	921,574	706,416	477,949	462,733	455,111
Exports . .	1,013,392	694,794	317,626	251,427	308,278

The imports consist chiefly of blankets, ploughs, clothing, iron and tin ware, and groceries, and the exports (1932) of wool and mohair (115,570*l.*), wheat and wheat-meal (168,015*l.*). Government imports, 26,885*l.*

A railway built by the C.S.A.R., 16 miles, connects Maseru with the Bloemfontein-Natal line at Marseilles Station.

The currency is exclusively British.

Resident Commissioner.—E. C. *Richards* (March, 1935).

BECHUANALAND PROTECTORATE.

The Bechuanaland Protectorate comprises the territory lying between the Molopo River on the south and the Zambezi on the north, and extending from the Transvaal Province and Southern Rhodesia on the east to South-West Africa. Area about 275,000 square miles; population, according to the census of 1921: Europeans, 1,743; Asiatics and coloured, 1,055; native, 150,185. The most important tribes are the Bamangwato (35,000), under the Chief Tshekedi (acting as regent during the minority of Seretse, the son of Sekgoma, who died in November, 1925) whose capital is Serowe (population 17,000), 40 miles west of the railway line at Palapye Road; the Bakgatla (11,000), under Chief Molefi Pilane, the Bakwena (13,000), under Kgari Sechele; the Bangwaketse (18,000), under chief Bathoeñ, the eldest son of the late Chief Gaseitsiwe; the Batawana, under Acting Chief Monnamaburu, who is acting during the minority of Moremi Mathibe; the Bamalete (4,500), under Chief Seboko Mokgosi; and the Batlokwa (1,200), under Chief Matlala. In 1885, the territory was declared to be within the British sphere; in 1889 it was included in the sphere of the British South Africa Company, but was never administered by the company; in 1890 a Resident Commissioner was appointed, and in 1895, on the annexation of the Crown Colony of British Bechuanaland to the Cape of Good Hope, new arrangements were made for the administration of the Protectorate, and special agreements were made in view of

the extension of the railway northwards from Mafeking. Each of the chiefs rules his own people as formerly, under the protection of the King, who is represented by a Resident Commissioner, acting under the High Commissioner. The headquarters of the Administration is in Mafeking, in the Cape Province, where there is a reserve for Imperial purposes.

The Territory is divided for administrative purposes into 11 districts, each under a Resident Magistrate. There is a tax of 15*s.* on every male native in the territory, and 5*s.* of this sum is placed to the credit of a fund called the Native Fund, for education, &c. Licences for the sale of spirits are, as a rule, granted only at certain railway stations. The police force consists of 35 European officers, warrant officers and sergeants, 50 mounted police, and 181 dismounted constables.

Education is provided (there were 10 European, 2 Coloured, and 107 native schools, 1932–33). The European schools were assisted financially by the Government to the extent of 1,730*l.* The native schools are now mainly financed by the Native Fund, the charge to which for 1932–33 was 5,787*l.* Under the Inspector of Education, the schools are controlled in most of the Reserves by School Committees on which the various missionary bodies are, together with natives, represented.

Cattle-rearing and dairying are the chief industries, but the country is more a pastoral than an agricultural one, crops depending entirely upon the rainfall. Estimated number of cattle on May 3, 1932, 770,000 head (1,000,000 head, 1933–34), sheep and goats 380,000 (1921). During the year 1931, 25,927 head of cattle were exported.

Gold and silver to the total value of 22,327*l.* were mined in 1933–34.

Revenue and expenditure for six years:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1928–29	142,246	143,346	1931–32	106,686	162,495
1929–30	146,384	155,822	1932–33	102,303	142,830
1930–31	148,511	154,922	1933–34	255,270	187,264

Chief items of revenue, 1933–34: income tax and poll tax, 3,665*l.*; customs, 29,100*l.*; hut-tax, 9,624*l.*; licences, 5,102*l.*; posts, 18,031*l.* Chief items of expenditure, 1933–34: Resident Commissioner, 13,071*l.*; district administration, 12,258*l.*; posts, 5,769*l.*; police, 31,963*l.*; administration of justice, 5,358*l.*; public works (extraordinary and recurrent), 9,769*l.*; medical, 12,897*l.*; veterinary, 14,134*l.*; Parliamentary grant-in-aid 177,000*l.*; excess of liabilities over assets on April 1, 1934, 18,717*l.*

When the Union of South Africa was established, an agreement was made with the Union Government under which duty on all dutiable articles imported into the Protectorate is collected by the Union Customs Department and paid into the Union Treasury, a lump sum representing a certain portion of the annual Customs Revenue of the Union being paid over to the Protectorate. Under this arrangement full figures relating to imports and exports of the Protectorate are not available. The export of dairy products was in 1932, 34,178*l.*

The telegraph from the Cape of Good Hope to Rhodesia passes through the Protectorate. Similarly the railway extending northwards from the Cape of Good Hope traverses the Protectorate. It is the property of the Rhodesia Railways, Limited. In the Protectorate are 24 post offices; receipts, in 1933–34, 18,031*l.*; expenditure, 5,769*l.* In 1933–34, 4,033*l.* was deposited in the Savings Bank and 2,061*l.* withdrawn.

The currency is British. There is no bank in the Protectorate.

Resident Commissioner.—Lieut.-Col. C. F. *Rey*, C.M.G.
Assistant Resident Commissioner.—Captain R. O'M. *Reilly*.

SOUTHERN RHODESIA.

Rhodesia includes the whole of the region extending from the Transvaal Province northwards to the borders of the Belgian Congo and Tanganyika Territory, bounded on the east by Portuguese East Africa, Nyasaland, and the Tanganyika Territory, and on the west by the Belgian Congo, Portuguese West Africa, and Bechuanaland. The region south of the Zambezi (Matabeleland and Mashonaland) is called Southern Rhodesia; that north of the Zambezi is known as Northern Rhodesia.

Prior to October, 1923, Southern Rhodesia, like Northern Rhodesia, was under the administration of the British South Africa Company. In October, 1922, Southern Rhodesia voted in favour of responsible government. On September 12, 1923, the country was formally annexed to His Majesty's Dominions, and on October 1, 1923, the new form of government was established under a Governor, assisted by an Executive Council, and a Legislature. The latter consists at first of a single elected Legislative Assembly, but that body may pass a law constituting a Legislative Council in addition. There must be a session at least once a year, and the duration of the Legislature is five years, unless sooner dissolved. The Legislature may amend, by a two-thirds vote of the total membership, the Letters Patent setting up the Constitution, with certain exceptions (relating to reservation of bills by the Governor, native administration, Crown Letters Patent, and Governor's salary). Legislative Council numbers 30 members. The powers of the Legislative Council respecting appropriation and Taxation Bills are limited. In July 1928 the franchise was extended to all British subjects over 21 years of age and to married women, subject to certain qualifications.

A native Council may be established in any native reserve, representative of the local chiefs and native residents, to advise the Governor and manage such local affairs as may be entrusted to it.

Governor and Commander-in-Chief.—Sir H. J. *Stanley*, G.C.M.G. Appointed 1934. (Salary, 4,000*l.*; allowances, 2,000*l.*)

The Cabinet is as follows (November 14, 1934):—

Prime Minister and Minister of Native Affairs.—G. M. *Huggins*.
Minister of Internal Affairs and Minister of Justice and Defence.—V. A. *Lewis*.
Minister of Finance and Commerce.—J. H. *Smit*.
Minister of Agriculture.—Capt. F. E. *Harris*, D.S.O.
Minister of Mines.—W. S. *Senior*.
Minister without Portfolio.—P. D. L. *Fynn*.

High Commissioner in London.—B. F. *Wright* (Acting).

Area and Population.—The area is 150,344 square miles. The growth of the population is given in the following table:—

Year	Europeans			Asiatic Coloured Total	Native Total	Total Population
	Males	Females	Total			
Census of—	No.	No.	No.	No.	No.	No.
May 1911 . .	15,580	8,026	23,606	2,912	744,559	771,077
May 1921 . .	18,987	14,633	33,620	3,248	862,319	899,187
May 1926 . .	21,808	17,366	39,174	3,612	933,899	976,685
May 1931 . .	27,280	22,630	49,910	4,102	1,055,000	1,109,012
June 1933 (est.) .	28,911	24,039	52,950	4,550	1,154,500	1,212,000

The chief towns are Salisbury (the capital, population (including suburbs), 29,000 (approx.), including 10,208 Europeans), Bulawayo (including suburbs), (33,000 (approx.), including 12,602 Europeans), Umtali, Gwelo, Gatooma, Que Que, Shamva, Wankie and Victoria.

In 1933, the number of births (European) was 1,119; deaths, 441; marriages (among Europeans), 581.

Education.—At the end of 1933 the schools for Europeans numbered 65 primary, 12 secondary and 1 vocational. There is a primary teachers' training centre, with 24 teachers in training in 1933, and correspondence classes conducting primary work with a total enrolment of 499 pupils. There were also 69 aided farm schools, taught by private tutors or governesses, with an aggregate enrolment of 499 pupils. Including these, the total enrolment of European children at the end of the year 1933 was 9,762. There were also 8 schools for coloured children, including Eurafrican and Asiatic, with a total enrolment of 910 pupils; and 1,278 schools for native pupils, with a total enrolment of 103,708 pupils. The total expenditure on public education (other than native education) in the Colony in the calendar year 1933 amounted to 269,230*l.*, against which receipts from boarding and tuition fees were 81,961*l.* Grants-in-aid of native education during the year ended March 31, 1934, amounted to 52,881*l.*

Justice.—There is a High Court (composed of a Chief Justice and 2 Judges) with criminal and civil jurisdiction. Single Judges are stationed at Salisbury and Bulawayo and sittings are held at five of the other principal towns twice a year. There are nine principal Courts of Magistrate, also courts presided over by detached Assistant Magistrates and several periodical courts. Natives are subject mainly to the same laws as Europeans, though there are special restrictions relating to arms, ammunition and liquor, and there are laws particularly applicable to natives, such as those dealing with marriage, taxation and registration and passes. Native Commissioners have jurisdiction in civil and criminal matters in which natives only are concerned, but generally exercise jurisdiction in their capacity as Assistant Magistrates.

Finance.—The total revenue for the year ended March 31, 1934, was 2,465,380*l.*, of which the receipts from stamps and licences were 123,140*l.*; Native tax, 334,017*l*; income tax, 366,809*l.*; customs and excise duties, 720,478*l.*; and lands department, 52,847*l.* Total expenditure (including loan expenditure), 1933–34,[1] was 2,858,442*l.*, including 289,094*l.* for education, 268,763*l.* for police and defence, 319,277*l.* for public works and roads,

[1] Provisional figures.

and 438,910*l.* for debt services. The estimated revenue for 1934–35 is 2,501,000*l.*; expenditure out of revenue, 2,522,686*l.*

The net amount of the Public Debt outstanding was, at March 31, 1934, 8,969,315*l.*

Production and Industries.—When responsible Government was granted to the Colony the British South Africa Company relinquished all rights and interests in the land in Southern Rhodesia, except in the estates which it was already developing and working on July 10, 1923, but was recognised by the Crown as the owner of the mineral rights throughout both Southern and Northern Rhodesia. In 1933 the mineral rights in Southern Rhodesia were purchased by the Government for the sum of 2,000,000*l.* Land amounting to 21,595,000 acres has been set apart for tribal settlements ('native reserves'). A further 7,465,000 acres has been set aside as native purchase areas, while the final disposal of 17,793,000 acres as between natives and Europeans have not yet been determined. The country is well adapted for agriculture and European settlers. Live stock (1933): cattle, 2,688,677; sheep, 323,940; and pigs, 79,176. Acreage under crops (1933): maize, 251,042; tobacco, 34,382; ground-nuts, 6,896; legumes and fodders, 71,804. Large fruit orchards have been planted, and nearly all fruit trees thrive, the cultivation of oranges and lemons constituting a rapidly expanding industry. Exports of citrus fruit amounted to 108,051 boxes in 1933. The sale of dairy produce is a profitable industry. Animal products sold in 1933 include 734,042 dozen eggs, 1,240,246 gallons milk, 281,981 lbs. cheese, and 1,564,194 lbs. butter.

A Land and Agricultural Bank makes loans to settlers on easy terms of repayment, for the purpose of improving and developing their agricultural holdings. The amount of applications for advances granted was 121,165*l.* in 1932 and 130,343*l.* in 1933.

Mining.—The country contains gold and other minerals. The total output of all minerals from 1890 to December 31, 1933, is valued at 112,455,857*l.*, of which gold accounted for 84,752,276*l.* The gold output in 1933 was valued at 4,014,034*l.*, including gold premiums amounting to 1,299,255*l.* The output in 1933 of other minerals was: coal, 533,501 tons (240,633*l.*); chrome ore, 38,632 tons (105,829*l.*);[1] asbestos, 30,182 tons (555,993*l.*).[1] The total mineral output for 1933 was valued at 4,939,635*l.*

Commerce.—The total value of imports (including bullion and coin) into Southern Rhodesia in 1933 was 4,581,057*l.*, the chief being: food stuffs and potable vegetables, 535,090*l.*; cotton piece goods, 277,253*l.*; apparel, 400,673*l.*; other textile goods, 402,980*l.*; machines and machinery, 392,465*l.*; motor cars, chassis and parts, 226,296*l.*; motor trucks, chassis and parts, 50,149*l.*; other metal manufactures, 543,827*l.*; motor spirit (petrol), 78,736*l.*; motor tyres and tubes, 56,310*l.*; drugs and chemicals, 235,335*l.*; fertilisers, 57,448*l.*; boots and shoes, 103,309*l.*; explosives, ammunition, etc., 242,720*l.* The value of exports, including gold, but excluding re-exports (845,144*l.*) was 4,635,953*l.*), the chief being: raw gold, 2,639,772*l.*; (excluding the gold premium estimated at 1,270,000*l.*); asbestos, 512,361*l.*; maize (including maize meal), 175,360*l.*; chrome ore, 81,616*l.*; coal, 108,226*l.*; tobacco, 499,999*l.* Total imports, including specie, from the United Kingdom in 1933 amounted to 2,152,128*l.*; from the Union of S. Africa, 856,723*l.*; from the United States, 203,394*l.* Domestic exports to the United Kingdom in 1933, 3,485,664*l.*; Union of S. Africa, 237,897*l.*

Communications.—The British South Africa Company has a controlling interest in the Rhodesian railway system, the total mileage of which (including the Beira Railway) at September 30, 1933, was 2,708. The system begins at Vryburg in the Cape Colony, and extends through the Bechuanaland Protectorate and Southern and Northern Rhodesia to the Belgian Congo and Portuguese East Africa. In conjunction with the railways of the Union of South Africa it provides through communication from Cape Town to the Congo border (2,157 miles), and (by a line from Bulawayo via Salisbury) to the port of Beira on the Indian Ocean (2,033 miles). There are also several branch lines in Southern Rhodesia. The total length of line operated in Southern Rhodesia is 1,356 miles. A system of road motor services has been organised, having in September, 1933, a total route mileage of 1,473 miles.

On December 31, 1933, there were in Southern Rhodesia 219 post offices, 47 of which are money order and savings bank offices. During the year 1933, 10,800,138 letters and post-cards were despatched; 5,794,748 newspapers, books, and parcels, and 240,526 registered articles. The postal revenue for the year 1933 was 233,239*l.*, and the expenditure, 190,705*l.* There is an extensive telephone system in operation with automatic telephone exchanges at Salisbury, Umtali, Bulawayo and Gwelo.

On January 1, 1905, a Post Office Savings Bank was established, and on December 31, 1933, the deposits amounted to 344,635*l.*

NORTHERN RHODESIA.

By an Order in Council, dated May 4, 1911, the two provinces of North-eastern and North-western Rhodesia were amalgamated under the title of Northern Rhodesia, the amalgamation taking effect as from August 17, 1911. The limits of the territory, as defined by the Order in Council, are 'the parts of Africa bounded by Southern Rhodesia, German South-west Africa (now South-west Africa), Portuguese West Africa, the Congo Free State (now the Belgian Congo), German East Africa (now Tanganyika Territory), Nyasaland, and Portuguese East Africa.'

An Administrator was appointed by the British South Africa Company with the approval of the Secretary of State, and had, for consultative purposes, an Advisory Council of five members, chosen by the white settlers.

By an Order in Council dated February 20, 1924, the office of Governor was created, an Executive Council constituted and provision made for the institution of a Legislative Council. This latter Council is composed of five *ex-officio* members, who also constitute the Executive Council, four nominated official members and seven elected unofficial members. On April 1, 1924, the British South Africa Company was relieved of the administration of the Territory by the Crown, from which date the Order in Council of February 20, 1924, took effect.

Northern Rhodesia has an area of 290,320 square miles, and consists for the most part of high plateau country, covered with thin forest. Much of the country is suitable for farming and contains areas carrying good arable and grazing land. The European population at December 31, 1932, was estimated at 10,533; the native population at 1,382,705. The territory is divided into five provinces. The seat of Government is at Livingstone, three miles from the Zambezi, but the Government has selected Lusaka, 65 miles south of Broken Hill, as the site of the new capital of the territory. The most important centres are Broken Hill, Fort Jameson, Lusaka, Mazabuka, Abercorn, Fort Rosebery, Ndola, Luanshya, Mufulira, Nchanga, Nkana and Mongu. The police force, called the Northern

Rhodesia Police, is composed of natives, with European officers and non-commissioned officers. A military force, the Northern Rhodesia Regiment, composed of African rank and file, with European officers and non-commissioned officers, is also maintained.

There were in December, 1933, 13 European controlled schools, with an enrolment of 950; and a number of small non-controlled schools. There are Government schools for natives at Mongu, Mazabuka, Kasama, Lusaka and Ndola, and a large number of mission schools, many of which receive Government grants in aid. At the end of 1933 some 19,490 scholars were on the rolls of recognised schools.

Revenue, 1933, 718,283*l.* (taxes, &c., 261,843*l.*; customs, 204,018*l.*; posts, &c., 41,708*l.*; fees, 61,590*l.*; land sales, &c., 2,339*l.*; miscellaneous, 246,785*l.*). The expenditure for 1933 was 778,879*l.*

Gross imports (including specie), 1933, 1,980,190*l.*; exports and re-exports (including specie), 3,747,354*l.*; of which the principal items of domestic exports were: copper, 3,114,618*l.*; vanadic oxide (fused), 19,638*l.*; gold, 6,833*l.*; zinc, 275,834*l.*; tobacco (unmanufactured), 35,196*l.*; wood (manufactured and partly manufactured), 36,829*l.*; and hides, skins and horns, 8,547*l.*

Agricultural products are maize, tobacco, wheat, coffee, and cattle. There is timber of various kinds. Gold, silver, copper, zinc, lead and vanadium are the chief mineral products; coal has been discovered. Chief production, 1933: gold, 2,588 ozs., value 10,994*l.*; silver, 25 ozs., value 2*l.*; copper, 104,205 tons, value 3,402,896*l.*; zinc, 18,541 tons, value 291,764*l.*; vanadium, 79,153 lbs., value 51,449*l.*; manganese ore, 5,367 tons, value 8,051*l.*; cobalt, 260,491 lb., value 79,064*l.* Total value of mineral production: 1933, 3,845,560*l.* Production of gold in 1933 was 2,588 ozs.; copper, 104,204 tons; vanadium, 76,153 lb.; cobalt, 260,941 lb.

The trunk line of the Rhodesian railway system traverses Northern Rhodesia from Livingstone to the Congo border. Branch lines connect to Mkana, Lunashya, Mufulira Nchanga in the Copper Belt. Also from Livingstone to the Machili Timber Forests. The Zambezi, Kafue, Chambesi, and other rivers of Northern Rhodesia are navigable for a considerable portion of their extent.

There are 43 post offices, 15 being money order offices. There are wireless telegraph stations at Abercorn, Broken Hill, Fort Jameson, Livingstone, Mongu and Mpika. Telegraph and telephone lines run alongside the railway from the Southern Rhodesia border at Victoria Falls to the Congo border North of Ndola with branches from Ndola to Luanshya, Nkana and Mufulira in the Copper Belt. Other lines link up Fort Jameson with Nyasaland and Abercorn and Kasama with Tanganyika Territory.

Broken Hill and Mpika are airports on Imperial Airways route for the air mail service between the United Kingdom and South Africa.

SWAZILAND.

Swaziland lies at the south-eastern corner of the Transvaal. On June 25, 1903, an Order in Council was issued conferring on the Governor of the Transvaal authority over Swaziland, and by Order in Council of December 1, 1906, this authority was transferred to the High Commissioner for South Africa.

The seat of the administration is at Mbabane; altitude 3,800 feet.

Area, 6,705 square miles. Population, census 1921: 112,951, including Europeans, 2,205; natives (Bantu), 110,295; coloured, 451. Estimated population, 1933, 127,515, including 2,805 Europeans, 124,710 Bantu natives. The Government maintains 10 European schools at different centres, average attendance, 356 in 1933; and 3 native schools at Zombode, the kraal of the ex-Chief Regent at Lobamba, the kraal of the Queen-Mother, and at Matapa (the Swazi National School) respectively, average attendance, 195 in 1933. The Government also subsidises certain native schools with an average attendance in 1933 of 7,151, and one school for coloured children, at which the average attendance in 1933 was 26.

A Special Court, having the full jurisdiction of a Superior Court, and Assistant Commissioners' Courts have been established. A local Swaziland police force was created in 1907. Authorised strength (1933) 24 Europeans and 135 natives. During 1933, there were 4,120 summary convictions, and 33 convictions in the Superior Court. Native chiefs continue to exercise jurisdiction according to native law and customs in all civil matters between natives, subject to a final appeal to the Resident Commissioner.

The public debt of Swaziland amounts (1933) to 55,000*l.*

Gold is subject to a tax of 10 per cent. on profits; base metals to a royalty of 2½ per cent. on output, in addition to any rentals now payable.

The agricultural and grazing rights of natives are safeguarded, and delimited. The agricultural products are cotton, tobacco, maize (the staple product), millet, pumpkins, ground-nuts, beans, and sweet potatoes, grown in insufficient quantities for local supply. Stock numbers approximately (1933): horses, 2,399; cattle, 309,814; native sheep and goats, 134,000. About 300,000 sheep are brought into Swaziland from the Transvaal each year for winter grazing. The territory is reported to be rich in minerals, but it has not yet been systematically prospected. Alluvial tin is being mined and shipped. In 1933 the output was 101 tons, valued at 19,665*l.*

By agreement (dated June 29, 1910) with the Union of South Africa, Swaziland is treated for customs purposes as part of the Union and receives a *pro rata* share of the Customs dues collected. The chief exports, 1933, were: slaughter cattle, 62,400*l.*; cassiterite tin, 19,665*l.*; tobacco, 10,010*l.*; cotton (seed), 1,400*l.*

There is daily (except Sundays) communication by Railway Motor buses between Bremersdorp, Mbabane and Breyten, and between Piet Retief and Hlatikulu, and bi-weekly services between Goedgegun and Hluti; Bremersdorp and Stegi and Goba; Bremersdorp and Gollel. Post offices working in 1933, 27. There are telegraph and telephone offices at Mbabane, Pigg's Peak, Bremersdorp, Ezulwini, Hlatikulu, Dwaleni, Mahamba, Stegi, Nsoko, Goedgegun, Hluti and Gollel. Post Office Savings Banks deposits, 5,536*l.* during 1933 by 935 depositors.

The currency is British and Union of South Africa coin, also coins of the late South African Republic, which are of similar denomination to the British. The Barclays Bank (Dominion, Colonial and Overseas) has branches at Mbabane, Hlatikulu, Bremersdorp and Stegi, and the Standard Bank of South Africa Ltd., at Bremersdorp and Stegi.

Resident Commissioner.—Vacant (April, 1935).

THE UNION OF SOUTH AFRICA.

Constitution and Government.

THE Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. 7, Ch. 9), passed by the Parliament of the United Kingdom on September 20, 1909. Under the terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony were united on May 31, 1910, in a legislative union under one Government under the name of the Union of South Africa, these Colonies becoming original provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively. There is a Governor-General, and an Executive Council in charge of the Departments of State.

Legislative power is vested in a Parliament consisting of the King, a Senate, and a House of Assembly. The Governor-General has power to summon, prorogue, and dissolve Parliament, either both Houses simul-

taneously or the House of Assembly alone. There must be a session of Parliament every year.

The Senate consists of forty members, eight (four being selected mainly for their acquaintance with the reasonable wants and wishes of the non-European races) being nominated by the Governor-General in Council and thirty-two being elected, eight for each Province. Each senator must be a British subject of European descent, at least 30 years of age, qualified as a voter in one of the provinces, and resident for five years within the Union; an elected senator must be a registered owner of property of the value of 500*l.* over any mortgage.

The House of Assembly consists, according to the Sixth Delimitation Commission appointed in connection with the 1931 population census results, of 150 members chosen in Electoral Divisions in numbers as follows:—The Cape of Good Hope, 61; Natal, 16; Transvaal, 57; Orange Free State, 16. Act No. 18 of 1930 introduced female franchise and gave the vote to all women over 21. Act No. 41 of 1931 extended the franchise to all males of European, or white, extraction over the age of 21, thus removing the property and wage qualifications existing in the Cape and Natal Provinces. The qualifications in respect of coloured and native (Bantu) voters remains unchanged. Each electoral district in each province returns one member, who must be a British subject of European descent, qualified as a registered voter, and resident five years within the Union. A House of Assembly continues five years from the date of its first meeting unless sooner dissolved.

The House of Assembly, not the Senate, must originate money Bills, but may not pass a Bill for taxation or appropriation unless it has been recommended by message from the Governor-General during the Session. Restrictions are placed on the amendment of money Bills by the Senate. Provision is made respecting disagreements between the Houses, the Royal Assent to Bills, and the disallowance of laws assented to by the Governor-General.

Each member of each House must make Oath or Affirmation of Allegiance. A member of one House cannot be elected to the other, but a Minister of State may sit and speak, but not vote in the House of which he is not a member. To hold an office of profit under the Crown (with certain exceptions) is a disqualification for membership of either House, as are also insolvency, crime, and insanity.

Pretoria is the seat of government of the Union, and Cape Town is the seat of Legislature.

Governor-General and Commander-in-Chief.—Earl of *Clarendon*, G.C.M.G. Appointed January, 1931 (salary £10,000 per annum).

The Executive Council was constituted (November, 1924) as follows:—

The Governor-General.

Prime Minister and Minister of External Affairs.—General The Hon. J. B. M. *Hertzog* (3,500*l.*).

Minister of the Interior, of Public Health and of Education.—The Hon. J. H. *Hofmeyr* (2,500*l.*).

Minister of Mines.—The Hon. Patrick *Duncan*, K.C., C.M.G. (2,500*l.*).

Minister of Railways and Harbours and of Defence.—The Hon. O. *Pirow* (2,500*l.*).

Minister of Finance.—The Hon. N. C. *Havenga* (2,500*l.*).

Minister of Justice.—General The Right Hon. J. C. *Smuts*, P.C., C.H., K.C., D.T.D. (2,500*l.*).

Minister of Labour.—The Hon. A. P. J *Fourie* (2,500*l.*).

Minister of Lands.—General The Hon. J. C. G. *Kemp* (2,500*l.*).

Minister of Agriculture.—Colonel The Hon. Deneys *Reitz* (2,500*l.*).
Minister of Posts and Telegraphs and of Public Works.—Senator The Hon. C. F. *Clarkson* (2,500*l*.).
Minister of Native Affairs.—The Hon. P. G. W. *Grobler* (2,500*l.*).
Minister without Portfolio.—The Hon. R. *Stuttaford.*
Secretary to the Prime Minister and Secretary for External Affairs.—H. D. J. *Bodenstein*, LL.D.

The result of the elections in May, 1933, was: Nationalists, 75; South African Party, 61; Labour (Coalitionist), 2; Labour 2; Roos, 2; Home Rule, 2; Independent, 6; total, 150.

On Dec. 5, 1934, the South African Party and the Nationalist Party were fused into the United Party of South Africa.

In each province there is an Administrator appointed by the Governor-General in Council for five years, and a Provincial Council elected for three years, each council having an executive committee of four (either members or not of the council), the administrator presiding at its meetings. Members of the Provincial Council are elected on the same system as members of Parliament, but the restriction as to European descent does not apply. The number of members in each Provincial Council is as follows:—Cape of Good Hope, 61; Natal, 25; Transvaal, 57; Orange Free State, 25. The provincial committees and councils have authority to deal with local matters such as provincial finance, education (primary), charity, municipal institutions, local works, roads and bridges, markets, fish and game, and penalties for breaches of laws respecting such subjects. Other matters may be delegated to these Councils. All ordinances passed by a Provincial Council are subject to the veto of the Governor-General-in-Council.

There is a provincial Revenue Fund in each province. The old colonial capitals are the seats of provincial legislature of the provinces.

The railways, ports, and harbours are managed by a Harbour and Railway Board, under the chairmanship of a Minister of State. The revenues therefrom are paid into a special fund. All other moneys received by the Union are paid into a Consolidated Revenue Fund, on which the interest on debts of the colonies forms a first charge. To the Union has been transferred the public property, real and personal, of the colonies.

The English and Dutch languages are both official. The word 'Dutch' has now been expressly declared by Act of Parliament to include Afrikaans, a local variant of the language of Holland.

High Commissioner in London.—Hon. C. *te Water* (appointed Sept., 1929).
Accredited Representative to the League of Nations.—D. *Steyn.*
Envoy Extraordinary and Minister Plenipotentiary at Paris.—E. H. *Louw.*
Envoy Extraordinary and Minister Plenipotentiary at Berlin.—Dr. S. F. N. *Gie.*
Envoy Extraordinary and Minister Plenipotentiary to the United States.—R. W. *Close.*
Envoy Extraordinary and Minister Plenipotentiary to Holland.—Dr. H. D. van *Broekhuizen.*
Envoy Extraordinary and Minister Plenipotentiary to Italy.—Dr. G. M. A. *Heymans.*

High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland and High Commissioner for the United Kingdom in the Union of South Africa.—Sir William Henry *Clark*, K.C.S.I., K.C.M.G. (appointed June 18, 1934).

Area and Population.

The total area of the Union is 472,550 [1] square miles divided between the Provinces as follows:—Cape of Good Hope, 277,169; [1] Natal, 35,284; Transvaal, 110,450; Orange Free State, 49,647.

The census taken in 1904 in each of the four Colonies was the first simultaneous census taken in South Africa. In 1911 the first Union census was taken.

The following tables give the returns of population at the various censuses classified according to race and sex:—

Year	All Races			European		Non-European	
	Total	European	Non-European	Males	Females	Males	Females
1904 . . .	5,175,824	1,116,806	4,059,018	635,117	481,689	2,047,118	2,011,900
1911 . . .	5,973,394	1,276,242	4,697,152	685,164	591,078	2,384,228	2,312,924
1918 . . .	—	1,421,781	—	728,866	692,915	—	—
1921 . . .	6,928,580	1,519,488	5,409,092	782,035	737,453	2,754,957	2,654,135
1926 . . .	—	1,677,322	—	857,393	819,929	—	—
1931 . . .	—	1,828,175	—	930,541	897,634	—	—

The 1926 and 1931 population censuses were quinquennial ones of Europeans only, and were taken under the provisions of the South Africa Act for the delimitation of political constituencies.

On June 30, 1934, the European population was estimated at 1,914,700 and other races at 6,567,900.

Of the non-European population in 1921, 4,697,813 were Bantu, 165,731 Asiatic, and 545,548 of other races.

The increase in the total population, 1911–21, was: Union, 15·99 per cent.; Cape, 8·49 per cent.; Natal, 19·71 per cent.; Transvaal, 23·81 per cent.; O. F. S., 19·06 per cent. The increase in the European population in the Union 1926–31 was: Cape, 5·9 per cent.; Natal, 11·6 per cent.; Transvaal, 14·4 per cent.; Orange Free State, 1·2 per cent.; and for the Union, 8·9 per cent.

Principal towns (including suburbs) in the Union classified according to the number of inhabitants of European race, 1921, 1926 and 1931:—

[1] Includes Walvis Bay (430 sq. miles), which is an integral part of the Cape Province but is administered under Act No. 24 of 1922 by South West Africa.

Migration.—1933. Gross Figures (excluding 'In transit,') European; Arrivals, 26,944; departures, 25,264. Non-European: Arrivals, 2,792: departures, 4,073.

Vital Statistics.—The following table gives the total numbers of marriages, births and deaths registered in the Union for recent years for all races :—

Year	European			Non-European [1]		
	Births	Deaths	Marriages	Births	Deaths	Marriages
1928	44,813	17,642	16,348	52,577	45,810	18,131
1929	46,219	16,803	17,192	54,171	43,390	18,069
1930	47,534	17,415	16,604	56,277	45,211	18,113
1931	46,423	17,145	15,688	58,171	49,121	17,346
1932	44,044	18,542	15,408	57,418	48,748	16,450

[1] Partial Registration only.

Unifying Act No. 17 of 1923, which came into effect as from January 1, 1924, abolished compulsory registration of native vital events in rural areas, but made registration compulsory in all urban areas throughout the Union.

The figures for non-Europeans must therefore be regarded as merely recording registrations, and not the total number of actual events.

Religion.

Religions.—The results of the European census of 1926 as regards religions are as follows : — Europeans : Dutch Churches, 921,961 ; Anglicans, 311,281 ; Presbyterians, 79,516 ; Congregationalists, 9,965 ; Wesleyans, 105,217 ; Lutherans, 23,371 ; Roman Catholics, 71,227 ; Baptists, 17,316 ; Jews, 71,816 : others and unspecified, 36,615 ; Christian Scientists, 3,930 ; Apostolic Faith, Mission Church, 15,544 ; other Christian sects, 8,901 ; total, 1,676,660. Non-Europeans as at the census of 1921:[1] Dutch Churches, 276,486 ; Anglican, 420,059 ; Presbyterians, 115,897 ; Independents (Congregationalists), 145,723 ; Wesleyans, 730,214 ; various Christian Sects, 57,190 ; Lutherans, 241,807 ; Roman Catholics, 82,008 ; Hindus, 109,253 ; Buddhists and Confucians, 13,946 ; Mohammedans, 49,936 ; no religion, 3,062,669 ; others and unspecified, 103,904 ; total, 5,409,092.

Education.

Under the *South Africa Act,* for a period of five years after the establishment of the Union and thereafter subject to decree of Parliament, control of education other than higher education was granted to the four Provincial Administrations. This arrangement still obtains. For practical purposes it has been provisionally determined that all post-matriculation instruction and vocational education shall be deemed to constitute Higher Education.

Higher Education.—By legislation of 1916 three Universities, with teaching and examining functions, were established on April 2, 1918, in place of the University of the Cape of Good Hope, provision being made for the conversion of the South African College into the University of Cape Town, of the Victoria College into the University of Stellenbosch, and of the University of the Cape of Good Hope into a federal University, styled the University of South Africa, with the remainder of the University Colleges as constituent colleges, the names of which, with appropriate details, will be found in the table hereunder. In 1921 the University College of Johannesburg was created the University of the Witwatersrand, and Potchefstroom University College was incorporated as a constituent college of the University

Justice.

The Common Law of the Union is the Roman-Dutch Law, that is, the uncodified law of Holland as it was at the date of the cession of the Cape in 1806. The Law of England as such is not recognised as authoritative, though by Statute the principles of English Law relating to mercantile matters, *e.g.*, companies, patents, trademarks, insolvency and the like, have been introduced. In shipping, insurance, and other modern business developments English Law is followed, and it has also largely influenced civil and criminal procedure. In all other matters, family relations, property, succession, contract, &c., Roman-Dutch Law rules, English decisions being valued only so far as they agree therewith. The prerogatives of the Crown are the same as in England.

The Supreme Court consists of an Appellate Division with a Chief Justice and four Judges of Appeal. In each Province of the Union there is a Provincial Division of the Supreme Court; while in the Cape there are, in addition to the Provincial Division, two Local Divisions, and in the Transvaal one, exercising the same jurisdiction within limited areas as the Provincial Divisions. The Judges appointed since 1912 hold office till they attain the age of 70 years. Those appointed earlier were appointed for life. No judge can be removed from office except by resolution of Parliament. The Circuit System is fully developed.

Each Province is further divided into Districts with a Magistrate's Court having a prescribed civil and criminal jurisdiction. From this Court there is an appeal to the Provincial and Local Divisions of the Supreme Court, and thence to the Appellate Division. A distinctive feature of the Criminal system is that Magistrates' convictions carrying sentences above a prescribed limit are subject to automatic review by a Judge.

Persons convicted, all courts, 1932: males, 454,031; females, 67,008; and in 1933: males, 469,661; females, 77,256.

Old Age Pensions.

An Old Age Pension Act was passed in 1928 (amended in 1931), and came into force on January 1, 1929. The Act provides for an amount of 30*l.* per annum being paid to indigenous European persons who reach the age of 65, and 18*l.* per annum to persons of mixed or coloured race—but not Bantus nor to Asiatics.

On Nov. 1, 1933, the number of white pensioners was 32,296, who received 819,804*l.*; and the number of coloured 14,701, receiving 141,060*l.*

Finance.

Prior to 1913–14 the expenditure of the four Provinces was entirely met from grants by the Union Government. Since then various Financial

Relations Acts have been passed defining the conditions upon which subsidies shall be granted to the Provinces, assigning and transferring to them certain revenues and limiting their powers of taxation. Act No. 46 of 1925 bases the subsidy on the attendance of pupils receiving education, assigns certain revenues collected by the Union to the Provinces and gives special grants to the two smaller Provinces.

Defence.

The South Africa Defence Act 1912, which became law on June 14, 1912, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising:—

1. *The South African Permanent Force*, which consists of:—(i) The South African Staff Corps; (ii) The South African Field Artillery; (iii) The South African Air Force; (iv) The South African Permanent Garrison Artillery; (v) The South African Naval Service; (vi) The South African Instructional Corps; (vii) The Special Service Battalion; (viii) The South African Ordnance Corps; (ix) The South African Service Corps; (x) The South African Medical Corps; (xi) The South African Veterinary Corps; (xii) The South African Administrative, Pay, and Clerical Corps.

2. *The Active Citizen Force;* 3. *The Citizen Force Reserve;* 4. *The Coast Garrison Force Reserve;* 5. *The Royal Naval Volunteer Reserve;* 6. *The National Reserve;* 7. *Rifle Associations; and* 8. *Cadets.*

Every citizen of European descent between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle. The strength of the Rifle Associations in 1934 was about 120,000.

The Union is divided into 5 commands. To each command have been allotted various units of different arms, to which the citizens entered for peace training in their 17th to 21st years are posted. The active Citizen Force is organised in 1 mounted brigade and 3 infantry brigades, and comprises 5 mounted regiments, 12 battalions and 6 batteries of field artillery.

Under the 1922 Act the Permanent Force is relieved of all Police duties in peace time for which they were liable under the Act of 1912, and becomes a purely military force. Its strength on June 30, 1934, was 151 officers and 1,783 other ranks, which included 305 of the South African Air Force, and 20 officers and 204 other ranks of the South African Naval Service. In addition 23 officers, nursing sisters and nurses, and 17 other ranks of the Active Citizen Force were employed on whole-time employment. The estimates of the Department of Defence for 1934–35 were 1,114,300*l.*

Production and Industry.

Agriculture.—The production of wheat in recent years is shown by the following table:—

[1] Estimated production by the Department of Agriculture.

Estimated European production of other products, 1932–33: Kaffir corn, 54,200,000 lbs.; potatoes, 273,450,000 lbs.; tobacco, 9,300,000 lbs.

In 1930 the live-stock in the Union was as follows: 10,573,869 cattle; 48,358,349 sheep; 7,954,403 goats; 940,904 pigs; 836,003 horses; 129,854 mules; 699,561 donkeys; and 31,618 ostriches. Sheep numbered 49,280,000 in 1932, and 46,091,000 in 1933.

The production of wool during the 1931–32 and 1932–33 seasons was 305,000,000 lbs. and 318,000,000 lbs. respectively. The export of ostrich feathers in 1933 was valued at 37,790*l.*; hides and skins at 1,616,199*l.* and wattle bark and extract at 525,869*l.* In 1933, wool, scoured and greasy, 262,407,718 lbs.; mohair, 15,743,087 lbs. In 1934–35 the estimated quantity of grease wool produced was 245,000,000 lbs.

Cotton-growing is now undertaken by many farmers, the plant being found a better drought resistant than either tobacco or maize. Yield in 1933, 2,123,424 lbs. (Grader's figures). Sugar is also cultivated; yield of 1933–34 season, 391,173 tons. The area under tea for the 1931–32 and 1932–33 seasons was 1,939 and 2,323 acres respectively, from which the yield of green leaf tea was 2,162,561 lbs. and 2,495,510 lbs. respectively. It is estimated that some 15,000 acres of land suitable for tea plantations are available.

On March 31, 1933, the forest reserve areas comprised 2,547,915 acres demarcated, and 350,259 acres undemarcated: total, 2,898,174 acres.

Irrigation.—Technical and financial assistance is given by the State under the Union Irrigation Law of 1912, which was designed to encourage irrigation. The Government expenditure on irrigation in 1931–32 and 1932–33 was 277,357*l.* and 369,620*l.* respectively from Loan Funds and 207,226*l.* and 173,201*l.* respectively from revenue.

Manufactures.—The report on the industrial census in the Union in 1929–30 gives the value added by process of manufacture, &c., as 55,787,343*l.*,

and the value of the gross production of the industries covered at 112,178,613*l.* The total number of factories which made returns was 7,730. Value of land and buildings, 26,661,591*l.*, machinery, plant, and tools, 40,450,066*l.*, of materials used, 56,391,270*l.*, and cost of fuel, light, and power, 3,454,716*l.* Average number of persons employed, 218,585 (Europeans, 91,024). Wages paid, 27,574,484*l.* The gross value of the output of the principal groups of industries was: food, drink, &c., 33,061,819*l.*; metals, engineering, &c., 21,932,061*l.*; chemicals, &c., 7,378,030*l.*; heat, light, and power, 7,489,285*l.*; building, &c., 9,861,110*l.*; clothing, textiles, &c., 5,467,744*l.*; books, printing, &c., 5,739,644*l.*; leather, &c., 3,764,626*l.*; stone, clay, &c., 3,708,733*l.*; vehicles, 2,424,422*l.*; furniture, &c., 2,352,152*l.*

Mining.—The table hereunder gives the total value of the principal minerals produced in the Union to December 31, 1933. The value of gold is calculated at 4·24773*l.* per fine ounce up to 1919, when the gold premium came into effect, as from the 24th of July, and from 1925 onwards when the gold premium ceased to operate. A portion, however, of the gold produced during December, 1932, and the whole of the production of 1933, was sold at a premium; this additional sum amounted to 668,798*l.* and 21,903,301*l.* respectively, and are included below. Copper, tin, antimony, scheelite, and silver are valued on the estimated pure metal contained in shipments according to the average current prices in London. The value of other base minerals is calculated on average local prices.

Shipping and Communications.

Oversea shipping, 1933: entered, 1,340 vessels of 5,002,293 tons net; cleared, 1,284 of 4,913,016 tons. Coastwise: entered, 3,559 vessels of 10,132,190 tons net; cleared, 3,607 of 10,189,130 tons.

Prior to the Union the State Railways of the several colonies were operated by the separate Governments. In May, 1910, the Government lines were merged into one system, the South African Railways, under the control of the Union Government. The total open mileage at the end of March, 1934, was 13,130 (comprising Cape 5,218 miles, Orange Free State 1,633 miles, Transvaal 3,297 miles, Natal 1,520 miles, and South West Africa 1,462 miles), of which 12,246 miles are 3 ft. 6 in. gauge, and 884 miles 2 ft. gauge. Capital expenditure on Government Railways up to March, 1934, amounted to 149,192,590*l.* Earnings, 1933–34, 23,707,524*l.*; working expenditure, 1933–34, 15,141,457*l.* (excluding depreciation); passengers, 1932–33, 69,921,653. Mileage of private lines, 1932–33, 407 miles (Cape 249, Natal 84, and South West Africa 74). In April, 1932, a two-way passenger-carrying air service was begun between Croydon and Cape Town.

At the end of 1933–34 there were in the Union 3,178 post and 2,944 telegraph offices; 5,093,510 telegrams of all classes were forwarded. The number of money orders issued during the year 1933–34 was 633,119, while 544,472 orders were paid. 4,426,808 postal orders were issued, and 4,159,533 paid. The cash revenue of the Department of Posts and Telegraphs, 1933–34, was 4,420,071*l.*; expenditure, 2,896,771*l.* The revenue figures include 482,401*l.*, from the telegraph service, and 1,655,474*l.* from the telephone service.

There were 117,451 telephone instruments and 89,312 subscribers. A station working on the 'beam' system and in direct communication with the United Kingdom was opened for the acceptance of public traffic on July 5, 1927.

The number of depositors in the Government Savings Bank in the Union at the end of March, 1934, was 541,309, and the amount standing to their credit 11,425,049*l.*

Banks.

Statistics of the banks in the Union are as follows:—

[1] In December, 1920, under the South African Currency and Banking Act, 1920, a Central Reserve Bank was established at Pretoria. It commenced operations in June, 1921, and began to issue notes in April, 1922. Liability for the outstanding notes of the commercial banks was transferred to it on June 30, 1924, and amounted to 139,488*l.* on March 31, 1934. A branch was opened in Johannesburg on September 1, 1925, and further branches at Cape Town, Durban, Port Elizabeth and East London by the end of the year.

Money, Weights, and Measures.

An Act of 1922 provided for the issue of a Union Coinage with denominations identical with those of British Coins, which remained in circulation as legal tender until January 15, 1933, when they were withdrawn. A branch of the Royal Mint which was established at Pretoria, was taken over by the Government in January, 1932.

Union of South Africa silver and bronze coins of 2*s.* 6*d.*, 2*s.*, 1*s.*, 6*d.*, 3*d.*, 1*d.*, ½*d.*, ¼*d.* are being coined and are in circulation. Gold coinage was in circulation until December 21, 1932, on which date the Union suspended gold payments.

An Act (No. 22 of 1922) was passed legalizing the optional use of either the metric or the imperial standard weights and measures, but under a proclamation of 1923 the cwt. has been replaced by the 'cental' of 100 lbs. The following old Dutch measures are, however, still in use:—*Liquid Measure:* Leaguer = about 128 imperial gallons; half aum = 15½ imperial gallons; anker = 7½ imperial gallons. *Capacity:* Muid = 3 bushels. The customary surface measure is the *Morgen*, equal to 2·1165402 acres: 1,000 Cape lineal feet are equal to 1,033 British imperial feet.

PROVINCE OF THE CAPE OF GOOD HOPE.

Constitution and Government.—The Colony of the Cape of Good Hope was originally founded by the Dutch in the year 1652. Britain took possession of it in 1795 but evacuated it in 1803. A British force again took possession in 1806 and the Colony has remained a British Possession since that date. It was formally ceded to Great Britain by the Convention of London, August 13, 1814. Letters Patent issued in 1850 declared that in the Colony there should be a Parliament which should consist of the Governor, a Legislative Council, and a House of Assembly. On the 31st May, 1910, the Colony was merged in the Union of South Africa, thereafter forming an original province of the Union.

Cape Town is the seat of the Provincial Administration.

Administrator.—The Hon. J. H. *Conradie.* Appointed 1929. (Salary 2,500*l.*)

The Province is divided into 126 magisterial districts, and the Province proper, including Bechuanaland, but exclusive of the Transkeian territories, into 94 divisions. Each division has a Council of at least 6 members (14 in the Cape Division) elected triennially by the owners or occupiers of immovable property. The duties devolving upon Divisional Councils include the construction and maintenance of roads and bridges, control of outspans, trekpaths and public servitudes, destruction of noxious weeds, and preservation of public health.

There are 130 Municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are also 80 Village Management Boards.

Area and Population.—The following table gives the population of the Cape of Good Hope[1] at each census :—

Census Year	All Races			European		Coloured

Total Province . .	276,739	650,327	706,137	748,478

Of the non-European population in 1921, 7,696 were Asiatics, 1,640,162 were Bantu, and 484,252 were of mixed and other races. The great majority are engaged in agricultural or domestic employments.

Chief Towns: The census figures for the European population in 1931 are:—Cape Town, 150,914; Kimberley, 18,618; Port Elizabeth, 43,924; Graham's Town, 7,602; Paarl, 7,809; King William's Town, 6,553; East London, 27,801; Graaff-Reinet, 4,447; Worcester, 4,782; Uitenhage, 9,350; Oudtshoorn 5,599.

Vital statistics are shown as follows:—

1932	18,284	7,614	5,782	41,040	26,382	9,048

[1] Partial registration.

Religion.—In 1926 (Europeans only) there were 678,309 Christians—410,227 members of Dutch Churches, 132,703 Anglicans, 25,539 Presbyterians, 4,494 Congregationalists, 42,043 Methodists, 10,781 Lutherans, 28,023 Roman Catholics, 10,149 Baptists, and 14,350 other Christian sects. Jews 23,984, others 3,844.

Education.—Local school administration is conducted by school boards and school committees, the unit of administration being the school district. Each school district is under the control of a school board, a portion of the members being elected by the ratepayers and a portion nominated partly by the Provincial Administration and partly by the local authorities. Education is compulsory for children of European parentage. Grants in support of education are provided from Provincial Council revenues, education up to the age of fifteen being free.

Provincial expenditure in 1933–34 on education (excluding Higher Education, which is under control of the Central Government) amounted to 2,551,322*l.* on European, and 771,173*l.* on non-European education.

In 1933 there were 2,319 public and 31 aided private schools for European scholars, and in addition 9 Institutions for the training of teachers. There were 151,244 European pupils, mostly under School Boards, and a total of 6,444 teachers. There were 2,426 public and aided private schools for non-European scholars, of which 17 were industrial schools and 21 training institutions for teachers. Altogether, there were 5,763 teachers in non-European schools, and a total of 239,933 pupils, mostly under churches and missionary bodies.

Pauperism.—There is no organised system of poor-law relief, but in 1932–33, 42,935*l.* was distributed in such relief.

Finance.—Since the coming into effect of the Union there is only one financial statement for the four provinces together. Particulars are given above under the Union. Since the passing of the Financial Relations Act, 1913, the Provincial revenue consists of certain revenues assigned to the Province and an amount voted by Parliament by way of subsidy. The following figures show the provincial revenue and expenditure for five years :—

	1929–30	1930–31	1931–32	1932–33	1933–34

PROVINCE OF NATAL.

Constitution and Government.—Natal was annexed to Cape Colony in 1844, placed under separate government in 1845, and under charter of

July 15, 1856, erected into a separate Colony. By this charter partially representative institutions were established, and, under a Natal Act of 1893, assented to by Order in Council, June 26, 1893, the Colony obtained responsible government The province of Zululand was annexed to Natal on December 30, 1897. The districts of Vryheid, Utrecht and part of Wakkerstroom, formerly belonging to the Transvaal, were annexed in January, 1903. On May 31, 1910, the Colony was merged in the Union of South Africa, becoming an original province of the Union.

The seat of provincial government in Natal is Pietermaritzburg.

Administrator.—The Hon. H. Gordon *Watson* (Jan. 1928) (2,000*l.*).

Area and Population.—The Province (including Zululand, 10,427 square miles) has an area of 35,284 square miles, with a seaboard of about 360 miles. The climate is sub-tropical on the coast and somewhat colder inland. It is well suited to Europeans. The Province is divided into 43 Magisterial Districts.

The European population has more than trebled since 1879. The returns of the total population at the last six censuses were :—

Census Year	All Races			European		Coloured

Education.—With the exception of Higher, Technical and Vocational Education which is under the control of the Union Government, Education comes under the Provincial Administration. In 1933 there were, for children of European extraction, 501 schools giving primary, 29 giving beyond primary education, in all 530 schools, which were supported either entirely or partially by Government funds. In addition there was 1 training

school for teachers, with 263 pupils. For non-European children, there were 662 native schools; 89 Asiatic schools and 27 other coloured schools, State and State-aided. The enrolment of European pupils in Government and inspected schools was 27,558 on November 7, 1933; the average daily attendance 94 per cent. of that number. The number of native, Asiatic, and coloured children receiving instruction on November 7, 1933, amounted to 73,195. A sum of 197,468*l.* was spent on native, Asiatic and coloured education, during the year 1933–34 out of public funds; the corresponding figure in respect of European education was 546,902*l.* It is estimated that only a very small percentage of European children are receiving no education.

Finance.—For financial arrangements, *see* p. 255. The following figures show the provincial revenue and expenditure for five years:—

Production and Industry.—On the Coast and in Zululand there are vast plantations of sugar (output, 1930–31, 393,205 tons) and tea, while cereals of all kinds (especially maize), fruits, vegetables, the *Acacia molissima*, the bark of which is so much used for tanning purposes, and other crops are produced.

The Province is rich in mineral wealth, particularly coal. Other minerals are asbestos, copper ore, fireclay, gold, graphite, gypsum, iron ore, lead and silver ore, limestone and marble, manganese ore, mica, molybdenum ore, nickel ore, nitre, oil shale, and tin ore. For figures of mineral production, *see* p. 247.

A Whaling Industry was commenced at Durban in 1908. It is regulated by the Provincial Government, as indiscriminate slaughter was driving the whales away from the South African waters.

Commerce.—Since the coming into effect of the Union there are no special records of trade for each of the Provinces.

PROVINCE OF THE TRANSVAAL.

Constitution and Government.—The territory was colonised by Boers from Cape Colony in 1836–37. In 1852 the independence of the Transvaal Government was recognised by Great Britain, but in 1877, in consequence of financial difficulties and troubles with the natives, and in accordance with representations and petitions from the Boers, the territory was annexed by the British Government. In 1880 the Boers rebelled, and in 1881 a Convention was signed restoring self-government, but with conditions, reservations, and limitations, and subject to the suzerainty of the British Crown. This arrangement was modified by a Convention in 1884, in which the name of the South African Republic was given to the Transvaal State; but the control over external affairs, other than engagements with the Orange Free State, was reserved to the Crown. The discovery of gold and the conditions which followed this discovery occasioned difficulties finally resulting in war. This led to the annexation of both States to the British Crown, the one on September 1, 1900, under the name of The Transvaal, and the other (May 24) as the Orange River Colony. Hostilities continued till May 31, 1902. [*See* STATESMAN'S YEAR-BOOK for 1906, under *The Transvaal.*]

The administration was thereafter carried on under a Governor and Lieutenant-Governor, assisted by an Executive and a Legislative Council. On December 6, 1906, Letters Patent were issued providing for a Constitution of responsible Government in the Colony. The Colony was merged in the Union of South Africa on May 31, 1910, as an original Province of the Union.

The seat of provincial government for the Transvaal is at Pretoria.

Administrator.—The Hon. S. P. *Bekker.* (Salary, 2,500*l.*)

Area and Population.—The area of the Province is 110,450 square miles, divided into 40 districts. The following table shows the population at each of the last six censuses:—

Census Year	All Races			European		Coloured

Education.—All education except that of a university and of a vocational type is under the provincial authority. The Province has been divided for the purposes of local control and management into thirty-three school districts. Instruction in Government Schools, both primary and secondary, is free.

The following statistics of education show the position at November 7, 1933: 1,154 primary and intermediate schools and 46 secondary and high schools for European scholars with a total enrolment of 136,844, and 5,563 teachers; 629 State and State-aided schools for coloured, native and Indian children, with 85,942 pupils. There are four training institutions for European teachers, with 642 students; and five for coloured and native teachers, with 616 students. During the year 1933–34, 2,688,663*l.* was expended for educational purposes.

The medium of instruction up to the fourth standard is the home language (English or Afrikaans) of the pupil, but parents may request that the other language be gradually introduced as a second medium. Above the fourth standard both languages may be used at the parents' option or as occasion allows.

Finance.—For financial arrangements, *see* p. 255.

The following figures show the provincial revenue and expenditure for five years :—

Ordinary Expenditure, 1933-34: General administration, 76,942*l.*; education, 2,718,678*l.*; hospitals and poor relief, 455,882*l.*; roads, bridges, and local works, 691,665*l.* The capital expenditure in 1933-34 was 107,998*l.*

The Provincial Revenue is mainly derived from Licences, Native Pass Fees, Poll Tax, Transfer Duty and Companies' Tax.

Production and Industry.—The Province is in the main a stock-raising country, though there are considerable areas well adapted for agriculture, including the growing of tropical crops.

The live-stock numbered, in 1930, 3,158,573 cattle; 5,648,486 sheep; 906,852 goats. On June 30, 1933, there were (estimated), 5,502,000 sheep and 1,146,000 goats.

For mineral production, *see* p. 247. The Province has iron and brass foundries and engineering works, grain-mills, breweries, brick, tile, and pottery works, tobacco, soap, and candle factories, coach and wagon works, &c. The Transvaal gold output in 1931 was 10,877,708 ozs. valued at 46,205,566*l.*, and in 1932, 11,557,858 ozs. valued at 49,094,661*l.*, exclusive of gold premium of 668,798*l.* obtained on a portion of the December, 1932, production. The gold output in 1933 was 11,012,340 ozs., valued at 46,777,446*l.* exclusive of gold premium; total premium amounted to 21,903,301*l.* The output for 1934 was 10,486,393 ozs.

Commerce.—Since the coming into effect of the Union there are no special records of trade for each of the Provinces.

PROVINCE OF THE ORANGE FREE STATE.

The Orange River was first crossed by Europeans about the middle of the 18th century. Between 1810 and 1820, settlements were made in the southern parts of the Orange Free State, and the Great Trek greatly augmented the number of settlers during and after 1836. In 1848, Sir Harry Smith proclaimed the whole territory between the Orange and Vaal Rivers as a British Possession and established what was called the Orange River Sovereignty. Great dissatisfaction was caused by this step, as well as by the native policy of the British Government. In 1854, by the Convention of Bloemfontein, British Sovereignty was withdrawn and the independence of the country was recognised.

During the first five years of its existence the Orange Free State was much harassed by incessant raids by, and fighting with, the Basutos. These were at length conquered. The British Government then stepped in and arranged matters much to the dissatisfaction of the conquering party. By the treaty of Aliwal North, only a part of the territory of the Basutos was incorporated in the Orange Free State.

On account of the Treaty between the Orange Free State and South African Republic, the former State took a prominent part in the South African War (1899–1902), and was annexed on May 28, 1900, as the Orange River Colony. After peace was declared Crown Colony Government was established and continued until 1907, when responsible government was introduced. On May 31, 1910, the Orange River Colony was merged in the Union of South Africa as the Province of the Orange Free State.

The seat of provincial government is at Bloemfontein.

Administrator.—The Hon. C. T. *Wilcocks* (salary, 2,000*l.*).

There are municipalities at Bloemfontein and other centres, 61 in all; local authorities have, so far as possible, the usual local administrative powers.

Area and Population.—The area of the Province is 49,647 square miles; it is divided into 33 districts. The census population has varied as follows:—

Census Year	All Races			European		Coloured	
	Total	Males	Females	Males	Females	Males	Females
1904 .	387,315	210,095	177,220	81,571	61,108	128,524	116,112
1911 .	528,174	277,518	250,656	94,488	80,701	183,030	169,955

1931 .	—	—	—	104,738	100,637	—	—

The capital, Bloemfontein, had, in 1921, 19,367 white inhabitants, and 19,667 natives and other coloured persons; total, 39,034. The 1931 Census figures for the European population are 28,503.

Vital statistics are shown as follows:—

Year	European			Non-European [1]		
	Births	Deaths	Marriages	Births	Deaths	Marriages
1930	5,317	1,674	1,709	1,648	2,450	1,994

1932	4,911	1,762	1,596	2,141	2,813	1,747

[1] Partial registration.

Religion.—The census of 1926 (Europeans only) gave the following results: Dutch Churches, 163,504; Anglican Churches, 13,235; Presbyterians, 3,945; Methodists, 7,478; Lutherans, 893; Roman Catholics, 2,516; Apostolic Faith Mission Church, 1,889; Jews, 5,753; others, 3,772.

Education.—Higher and vocational education is under the control of the Union Education Department, while primary and secondary education and the training of teachers are controlled and financed by the Provincial Administration. The amount spent during year ended March 31, 1934, on European education was 826,169*l.*, and on non-European education, 42,262*l.*

Under the Education Ordinance of 1930 the Province is divided into 25 School Board Districts, for each of which there is a School Board elected by the School Committees in the district. On Nov. 7, 1933, there were 682 European public schools and 77 aided private schools in the Province, with a total enrolment of 44,586 pupils. The number of teachers in European schools totalled 2,138. The Normal College had 172 teachers in training. Similarly, there were 237 non-European public and aided private schools with total enrolment of 29,555 and 2 training institutions for native teachers with 161 pupils; the number of teachers in all non-European institutions was 666. Education is free in all public schools up to the University Matriculation standard, but certain schools are allowed to charge fees and to expend the proceeds for the advantage of the schools. Attendance is compulsory between the ages of 7 and 16, but exemption may be granted in special cases or when a child has passed Standard VI and is in regular employment. Unless parents object, the two official languages—English and Afrikaans—are taught to all pupils, the home language of the pupil being the chief medium of instruction and the second language being introduced gradually during the primary school course. In all the towns and villages of the Province there are either secondary or intermediate schools preparing pupils up to the standard of the University Matriculation.

Finance.—For financial arrangements *see* p. 255. The following figures show the provincial revenue and expenditure for five years:—

	1929-30	1930-31	1931-32	1932-33	1933-34

Production and Industry.—The Province consists of undulating plains, affording excellent grazing and wide tracts for agricultural purposes. The rainfall is moderate. The country is still mainly devoted to stock-farming, although a rapidly increasing quantity of grain is being raised, especially in the Eastern Districts.

For Mineral Statistics *see* p. 247.

Commerce.—Since the coming into effect of the Union there are no special records of trade for each of the Provinces.

The money, weights, and measures are English. The land measure, the Morgen, is equal to about 2·1165 acres.

NIGERIA.

History and Constitution.—This territory comprises a number of areas formerly under separate administrations. Lagos, ceded in August, 1861, from a native king, was placed under the Governor of Sierra Leone in 1866. In 1874 it was detached, together with the Gold Coast Colony, and formed part of the latter until January, 1886, when a separate 'Colony and Protectorate of Lagos' was constituted. Meanwhile the National African Company had established British interests in the Niger valley, and in July, 1886, the company obtained a charter under the name of the Royal Niger Company. This Company surrendered its charter to the Crown in 1899, and on January 1, 1900, its territories were formed into the two Protectorates of Northern and Southern Nigeria. The latter absorbed the 'Niger Coast Protectorate,' which was formed in May, 1893, from the 'Protectorate of the Oil Rivers,' which had been constituted in June, 1885. In February, 1906, Lagos and Southern Nigeria were united into the 'Colony and Protectorate of Southern Nigeria,' and on January 1, 1914, the latter was amalgamated with the Protectorate of Northern Nigeria to form the 'Colony and Protectorate of Nigeria,' under a Governor. Lagos is the seat of the Central Government.

The Colony of Nigeria had its boundaries defined afresh, and the Protectorate was divided into two groups of provinces, the 'Northern Provinces' and the 'Southern Provinces,' each under a Lieutenant-Governor appointed by the King, and subject to the control and authority of the Governor.

The British mandated territory of Cameroon is now attached to Nigeria for administrative purposes.

The Executive Council of the Colony was made, from January 1, 1914, the Executive Council of the Protectorate also. It consists of a few of the senior officials. There is a Legislative Council, created by Order in Council in November, 1922, consisting of the Governor, the members of the Executive Council, and other official members (total official membership not exceeding 30); three members elected by the ratepayers of Lagos; one member elected by the ratepayers of Calabar; four members selected respectively by the Chambers of Commerce of Lagos, Port Harcourt and Kano, and the local Chamber of Mines; two members to represent respectively Banking and Shipping interests; and seven members to represent African interests in those parts of the Colony and Southern Provinces which do not return elected representatives. This Council legislates for the Colony and the Southern Provinces of the Protectorate, laws affecting the Northern Provinces being enacted by the Governor as heretofore.

Governor of Nigeria.—Sir Donald C. *Cameron*, G.C.M.G., K.B.E. (appointed December, 1930).

Chief Secretary to the Government.—John Alexander *Maybin* (July, 1934).

There are altogether 22 provinces, including Cameroons, under British Mandate, each under the immediate control of a Resident. In many provinces the administration is in the hands of the paramount chief and his officials.

Area and Population.—Area approximately 372,674 square miles; population census 1931, 19,928,171. [Northern Provinces: 281,778 square miles, 11,316,938 population (1933). Southern Provinces: 89,515 square miles, 8,129,318 population (1933). Colony: 316,773 population (1933).] The populations of the ten largest towns are: Ibadan, 387,133 (including farming suburbs); Lagos, 126,108; Kano, 75,914; Ogbomosho, 86,744; Iwo, 57,191; Ede, 52,392; Oshogbo, 49,599; Oyo, 48,733; Ilorin, 40,532; Abeokuta, 45,763; Iseyin, 36,805.

Justice.—The Chief Justice is the president of the Supreme Court of Nigeria, and three other judges are stationed in Lagos and one in Calabar. Police Magistrates have District Courts at Lagos and Ebute Metta, and Station Magistrates at Port Harcourt, Ibadan, Warri, Onitsha, Enugu, Calabar, Kaduna, Jos, Lokoja, Kano, and Zaria. In other places where the Supreme Court has jurisdiction, District Officers have the same powers as Police and Station Magistrates. In each province is a Provincial Court consisting of the Resident and his assistants, and such Justices of the Peace as may be appointed by the Governor. Native courts exist in Mohammedan and certain other localities where there are chiefs and councillors, and amongst pagan tribes, Judicial Councils with limited judicial powers have been established. (A complete reorganisation of the Judicial System came into force on April 1, 1934.)

The number of persons summoned before the District and Divisional Courts in 1932 was 24,871, of whom 18,169 were convicted.

Religion and Education.—*Northern Provinces.*—In this area the majority of the population has adopted the religion and social system of Islam. There are, however, regions into which Islam has not penetrated, and where therefore, the social life of the people is still very primitive and their religion some form of animism. In the Mohammedan Emirates education is chiefly in the hands of the Government, while the Missions concentrate upon the Pagans. The main principles underlying the educational policy are the use of vernacular in elementary education, the correlation at every stage of manual and literary subjects, and the provision at the top of more advanced education for the best pupils from the lower grades. The latest figures show that there are 36,506 Koran Schools with 209,895 pupils, 350 Elementary and Primary Schools with 16,324 pupils, 13 Middle Schools with 806 pupils, and 4 Training Institutions having a combined roll of 209 students.

Southern Provinces.—Although the vast majority of the inhabitants are wholly pagan, Christianity, presented by the various Christian Missions, and Islam, assimilated by contact with numerous African adherents, are rapidly gaining ground. The lower stages of education are mainly given in Mission schools or schools conducted by the African Churches and similar agencies. More advanced education is given in some Mission and Government institutions. The direction of policy and the supervision and inspection of all schools is undertaken by the Government Department of Education. The latest figures show that there are, in the Elementary or Primary grade, 2,867 schools with 178,706 pupils, and also 26 Middle or Secondary Schools with 1,219 pupils, and 17 Training Institutions having a total roll of 769 students.

A Higher College, which, it is hoped, will eventually attain to University

standards, has been completed at Yaba, near Lagos. At this College vocational training in various branches, including medicine, engineering, agriculture and teacher-training, is being undertaken in co-operation with the technical departments of Government.

A similar scheme for the Northern Provinces is being introduced shortly.

Seven British, three French, two American, one Canadian, and the Basel Missionary Societies are working in the country as well as the Salvation Army and the different African Churches.

Finance.—Revenue, expenditure, and debt of Nigeria as a whole :—

Year (ending March 31)	Revenue	Expenditure—Ordinary Recurrent	Total Expenditure	Public Debt

The above figures include the Railway Net Revenue or Expenditure only. The surplus at March 31, 1934, was 2,258,475*l.*

The main items of revenue for the year 1932–33 were :—Customs, 2,163,885*l.* ; Railway, 1,863,254*l.* ; Direct Taxes, 808,075*l.* ; Fees of Court, 336,675*l.* ; Marine, 275,321*l.* ; Mining, 62,559*l.* ; Posts and Telegraphs, 96,034*l.* ; Interest, 352,089*l.* ; Miscellaneous, 303,960*l.* ; Licences, etc., 81,111*l.* ; Rent (Government Property), 53,509*l.* ; Colonial Development Fund, 25,378*l.* The chief items of expenditure were :—Railway, 2,113,729*l.*; Charges on account of Public Debt, 752,323*l.* ; Public Works, 448,086*l.* ; Administrative, 528,759*l.* ; Military and Police, 523,970*l.* ; Education, 237,732*l.* ; Medical and Health, 391,340*l.* ; Marine, 254,142*l.* ; Agriculture and Forestry, 150,782*l.* ; Colliery, 61,904*l.* ; Miscellaneous, 96,621*l.* ; Pensions and Gratuities, 470,183*l.* ; Posts and Telegraphs, 153,837*l.* ; Prisons, 105,476*l.* ; Surveys, 69,331*l.* ; Customs, 71,628*l.* ; Colonial Development Fund Schemes, 24,849*l.*

Defence.—The Nigerian Regiment consists of 1 battery 3·7 howitzers, 6 battalions of infantry, and 1 signal training centre.

Production and Industry.—The products (1932) are palm-oil (exports, 128,696 tons) ; palm kernels (exports, 259,945 tons) ; cotton lint (exports, 88,064 cwt.), cocoa (exports, 60,737 tons), mahogany (exports, 7,544 logs), tin ore (exports, 5,216 tons), gold raw (exports, 16,055 oz.). Sheep and goat skins are tanned and dyed. The natives have worked iron, lead, and tin for centuries. There are also deposits of coal, silver, galena, manganese ore, lignite, and monazite (which contains thorium).

Mining rights are vested in the Government, but under an agreement made with the Royal Niger Company at the date of the revocation of the charter, that Company receives half the gross profits derived from royalties on minerals won between the main stream of the Niger on the west and a line running direct from Yola to Zinder on the east, for a period of 99 years with effect from January 1, 1900.

Commerce.—The principal ports are Lagos, Warri, Burutu, Sapele, Koko, Akassa, Degema, Port Harcourt, Bonny, Opobo, Calabar, Tiko, and Victoria. Numerous rivers and creeks form the chief routes for transport, and there are many well-made roads.

Considerable trade is carried on in the Northern Provinces. There is also a large trade by caravans which, coming from Salaga in the west, the Sahara in the north, and Lake Chad and Wadai in the east, make use of Kano as an emporium.

The trade and shipping of Nigeria are shown as follows (bullion and specie are included):—

Year	Trade		Shipping entered and cleared	
	Imports	Exports	Total	British only
	£	£	Tons	Tons
1929	13,404,447	17,922,501	4,018,801	2,075,034

1933	6,645,260	9,067,143	2,950,427	1,443,649

The chief imports (1933) were: Cotton-piece goods, 2,076,552*l.*; iron and steel manufactures, 451,108*l.*; fish, 266,885*l.*; salt, 204,580*l.* The chief exports (1933) were: Palm oil, 1,384,431*l.*; palm kernels, 1,898,522*l.*; cotton lint, 192,989*l.*; cocoa, 1,143,627*l.*; ground-nuts, 2,064,369*l.*; hides and skins, 590,016*l.*

Imports from the British Empire, 1933, 4,959,211*l.*, and from U.S.A., 399,034*l.*

Communications.—The railway system comprises (1) a Western line from Lagos to Kano (704½ miles), and extension to N'Guru (847½ miles), crossing the Niger by bridge at Jebba, with branches from Minna to Baro (111 miles) and from Zaria to the tin fields (Jos) (133 miles, light railway); and from Zaria to Kaura Namoda (137 miles); and from Ifo to Idogo (27 miles). (2) An Eastern line (569 miles) from Port Harcourt to Kaduna on the Western Railway, crossing the Benue at Makurdi with a branch line connecting from Kafanchan junction (458 miles) with the tin fields (Jos)—62¾ miles. Total capital expenditure on Nigerian railway, for the year ending March, 1934, 22,996,697*l.*; interest charges payable, 1,045,255*l.*; gross receipts, 1,868,171*l.*; working expenditure (excluding interest), 1,070,826*l.*; net operating surplus (applied to interest charges), 797,345*l.*; passengers carried, 5,179,206; goods and minerals transported, 627,475 tons.

The Railway also control the Udi Coal Mines at Enugu, the output of which was 234,296 tons for the year ending March 31, 1934.

There is a wireless station at Lagos under the control of the Eastern Telegraph Company for ship to shore communication; the Post Office also maintain wireless stations at Lagos, Badagry, Buca and two other stations in the Cameroons Province.

In 1933 there were 152 Post Offices in Nigeria and the Cameroons under British Mandate. The Savings Bank on Dec. 31, 1933, had 17,721 depositors, with 56,206*l.* to their credit.

A special silver coinage for West Africa was introduced in 1913, the denominations being 2*s.*, 1*s.*, 6*d.*, and 3*d.*, of the same size, weight, and fineness as corresponding coins of the United Kingdom, and in 1920 an alloy coinage of similar denominations to the silver coinage was added. A nickel coinage (penny, half-penny, and tenth of a penny) is also in use. In 1916 special West African currency notes were introduced (present denominations 20*s.* and 10*s.*). The silver coinage is now being withdrawn from circulation.

All West African Currencies are under the control of the West African Currency Board.

The Bank of British West Africa, Ltd., and Barclays (Dominion, Colonial and Overseas) Bank, Ltd., have branches in Nigeria.

GAMBIA.

Governor.—A. F. Richards (2,500*l.*, and 750*l.* allowances). Appointed November, 1933.

Gambia was discovered by the early Portuguese navigators, but they made no settlement. During the seventeenth century various companies of merchants obtained trading charters and established a settlement on the river, which, from 1807, was controlled from Sierra Leone; in 1843 it was made an independent Crown Colony; in 1866 it formed part of the West African Settlements, but in December, 1888, it again became a separate Crown Colony. It is administered under a Governor with an Executive and a nominated Legislative Council containing an unofficial element. With the exception of the Island of St. Mary, on which Bathurst, the capital, stands, the whole Colony is administered on the Protectorate system. Since 1901 both banks of the Gambia have been under direct British control up to the Anglo-French boundary.

Area of Colony (comprising Bathurst and Georgetown and some adjoining land), 69 square miles; population (1931 Census), 14,370. In the Protectorate (area, 3,999 square miles) the population (1931 Census) was 185,150.

There were, in December, 1933, 6 elementary Government-aided schools and 2 Government Mohammedan schools, with 1,792 pupils enrolled, and an average attendance of 1,032; Government grant, proportional to results

(1933), 1,939*l.* Of the elementary schools 1 is Anglican, 2 are Roman Catholic, and 3 Methodist. The Methodists and Roman Catholics each have 2 secondary schools with a total of 64 boys and 89 girls enrolled. A Teacher Training School was opened in 1930. Total Government expenditure on education (1933), 5,498*l.*

There is a company of the Royal West African Frontier Force of 142 men. The armed police has a strength of 127 all ranks.

Of the 421 vessels (1,016,384 tons) entered and cleared in the foreign trade in 1933, 576,148 tons were British.

Internal communication is maintained by steamers or launches. There are several post offices, and postal facilities are also afforded to all river towns by means of a weekly travelling post office on the Government river mail-steamers. Postal packets and parcels dealt with in 1933, estimated at 174,504. Bathurst is connected with St. Vincent (Cape de Verde) and with Sierra Leone by cable, but there are no local railways. Bathurst is in wireless communication with Georgetown, Kuntaur and Basse in the Protectorate. The Post Office Savings Bank had 805 depositors holding deposits value 1,805*l.* A special West African alloy currency was introduced in 1920 (*see* under Nigeria, p. 265). West African currency notes in circulation December 31, 1932, amounted to 215,436*l.* There is one bank in the Colony, the Bank of British West Africa.

GOLD COAST.

The **Gold Coast** first became known through Portuguese navigators in the fourteenth century, and English and Dutch traders and companies exploited

the district in the seventeenth century, their main object being the slave traffic. The Dutch held settlements on the coast until 1871, when a convention was made transferring them to the English. The Colony stretches for 334 miles along the Gulf of Guinea, between the French Ivory Coast and Togoland. It is administered by a Governor with an Executive and a Legislative Council. Attached to it inland are Ashanti and the Northern Territories. Togoland under British Mandate is also attached to the Gold Coast for administrative purposes.

The area of the Colony, Ashanti, Northern Territories and Togoland under British Mandate is 91,843 square miles; population, estimated 1932, 3,271,557; non-Africans, 3,146. Chief towns: Accra, 63,176; Sekondi, 17,884; Cape Coast, 18,030; Keta, 6,405; Winneba, 10,926; Saltpond, 6,369; Koforidua, 11,174.

In the Colony, Ashanti, the Northern Territories and Togoland under British Mandate there were, in 1933–34, 28 Government schools (including 1 technical school); 372 Assisted Schools (including 2 secondary schools and 5 training colleges) which are under the control of the various Missions, and the Prince of Wales' College at Achimota, including kindergarten, primary, secondary and university courses and classes for the training of teachers. The total number of pupils on the roll of Government and Assisted Schools was 44,542, of whom 10,996 were girls and 410 were teachers in training. There are in addition a large number of non-assisted schools supported by the various religious bodies. Government expenditure on education in 1933–34 (including the Northern Territories but excluding Achimota) was 161,984*l.*

The Defence force consists of the Gold Coast Regiment (1 battery of 3·7 howitzers and 4 companies of infantry).

The strength of the police, which is distributed throughout the Gold Coast Colony, Ashanti, Togoland, under British Mandate, and the Northern Territories is (1933–34) 36 European officers and 2,014 other ranks. Summary convictions (1933–34) 22,399 persons.

Staple products and exports, cocoa, gold, manganese, diamonds, kola nuts, mahogany, palm kernels, rubber, copra, and palm oil.

The shipping entered and cleared in the foreign trade in 1932 was 3,547,905 tons, of which 1,847,073 tons were British. The harbour of Takoradi, opened in March, 1928, and appointed as a port on December 3, 1928, is the only complete shelter for ships of over 30 ft. draught between Sierra Leone and Nigeria.

Communications.—Railway communication consists of a main line running from Sekondi to Kumasi thence to Accra, a distance of 361 miles, with branches, Takoradi Junction to Takoradi (7 miles), Inchaban Junction to Inchaban (4 miles), Tarkwa to Prestea (19 miles), and Huni Valley to Kade (99 miles). The main line and branches are 3 ft. 6 in. gauge. There is a branch line Accra to Weshiang (Accra Water Works) 10 miles in length, which is 2 ft. 6 in. gauge. The railway gross earnings for the year 1933–34 were 796,730*l.*, and the working expenditure, excluding provision for renewals but including pensions, was 407,337*l.* The total number of miles open for traffic on March 31, 1934, was 500, and the capital cost, 9,242,458*l.*

There are 6,264 miles of motorable roads in the Gold Coast, Ashanti, and the Northern Territories. There were in the Colony, March 31, 1934, 4,657 miles of telegraph trunks and 7,870 miles of telephone trunks and 282 offices, and there are 78 telephone exchanges with 1,886 telephones in use, and over 3,039 miles of wire in the exchange areas. The telephone trunk system connects up all the main towns in the Colony. Telegrams in 1933–34: 256,426. There is a wireless telegraph station at Takoradi. The number of letters, packets, &c., handled in the postal service in 1933–34 was 5,494,927. In 1933–34 the savings bank had 18,077 depositors with 114,955*l.* to their credit.

The Bank of British West Africa, Ltd. and Barclay's Bank (Dominion, Colonial and Overseas) operate in the Colony and Ashanti. For currency, *see* p. 265. West African currency notes in circulation at March 31, 1931, amounted to 1,963,573*l.*; March 31, 1932, 2,000,070*l.*; March 31, 1933, 2,038.586*l.*

Ashanti was placed under British protection on August 27, 1896. Under Orders in Council of September 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast being appointed Governor of Ashanti, though only some of the laws and ordinances of the Gold Coast apply to the annexed territory. A subsequent Order in Council, dated October 22, 1906, readjusted and defined the boundaries. Ashanti is administered by a Chief Commissioner, with an Assistant Chief Commissioner as relieving officer, and a staff of fourteen District and Assistant District Commissioners. The area is 24,379 square miles and the population (census 1931) was 578,078; non-African (1931), 624. Kumasi, the chief town, had (1932) 39,820 inhabitants. For purposes of education, Ashanti is considered as part of the Gold Coast. The number of children in the Government schools was (1932) 1,309, and in the mission schools, 6,630. At the Agricultural and Forestry Training Centre 31 students were in residence during 1933–34. Police force (1933–34), 4 European officers and 255 other ranks. Prosecutions, 1933–34, amounted to 3,547. There are 1,600 miles of motor roads. Agriculture is the staple industry. 77,020 tons of cocoa were exported by rail in 1933–34. Gold output (1933–34), 180,405 oz. (766,359*l.*). Average number employed in mining industry, 77 Europeans and 3,564 Africans in 1933–34.

In the western parts of the Colony are rich forests of mahogany, cedar, &c., and trees yielding fruits, oil, rubber, and gum copal. This district has been opened up by a trunk motor road from Kumasi to Pamu (130 miles) on the western frontier, via Sunyani, with the accompanying branch roads. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, coco-yams, bananas, ground-nuts, and cocoa, the plantations of which are rapidly extending.

In 1931 there were 1,500 cattle, 10,000 sheep and goats, 20,000 pigs, 400 horses, and 500 donkeys.

The Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection in 1901. They are administered, under the Governor, by a Chief Commissioner, an Assistant Chief Commissioner and 15 Political officers. The country is divided into two provinces, Northern and Southern, comprising Mamprusi, Laura-Tumu, Wa, Dagomba, Gonja and Kete Krachi Districts, with the headquarters of the Protectorate at Tamale in the Southern Province, 237 miles north of Kumasi. Estimated population (1931), 717,275; non-Africans (1931), 107. Chief towns, Tamale, 12,941; Wa, 5,223; Salaga, 4,826; Bawku, 3,752. Area of the Protectorate, 30,486 square miles; Mandated Territory is about 13,041 square miles in addition. Police force (1931–32), 2 European officers and 266 other ranks. The Mohammedans have substantial mosques; there are Roman Catholic and other missions. For the purposes of education the Northern Territories are regarded as a part of the Gold Coast under the administration of the Director of Education, but having a separate Ordinance and Rules. Government schools exist at Tamale, Gambaga, Salaga, and Wa. Pupils in 1931–32, 894. There are also Mohammedan schools. There are 2,158 miles of permanent motorable roads in the dry season. The chief

crops grown are yams, guinea corn, millet, maize, rice, and tobacco. Live-stock, 1932: cattle, 130,000; sheep and goats, 454,200; donkeys, 15,430; horses, 3,740; pigs, 6,810. The headquarters of the Animal Health Department is at Pong Temale, where there is a laboratory and where Africans are trained to be veterinary assistants. There are 5 quarantine stations through which foreign cattle and sheep enter the Protectorate. Gold-bearing quartz and alluvial deposits, and mica, exist.

SIERRA LEONE.

The Colony of Sierra Leone originated in the sale and cession, in 1788, by a native King to English settlers, of a piece of land intended as a home for natives of Africa who were waifs in London; and later it was used as a settlement for Africans rescued from slave-ships. It lies between French Guinea on the north and the Republic of Liberia on the east and south-east. Sierra Leone proper consists of a peninsula about 26 miles long, and 12 miles broad, terminating in Cape Sierra Leone. The Colony of Sierra Leone extends from the Scarcies River on the north, to the border of Liberia on the south, 180 miles. Inland it extends to a distance varying from 8 to 20 miles and includes the Yellaboi and other islands towards the north, as well as Sherbro and several smaller islands to the south, but the Isles de Los were ceded to France under the Convention of 1904. There are for the Colony and Protectorate a nominated Executive Council and a Legislative Council consisting of the Governor, eleven official members, three elected unofficial members, and not more than seven nominated unofficial members, of whom three are paramount chiefs of the Protectorate. Elected members must be 25 years of age, and hold their seats for five years. The franchise is confined to males.

Those portions of Sierra Leone which are administered strictly as Colony (viz. the Sierra Leone Peninsula, Tasso Island, Banana Islands, and the township of Bonthe on Sherbro Island) cover an area of approximately 256 square miles. Area of the Colony 4,000 square miles approximately; population (census 1931), 96,422. Europeans, 1931, numbered 420. The birth-rate (1933) was 23·4 per thousand, and the death-rate 22·2; infantile mortality-rate 232 per 1,000 registered births. Owing to the fact that many births in the rural districts escape registration, the birth-rate appears lower and the infantile mortality-rate higher than they really are. Chief town, Freetown, 55,359 inhabitants (1931). The battalion of the Royal West African Frontier Force has its headquarters at Wilberforce, Freetown. Freetown, the greatest seaport in West Africa, is a second-class Imperial coaling-station, with an excellent harbour.

In 1933, there were 49 primary schools, belonging to missionary societies and assisted from public funds, and 2 Government primary schools. The average attendance in these 51 schools was 5,227. Salaries paid by Government, under amalgamation scheme, to African teachers in mission schools, including grants to European teachers at Roman Catholic schools, amounted to 13,191*l*. There were 8 assisted secondary schools with an average attendance of 864. The grant awarded

these secondary schools amounted to 1,276*l*. One of these (the Albert Academy) includes industrial work in its curriculum. There were also 2 assisted industrial schools with an average attendance of 114, and one (The Sir Alfred Jones' Trades School) controlled by Government with an average of 24 boys. The assisted industrial schools received grants amounting to 280*l*. Besides these there were 1 preparatory to secondary (assisted), 1 secondary, and 2 primary unassisted schools.

The Government conducts in Freetown a Model School for primary and post-primary education with an average attendance of 301, and a secondary school for boys with an average attendance of 119. Fourah Bay College which is under the management of the Church Missionary and Wesleyan Missionary Societies is affiliated to the University of Durham.

Police force at end of 1932 had an authorised strength of 273, including 4 European officers. In 1932, 32 persons were convicted in the Supreme Court, and 43 in the Circuit court.

Principal imports, 1933: cotton manufactures, 167,314*l*.; coal, 20,618 tons, 27,126*l*.; spirits, 9,522 gallons, 8,698*l*.; tobacco manufactured, 42,906 lbs., 13,127*l*.; tobacco unmanufactured, 1,103,163 lbs., 46,209*l*.; oil (illuminating), 260,802 gallons, 14,900*l*. Principal exports, 1933: ginger, 1,545 tons, 16,544*l*.; kola nuts, 1,812 tons, 43,656*l*.; palm kernels, 64,083 tons, 472,824*l*.; palm oil, 1,617 tons, 17,637*l*.; piassava, 3,500 tons, 30,108*l*.

Imports (Board of Trade returns) from United Kingdom in 1934, 405,886*l*.; 1933, 449,682*l*. Exports thereto, 1934, 342,358*l*.; 1933, 338,768*l*.

The tonnage of vessels entered and cleared in the foreign trade (excluding vessels in Admiralty service) was (1933) 3,509,799 tons, of which 1,949,746 tons were British.

A Government railway, a single line of 2ft. 6in. gauge, is open from Freetown to Pendembu, near the Liberian frontier, a length of 227½ miles. From Bauya Junction, 64¼ miles from Freetown, a branch line runs to Makeni, a distance of 83 miles. Total line open, 1932, was 310 miles, excluding sidings. Total receipts 1933, 145,594*l*., gross expenditure 1933, 205,931*l*. There are over 1,932 miles of telegraph and telephone, including electric-train-staff lines. In 1931, 1,858,572 postal packets were dealt with in the Colony; money order transactions amounted to 30,502*l*. There were (1933) 1,166 miles of combined telegraph and telephone wires in operation. There are 70 post offices and postal agencies. At the end of 1933 there were 9,523 depositors in the savings bank with 64,726*l*. (inclusive of interest) to their credit. The West African Silver Currency was introduced in 1913 (*see* under Nigeria, p. 265), and in

1920 West African Alloy Coinage was put into circulation; but British coins are still used. Currency notes of the West African Currency Board are in circulation (251,638*l.* at the end of 1933). The Bank of British West Africa and the Colonial Bank have their headquarters at Freetown.

The Protectorate.—The Protectorate was proclaimed August 21, 1896. On March 7, 1913, an Order in Council was issued providing for its administration; this was revoked and replaced by an Order in Council of January 16, 1924. The Order applies to the territories, not being portions of the Colony of Sierra Leone, lying between the sixth and tenth degrees of north latitude and the tenth and fourteenth degrees of west longitude, and beginning at the extreme southerly point of the Colony on the Anglo-Liberian boundary, as delimited under the provisions of the Anglo-Liberian Conventions, November 11, 1885, and January 21, 1911. The Protectorate extends inland about 180 miles.

The Governor and Commander-in-Chief for the time being of the Colony of Sierra Leone is also the Governor of the Protectorate. Authority is given to the Legislative Council of Sierra Leone, by ordinance, to exercise and provide for giving effect to the powers and jurisdiction acquired by the Crown.

The Protectorate has an area of 27,670 square miles, and a population, according to the census of 1921, of 1,456,148 (natives, 1,450,903). The whole territory has been divided into two Provinces, each of which is placed under a European commissioner. Circuit courts are held at the chief centres of population. There are also district commissioners' courts, chiefs' courts for purely native cases (not serious crime), and combined courts (a chief and a non-native) for small debts and trivial misdemeanours (assaults, abusive language) arising between native and non-native. The chief articles of imports are cotton goods, spirits, hardware and tobacco; the chief exports are palm kernels, kola nuts, palm oil, and ginger. A platinum-bearing area of about 40 square miles has been discovered. Platinum and gold are now being mined in small quantities. Two large hæmatite deposits have been discovered and exploitation of one deposit is being proceeded with. Deposits of chromite of commercial value have been found at a short distance from the Government Railway. There were, in 1933, 171 mission primary schools, 80 of which received assistance from the Government. The average attendance at the assisted schools was 4,375 and the grant paid them was 3,161*l.*; 6 assisted secondary schools with an average attendance of 535, and which received grants amounting to 1,023*l.*; one industrial school with an average attendance of 52, and which received a grant of 87*l.*; a Government School for the sons and nominees of chiefs at Bo, with 92 pupils at the end of 1933; in 1929, Government opened a Central School at Koyeima; the average attendance in 1933 was 84. There were also 7 smaller Government Rural Schools, with a total of 250 pupils.

Governor.—Henry Monck-Mason *Moore*, C.M.G. (July, 17, 1934).
Colonial Secretary.—Hilary R. R. *Blood*, C.M.G. (May, 1934).

ANGLO-EGYPTIAN SOUDAN.

Government.

The rule of Egypt in the Sudan, after having gradually extended during the course of 60 years, was interrupted in 1882 by the revolt of the Mahdi, who, with his successor, the Khalifa, held the country from 1885 for about 13 years under a desolating tyranny. In 1896 an Anglo-Egyptian army commenced operations for the recovery of the lost provinces, and on September 2, 1898, the overthrow of the Khalifa was completed. In November, 1899, he was killed by the Egyptian forces near Gedid.

A convention between the British and Egyptian Governments, signed at Cairo, January 19, 1899, provides for the administration of the territory south of the 22nd parallel of latitude by a Governor-General, appointed by Egypt with the assent of Great Britain, and declares the general principles in accordance with which the administration shall be carried on. The British and Egyptian flags shall be used together; laws shall be made by proclamation; no duties shall be levied on imports from Egypt, and duties on imports from other countries, via the Red Sea, shall not exceed those levied in Egypt; the import and export of slaves is prohibited, and special attention shall be paid to the Brussels Act of 1890 respecting the import and export of arms, ammunition, and spirits.

The Sudan is divided into ten Provinces under Governors. Administration is carried out through British District Commissioners one or more of whom are appointed to each of the districts into which the provinces are subdivided. Native administrative officers are employed under the District Commissioners. Courts of Sheikhs and Chiefs have varying powers of limited jurisdiction over their tribesmen in accordance with native custom throughout the country.

In 1910 a Governor-General's Council was created to assist the Governor-

General in the discharge of his executive and legislative powers. All ordinances, laws and regulations are now made by the Governor-General in Council.

Area and Population.

Extending southwards from the frontier of Egypt to Uganda and the Belgian Congo (approximately N. lat. 5°), a distance of about 1,650 miles, and stretching from the Red Sea to the confines of Wadai in Central Africa, the subject territory has an area of 1,008,100 square miles. The population of the Sudan, according to the most recent estimates, is 5,728,551, including natives of the Sudan, 1,468,712 men, 1,765,971 women, 2,442,397 children, total 5,677,080; non-natives, 51,471. (As so great a proportion of the people are nomads, the numbers are difficult to assess with any degree of accuracy, and the figures of the native population must be taken as approximations only.) The Gambela Enclave, situated within the boundaries of Abyssinia, is leased by the Sudan Government from the Abyssinian Government as a Trading Post. The Eritrea-Sudan frontier and the frontier with French Equatorial Africa have been delimited and demarcated, as also has the greater part of the frontier with Abyssinia (see under *Abyssinia*). The chief towns are: Khartoum, population 49,741, the capital; Omdurman (the old Dervish capital), population 110,436; Khartoum North and Rural District, population 107,720; Wadi Halfa, Merowé, El Damer, Atbara, Port Sudan, Suakin, Kassala, Ed Dueim, Kosti, El Obeid, En Nahud, Wad Medani, Singa, and El Fasher.

Education.

The schools under the Central Authority are classified as follows:—(1) The elementary vernacular schools (Kuttabs), 91 in number (April, 1933), situated in all parts of the country, and with a total number of about 9,323 pupils. Instruction is given to boys from 7 to 12 years of age. (2) The primary schools, of which there are now 10—at Khartoum, Omdurman, Khartoum North, Wad Medani, Atbara, El Obeid, Halfa, Rufaa, Berber and Port Sudan. The number of boys in attendance is 970. The school at Gordon College is attended by 436 pupils. There is also in the Gordon College buildings a training college for students who are eventually drafted out as Kadis in district courts. Also in Khartoum, but separate from the Gordon College, is the Elementary Teachers' Training School, attended by 40 students who are being trained as teachers for the Kuttabs. The industrial workshops, of which there are two, at Omdurman and Atbara, are attended by 243 boy apprentices. There is a training college for girls in Omdurman attended by 30 students, and 22 other girls' schools, attended by 2,203 girls altogether. Affiliated to the Gordon College are the Wellcome Tropical Research Laboratories, where investigations are carried on in connection with diseases and with the economic products of the country. In addition to the above the Central authority aids 633 native schools (Khalwas) attended in 1933 by about 23,869 boys.

Justice.

The Courts of Justice, as well as the Registry of Lands, the Department of Government Lands, and the offices which deal with the legal business of the Government, are administered by the Legal Secretary, who has a permanent seat *ex-officio* on the Governor-General's Council. There is also an Advocate-General.

The High Court of Justice for the trial of civil suits comprises the Court of Appeal and Courts of original jurisdiction. Judges of the High Court

sitting singly have general original jurisdiction. The Court of Appeal is constituted by any two or more Judges of the High Court sitting together.

The general superintendence of the High Court is vested in the Chief Justice. In addition to the Chief Justice there are two Judges of the High Court.

Subordinate to the High Court in every province is the Province Court. This comprises a Province Judge, except in Khartoum Province, and District Judges of three grades. An Appeal lies to the Court of Appeal from a decree made in a suit of value more than £E50 if the value of the relief claimed in the appeal is more than £E50. There are wide powers of revision exercised by the Court of Appeal or the Province Judge in matters where there is no right of appeal.

In Provinces where there is neither a High Court Judge nor a specially appointed Province Judge the Governor acts as Province Judge, and, in any District where there is no specially appointed District Judge, the district commissioners and assistant district commissioners act as District Judges. There are six specially appointed British District Judges, and seven specially appointed District Judges of the second grade.

The Mohammedan Law Courts administer the Moslem religious law in cases between Mohammedans relating to succession on death, marriage, divorce, and family relations generally, and also Mohammedan charitable endowments.

In many districts there are native courts presided over by sheikhs, chiefs, or village elders. This system is being developed and extended.

Criminal justice is administered either by single magistrates, or courts of three magistrates. Judges of the High Court, and District Judges of the first and second grades, governors of provinces, district and assistant district commissioners, and some subordinate administrative officials are magistrates; there are also native notables appointed as magistrates to sit as members of courts. Decisions of courts in the more serious cases require confirmation either by the Governor of the province or by the Governor-General, both of whom have extensive powers of revision. Rights of appeal exist.

The Sudan penal code is an adaptation of the Indian penal code.

Defence.

Egyptian troops were evacuated in 1924, and a new Sudan Defence Force, owing allegiance to the Governor-General, has been created.

Finance.

The revenue and expenditure of the Sudan are as follows (£E1 = £1 0*s.* 6*d.*):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£E	£E		£E	£E
1928 . .	6,646,883	6,045,286	1931[1] . .	4,398,618	4,398,618
1929 . .	6,981,590	6,610,274	1932 . .	3,853,798	3,853,798
1930[1] . .	4,693,623	4,693,623	1933 . .	3,631,552	3,621,957

[1] Including net receipts only from Railways and Steamers.

The main sources of revenue in 1933 were: Land Tax (£E20,243); Animal Tax (£E108,296); Royalties (£E138,313); Customs (£E390,717); Railways net profit (£E447,255); Posts and Telegraphs (£E102,074).

These figures do not include the revenue and expenditure of Local

Provincial Services, which amounted in 1929, to £E126,584 and £E108,719; 1930, to £E90,132 and £E79,536; 1931, to £E74,963 and £E67,139; 1932, to £E68,839 and £E62,841; 1933, to £E66,102 and £E61,525.

Production and Commerce.

The Sudan is the chief source of the world's supply of gum arabic, exports of which in 1933 amounted to 17,086 tons, valued at £E393,333. Egyptian cotton has been well established, and increasing quantities, which compare favourably with corresponding varieties grown in Egypt, are being produced annually. In 1933–34 the area of cotton on the Gezira Irrigation Scheme (put into operation in 1925) was 174,872 acres and produced a crop of 409,960 kantars of 315 lbs. seed cotton. The areas of cotton grown on the Gash and Baraka Deltas were 31,146 and 37,700 acres respectively and produced 61,365 and 22,465 kantars of 315 lbs. seed cotton. In addition, increasing quantities of high-grade, long-staple American cotton are produced in the Northern Provinces of Berber and Dongola under irrigation, and as a rain crop in the Kordofan, Upper Nile, and Mongalla Provinces. The total area under cotton in the 1933–34 season is recorded as 320,934 acres, and the crop of 1933–34 amounted to 650,847 kantars of 315 lbs. of seed cotton.

Other products of the Sudan include sesamé, senna leaves and pods, groundnuts, dates, hides and skins, mahogany, dom nuts (vegetable ivory), chillies, shea nuts, salt, ivory and gold. The principal grain crops are dura (great millet), the staple food of the people in the Sudan and used as cattle and poultry food outside the Sudan, and dukhn (bulrush millet). The cattle and sheep trade of the Sudan is capable of great development.

In 1932 there were in the Sudan approximately 22,750 horses; 352,000 asses; 1,000 mules; 1,250,000 cattle; 2,250,000 sheep; 2,000,000 goats; and 400,000 camels. Pigs are kept by the Nubas only—about 5,000.

The forests which line the Blue Nile River banks, rich in fibres and tanning material, extend to the frontier of Abyssinia. The forests of the Southern Sudan contain valuable trees, the mahogany and the shea butter tree being the most important. The finest gum forests are in Kordofan, Fung and Kassala. The sudd area in the upper reaches of the White Nile is composed of an inexhaustible quantity of papyrus.

Gold is being successfully exploited in the Sudan, mines being worked at Gabait and other places in the Red Sea Hills. Salt pans at Port Sudan supply the whole needs of the country, and considerable quantities are exported annually. In 1933 the exports of salt totalled 14,920 tons.

The principal exports in 1933 were ginned cotton, 24,395 tons (valued at £E1,596,627); cotton seed, 51,068 tons (£E180,089); gum, 17,086 tons (£E393,333); sesame, 6,569 tons (£E62,979); untanned skins of sheep and goats, 1,057 tons (£E51,647); untanned hides, 1,207 tons (£E36,166); cattle, 5,533 (£E20,054); salted fish, 695 tons (£E19,654); ground nuts, 3,153 tons (£E18,724); gold bullion, 28,069 troy ozs. (£E152,930); dom palm nuts (whole and sliced), 6,859 tons (£E28,439); dom palm nuts (button blanks), 50 tons (£E2,453); dates, 4,925 tons (£E46,057); senna, 467 tons (£E13,727).

Internal Communications.

There is a railway from Wadi Halfa to Khartoum with connections to the Red Sea at Port Sudan and Suakin, to Kareima in Dongola Province and Sennar and El Obeid. There is also a line 498 miles long from Haiya on the Atbara-Port Sudan line to Sennar on the Blue Nile passing through Kassala (near Eritrea) and Gedaref. A new section from Gedaref to Sennar Town, 143 miles, was opened in 1929. The total length of the line open for traffic is 2,019 miles as at Dec. 31, 1933. The gauge is 3ft. 6in.

There is a motor transport service throughout the year between Juba and Aba (Belgian Congo) a distance of 140 miles, and between Juba and Nimule (117 miles) on the Uganda border. Motor transport, privately owned, operates between Nairobi, Kampala and Juba during dry season—November to April—by arrangement.

All navigable arms of the Nile and its tributaries between Assuan (Egypt) and Rejaf are served by a fleet of Government steamers.

There is landline and wireless telegraph communication with Egypt and Erythrea, wireless communication with Gambeila in Western Abyssinia, Kenya and Uganda, and submarine cable communication with the Hedjaz. There are 21 wireless stations (including 1 coast station), 5,753 miles of telegraph and telephone routes, and 22,910 miles of wire. There are 1,614 telephone subscribers. There are 77 post and telegraph offices and 16 travelling post offices. In 1933, 12,992,000 postal packets were dealt with, 172,734 parcels, and 611,198 telegrams.

BRITISH MANDATED TERRITORIES IN AFRICA (TANGANYIKA, SOUTH-WEST AFRICA, CAMEROONS, AND TOGOLAND).

TANGANYIKA TERRITORY (LATE GERMAN EAST AFRICA).

Government.—German East Africa was conquered in 1918, and was subsequently divided between the British and Belgians. In March, 1921, the district of Ujiji and part of Bukoba, formerly administered by the Belgians, were handed over to British jurisdiction. The country is administered under mandates approved by the League of Nations. The mandates lay down conditions directed against slavery, forced labour (except for essential public works and services), abuses in connection with the arms traffic, the trade in spirits, usury, and security of labour. The interests of natives are safeguarded.

Under an Order in Council, dated July 22, 1920, the Territory is administered by a Governor, who is assisted by an Executive Council, all of whose members are nominated. A Legislative Council has been constituted as from Oct. 1, 1926, consisting of 13 official members and not more than 10 non-official members. Rights in or in relation to any public lands vest in the Governor, but the Secretary of State for the Colonies may appoint, if he sees fit, another trustee or trustees to exercise such right. A Native Affairs Department was established in 1926.

Area and Population.—The Territory extends from the Umba River on the north to the Rovuma River on the south, the coast-line being about

500 miles in length, and includes the adjacent islands. The northern boundary runs approximately north-west to Lake Victoria at the intersection of the first parallel of southern latitude with the eastern shore (Mohuru Point). The boundary on the west follows the Kagera River (the eastern frontier of Ruanda), thence the eastern boundary of Urundi to Lake Tanganyika. The western boundary then follows the middle of Lake Tanganyika to its southern end at Kasanga (formerly Bismarckburg), whence it goes south-east to the northern end of Lake Nyasa. Rather less than half-way down the lake the boundary turns east and joins the Rovuma River, whose course it follows to the sea. The total area is about 360,000 square miles, which includes about 20,000 square miles of water. Dar-es-Salaam is the capital, population, approximately 29,500.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated (April, 1921) at 4,107,000. In 1933 the European population was estimated at 8,304 and the native population at 5,000,160. European population, 1931 census: 5,236 males, 2,981 females; total, 8,217. Asiatic population, 1931 census: 20,462 males, 12,225 females; total, 32,687. Native population, 1931 census: 2,428,216 males, 2,594,424 females; total 5,022,640. According to German law every native born after 1905 was free, but a mild serfdom was continued under German rule. Legislation for the abolition of slavery was enacted in 1922.

Education.—There were in 1933, 88 Government schools with an average attendance of 6,000 pupils, and 3,359 Mission schools with an average attendance of 135,812 pupils. The amount allotted to education in 1933 was 93,000*l.* There are 3 schools for the children of Dutch settlers in the Arusha District and another European school at Arusla in the Northern Province. There are also 4 German schools, 2 in the Lushoto, 1 each in the Mbulu and Iringa Districts, and 2 Greek schools in the Northern Province. Three kindergarten schools at Dodoma, Tanga and Tabora, receive grants from Government. A school for young European children was established in Dar-es-Salaam in 1929, and a correspondence course exists for children in outlying districts who are unable to attend school.

There is a monthly paper published by the Government in Swahili.

Finance.—The revenue and expenditure for 5 years were:—

—	1930–31	1931–32	1932 (April–Dec.)	1933	1934[1]
	£	£	£	£	£
Revenue . . .	1,749,478	1,522,368	1,290,891	1,564,588	1,672,320
Expenditure . . .	2,102,501	1,820,928	1,255,164	1,655,193	1,672,078

[1] Estimates.

The chief items of revenue in 1933 were: licences, taxes, etc., 802,366*l.*; customs, 414,755*l.*; fees of court or office, 115,496*l.*; miscellaneous, 49,772*l.*; posts and telegraphs, 71,178*l.*; revenue from government property, 80,372*l.* The chief items of expenditure were: public works, 133,984*l.*; provincial administration, 323,885*l.*; medical and sanitation, 190,716*l.*; police and prisons, 138,149*l.*; education, 89,355*l.*; posts and telegraphs, 80,973*l.*; military, 82,352*l.*

Loans were received from the Imperial Government in the years 1920–21 to 1925–26, amounting to 3,135,446*l.* for capital improvements and developments and were expended upon railway works, 1,293,614*l.*; other works, 766,824*l.*; restoration of war damage, 177,909*l.*, and to meet deficit

upon recurrent account, 897,599*l.* Interest at 5 per cent. and sinking fund at 1 per cent. is being paid on the loan for railway and other works, while the balance is temporarily free of interest, but repayment will be considered in 1938. Other loans: Guaranteed Loan, 1948-68, 2,070,000*l.*, of which 1,731,604*l.* are allocated to railway works; Guaranteed Loan, 1951-71, 3,000,000*l.*, of which 2,029,728*l.* are allocated to railway work.

Defence.—The Southern Brigade Headquarters, the Brigade Signal Section, the Brigade Supply and Transport Corps, the 2nd and 6th Battalions of the King's African Rifles, totalling about 1,000 native soldiers and 35 European officers, are stationed in the Territory. The police force consisted (1933) of 1,800 all ranks.

Production and Industry.—The total area under forest other than savannah forest is approximately 4,072 square miles of which 97·1 per cent. is Government forest reserves, 1·4 per cent. awaits reservation, and 1·5 per cent. is valuable forest in private ownership. These forests contain some good merchantable timbers in large quantity, among which Pencil Cedar, Yellow-Wood and Mvule are the most important. In addition, valuable species of hard woods occur as single trees or in groups widely scattered throughout large areas of savannah forest. Ebony is plentiful near the coast, and the creeks and river mouths support extensive mangrove woods valuable as a source of tanning bark and poles. The possible output of the Territory's forests far exceeds the present local consumption. The approximate production of timber and fuel wood in 1933 was 123,274 and 4,527,000 cubic feet respectively.

In 1933 there were 5,450,280 cattle, 2,346,018 sheep and 3,332,983 goats in the territory.

The value of minerals produced in 1933 was: diamonds, 2,389*l.*; gold, 201,686*l.*; salt, 31,782*l.*; mica, 2,630*l.*; tin, 11,002*l.*; red ochre, 191*l.*; Companies desiring to investigate the mineral resources can obtain information and assistance from the Mines Dept., Dar-es-Salaam.

Trade and Shipping.—There is a uniform Customs tariff in Tanganyika, Kenya, and Uganda. Total imports, 1932, 1,872,012*l.*; 1933, 1,946,687*l.*; total exports, 1932, 2,356,942*l.*; 1933, 2,725,878*l.*

Chief exports, 1933: Sisal (69,600 tons), 881,772*l.*; cotton (113,677 centals), 276,864*l.*; coffee (12,718 tons), 429,523*l.*; ground-nuts (19,177 tons), 166,223*l.*; hides and skins (4,140 tons), 165,382*l.*; copra (8,157 tons), 62,160*l.*; grain (222,658 cwts), 80,145*l.*; sesame (4,441 tons), 41,845*l.*; beeswax (680 tons), 52,751*l.*; ghee (9,604 cwts), 19,586*l.*; diamonds (1,373 carats), 2,389*l.*; gold (38,704 ozs. troy), 195,389*l.* Chief imports, 1933: Cotton piece-goods, 443,195*l.*; iron and steel manufactures, 63,458*l.*; foodstuffs, 110,015*l.*; machinery, 137,227*l.*; building materials (including cement and galvanised iron sheets), 66,334*l.*; kerosene and motor spirits, 127,123*l.*; sugar, 57,981*l.*; rice, 4,395*l.*; spirits, 27,484*l.*; cigarettes, 56,926*l.*

In 1933, 469 steamers (exclusive of coastal boats) of 2,169,786 tons, and 5,608 dhows of 111,422 tons, entered and cleared the various coast ports from places beyond the Territory.

The chief seaports are Dar-es-Salaam, Tanga, Lindi, and Mikindani.

Communications.—Light motor traffic is now possible over 15,555 miles of road during the dry season.

There are two railways of metre gauge in the territory. The Tanga Railway from Tanga to Arusha via Moshi (273 miles), and the Central Railway from Dar-es-Salaam to Kigoma (772½ miles), with a branch line from

Tabora to Mwanza (235½ miles) and a branch line from Manyoni to Kinyangiri (93 miles) via Singida. There are steamers on Lakes Victoria, Nyasa and Tanganyika.

Dar-es-Salaam is in telegraphic communication with many inland centres and with the adjoining territories Nyasaland, Kenya, Uganda and Northern Rhodesia. Cable communication exists between Dar-es-Salaam and Zanzibar and communication with the Belgian Congo is effected by wireless between Kigoma and Albertville. A wireless station exists at Dar-es-Salaam for communication with shipping, and stations for dealing with aircraft are installed at Mbeya, Dodoma and Moshi, which are ports of call for Imperial Airways Mail Service, London to Capetown. There are 135 Post Offices and Postal Agencies (105 of which have telegraphic facilities), and 140 Telegraph Offices. Telegraph Money Order and Savings Bank business is conducted at 23 Head Offices, and Postal Order and ordinary Money Order business at 18 Sub Offices. Telephone Exchanges are established and Trunk Telephone communication is in operation between various centres in the Territory and also with Mombasa and Nairobi.

East African currency is in use consisting of a silver shilling, the equivalent of 100 cents; a 50 cent silver piece; copper and bronze 10 cent, 5 cent, and 1 cent pieces. There are currency notes in denominations ranging from 5 to 1000 shillings. Four banks, the National Bank of India, the Standard Bank of South Africa, Barclays Bank (Dominion, Colonial and Overseas) and the Banque du Congo Bélge, have branches in the country.

Governor.—Sir Harold MacMichael, K.C.M.G., D.S.O. (January 25, 1934).

Chief Secretary.—P. E. Mitchell, C.M.G., M.C. (August 3, 1934).

SOUTH-WEST AFRICA.

Situation and Physical Features.—This country is bounded on the north by Portuguese West Africa and North Rhodesia, on the west by the Atlantic Ocean, on the south and southern portion of the eastern boundary by the Cape Province of the Union, and on the remainder of the eastern boundary by the Bechuanaland Protectorate and North Rhodesia. On the western coast, a strip varying from 60 to 100 miles in width and extending from the Orange River in the south to the Ugab River, which borders on what is known as the Kaokoveld, consists of barren desert, and this is also the case in that portion of the Great Kalahari depression which is included in the country on its eastern boundary. The eastern portion is, however, not barren, being good grazing land.

The Kunene River and the Okavango, which form portions of the northern border of the country, the Zambesi, which forms the eastern boundary of the Caprivi Strip, the Kwando or Mashi, which flows through the Caprivi

Strip from the north between the Okavango and the Zambesi, and the Orange River in the south, are the only permanently running streams. But there is a system of great sandy dry river beds throughout the country, in which water can generally be obtained by sinking shallow wells; these are the Kuiseb, Swakop, Omaruru and Ugab on the west, the Fish River in the south, the Nosob, the Auob and the Elephant Rivers in the south-east, and a series of what are known as Omuramba in the north-east, with numerous smaller stream beds. In the Grootfontein area, which geologists describe as a 'karst' region, there are large supplies of underground water, but except for a few springs, mostly hot, there is no surface water throughout the country.

Government and Administration.—The country was annexed by Germany in 1884, but was surrendered to the Forces of the Union of South Africa on July 9, 1915, at Khorab. It is now administered by the Union under a Mandate from the League of Nations, dated December 17, 1920. The laws of the Union, subject to local modifications, if required, may be applied to the country and are gradually being introduced.

The Administration is conducted from Windhoek, and the country is divided into 17 Districts controlled by Magistrates. In addition there is a Chief Native Commissioner at Windhoek who has charge of all Native Affairs in the Territory. Under him are officers at the larger labour centres and Superintendents of Reserves in the Districts where there are large Native Reserves. The Native Commissioner in Ovamboland keeps in touch with the Ovambos living there. There is also an officer stationed at Kuring Kuru on the Okavango River, who keeps close touch with the natives living along the North-Eastern border of the territory.

Windhoek, the capital, is situated in the centre of the territory, and with its surrounding district contains a population of 4,602 Europeans (1926 Census) and 12,488 (estimated) Natives.

The administration has been vested by the Union Parliament in the Governor-General of the Union, who has delegated his powers to an Administrator with full authority to legislate. By Act No. 42 of 1925 the Union Parliament conferred a Constitution on South-West Africa, providing for an Executive Committee, an Advisory Council, and a Legislative Assembly with such powers, authorities and functions severally as are in the Act defined.

Administrator.—D. G. *Conradie* (April, 1933).

Area and Population.—The total area of the country including the Caprivi Zipfel is 317,725 square miles; that of Walvis Bay, administered by S.W.A., 374 square miles.

The European population according to the figures of the 1926 Census amounted to 24,115, and in 1933 was estimated at 31,600. The Native population is estimated at 241,733. As large areas of the country, particularly along the coast and in the north, are uncivilised, it has been impossible to procure precise figures. In particular it has been difficult to estimate the numbers of the Bushmen, who still exist in considerable numbers in the north-eastern portion of the country.

The principal native races are the Ovambos, Hereros, Bergdamaras or Klipkaffirs, Hottentots and Bushmen.

The Ovambos are a Bantu race and follow agriculture. They still possess to its full extent tribal organisation.

The Hereros are a pastoral people who formerly owned enormous herds of cattle. The Germans oppressed them, their tribal organisation completely disappeared and they were scattered throughout the country on farms

and in the different towns, where they formed the ordinary source of labour. The Herero makes an excellent herd. Since the British occupation of the country Reserves have been set apart for them and they have considerably increased in numbers and in animal wealth.

The Bergdamaras are, it is believed, also of Bantu origin, though some authorities hold that they belong rather to the Hottentot race whose language they now speak. They are an inferior tribe and were alternately the slaves of the Hereros and the Hottentots in pre-European days, as the former or the latter were in the ascendant.

The Hottentots, so called, consist of two distinct sections: one, whose remnants are found in the central portions of the country, being of pure native extraction, the source of which is but little understood; the other is composed of tribes resulting from an admixture of European blood in the Cape with the Hottentot races residing there a couple of centuries ago, which, after conflict with their European neighbours, sought refuge across the Orange River.

The Bushmen are the oldest inhabitants of South-West Africa and are found in considerable numbers in its eastern portion from Lat. 26° to the Northern boundary.

In the centre of the country just south of the Windhoek district is the Bastard Gebiet occupied by a race known as the Bastards, whose origin is much the same as the second class of Hottentots mentioned above, except that the admixture of European blood is much greater and their ordinary language is Cape Dutch. These people have a measure of self-government under a council of which the local Magistrate is Chairman. They number about 5,000.

Education.—*European.*—There are (1933) 62 Government schools with 4,290 pupils, and 63 registered private schools with 944 pupils. Of the children in Government schools 749 are accommodated in hostels which are conducted by the Administration in conjunction with 19 of the Government schools. The general policy has hitherto been to bring the country children into these hostels and so obviate the necessity of single-teacher country schools. In consequence of the expenditure involved, however, this policy is now being modified, and wherever possible Government farm schools and aided private farm schools are being established. There are 3 Government farm schools and 45 aided private farm schools.

Native.—The education of the Natives is under the direct supervision of the various Missions. There are (1933) 73 Government-aided mission schools for coloured and native children, with 4,343 pupils. There are 2 Training Schools for Native Teachers, subsidised by the Government, with 48 student teachers in training, and 2 industrial schools in which 32 pupils are enrolled.

Finance.—The revenue and expenditure for 5 years were:—

	1930-31	1931-32	1932-33	1933-34	1934-35[1]
	£	£	£	£	£
Revenue . . .	619,229	528,345	384,489	452,554	448,500
Expenditure[2] . .	1,271,281	1,166,589	662,950	667,459	850,548

For the purposes of Customs and Excise revenue the territory is included in the South African Customs Union, and a lump sum based on the customs

and excise duties on goods consumed in the territory is paid over to the Administration. The total annual revenue from this source is now approximately 110,000*l.*

Production and Industry.—South-West Africa is essentially a stock-raising country, the absence of water rendering agriculture, except in the Northern and North-eastern portions, almost impossible. Generally speaking the southern half of the Territory is suited for the raising of small stock, while the central and northern portions are better fitted for cattle. The stock census for the year 1933 was as follows: 628,462 head of cattle, 2,210,293 head of small stock, 18,412 horses, 64,958 donkeys and 1,443 mules. Considerable attention is now being paid to the production of butter, the quantity manufactured during the year being 2,728,645 lbs., of which 2,678,190 lbs. were exported.

More and more attention is being centred on the production of Karakul pelts. The number exported during the year was 441,754.

Minerals constitute 70 to 80 per cent. of the total value of exports m the Territory. Diamonds, which constitute the principal production, are recovered from alluvial sources on a 300 mile stretch along the coast line from the Orange River northward. Exports in 1933: 9,113 carats, valued at 57,860*l.*; in 1932: 44,313 carats, valued at 211,170*l.*

Copper, lead, vanadium and tin are at present being worked in the north of the Territory. Exports: copper-lead ore, copper-lead matte and pig lead, valued, in 1933, nil.; in 1932, at 19,700*l.*; Vanadium, as concentrates valued, in 1933, at 44,312*l.*; in 1932, at 52,200*l.* Tin, as concentrates, valued, in 1933, at 28,800*l.*; in 1932, at 10,000*l.*

Commerce.—Imports and exports for 6 years:—

1929	3,081,848	3,595,313	1932	884,132	1,150,420
1930	2,120,282	2,617,127	1933	1,048,554	1,445,728

Imports from overseas, 1933, 240,826*l.*; Union of South Africa, 771,871*l.* Exports overseas, 754,312*l.*; Union of S. A., 646,031*l.*

The bulk of the direct imports into the country is landed at Walvis Bay, which is now administered as a portion of South-West Africa, and the Government proposes to develop this port as the main harbour.

Communications.—The railway line between De Aar Junction and Prieska has been extended through Upington across the Orange River and joined up with the line from Kalkfontein to Windhoek and Walvis Bay.

The total length of the line inside South-West Africa is 1,128 miles of 3ft. 6in. gauge, and 353 miles of 2ft. gauge. There are also 98 miles of private line, most of which have been constructed for the service of the diamond fields south of Luderitz.

At the 31st March, 1934, there were 101 Post Offices and 382 Private Bag Services distributed by rail or road transport. The number of articles posted was 2,837,348 and 4,533,552 were received.

On 31st March, 1934, there were 5,012 miles of trunk lines, 533 miles of telegraphs, 2,272 miles of super-imposed telegraphs and telephones, 467 miles of rural telephones and 1,740 miles of farm telephone lines; 79 telegraph offices, 36 telephone exchanges, and 1,248 telephone subscribers.

A Post Office Savings Bank was established in 1916. The number of accounts open at 31st March, 1934, was 7,086, with a credit of 197,853*l.* Savings certificates of a value of 50*l.* are also issued. The balance due to holders as at March 31, 1934, amounted to 38,500*l.*

At Walvis Bay there is a 3½ kw. Coastal Wireless Station for long-wave and a 1 kw. set for short-wave working.

BRITISH CAMEROONS.

The Cameroons, lying between British Nigeria and the French Congo, marches with the eastern boundary of Nigeria north-eastwards from the coast to Lake Chad. It was captured from the Germans in February, 1916, and was divided between the British and French under a Declaration signed at London July 10, 1919. The British portion is a strip stretching the whole length, save for one short break, of the Nigerian boundary. Area 34,559 square miles and population estimated at 781,115. Bantu negroes live near the coast, Sudan negroes inland. The country is administered under a mandate conferred on July 20, 1922, containing provisions directed against slavery, forced labour (except for essential public services) and abuses of the traffic in arms and spirituous liquors. The northern part is attached to the Provinces of Bornu, Benue and Adamawa in Nigeria, and the southern part, known as the Cameroons Province, to the Southern Provinces of Nigeria. There are 6 Government schools in the Cameroons Province and a number of schools controlled by Native Administrations and Missions. There is also an Elementary Teachers' training centre.

There are graduated direct taxes for natives and Europeans. The revenue and expenditure are incorporated in the accounts for Nigeria. Government revenue for 1932–33, 81,042*l.*; expenditure, 129,829*l.*

The soil in the coast region is fertile, and this area is heavily forested. Near the coast are a number of plantations controlled by European firms. Their chief products are palm oil, palm kernels, cocoa, rubber and bananas.

Imports into the British Cameroons in 1933, 117,092*l.*; exports, 168,037*l.* Chief exports: bananas (dried and fresh), 17,322 tons.; palm kernels, 1,617 tons; palm oil, 1,837 tons; cocoa, 72,160 cwts.; and rubber, 367,360 lbs. Chief imports: textiles, salt, iron wares, kerosene, fish, rice, tobacco, cigarettes and motor spirit. In 1933, 112 vessels, having a total tonnage of 225,665, entered and cleared the port of Victoria, and 89 vessels (61,256 tons) entered the port of Tiko.

The currency is British, similar to that in use in Nigeria.

Administrator of British Zone.—The Governor of Nigeria.

TOGOLAND.

Togoland, between the Gold Coast Colony on the west and French Dahomey on the east, was surrendered unconditionally by the Germans to British and French forces in August, 1914. On September 30th, 1920, the country was divided between France and Britain in accordance with the Franco-British declaration of July 10th, 1919. The boundary between the two spheres extends from the north-west corner in a general direction south-east and south, terminating not far from the port of Lome, but so that no part of the British sphere reaches the coast. (See map in the YEAR BOOK for 1920.) The area allotted to Great Britain is 13,041 square miles, and for administrative purposes it is attached to adjacent provinces of the Gold Coast Colony and Northern Territories. The population, according to the 1931 census, is 293,671 (excluding 43 non-Africans).

For purposes of education Togoland under British mandate is considered as part of the Gold Coast.

In the British mandated area the Ewe Mission has 67 schools with 3,160 pupils, average daily attendance 3,008, the Roman Catholic Mission has 25 schools with 1,644 pupils, average daily attendance 1,402, and the First Century Gospel Mission has 2 schools with 135 pupils, average daily attendance 124.

The revenue and expenditure of the area are now included in the figures for the Gold Coast. Expenditure still greatly exceeds revenue.

Separate figures for imports and exports are no longer available, being included in the general total for the Gold Coast.

The principal imports are cotton goods, salt, and tobacco. Principal exports are palm oil, palm kernels, cocoa, kola nuts, and raw cotton.

Administrator of British Area.—The Governor of the Gold Coast.

BERMUDA.

A Colony, with representative government, consisting of a group of 360 small islands (about 20 inhabited), 580 miles east of North Carolina and

677 miles from New York, noted for its climate and scenery; favourite winter resort for Americans, who number some 30,000 annually.

The Spaniards visited the islands in 1515, but they had previously been discovered (the exact date is unknown) by Juan de Bermudez, after whom they were named. No settlement was made, and they were uninhabited until a party of colonists under Sir George Somers was wrecked there in 1609. A company was formed for the 'Plantation of the Somers' Islands, as they were called at first, and in 1684 the Crown took over the Government.

Governor.—Lieut.-General Sir T. *Astley-Cubitt*, K.C.B., C.M.G., D.S.O., appointed 1931 (3,000*l.* salary, 1,000*l.* entertainment, 200*l.* duty pay), assisted by an Executive Council of 7 members (four official) appointed by the Crown, a Legislative Council of 9 members (three official), also appointed by the Crown, and an elected House of Assembly of 36 members; 2,608 electors.

Area, 19·3 square miles (12,360 acres, 1,400 under cultivation). Civil population, estimated 1933, 29,116 (11,684 white). In 1933 the birth-rate was 30·05 and the death-rate 12·0 per 1,000; there were 201 marriages. In 1930 there was an excess of immigration over emigration of 453. Chief town, Hamilton; population 3,259. Bermuda is an important naval base on the America and West Indies Station, with dockyard, victualling establishment, &c. Police force, 1933, 84.

Education is compulsory between the ages of 7 and 13, and Government assistance is given by the payment of grants, and, where necessary, school fees, but there are no Government schools. In 1933, 30 aided schools, with 4,212 pupils, received in Government grants 17,374*l.* There is 1 garrison school and 1 naval school; about 19 other primary schools receiving no Government grant.

Imports (excluding Government stores) from United Kingdom in 1933, 506,383*l.*; Canada and British West Indies, 317,111*l.*; other countries, 573,572*l.*

Food supplies are mostly imported from the United States and Canada, and nearly all the export produce of Bermuda goes to Canada. The principal imports in 1933 were: fancy goods, 87,031*l.*; woollen clothing,

57,603*l.*; hardware, 47,057*l.*; cotton clothing, 44,830*l.*; beef (fresh) 40,563*l.*; electrical, 39,425*l.*; whisky, 36,852*l.*; lumber, 36,004*l.*; furniture, 32,098*l.*; perfumery, 27,875*l.*; fuel oil, 27,571*l.*; boots and shoes, 27,343*l.*; oats, 24,580*l.*; cigarettes, 24,531*l.*; stationery, 22,664*l.*; patent medicines, 22,172*l.* The principal exports in 1933 were: lily bulbs, 4,910*l.*; potatoes, 24,636*l.*; other vegetables, 23,191*l.*

The registered shipping consisted (1933) of 15 steam vessels of 40,787 tons net, 19 sailing vessels of 3,118 tons net, and 15 motor vessels of 170 tons net; total net tonnage, 44,075. In 1933 the total tonnage of vessels entered and cleared was 6,638,061 tons, of which 4,957,946 were British.

There are 220 miles of telephone wire under the control of the military, and 15 of telegraph cable. There is also a private telephone company, with over 1,600 miles of wire. Cables connect the islands with Halifax, Nova Scotia, Turks Island, and Jamaica. There were (1933) 18 post offices in the colony; the number of letters and post cards dealt with in the year 1933 was 4,467,984; newspapers, book packets and circulars, 1,185,744; parcels, 62,626. The post office revenue was 25,533*l.*, and expenditure, 17,110*l.* Savings bank deposits on December 31, 1933, were 90,503*l.* to the credit of 5,847 depositors.

There are two banks in the Island, the Bank of Bermuda, Ltd., and the Bank of N. T. Butterfield and Son, Ltd., both local. Bills of exchange issued by the Treasury Chest Office in the Colony form the basis of exchange with the outside world.

The currency, weights, and measures are British. The British 1*l.* and 10*s.* notes are legal tender. The Bermuda Government is also authorised to issue 1*l.* and 10*s.* notes up to an amount not exceeding 175,000*l.* A considerable quantity of American paper is also in circulation, being largely used for remittances to the United States.

CANADA.

(DOMINION OF CANADA.)

Constitution and Government.

The territories which now constitute the Dominion of Canada came under British power at various times by settlement, conquest, or cession. Nova Scotia was temporarily occupied in 1628 by settlement at Port Royal, was ceded back to France in 1632, and was finally ceded by France in 1713, by the Treaty of Utrecht; the Hudson's Bay Company's charter, conferring rights over all the territory draining into Hudson Bay, was granted in 1670; Canada, with all its dependencies, including New Brunswick and Prince Edward Island, was formally ceded to Great Britain by France in 1763; Vancouver Island was acknowledged to be British by the Oregon Boundary Treaty of 1846, and British Columbia was established as a separate colony in 1858. As originally constituted, the Dominion was composed of the provinces of

Canada—Upper and Lower Canada, now Ontario and Quebec—Nova Scotia, and New Brunswick. They were united under the provisions of an Act of the Imperial Parliament known as 'The British North America Act, 1867, which came into operation on July 1, 1867, by royal proclamation. The Act provides that the Constitution of the Dominion shall be 'similar in principle to that of the United Kingdom'; that the executive authority shall be vested in the Sovereign of Great Britain and Ireland, and carried on in his name by a Governor-General and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses, called the 'Senate' and the 'House of Commons.' The present position of Canada in the British Commonwealth of Nations was defined at the Imperial Conference of 1926: 'The self-governing Dominions are autonomous Communities within the British Empire, equal in status, though united by a common allegiance to the Crown.' The Dominion has its own representatives in the United States, Great Britain, France and Japan, and was elected a member of the Council of the League of Nations in 1927. Provision was made in the British North America Act for the admission of British Columbia, Prince Edward Island, the North-West Territories, and Newfoundland into the Dominion; Newfoundland alone has not availed itself of such provision. In 1869 Rupert's Land, or the North-West Territories, were purchased from the Hudson's Bay Company; the province of Manitoba was erected from this territory, and admitted into the confederation on July 15, 1870. On July 20, 1871, the province of British Columbia was admitted, and Prince Edward Island on July 1, 1873. The provinces of Alberta and Saskatchewan were formed from the provisional districts of Alberta, Athabaska, Assiniboia, and Saskatchewan, and admitted on September 1, 1905.

In February, 1931, the Government of Norway formally recognised the Canadian title to the Sverdrup group of Arctic islands. Canada thus holds sovereignty in the whole Arctic sector north of the Canadian mainland.

On June 30, 1931, the House of Commons approved the enactment of the proposed Statute of Westminster emancipating the Provinces as well as the Dominion from the operation of the Colonial Laws Validity Act, and thus removing what legal limitations existed as regards Canada's legislative autonomy. The Statute received the Royal Assent on December 12, 1931.

The members of the Senate are nominated for life, by summons of the Governor-General under the Great Seal of Canada. By the Amendment of the British North America Act, 1867 (May, 1915), which came into effect in 1917, the Senate consists of 96 senators—namely, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Prince Edward Island, 6 from Manitoba, 6 from British Columbia, 6 from Alberta, and 6 from Saskatchewan. The total number may not exceed 104. Each senator must be at least 30 years of age, a born or naturalised British subject, and must reside in, and be possessed of property, real or personal, to the value of 4,000 dollars within the province for which he is appointed. The House of Commons is elected by the people, for five years, unless sooner dissolved, the province of Quebec always having 65 members (one for each 44,186 persons at the 1931 census, but one for each 36,283 persons on the basis of the 1921 population upon which the representation of the present Parliament is based), and the other provinces proportionally, according to their populations at each decennial census. The seventeenth Parliament, elected on July 28, 1930, comprised 245 members, in accordance with the Representation Act of 1924 which, as the result of the census of 1921, fixed the representation as follows: 82 for Ontario, 65 for Quebec, 14 for Nova Scotia, 11 for New Brunswick, 17 for Manitoba, 14 for British Columbia, 4 for Prince Edward Island, 21 for Saskatchewan, 16 for

Alberta, and 1 for the Yukon Territory. Voting is by ballot. Women have the vote and are eligible for election to the Dominion Parliament.

State of the Parties in the seventeenth Parliament, as elected on July 28, 1930: Conservatives, 138; Liberals, 87; Liberal-Progressives, 3; United Farmers of Alberta, 10; Progressives, 2; Labour, 3; and Independent, 2.

The Speaker in the House of Commons has a salary of 6,000 dollars per annum, the Deputy Speaker an allowance of 1,500 dollars, and each member an allowance of 4,000 dollars for the session, subject to deductions for non-attendance and a deduction of 10 per cent. for the sessions occurring in the fiscal years ending from 1933 to 1935.

The Speaker and members of the Senate have the same sessional indemnity as the Speaker and members of the House of Commons, with no extra allowances.

Governor-General.—Mr. John *Buchan*. Appointed March 27, 1935. Salary, 10,000*l.* per annum.

He is assisted in his functions, under the provisions of the Act of 1867, by a Privy Council composed of Cabinet Ministers and other persons.

The following is the list of the Cabinet, which was sworn in on August 7, 1930, in order of precedence, which in Canada attaches generally rather to the person than to the office:

Prime Minister, President of the Privy Council, Secretary of State for External Affairs.—Rt. Hon. R. B. *Bennett*, KC., M.P.

Ministers without Portfolio.—Rt. Hon. Sir George H. *Perley*, G.C.M.G., M.P., Rt. Hon. Arthur *Meighen* (Senator).

French Minister in Canada.—M. Raymond Brugère (appointed 1934).

Canadian Minister in Japan.—Hon. H. M. Marler (appointed 1929), Tokyo, Japan.

Japanese Minister in Canada.—Mr. Iyemasa Tokugawa (appointed 1929).

Provincial Government.

The nine provinces have each a separate parliament and administration, with a Lieutenant-Governor appointed by the Governor-General in Council at the head of the executive. They have full powers to regulate their own local affairs and dispose of their revenues, provided only they do not interfere with the action and policy of the central administration. Among the subjects assigned exclusively to the provincial legislatures are: the amendment of the provincial constitution, except as regards the office of the Lieutenant-Governor; direct taxation for revenue purposes; borrowing; management and sale of crown lands; provincial hospitals, reformatories, &c.; shop, saloon, tavern, auctioneer, and other licences for local or provincial purposes; local works and undertakings, except lines of ships, railways, canals, telegraphs, &c., extending beyond the province or connecting with other provinces, and excepting also such works as the Dominion Parliament declares are for the general good; marriages; administration of justice within the province; education. Quebec has two Chambers and the other Provinces one Chamber. The North-West Territories and the Yukon Territory are governed by Commissioners assisted by Councils.

Area and Population.

The following is the population of the area now included in the Dominion:—

Year	Population	Year	Population

Education.

By the British North America Act the Provincial Governments have control in educational matters. In all provinces except Quebec the number of private schools is small, so that elementary and secondary education in Canada is almost entirely State-controlled. In Quebec primary education is only partly State-controlled. Roman Catholic secondary education is given by independent institutions, mainly consisting of State subsidised classical colleges for boys and convents for girls. Except for a few independent schools, Protestant education, primary and secondary, is State-controlled. Primary schools—*i. e.* elementary schools, and in all provinces, except Ontario, continuation schools other than regular secondary schools—are free, and the same is true of secondary education in most provinces. In Quebec (except in certain municipalities) a fee is collected for primary education for every child of school age without reference to school attendance. In the same province Catholic and Protestant schools are under one Department of Public Instruction and are supported by a common system of taxation, but are administered independently. In Alberta, Ontario, and Saskatchewan minority elementary schools, whether Protestant or Catholic, are called Separate Schools, and are under the same provincial administration as majority schools. Secondary education in these three provinces is non-sectarian.

There are 6 State-controlled universities in Canada, and 17 independent of provincial control. These, together with colleges of higher education, had an enrolment of 85,133 students in 1933, and employed 5,775 professors, lecturers, &c.

[1] Where possible the number of school-houses is given, and elsewhere the number of school districts with schools in operation.

The census of 1931 showed that 95·7 per cent. of the population in Canada over 10 years of age could read and write, as compared with 94·3 per cent. in 1921. These percentages would be higher if the aboriginal Indian population, numbering 122,911 in 1931, and of whom about 110,000 live on the Indian Reserves, were excluded. The Dominion Government provides a special school system for the Indian youth, of whom 17,425 were enrolled in its schools in 1933.

In 1934 there were in Canada 1,686 periodical publications, classified as follows: Dailies, 112; tri-weeklies, 6; weeklies, 970; semi-weeklies, 19; monthlies, 429; semi-monthlies, 51; miscellaneous, 99.

Justice and Crime.

There is a Supreme Court in Ottawa, having appellate, civil and criminal jurisdiction in and throughout Canada. There is an exchequer court, which is also a court of admiralty. There is a Superior Court in each province; county courts, with limited jurisdiction, in most of the provinces; all the judges in these courts being appointed by the Governor-General. Police magistrates and justices of the peace are appointed by the Provincial Governments.

For the year ended September 30, 1933, total convictions for indictable offences were 32,942; total convictions for all offences amounted to 325,615.

Defence.

'The National Defence Act, 1922,' which came into force January 1, 1923, provides for a Department of National Defence presided over by the Minister of National Defence.

Militia.—Canada is organised in 11 military districts, each under a Commander and his District Staff.

The militia of Canada is classified as active and reserve, and the active is sub-divided into permanent and non-permanent forces. The permanent force consists of 14 units of all arms of the service, with an authorised establishment limited to 10,000, but at present the strength is about 3,600. The non-permanent active militia is made up of cavalry, artillery, engineers, machine gun, signalling, infantry and other corps. The establishment of the Canadian non-permanent militia totals 9,061 officers and 125,782 other ranks, organised as follows:—

[1] Anti-Aircraft Sections.

The strength of the Royal Canadian Air Force in 1934 was 106 officers and 586 men of the permanent, and 20 officers and 8 men of the non-permanent forces. The number of aircraft was 189.

The reserve militia consists of such units as are named by the Governor in Council and of all able-bodied citizens between the ages of 18 and 60, with certain exemptions.

The reserve of the active militia consists of (1) reserve units of city and rural corps, (2) reserve depôts, (3) reserve of officers.

The above organisations are supplemented by numerous cadet corps and rifle associations. The Royal Military College at Kingston, Ontario, provides both a military and a general education for about 200 cadets. The course extends over four years. Each year there are available for graduates a number of commissions in the Canadian Permanent Force and the Royal Canadian Air Force, also in the British Army and the Royal Air Force. R.M.C. graduates are given one year's seniority in the British or Indian armies because their course is longer than that given at Woolwich or Sandhurst.

The estimated expenditure for the militia for the year ending March 31, 1935, is 8,712,864 dollars.

Navy.—The Royal Canadian Navy was established in 1910. Its authorized complements are: 104 officers and 792 men of the permanent force (Royal

Canadian Navy), 70 officers and 430 men of the Royal Canadian Naval Reserve; and 70 officers and 930 men of the Royal Canadian Naval Volunteer Reserve. The vessels at present maintained in commission are the destroyers *Champlain* and *Saguenay* and the mine-sweepers *Festubert* and *Ypres* (paid off), based on Halifax, N.S.: the destroyers *Vancouver* and *Skeena* and mine-sweeper *Armentières*, based on Esquimalt, B.C. There are several small craft, some armed, used for fisheries protection and patrol duty on the eastern and western coasts and on the Great Lakes, but these are attached to the Department of Marine and Fisheries or to the Customs Department, and do not normally form part of the naval forces. H.M.C. dockyards are at Halifax and Esquimalt, having been taken over from the Imperial Government in 1910. Naval depots are maintained at both bases, and are used as training headquarters for the personnel of the R.C.N., R.C.N.R., and R.C.N.V.R.

The estimated expenditure for the year ending March 31, 1935, is 2,222,000 dollars.

Aeronautics.—The direction and control of aeronautics in Canada, both civil and military, come under the jurisdiction of the Department of National Defence. The powers, duties and functions involved are exercised under the direction of the Minister by the Royal Canadian Air Force and the Branch of the Controller of Civil Aviation.

The present strength of the Royal Canadian Air Force is 103 officers and 591 airmen. Its functions are: (*a*) to form the nucleus of the Air Defences of Canada; (*b*) the training of the Non-Permanent Active Air Force; and (*c*) the conduct of Civil Government Air Operations.

The Permanent Active Air Force has its headquarters at Ottawa with five stations at Ottawa, Camp Borden, Trenton, Winnipeg and Vancouver.

The Non-Permanent Active Air Force is in process of organization, four units and formations being authorized.

The Controller of Civil Aviation is responsible for the administration of the Air Regulations and Airways, and the supervision of flying clubs. On Dec. 31, 1933, there were in force 796 private and commercial pilot's licences, and 346 air engineer's licences and 345 private and commercial aircraft were registered. 90 air harbours were licensed and 23 light aeroplane clubs established.

Royal Canadian Mounted Police.—The Royal Canadian Mounted Police is a Constabulary maintained by the Dominion Government. It was organized in 1873, and was then known as the North West Mounted Police; in 1904, its name was changed to the Royal North-West Mounted Police, and in 1920, to the Royal Canadian Mounted Police. From a Force of 300 men in 1873, it has grown to one of 2,500 at the present time. The Force is controlled and administered by a Minister of the Crown (at present the Minister of Justice), and it may be employed anywhere in Canada. It is primarily responsible for the maintenance of law and order in the Yukon Territory, the Arctic regions, the unorganized North-West Territories, and a variety of services for the Federal Government in all Provinces of the Dominion, and a large number of the Federal Departments utilize its services in investigations and in administrative work. Under the Royal Canadian Mounted Police Act, any Province may enter into an agreement with the Federal Government for the services of the Royal Canadian Mounted Police to enforce Provincial Laws upon payment for its services, and at the present time such agreements are in force with the Provinces of Prince Edward Island, Nova Scotia, New Brunswick, Manitoba, Saskatchewan and Alberta.

The Force is divided into 15 divisions of varying strength distributed over the entire country. The term of engagement is 5 years for recruits with re-enlistment for 1 year or 3 years. The officers are commissioned by the Crown. Recruits are trained at Regina, Saskatchewan. The course of training is six months, and consists of drill, both mounted and on foot, physical training, including instruction in wrestling and boxing and detailed lectures on police duties. Instructional courses for promotion are held, and where practical, an annual Refresher Course of training is given.

Production and Industry.

Agriculture.—Though the manufacturing industries now predominate, Canada is largely agricultural, and among her natural resources arable lands stand unrivalled. Present information permits only a rough estimate of their actual extent, but it is believed that about 361 million acres are physically suitable for agriculture. Of this area 85 million acres is now under forest, and 186 million acres, or about one-half, has been alienated. Grain growing, dairy farming, fruit farming, ranching and fur farming are all carried on successfully. The following table shows the estimated agricultural wealth and production for 1933:—

	Values in dollars		Production in dollars
Land	2,032,769,000	Field crops	422,148,000
Buildings	1,342,924,000	Farm Animals	89,063,000
Implements and Machinery	650,604,000	Dairy Products	167,488,000

Production of the year	760,784,000		
Total	5,230,994,000	Total	762,302,000

Number of occupied farms, according to the census of 1931, was 728,623.

Field Crops.—In 1933, 58,533,450 acres were under field crops, those most widely cultivated being wheat, oats, hay and clover, barley and rye. The following are the revised estimates of January, 1934, for acreage and yield of grain crops for the year 1933:—

Provinces	Wheat		Oats		Barley

Total Canada	25,991,100	269,729	13,528,900	307,478	3,658,000	63,359

The total value of field crops for 1933 was estimated at 422,148,000 dollars and for 1932, 452,526,900 dollars.

The yield (in bushels) in 1934 of wheat is 275,850,000, of oats, 321,120,000, of barley, 68,740,000, and of rye, 5,420,000.

The following tables show the acreage and yield of field crops, by Provinces, in 1933 :—

Total, 1934:—Horses, 2,933,000; cattle, 8,952,000; sheep, 3,421,000; pigs, 3,654,000; poultry, 59,799,000.

Dairying.—The dairying industry of the Dominion is carried on most extensively in Ontario and Quebec, although there are dairy factories in all of the provinces. The total number of creameries in Canada in 1933 was 1,236; of cheese factories, 1,126; of combined butter and cheese factories, 331; of condenseries, 23; and the total value of all products of dairy factories, 86,655,743 dollars. Creamery butter produced in 1933 was 218,532,307 lb. and factory cheese, 111,044,628 lb.

Fruit Farming.—The value of fruit production by provinces in 1933 was (in dollars): British Columbia, 5,501,000; Ontario, 5,354,500; Nova Scotia, 3,776,000; Quebec, 1,420,700; and New Brunswick, 171,800; total, 16,224,000 dollars. The production of apples in 1933 was (in barrels): Nova Scotia, 2,438,000; Ontario, 1,068,700; British Columbia, 1,371,900; Quebec, 306,500; New Brunswick, 44,000; total, 5,329,800 (total 1932, 3,737,960 barrels).

Miscellaneous.—The wool-clip of Canada for 1933 was estimated at 19,206,000 lbs., valued at 2,000,000 dollars. The production in 1933 of tobacco, which is practically confined to Ontario and Quebec, was estimated at 39,400,500 lbs. from 45,953 acres. The total production of farm eggs (for 1933), 210,585,000 dozens, valued at 26,345,000 dollars, and the 1934 value of maple products 3,046,650 dollars.

Forestry.—The total area of land covered by forests is officially estimated at 1,153,000 square miles. Of this 791,670 square miles are productive and accessible. About a third of this area bears timber of merchantable size.

The Crown forests in the provinces belong to the Provincial Governments, those of Manitoba, Alberta, Saskatchewan and the Railway Belt and Peace River Block of British Columbia having been transferred in 1930 to the provinces concerned by the Dominion Government.

Fisheries.—In the calendar year 1933 the capital invested in vessels, gear, canneries, &c. (including working capital and stocks on hand) was 40,907,470 dollars. The total value of the produce of the fisheries of Canada in 1933 was 27,558,053 dollars. The principal kinds of fish marketed in 1933 were: (in dollars) salmon, 9,758 316; lobsters, 3,524,355; cod, 2,598,756; herring, 1,808,970; halibut, 1,694,405; whitefish, 1,136,400; haddock, 832,029;

sardines, 623,976; pickerel or doré, 623,343; trout, 524,968; smelts, 495,632; and mackerel, 396,306. The exports in the calendar year 1933 were valued in dollars at 20,223,610 (canned salmon, 5,270,092; canned lobsters, 2,450,863; dried codfish, 1,801,666; fresh lobsters, 1,605,931; fresh and frozen salmon, 1,148,520). The number of persons employed in 1933 was 79,328, including fishermen and those employed in canning and curing establishments. The number of factories and canneries in operation in 1933 was 618.

Mining.—Nova Scotia, British Columbia, Quebec, N. and W. Ontario, Alberta, and Yukon Territory are the chief mining districts. The total value of the mineral produce in 1933 was 221,482,743 dollars. The principal metals and minerals produced in 1933 were as follows:—

[1] Gold is valued at 20·671834 dollars per fine oz. The metals copper, lead, and silver are, for statistical and comparative purposes, valued at the final average value of the refined metal. Pig-iron is valued at the furnace. Non-metallic products are valued at the mine or point of shipment, and structural material and clay products at the point of shipment. Production 1934, 2,965,000 oz., valued at 102,250,000 dollars.

[2] Includes estimated exchange equalisation on gold produced of 23,382,611 dollars.

Production of pig-iron in 1933 was 227,317 tons, and steel, 409,979.

The Fur Trade.—In 1932–33 (year ended June 30), 4,503,558 pelts, valued at 10,305,154 dollars, were taken. Exports in 1932–33 were valued at 11,180,052 dollars, imports at 2,482,170 dollars. Exports to the United States amounted to 2,684,231 dollars; to the United Kingdom, 7,122,874 dollars. Fur auctions are now held on a large scale at Montreal and Winnipeg. The more important animals raised on fur farms are fox, muskrat, beaver, mink, racoon, marten, and fisher. The value of animals and pelts sold from the farms during the year 1932 was 3,289,820 dollars. There were in 1932, 5,221 fox farms and 1,075 other fur farms in Canada.

Water Power.—Canada is richly endowed with water power resources; on January 1, 1934, the available horse-power at ordinary six months' flow was 33,617,200; on January 1, 1934, turbine installation amounted to 7,332,070 horse-power. The Central Electric Station industry, of which about 95 p.c. of the total main plant is hydro equipment which generates 99 p.c. of the total electrical output, ranked second among the industries of Canada with a gross production of power valued at 121,212,679 dollars in 1932. The

number of power plants was then 572 and the capital invested 1,335,886,987 dollars.

Commerce.

The customs tariff of Canada is protective, but there is a preferential tariff in favour of the United Kingdom and of the Dominions, and of a number of the Crown Colonies. At the Imperial Economic Conference of 1932, held in Ottawa, the United Kingdom developed further the policy of preferential tariffs to the Dominions and on the part of the latter there was a general lowering of the existing tariffs against certain lines of United Kingdom manufactures. The Conference provided an opportunity for the revision of the trade agreements recently made with Australia and New Zealand, as well as the conclusion of one with the Union of South Africa.

Total	64,875	41,975,393	64,688	41,100,788

During the fiscal year 1933, the vessels entered and cleared at Canadian ports on inland waters between Canada and the United States were: Canadian, 14,861 of 15,277,169 tons; United States, 48,647 of 11,228,484 tons.

During the fiscal year 1933, 159 vessels, with a tonnage of 9,156 tons, were built in Canadian shipyards.

Internal Communications.

Canada has a system of canal, river, and lake navigation over 2,700 miles in length, and vessels from the lake ports may reach the Atlantic without breaking bulk. Up to March 31, 1933, 248,134,778 dollars had been spent on canals for construction and enlargement alone (capital expenditure). The heavy expenditures in recent years have been due to the construction of the Welland Ship Canal on which 129,102,250 dollars had been spent to March 31, 1933. The canal was opened on April 20, 1931. In 1933, 23,564 vessels, of 18,270,898 tons, passed through the Canadian canals, carrying 18,780,489 tons of freight, chiefly grain, lumber, iron ore and coal.

On January 11, 1909, a treaty was signed at Washington between the United Kingdom and the United States relating to the use of the boundary waters between Canada and the United States. The treaty provides for the establishment and maintenance of an international joint commission, consisting of three representatives appointed by the King on the recommendation of the Dominion, and three appointed by the President of the United States. This commission, subject to the conditions of the treaty, has jurisdiction in all cases involving the use or obstruction or diversion of the boundary waters. Precedence is given by the treaty to uses of the waters in the following order, viz., (1) for domestic and sanitary purposes, (2) for navigation, (3) for power and irrigation.

A treaty was consummated between the Canadian and United States Governments in July, 1932, directed towards the development of the St. Lawrence Seaway. According to the agreement, Canada is to be credited with her expenditures on the Welland Ship canal. The treaty failed to be ratified by the United States Senate.

The total single track mileage of steam railways in Canada on December 31, 1933, was 42,364. The total mileage, including second track, yard track and sidings was 56,736.

The lines built or acquired by the Canadian Government are now consolidated in one system, known as the Canadian National Railways, covering about one-half of the single track mileage, including two transcontinental lines with termini in Canada at Saint John, Halifax, Vancouver and Prince Rupert, and the Grand Trunk with termini at Portland, Maine, U.S.A., and Chicago.

The mileage in private ownership is mainly that of the Canadian Pacific Railway, 16,640 in 1933. The main line of this road from Vancouver, B.C., to Saint John, New Brunswick, is 3,367 miles.

Statistics of the Canadian steam railways for 1933: passengers, 19·2 millions; freight, 57·4 million short tons; gross receipts, 270,278,276 dollars; net receipts, 37,145,169 dollars.

Electric railways in 1933, 41, mileage 1,864; passengers during the year, 585,385,094; tons of freight carried, 1,547,202. The gross earnings in 1933 reached an aggregate of 39,383,965 dollars. Operating expenses amounted to 27,917,265 dollars. Paid-up capital, 200,098,870 dollars.

On March 31, 1933, there were 12,074 post offices. Net revenue, 30,825,156 dollars; expenditure, 30,167,827 dollars. At the end of the

calendar year 1933 there were 4,329 rural mail delivery routes, on which were erected 236,380 boxes.

Money order offices on March 31, 1933, 6,467; orders issued, 12,659,379, value 107,767,394 dollars. The Ocean Mail subsidies and steamship subventions paid by the Government amounted to 2,081,818 dollars in the fiscal year 1933.

There were 52,112 miles (8,844 being Government) of telegraph lines in Canada in 1933, and 365,489 miles of wire (including 11,052 miles of Government lines), with 4,115 offices; 5,089,261 miles of telephone wire on December 31, 1932, and 1,261,245 telephones (12·00 per 100 population).

Wireless Communication.—On March 31, 1933, there were 1,567 coast and land wireless stations, 273 ship wireless stations, 77 broadcasting stations, and 761,288 private receiving stations for the reception of broadcast programmes.

The ship and shore wireless traffic for the twelve months ended March 31, 1933, amounted to 299,469 messages and 6,693,256 words.

Wireless 'beam' stations are operated at Montreal for direct communication with Great Britain and Australia, and a station at Louisburg, N.S., provides a long distance service to ships.

Money and Credit.

The Bank Acts of Canada impose stringent conditions as to capital, notes in circulation, limit of dividend, returns to the Dominion Government, and other points, on all chartered banks. On December 31, 1933, there were 10 incorporated banks making returns to the Government, with 3,791 branches, including sub-agencies. The following are some particulars (in dollars) of the banks for 1933, the figures being averages of the twelve monthly returns: capital paid up, 144,500,000 dollars; bank notes in circulation, 130,362,488 dollars; total on deposit, 2,236,841,539 dollars; liabilities to the public, 2,517,934,260 dollars; assets, 2,831,393,641 dollars; percentage of liabilities to assets, 88·93.

In addition to the capital there was in 1933 the sum of 157,250,000 dollars of rest or reserve funds belonging to the banks.

Bank debits in the clearing house centres of Canada for 1933 amounted to 29,981,465,494 dollars, against 25,844,288,293 dollars in 1932. Of the transactions of 1933, Toronto had 34 per cent.; Montreal, nearly 27 per cent.; Winnipeg 16 per cent.; Ottawa about 5 per cent.; and Vancouver 4·2 per cent.

Government post-office savings-banks have been in operation in Canada since 1868. The post-office savings-banks had on March 31, 1934, deposits amounting to 23,158,919 dollars.

The deposits in special savings-banks amounted on June 30, 1934, to 65,969,041 dollars.

On February 22, 1934, legislation was introduced to set up a Central Bank in Canada, to which all note issue is ultimately to be transferred. The Bank is to have a capital of 5,000,000 dollars, and is required to maintain a reserve of gold coin and bullion equal to not less than 25 per cent. of its note and deposit liabilities. The chartered banks are required to transfer to the Bank all gold coin and bullion owned and held by them in Canada.

Currency, Weights, and Measures.

The denominations of money in the currency of Canada are dollars,

cents and mills. The cent is one-hundredth part of a dollar, and the mill one-tenth part of a cent. Five-cent coins of both nickel and silver are in use. The standard of fineness for gold coins is nine-tenths fine, and British and United States gold coins are legal tender so far as they remain in circulation, but only at the par rate of exchange. The privilege of issuing notes is restricted to the Dominion Government and the chartered banks. The legal equivalent of the British sovereign is 4·86⅔ dollars.

The Dominion Government issues Dominion notes, which are legal tender, in denominations of $1, $2, $5 and certain other larger denominations used chiefly in clearing-house transactions between banks. They may be issued in any amount. Prior to the war, the security behind Dominion notes consisted of 25 per cent. gold for the first fifty million dollars of such notes and dollar for dollar in gold for amounts in excess of fifty million. They were redeemable in gold. The war necessitated the suspension of redemption in gold, and by special legislation the Government was given power to issue Dominion notes to the banks upon the pledge of satisfactory securities and interest at not less than 5 per cent. per annum was charged the banks. At the same time banknotes were made legal tender, and an issue of twenty-six million dollars of Dominion notes without security as formerly prescribed by law, largely to implement railway guarantees, was legalised, partly covered by railway securities. Redemption in gold was resumed on July 1, 1926. After the suspension of gold payments by Great Britain, on Sept. 21, 1931, Canadian currency declined in sympathy with the pound sterling on the gold exchanges. After October, 1931, exports of gold were allowed only under license, so that redemption rights under the Dominion Notes Act were maintained and gold was made available for meeting all obligations abroad promptly.

An amendment in 1934 to the Dominion Notes Act raised the value of Dominion notes which may be issued on a 25 per cent. gold coverage from 50,000,000 dollars to 120,000,000 dollars. Notes in excess of the latter figure are to be fully secured by gold. Silver purchased under the London agreement of July 1933 may be held as additional security. Provision is also made for repealing the Dominion Notes Act when the new Bank of Canada starts functioning, after which time all notes will be issued, except as provided by the Bank Act, under the authority of the Bank of Canada Act.

Dominion notes in circulation on July 31, 1934, amounted to 191,203,156 dollars.

The Ottawa Branch of the Royal Mint was established in pursuance of The Ottawa Mint Act, 1901, and in December, 1931, control of the Mint was passed over to the Canadian Government. The Mint issues silver, nickel and copper coins for circulation in Canada, and sovereigns and half-sovereigns coined between 1908 and 1916 are legal tender in every country under the British flag. Gold refining is one of the principal activites of the Mint.

In 1933 gold bullion to the value of 53,102,586 dollars was received for treatment, and bullion to the value of 53,532,789 dollars was issued. No gold coins have been struck since 1916. Coin issued: bronze, 120,800 dollars; nickel, 125,000 dollars; silver, 155,000 dollars. In 1935 the Royal Mint of Canada is to strike a silver dollar bearing the effigy of the King, on the occasion of His Majesty's Silver Jubilee. It will be called "The George Dollar," and at least 100,000 will be struck.

The legal weights and measures are the Imperial yard, pound avoirdupois, gallon, and bushel; but the hundredweight is declared to be 100 pounds and the ton 2,000 pounds avoirdupois, as in the United States.

CANADIAN PROVINCES.

ALBERTA.

Constitution and Government.—The Constitution of Alberta is contained in the British North America Act of 1867, and amending Acts; also in the Alberta Act of 1905, passed by the Parliament of the Dominion of Canada, creating the province. In the British North America Act, provision was made for the admission of the new provinces from time to time, including the then North-West Territories, of which the present province of Alberta formed a large portion. Upon the granting of autonomy to the North-West Territories, Alberta and Saskatchewan were erected into provinces, and all the provisions of the British North America Act, except those with respect to schools, lands, and the public domain, were made to apply to Alberta as they apply to the older provinces of Canada. On October 1, 1930, the natural resources were transferred from the Dominion to Provincial Government control. The province is represented by 6 members in the Senate and 16 in the House of Commons of Canada.

The executive is vested nominally in the Lieutenant-Governor, who is appointed by the Federal Government, but actually in the Executive Council or the Cabinet of the Legislature. Legislative power is vested in the Assembly in the name of the King.

Members of the Legislative Assembly are elected by the direct vote of the people. Woman suffrage has been established in the province.

There are 63 members in the Legislature (1930)—39 United Farmers of Alberta, 11 Liberals, 4 Labour, 6 Conservatives, and 3 Independents.

Lieutenant-Governor.—His Honour W. L. *Walsh.*

The members of the Ministry are as follows:—

Premier and Provincial Secretary.—Hon. Richard G. *Reid.*
Attorney-General.—Hon. J. F. *Lymburn.*
Minister of Agriculture.—Hon. F. S. *Grisdale.*
Minister of Public Works.—Hon. O. L. *McPherson.*
Provincial Treasurer.—Hon. J. J. *MacLellan.*
Minister of Railways, Telephones and Public Health.—Hon. Geo. *Hoadley.*
Minister of Education.—Hon. Perren E. *Baker.*
Minister of Lands and Mines and Minister of Municipal Affairs.—Hon. H. W. *Allen.*
Minister without Portfolio.—Hon. Mrs. Irene *Parlby.*

Local Government.—Municipal Districts, formerly known as Local Improvement Districts, comprise the area within the limits of nine townships, *i.e.* 18 miles square (324 square miles), or as near to this as natural features will allow. Each Municipal District is a body corporate and governed in most cases by an elected council of six members, the chairman of whom is called the Reeve. The councillors are elected by a vote of all persons who are assessed for property within the Municipal District, together with the vote of the wife, husband, son, daughter, father or mother of such assessed persons, provided these relatives reside on the land of the assessed person.

Towns operate under the Town Act, 1927, except one which carries on under special charter. Villages are erected by Order of the Minister of

Municipal Affairs, and are governed by the Village Act. The town council consists of a Mayor and six councillors elected by those whose names appear on the last revised assessment roll. These must be twenty-one years of age, and assessed for property of the value of one hundred dollars and upwards. The village council consists of three members elected annually, the Chairman being Mayor of the village.

There are seven cities in Alberta, namely: Edmonton, Calgary, Lethbridge, Wetaskiwin, Red Deer, Medicine Hat, and Drumheller. These cities operate under special charters granted by the North-West Territorial Assembly, and later confirmed by the Legislative Assembly of the Province of Alberta. The governing body consists of a Mayor and a council of from six to ten members, according to the size of the city.

Area and Population.—The area of the province is 255,285 square miles, 252,925 sq. miles being land area and 2,360 sq. miles water area. The population (Census, 1931) was 731,605; in 1921, 588,454, in 1916, 496,442; in 1906, 185,195, and in 1901, 73,022. In 1931 the rural population numbered 453,097 (54,489 in 1901), and the urban 278,508 (18,533 in 1901). There were 15,249 Indians in 1921, or 2·08 per cent. of the total population. Population of the principal cities (1931):—Calgary, 83,761; Edmonton, 79,197; (1926) Lethbridge, 13,489; Medicine Hat, 10,300; Drumheller, 2,987; Red Deer, 2,344; Wetaskiwin, 2,125.

The vital statistics for 5 years are given as follows:—

—	Births	Marriages	Deaths	Excess of Births
1929 . . .	16,924	6,004	6,239	10,685
1930 . . .	17,649	5,334	5,496	12,153
1931 . . .	17,252	5,142	5,302	11,950
1932 . . .	16,990	5,054	5,521	11,469
1933 . . .	16,091	5,389	5,365	10,726

Education.—Schools of all grades are included under the term of public school. The same boards of trustees control the schools from the kindergarten to entrance to the university. All schools are supported by taxes levied by the local board, supplemented by Government grants, which are distributed to encourage elementary, secondary, and technical education and agricultural training. In 1933 there were 3,532 school districts, which included 64 consolidated schools and 16 rural high schools, with 171,445 pupils, 64 districts were disorganized to form one amalgamated district. This now has 26 rooms. There are Normal schools at Calgary, Camrose and Edmonton for the training of teachers. The attendance during 1933 was 677. The University of Alberta, organised in 1907, had, in 1933–34, 1,775 students.

Justice and Crime.—Judicial power of the province is vested in the Supreme Court, consisting of two divisions, the appellate and trial divisions. The judges are appointed by the Dominion Government, and hold office for life unless impeached by Parliament. There are also minor Courts of Civil and Criminal Jurisdiction. The district courts have full jurisdiction over all matters up to 600 dollars. By the Small Debts Act of 1918, as amended in 1924, magistrates have jurisdiction over matters up to 100 dollars. There are also Juvenile Courts having power to try boys under 16 and girls under 18 years of age.

The system of procedure in civil and criminal cases conforms as nearly as possible to the English system.

Finance.—The revenue of the province is derived from the following sources:—(1) Dominion subsidies; (2) School lands; and (3) Provincial sources.

—	1929	1930	1931	1932	1933
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue . . .	15,265,084	15,829,865	15,710,962	13,492,430	15,426,265
Expenditure . .	13,686,261	15,402,884	18,017,543	18,645,481	17,533,786

The gross bonded debt of the province March 31, 1933, amounted to 140,560,000 dollars, including Sinking Funds, 7,399,500 dollars. The net bonded debt was 133,161,000 dollars. Of this amount 42,161,000 dollars represent assets which are self supporting, leaving net general bonded debt of 91,000,000 dollars. To this should be added the net unfunded debt of 10,565,000 dollars, making a total of 101,565,000 dollars, net general debt.

Production and Industry.—Alberta is pre-eminently an agricultural province. Within the surveyed area of the province, which comprises about 85,000,000 acres, there are approximately 70,000,000 acres which may be classed as lands capable of agricultural development. Up to the present, however, little more than one-fourth of this area has been brought under cultivation.

For particulars of agricultural production and live-stock, *see* under Canada above. The wool clip for 1933 was 3,400,000 lbs.

Grain elevators (1932–33), 1,794, with a capacity of 77,029,900 bushels.

A coal survey of Alberta by the Geological Survey of Canada places the coal area at 16,588 square miles containing 1,035,629 million tons (approx.), 80,000 million being lignite. The output in 1933 was 4,714,784 tons, valued at 12,300,242 dollars. Natural gas is found abundantly in numerous localities. In 1933, 16,789,911 cubic feet, valued at 3,505,808 dollars, were consumed. High grade gasoline is profitably extracted from the gas in Turner Valley. 1,013,040 barrels of oil were produced in the Province in 1933. Immense deposits of bituminous sand containing on an average 15 to 18 per cent. bitumen are situated in the McMurray district in northern Alberta. Value of total mineral production in 1933, 19,284,808 dollars.

Alberta has 12,393,500 acres of forest reserves.

The lakes of the province abound in whitefish, pickerel, pike and trout, but the industry is not developed to any great extent. Value of fish marketed, 1933, 156,341 dollars.

Manufacturing in the province: Flour, oatmeal, cement, and linseed oil mills, pork and beef packing houses, clay, brass and iron, glass, wood, clothing, canning, biscuit and macaroni factories, large railway repair shops and oil refineries.

Statistics of manufactures for 1932: number of industrial establishments, 943; capital, 100,609,788 dollars; number of employees, 11,174; salaries and wages, 11,886,114 dollars; cost of materials, 28,442,192 dollars; value of products, 55,293,832 dollars.

Commerce and Communications.—The principal exports of the province consist of grain, live-stock, meat and meat products, wool, fish, butter, eggs, mining and timber products.

Length of railway lines 5,742 miles in the year 1933. Alberta's modern telephone system is owned and operated by the Provincial Govern-

ment except in the town of Banff and city of Edmonton. Automatic exchanges are operated at Calgary, Edmonton, Lethbridge, and Medicine Hat and Drumheller. 210,186 miles of wire serve 288 exchanges and 285 toll stations. There are 62,635 rural and urban subscribers, and first-class long distance service is available to all points in the Province and to every other Province in the Dominion and every State in the United States as well as to Mexico, Cuba and many points in Europe.

BRITISH COLUMBIA.

Constitution and Government.—British Columbia (then known as New Caledonia) and Vancouver Island originally formed part of the Hudson's Bay Company's concession. In 1849 Vancouver Island, and in 1858 British Columbia, were constituted Crown Colonies, and in 1866 the two Colonies were united. On July 20th, 1871, British Columbia entered the Canadian Confederation, and is represented by 6 members in the Senate, and 14 in the House of Commons of Canada.

The Provincial Government is administered by a Lieutenant-Governor and Legislative Assembly of 48 members on the system of executive administration known as a 'responsible government.' The Assembly is elected for five years, every adult, male or female (British subjects), having resided six months in the Province, duly registered, being entitled to vote.

Lieutenant-Governor.—His Honour John W. *Fordham-Johnson* (1931).

The members of the Ministry (assumed office, November 15, 1933) are as follows:—

Premier, Minister of Railways and President of the Executive Council.—Hon. T. D. *Patullo.*

Attorney-General.—Hon. Gordon *Sloan*, K.C.

Minister of Agriculture.—Hon. K. C. *MacDonald.*

Minister of Education and Provincial Secretary.—Hon. G. M. *Weir.*

Minister of Public Works.—Hon. F. M. *McPherson.*

Minister of Lands and Minister of Municipal Affairs.—Hon. A. Wells *Gray.*

Minister of Finance and Minister of Industries.—Hon. John A. *Hart.*

Minister of Mines and Labour and Commissioner of Fisheries.—Hon. G. S. *Pearson.*

Acting Agent-General in London.—W. A. *McAdam*, British Columbia House, 1/3, Regent Street, S.W.1.

Area and Population.—British Columbia, Canada's Maritime Province on the Pacific Ocean, has an area of 372,630 square miles, of which 369,191

square miles are land area, and 2,439 square miles water area, but exclusive of territorial seas. It lies between latitudes 49 degrees and 60 degrees north.

The electoral districts of the Province are as follows: Kootenays, east and west, 26,346 square miles; Yale, 10,462; Lillooet, 16,100; Vancouver and Westminster, 7,066; Cariboo, 148,594; Skeena, 123,896; Vancouver Island and Comox, 20,952.

The last census (1931) places the population at 694,263; in 1921 the population was 524,582; and in 1911 it was 392,480.

Some of the principal cities and towns and their approximate populations are: Greater Victoria (the capital), population 60,000; Greater Vancouver, 300,000; New Westminster, 18,000; Nanaimo, 10,000; Prince Rupert, 8,000; Nelson, 7,000.

The movement of the population for five years was as follows:—

—	Births	Marriages	Deaths	Excess of Births
1929	10,378	5,195	6,761	3,597
1930	11,217	4,758	6,759	4,458
1931	11,466	3,747	5,935	5,531
1932	9,933	3,487	5,676	4,257
1933	9,294	4,517	5,705	3,589

Education.—A complete system of free and non-sectarian education was established by Act in 1872. Attendance is compulsory from the age of seven to fifteen. The central control is vested in the Council of Public Instruction, composed of the members of the Executive Council.

There were 94 high schools, with 18,552 enrolled pupils and 656 teachers and 60 special instructors; and 15 junior high schools with 6,671 pupils, 234 teachers and 47 special instructors in 1932. The number of elementary schools was 1,054, with 2,985 teachers, 76 special instructors and 90,920 pupils. There were 34 superior schools with 673 pupils and 34 teachers. The Provincial University was founded by Act in 1908. It began operations as a teaching institution in 1915, and in 1932-33 there were 1,739 students, with 240 more at Victoria College. There are 2 normal schools, with 383 students in attendance in 1932-33.

In addition, 4,600 students took advantage of the winter programme of evening continuation classes, and 1,525 students studied under the system of high school and elementary correspondence courses designed for those unable to obtain instruction in the public schools.

Finance.—Revenue and expenditure:—

	Revenue Dollars	Expenditure Dollars		Revenue Dollars	Expenditure Dollars
1930-31	24,280,703	29,099,964	1933-34[1]	20,497,591	22,729,593

[1] Estimate.

On March 31, 1933, the gross funded debt totalled 145,611,561 dollars; Outstanding Treasury Bills 11,001,189 dollars; sinking funds 30,017,720 dollars.

Production and Industry.—British Columbia produced in 1933, minerals to the value of 30,674,486 dollars, 1934, 41,863,000 dollars; fish,

1933, 12,000,000 dollars, 1934, 15,000,000 dollars (estimate); agricultural produce, 1933, 36,292,077 dollars, 1934, 39,000,000 dollars; and lumber, lath, shingles and pulpwood valued at 1933, 39,155,000 dollars, 1934, 45,000,000 dollars.

Particulars of the agricultural output and numbers of live-stock are given under Canada above.

The mineral output in 1933 and 1934 was as follows:—

Communications and Shipping.—The Canadian Pacific and the Canadian National lines are at present the principal railways in the Province. The C.P.R. has three main lines, the Canadian Pacific Railway, the Crow's Nest Pass Railway, the Kettle Valley Railway, and several branches connecting with United States railway systems, also steamboat connections on the inland lakes, besides a large fleet of ocean-going and coasting steamers. The Canadian National has two main lines, diverging in Yellowhead Pass, Mount Robson Park, one with ocean terminus at Prince Rupert and the other at Vancouver, besides steamship lines. The Pacific Great Eastern Ry., owned and operated by the Province, runs north and south through the heart of the country. The railway mileage in 1931 was 4,097 (not including logging, mining and industrial railways). British Columbia has a greater number of telephones *per capita* than any other province, having a total of 115,042 on January 1, 1934.

In the year 1933, a total of 15,777 vessels of all classes, with a net tonnage of 10,897,302 tons, entered the port of Vancouver; in 1932, 15,981 vessels, 11,082,902 tons net.

Banking.—Bank clearings for five years:—1929, 1,445,640,200 dollars; 1930, 1,163,170,522 dollars; 1931, 920,592,448 dollars; 1932, 731,172,543 dollars; 1933, 758,534,469 dollars.

MANITOBA.

Constitution and Government.—Manitoba was known as the Red River Settlement before its entry into the Dominion in 1870. The Provincial Government is administered by a Lieutenant-Governor and a Legislative Assembly of 55 members elected for five years. Women have been enfranchised. Proportional representation has been adopted for the 10 seats in the City of Winnipeg, and the transferable vote for all other constituencies. The province is represented by 6 members in the Senate and 17 in the House of Commons of Canada. The Crown lands and other natural resources of the Province, formerly in the hands of the Dominion Government, were transferred to the Province as from July 15, 1930.

Lieutenant-Governor.—His Honour W. J. *Tupper*, K.C (November, 1934).

The Members of the Ministry are as follows:—

Premier, President of the Council.—Hon. John *Bracken.*

Minister of Mines and Natural Resources.—Hon. J. S. *McDiarmid.*

Minister of Public Works and Labour.—Hon. W. R. *Clubb.*

Provincial Secretary and Municipal Commissioner and Railway Commissioner.—Hon. D. L. *McLeod.*

Minister of Agriculture and Immigration.—Hon. D. G. *McKenzie.*

Minister of Education and Minister of Health and Public Welfare.—Hon. R. A. *Hoey.*

Attorney-General and Minister of Telephones and Telegraphs.—Hon. W. J. *Major*, K.C.

Provincial Treasurer.—Hon. E. A. *McPherson.*

State of parties in Legislative Assembly: Progressive Liberal (Government), 39; Conservative, 10; Labour, 5; Independent, 1.

Area and Population.—The area of the Province is 251,832 square miles (224,777 sq. miles land and 27,055 sq. miles water). In 1912 its boundaries were extended to the shores of Hudson Bay. (See map STATESMAN'S YEAR-BOOK, 1912.) The population (Census, 1931) was 700,139. The rural population in 1931 was 384,170. Population of the principal cities:—Winnipeg (capital), 218,785 (Census, 1931) (Greater Winnipeg, 300,001 in 1931); Brandon, 17,082; Portage la Prairie, 6,597; St. Boniface, 16,305.

Vital statistics for 4 years:—

Year	Births	Marriages	Deaths	Year	Births	Marriages	Deaths
1930	14,433	5,061	5,712	1932	14,141	4,702	5,364
1931	14,391	4,888	5,344	1933	13,372	4,818	5,518

Education.—Education is locally controlled, as in all the provinces, and is supported by local taxation and Government grants. The University of Manitoba, founded in 1877 in Winnipeg, had (in 1933–34) 2,646 full course students in all courses. There were (1932–33) 4,406 teachers and 150,070 pupils in the 4,290 public schoolrooms. There are 121 intermediate schools, having one room for high school work, 43 high schools, 15 junior high schools, 13 collegiate departments, and 26 collegiate institutes.

Finance.—Revenue and expenditure for six years:—

Year.	Revenue.	Expenditure.	Year.	Revenue.	Expenditure.
	Dollars.	Dollars.		Dollars.	Dollars.
1929	12,435,110	12,433,104	1932	14,631,341	14,631,341
1930	13,992,505	13,802,934	1933	12,366,918	14,311,482
1931	14,705,531	14,705,531	1934	13,966,921	14,003,532

Production and Industry.—The southern part of Manitoba is rich agricultural land, while the northern two-thirds of the province form part of the Canadian shield, an area underlain by pre-Cambrian rocks which have been proved to be rich in mineral deposits in other parts of Canada. Estimated arable land, 25,000,000 acres, of which about 30 per cent. is under cultivation. For particulars of agricultural production and number of live-stock, *see* under Canada above.

Total value of minerals, 1933, 9,025,733 dollars. Gold in the Rice Lake area and large copper-zinc-gold-silver deposits in northern Manitoba are now being operated. The numerous lakes in Manitoba furnish large quantities of excellent fish. Total quantity taken, 1933, 19,891,300 lbs., value to fishermen 725,294 dollars; value marketed 1,185,181 dollars. Forest reserves in Manitoba 2,236,858 acres.

Statistics of manufactures for 1932: 970 industrial establishments, with a capital of 190,545,652 dollars; employees, 22,255; wages and salaries, 24,157,589 dollars; cost of materials used, 45,591,099 dollars; and gross value of products, 96,056,029 dollars.

Communications.—In the year 1930, the Province had 6,255 miles of railway as compared with 3,074 miles in 1907. There are (1933) 314,174 miles of telephone wire in Manitoba, and 62,556 telephones, which includes approximately 2,900 of municipal and privately owned systems.

NEW BRUNSWICK.

Constitution and Government.—New Brunswick was discovered by Jacques Cartier in 1534. It was acquired by the English under the Treaty of Utrecht in 1713, and was settled by the English as early as 1761. In 1784 it was separated from Nova Scotia. The Government is at present vested in a Lieutenant-Governor and a Legislative Assembly of 48 members elected for five years. Franchise—any male or female British subject of full age, after six months' residence. Last election, August, 1925:—Liberals 12, Conservatives 35, Independents 1. The province is represented by 10 members of the Senate and 11 in the Canadian House of Commons.

Lieutenant-Governor.—Hon. H. H. *McLean.*

The members of the Ministry are as follows (1933):—
Premier.—Hon. L. P. de W. *Tilley.*
Provincial Secretary and Treasurer.—Hon. A. J. *Leger.*
Minister of Agriculture.—Hon. *Lewis Smith.*
Minister of Health and Labour.—Hon. Dr. H. I. *Taylor.*
President of Executive Council.—Hon. W. H. *Harrison.*
Minister of Public Works.—Hon. D. A. *Stewart.*
Minister without Portfolio.—Hon. E. A. *Reilly*, K.C.

Area and Population.—The area of the Province is 27,985 square miles, of which 27,911 square miles are land area. There are 7¾ million acres of Crown lands, principally lumber lands. The population (Census, 1931) was 408,255; in 1921, 387,876. The rural population in 1921 was 265,648. Population of the principal cities (1931):—Saint John, 46,640; Moncton, 20,617; Fredericton (capital), 8,828.

Education.—Education is free and undenominational. There are three Universities. The University of New Brunswick, at Fredericton, founded in 1800, had 362 students in 1931; the Mount Allison University at Sackville had 405 students; and the University of St. Joseph's College at Memramcook had 90 undergraduates in 1931. There were (1931) 87,160 pupils and 2,533 teachers in the 2,311 public day schools. Total expenditure on public schools in 1930–31, 2,607,477 dollars.

Finance.—The finance for recent years is shown as follows (years ended October 31):—

Year	Ordinary Revenue	Ordinary Expenditure	Year	Ordinary Revenue	Ordinary Expenditure
	Dollars	Dollars		Dollars	Dollars
1927	5,096,446	4,636,157	1930	6,583,726	7,218,856
1928	5,290,098	5,393,784	1931	5.980,914	6,761,420
1929	5,991,275	6,521,575	1934	5 632,689	5,598,933

Bonded debt (exclusive of Treasury Bills), October 31, 1931, 45,858,996 dollars.

Production and Industry.—New Brunswick is productive in agricultural manufacture, mining, fishing, and forest products. The total area under field crops in 1932 was 907,500 acres. For particulars of agricultural production and live-stock *see* under Canada, pp. 302, 303. The wool clip for 1930 was 875,000 lbs.

The Government owns over 10,600 square miles of forests and a similar area is owned privately. In 1930 the total timber cut in New Brunswick from both Crown and Private Lands, including sawn lumber, lath, shingles, railway ties, pulpwood, etc., was 179,844,960 cubic feet. The value of lumber and other sawmill products was 3,534,442 dollars. The capita invested in sawmills, pulp mills, logging and driving equipment, etc., is placed at 42,000,000 dollars, and wages amount to over 7,500,000 dollars annually.

A considerable variety of minerals is known to exist in the Province, such as iron, copper, antimony, lead, zinc, tungsten, manganese, bituminous coal, gypsum, oil shale, salt, diatomite. The only active mining in the year 1931 was in coal and gypsum. Quantities of good limestone exist in the southern part of the Province, and are quarried for lime, the pulp industry and as a fertilizing agent. Various granites are quarried and manufactured at St. George, and there is an active industry in pulpstones at Quarryville. Natural gas and oil are produced near Moncton. Coal output, 1931, 182,181 short tons.

In 1931 there were 872 industrial establishments, with a capital of 129,824,727 dollars, employing 16,175 persons; salaries and wages, 14,881,673 dollars; cost of materials, 33,288,250 dollars; gross value of products, 70,679,503 dollars.

The total value of fisheries in 1931 was 4,169,811 dollars, and in 1930, 4,853,575 dollars.

Commerce and Communications.—The exports of the Province in 1930–31 amounted to 51,374,506 dollars; the imports for consumption to 24,377,083 dollars.

The Province had in 1930, 11,836 miles of highway, comprising 1,368 miles of main-trunk roads, 3,268 miles of secondary-trunk roads and 7,200 miles of branch roads.

There were 1,934 miles of steam railway operating in 1931, as compared with 1,503 miles in 1907. In 1931 there were 61,743 miles of telephone wire and 33,950 telephones.

NOVA SCOTIA.

The first permanent settlement was made by the French early in the seventeenth century, and the province was called Acadia until finally ceded to the British by the Treaty of Utrecht in 1713.

Constitution and Government.—Under the 'British North America Act' of 1867 the Legislature of Nova Scotia may exclusively make laws in relation to local matters, including direct taxation within the Province,

and the administration of justice. The Legislature of Nova Scotia consists of a Lieutenant-Governor, appointed and paid by the Federal Government, and holding office for five years; and a House of Assembly of 30 members, chosen by popular vote every five years. The province is represented in the Dominion Senate by 10 members, and in the House of Commons by 12.

The franchise and eligibility to the Legislature are granted to every person, whether male or female, if of full age (21 years), a British subject, and a resident for one year in the Province and two months before the date of the writ of election in the county or electorial district of which the polling district forms part, and if not by law otherwise disqualified, or in receipt of aid as a pauper.

Lieutenant-Governor.—His Honour The Hon. Walter H. *Covert*, K.C. (appointed October, 1931).

The Members of the Ministry are as follows (appointed September 5, 1933):—

Premier and Provincial Secretary.—Hon. Angus Lewis *Macdonald.*
Minister of Agriculture and Marketing.—Hon. F. W. *Walsh.*
Attorney-General.—Hon. Josiah H. *MacQuarrie.*
Minister of Highways.—Hon. Alexander Stirling *MacMillan.*
Minister of Public Works and Mines.—Hon. Michael *Dwyer.*
Minister of Public Health.—Hon. Frank Roy *Davis*, M.D., C.M.
Ministers without Portfolio.—Hon. Joseph Willie *Comeau*, Hon. Clarence Wentworth *Anderson.*

Area and Population.—The area of the Province is 21,428 square miles, of which 21,068 square miles are land area, and 360 square miles water area. The population (Census, 1931) was 512,846.

Population of the principal cities and towns (1931):—Halifax, 59,275; Sydney, 23,089; Glace Bay, 20,706; Dartmouth, 9,100; Amherst, 7,450; New Glasgow, 8,858; Sydney Mines, 7,769; Truro, 7,901; Yarmouth, 7,055.

The vital statistics for three years are as follows:—

Calendar Year	Births	Marriages	Deaths	Excess of births
1930	11,346	3,451	6,206	5,170
1931	11,615	3,394	5,968	5,647
1932	11,629	3,197	6,159	5,470

Education.—Education in Nova Scotia is free, compulsory, and undenominational. Besides the elementary schools and high schools, there are in Halifax Maritime Provinces schools for the blind and for the deaf. A large Provincial Agricultural College is established at Truro; also a Normal College for the training of teachers. The Provincial Technical College grants degrees in civil, mining, chemical and electrical engineering. It also conducts correspondence courses in numerous subjects. Besides this central institution there are, working under its supervision, coal mining schools near all the collieries, and engineering and technical schools of various kinds in the industrial centres.

The total expenditure on education for the year ending June 30, 1933 was 4,290,412 dollars. The Province has 9 universities and colleges; 3,260 departments operated in 1,896 school buildings, with 3,597 teachers and 117,283 pupils, of whom 16,701 were in High School Grades.

Justice and Crime.—Justice in Nova Scotia is administered by the following courts: Courts for the collection of small debts; county courts;

inferior courts in criminal cases; courts of superior jurisdiction; a divorce court and probate courts. The supreme court of appeal is composed of a chief justice and six judges. There are also courts for the revision of assessment rolls and voters lists, and a court for juvenile delinquents.

In 1932-33, 4,225 persons were imprisoned for various crimes and misdemeanours.

Finance.—In Nova Scotia there is no general direct Government taxation. The revenue is raised from the Dominion subsidy; royalty on coal and other minerals; succession duty; special taxes on banks, incorporated companies, partnerships, automobiles and theatres, marriage licences, and statutory fees.

Revenue, expenditure, and debt for five years :—

Year	Revenue	Expenditure	Debt
	Dollars	Dollars	Dollars
1930	7,682,066	8,170,346	56,983,480
1931	8,104,601	8,509,436	60,325,613

Production and Industry.—Nova Scotia is largely an agricultural Province. Fruit-growing is specially profitable, and apples are the most important fruit grown; in 1933 the estimated crop was about 2,500,000 barrels. Nova Scotia is admirably adapted for dairying. Owing to the cool, moist climate, fodder may be raised easily, and the pastures are excellent. For particulars of agricultural production and live-stock, *see* under Canada above. The wool clip for 1933 was 889,000 lbs.

Principal minerals are (Sept. 30, 1933): coal, 3,664,000 tons; coke, 114, 200 tons; tar, 1,885,514 gallons; gold, 1,335 ozs.; gypsum, 306,331 tons; salt, 34,005 tons.

The known coal fields embrace 1,000 square miles. The gold districts cover about 10,250 square miles.

The estimated forest area of Nova Scotia is over 15,000 square miles. The principal trees are spruce, fir, hemlock, pine, birch, oak and maple. The estimated value of the primary forest products in 1934 reached the sum of 5,250,000 dollars.

The fisheries of the Province in 1933 had a value of 6,010,601 dollars, including cod fishery, 1,442,599 dollars, and lobster fishery, 1,884,175 dollars. In 1933, 8,221,108 dollars were invested in this industry, and about 20,553 men were employed.

The number of industrial establishments was (in 1931) 1,449, with a capital invested of 129,824,727 dollars, employing 16,175 wage and salary-earners; wages and salaries, 14,881,673 dollars; gross value of products, 70,679,503 dollars.

Commerce and Communications.—The imports entered for consumption during 1931-32 were 18,885,648 dollars; the exports, 41,414,498 dollars.

The country is covered with a network of railways, 1,420 miles in extent. There are 14,739 miles of highways; 1601 trunk, 3090 County and 10,049 local highways. Besides this, subsidised boats ply round the shores making regular calls at all the important ports.

In 1933 there were 101,000 miles of telephone wire and 43,854 telephones.

ONTARIO.

Constitution and Government.—From 1791 to 1867 Ontario was called Upper Canada. The Provincial Government is administered by a Lieutenant-Governor, a cabinet, and one chamber with, according to the provisions of the Representation Act, 1933, 90 members. The latter are elected for five years by a general franchise. Women have the vote and can be elected to the chamber.

Lieutenant-Governor.—Col. the Hon. Herbert *Bruce*.

The members of the Ministry are as follows:—

Premier, President of Council and Provincial Treasurer.—Hon. Mitchell F. *Hepburn*.
Minister of Highways and of Public Works.—Hon. Thomas B. *McQuesten*.
Attorney-General and Minister of Labour.—Hon. A. W. *Roebuck*, K.C.
Secretary and Registrar.—Hon. H. C. *Nixon*.
Minister of Agriculture.—Hon. Duncan *Marshall*.
Minister of Lands and Forests.—Hon. Peter *Heenan*.
Minister of Mines.—Hon. Paul *Leduc*, K.C.
Minister of Health.—Hon. James *Faulkner*, M.D.
Minister of Public Welfare and Municipal Affairs.—Hon. David A. *Croll*.
Minister of Education.—Hon. L. J. *Simpson*, M.D.

At the elections for the Provincial Legislature held on June 19, 1934, the following parties were returned:—Liberals, 66; Conservatives, 17; Liberal Progressives, 3; United Farmers of Ontario, 1; Independents, 1; Canadian Commonwealth Federation, 1; Liberal Labour, 1; total, 90.

Area and Population.—The greatest extent of the Province from east to west is 1,000 miles and from north to south 1,075 miles. The area is 412,582 square miles (363,282 sq. miles land area and 49,300 water). The Province is roughly divided into two sections by a line running westward from Mattawa on the Ottawa River to Georgian Bay—southern (or old) Ontario, the older settled portion, with an area of about 77,000 square miles, and northern (or new) Ontario, with an area of about 330,000 square miles, of which 146,400 square miles, the district of Patricia, was added in 1912. Population of the principal cities (Census, 1931):—Toronto (capital), 627,582; Ottawa, 124,988; Hamilton, 159,914; London, 71,022.

The population of the Province (Census, 1931) was 3,426,488. The Indian population of the Province in 1921 was 26,436.

Education.—There is a complete State system of elementary and secondary schools. The University of Toronto, founded in 1827, has (1931-32) 769 professors and lecturers, and 8,088 students (5,099 men and 2,989 women).

The other Universities are Queen's at Kingston, Western Ontario at London, McMaster at Hamilton, and Ottawa in Ottawa, which are private foundations. The first two are now undenominational and are aided by the State. The Royal Military College at Kingston is maintained by the Dominion Government. There were, in 1932, 7,777 day and evening schools of all grades with over 830,000 pupils enrolled. There are 21,608 certificated teachers engaged in these elementary and secondary schools. The total expenditure by the Government of Ontario on education in 1932 was 13,354,577·90 dollars.

Finance.—The revenues of the Province are derived from the sale of Crown lands, timber, mining, liquor sales, amusement, gasoline and betting taxes, succession duties and other fees, supplemented by a subsidy from the Dominion. The revenue and expenditure in recent years were as follow:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Dollars	Dollars		Dollars	Dollars
1926-27	56,306,224	55,947,001	1929-30	57,343,291	57,989,352
1927-28	58,426,982	58,198,746	1930-31	54,390,092	54,846,994
1928-29	64,549,717	61,906,824	1931-32	54,186,000	56,161,000

The public debt for the fiscal year 1933 was 107,416,814 dollars.

Production and Industry.—The Province is rich in agricultural and mineral resources. The land under cultivation is about 14,000,000 acres, more than 1,000,000 additional acres are cleared, and 25,434,294 acres are assessed. Of the total land surface of the Province, which is 234,000,000 acres, the amount of arable land is much larger than the portion now under cultivation. Beyond the cultivated portion it is estimated that northern Ontario alone contains some 20,000,000 acres of alluvial soil, not including the vast stretches of agricultural land south and west of James Bay. The farm values for 1932 were:—Land, 844,025,782 dollars; buildings, 473,255,236 dollars; implements, 154,723,478 dollars; and live-stock, 144,580,416 dollars. For particulars of agricultural production and live-stock *see* under Canada above. The wool clip for 1930 was 6,325,000 lbs.

The mineral production in 1932 included gold, 2,287,280 ozs., value 47,282,274 dollars; silver 6,220,278 ozs., 1,912,006 dollars; nickel, metallic, 30,327,968 lbs.; copper in matte exported, 17,650,186 lbs.; copper, metallic, 59,401,323 lbs.; platinum metals, 64,648 ozs.; Portland cement, 1,599,342 barrels; crude petroleum, 130,343 barrels; natural gas, 7,244,624 m. cubic feet. Total value of metallic minerals in 1931, 72,950,799 dollars, in 1932, 63,369,070 dollars. Non-metallic minerals and structural materials in 1931 were worth 18,882,171 dollars, in 1932, 13,923,073 dollars. The total value of the mineral production of Ontario in 1932 was 79,007,425 dollars.

Total area of forests 240,000 square miles; chief timber is spruce, pine, birch and poplar.

PRINCE EDWARD ISLAND.

This island was discovered by Sebastian Cabot in 1497; it was first settled by the French, but was taken from them in 1758. It was annexed to Nova Scotia in 1763, and constituted a separate colony in 1769.

Constitution and Government.—Prince Edward Island entered the Confederation on July 1, 1873. The Provincial Government is administered by a Lieutenant-Governor and a Legislative Assembly of 30 members, who are elected for 5 years, half by real property holders and the remainder by universal male and female suffrage. Women can also be elected to the Assembly. State of Parties (elected August, 1931), as at June 30, 1934: Conservatives, 16; Liberals, 12; 2 vacancies.

Lieutenant-Governor.—Hon. George Des Brisay *Deblois.*

The members of the Ministry are as follows (June 30, 1934):—

Premier and Minister of Education and Public Health.—Hon. William J. P. *MacMillan*, M.D., C.M.

Minister of Public Works and Highways.—Hon. G. Shelton *Sharp.*

Minister of Agriculture.—Hon. Thomas *Macnutt.*

Ministers without Portfolio.—Hon. Adrian F. *Arsenault*, Hon. Harry D. *McLean*, Hon. Walter G. *McKenzie*, Hon. Matthew W. *Wood*, and Hon. Augustine A. *MacDonald*, M.D.

Area and Population.—The province, which is the smallest in the Dominion, lies at the mouth of the Gulf of St. Lawrence, and is separated from the mainland of New Brunswick and Nova Scotia by Northumberland Strait. The area of the island is 2,184 sq. miles. The total population (Census, 1931) was 88,040. Population of the principal cities (1931):—Charlottetown (capital), 12,357; Summerside, 3,914.

Religion and Education.—The population of the Province at the census of 1931 was divided among the different creeds as follows:—Roman Catholic, 39,064; Presbyterian, 14,803; United Church, 21,979; Baptist, 5,066; Anglican, 5,066. There were (1932) 474 schools, 638 teachers, 17,846 pupils. This is exclusive of 3 Roman Catholic convent schools at Tignish, Summerside and Charlottetown, with 551 pupils. There are two colleges, Prince of Wales College, head of the Provincial school system, and St. Dunstan's, a Roman Catholic institution, both in Charlottetown. Total expenditure on public education in 1933 was 526,921 dollars.

Total sinking funds on December 31, 1933, amounted to 758,707 dollars. The total liabilities of the Province amounted on December 31, 1932, to 3,911,627 dollars.

Production and Industry.—The farm land occupied in 1921 was 1,216,483 acres. Field crops in 1932 covered about 476,200 acres, and were valued at 6,393,000 dollars. The land in natural forest covers 356,996 acres, and in pasture 210,000 acres. For particulars of agricultural production and live-stock *see* under Canada above. The wool clip for 1930 was 496,000 lbs.

Silver fox breeding is extensively carried on, and pelts are shipped to United States and European markets; breeding foxes are exported to all northern countries. The value of fur-bearing animals on the 848 farms in 1931 was estimated at 1,038,242 dollars.

The total value of the fisheries in 1931 was 1,078,901 dollars. Oysters abound in Richmond Bay, where the beds extend to 15,000 acres. The Dominion Government has possession and control of the oyster areas surrounding the Province. It is believed that the industry will soon be of major importance.

In 1931 there were 290 industrial establishments, with a capital of 4,019,288 dollars, employing 1,170 persons; salaries and wages, 809,122 dollars; cost of materials, 2,349,367 dollars; gross value of products, 4,136,576 dollars.

Commerce and Communications.—The trade of Prince Edward Island is chiefly with the other provinces of Canada and this inter-provincial trade does not appear in the trade statistics. In 1932–33 the exports to other countries amounted to 548,725 dollars; the imports entered for consumption to 619,533 dollars. In 1931 the province had 286 miles of railway. A railway and automobile ferry steamer of great power is in operation, connecting the lines of the Canadian National Railway in Prince Edward Island with those on the mainland. Daily steamship communication with the mainland was successfully maintained for the first time during the winter of 1917–18, and has since continued without interruption. In 1931 there were 8,137 miles of telephone wires and 5,806 telephones.

Governor.—Mr. Geoffry Alexander Stafford *Northcote* C.M.G. (appointed July 24, 1934 (3,500*l.* and 1,000*l.* contingencies and 500*l.* Duty Allowance).

Colonial Secretary.—Thomas *Millard*. Appointed November 6, 1934 (1,485*l.*–1,635*l.*).

This territory, including the counties of Demerara, Essequebo, and Berbice, named from the three rivers, was first partially settled by the Dutch West India Company about 1620. The Dutch retained their hold until 1796, when it was captured by the English, and was finally ceded to Great Britain in 1814.

Constitution and Government.—The British Guiana (Constitution) Order in Council, 1928, providing for the Government of the Colony and for the Constitution of a Legislative Council in place of the Court of Policy and Combined Court which have been determined, came into operation on July 18, 1928. The Legislative Council consists of the Governor as President, and ten Official Members and nineteen Unofficial Members. Executive and administrative functions are exercised by the Governor and Executive Council. The law of the Colony, both civil and criminal, is based on the common and statute law of England, except that the English law of personal property applies to both movable and immovable property, with certain exceptions, and the Roman-Dutch legitimatisation *per subsequens matrimonium* is preserved. There is absolute equality of males and females before the law as regards divorce, property, succession and all other matters. Appeals lie to the Full Court of the Supreme Court and to the West

Indian Court of Appeal, and from the latter of these Courts to the Judicial Committee of the Privy Council.

Area, Population, etc.—Area, 89,480 square miles. Population at census 1931, 310,933 (excluding about 7,379 aborigines). Estimated population, 1933, 321,260. Births (1933) 10,461 (32·6 per 1,000); deaths, 7,848 (24·4 per 1,000). Capital, Georgetown, 64,207. East Indians living on estates (census 1931), 64,037; Immigration Department estimate East Indians on estates (1933), 54,577; in villages and Settlements (1933), 80,537. Total East Indians (1933), 135,114. Returned to India (1933), nil. 179 schools (and 52 in remote and sparsely populated districts) received Government grant (67,852*l.*) in 1933; 44,136 pupils; average daily attendance, 30,221; teachers, 960. Secondary education is provided for both boys and girls.

Paupers (1933) receiving out-door relief, 3,183.

Governor and Commander-in-Chief.—Alan C. M. *Burns*, C.M.G. (2,000*l.*), (appointed May 18, 1934) assisted by an Executive Council of six members, and a Legislative Council consisting of six official and seven unofficial members.

British Honduras is a Crown Colony on the Caribbean Sea, south of Yucatan, and 600 miles west from Jamaica. Its early settlement was probably effected by woodcutters from Jamaica about 1638, and from that date to 1798, in spite of opposition from the Spaniards, settlers held their own and prospered. In 1786 the Home Government appointed a Superintendent, and in 1862 the settlement was declared a Colony, subordinate to Jamaica. It became an independent colony in 1884.

Area and Population.—Area, 8,598 sq. miles. Population, census 1931, 51,347 (25,524 males, and 25,823 females). Estimated population at December 31, 1933: 53,770 persons (26,605 males and 27,165 females). The birth-rate per 1,000 (1933) was 36·116, and the death-rate 10·321. In 1933 there were 462 marriages. Primary schools (1933), 75; children enrolled, 8,152; average attendance, 6,545; Government grant (expended), 12,659*l.*

There are 4 schools with secondary departments, and altogether about 412 pupils. They are under denominational management and none receive aid from Government. The total school roll, including private schools, was 8,889, and attendance 7,109. The police force contains (December, 1932) 3 officers, 118 non-commissioned officers and men. Chief town: Belize; population, census of 1931: 16,687 (7,668 males, and 9,019 females).

NEWFOUNDLAND AND LABRADOR.

Newfoundland was discovered by John Cabot in 1497. It was soon frequented by the Portuguese, Spanish and French for its fisheries. Guy, Calvert and others made unsuccessful attempts to colonise the island, but in the 17th century English colonists established themselves there. A French station also existed on the island, and there were constant disputes as to fishing rights. Although exclusive British sovereignty was ceded in 1713 by the Treaty of Utrecht, these disputes were not finally settled till 1904.

The coast is rugged, especially on the south-west, where the coast range reaches an elevation of nearly 2,000 feet. The hills attain their summit within a few miles of the salt water, and then spread out into an undulating country, consisting largely of barrens and marshes, and intersected by numerous rivers and lakes. On the borders of the lakes and watercourses good land is generally found, and in some cases, as about the Exploits, the Gander and the Humber, it is heavily timbered.

Constitution and Government.—The Governor is assisted by an Executive Council (not exceeding 12 members), a Legislative Council (not exceeding 24 members), and an elected House of Assembly consisting of 27 representatives. Members of the Legislative Council receive 125 dollars per session; members of the Legislative Assembly receive 600 dollars per session. For electoral purposes the whole colony is divided into 24 districts or constituencies. Women were enfranchised by an Act of the Legislature passed in 1925.

A Royal Commission appointed in 1933 to examine into the future of Newfoundland and to report on the financial situation, recommended that the existing Legislature and Executive Council should, for the time being, be suspended. It was also recommended that until such time as Newfound-

land may become self-supporting again there should be constituted a form of Government under which the full legislative power and executive power should be vested in the Governor acting on the advice of a specially created Commission, consisting of six members (three from Newfoundland and three from the United Kingdom), exclusive of the Governor, over which the Governor would preside. The Governor-in-Commission would be responsible to the Secretary of State for Dominion Affairs in the United Kingdom for the good government of the Island. The Government of the United Kingdom would assume general responsibility for the finances of the Island during the period of reconstruction.

These recommendations, which denoted a suspension of the Constitution of Newfoundland, were incorporated in the Newfoundland Bill, which was passed by the British Legislature on December 21, 1933.

Governor and Commander-in-Chief.—Admiral Sir David Murray *Anderson*, K.C.B., C.M.G., M.V.O., appointed September, 1932; salary 15,000 dollars.

Commissioners.—Hon. F. C. *Alderdice*; Hon. Sir John Hope *Simpson*, C.I.E.; Hon. W. R. *Howley*, K.C.; Hon. T. *Lodge*, C.B.; Hon. J. C. *Puddester*; Hon. E. N. R. *Trentham*.

Area and Population.—Area, 42,734 square miles. Population at December, 31, 1933: Newfoundland, 285,863; Labrador, 4,411. Dependent on Newfoundland is Labrador, the most easterly part of the American continent. The boundary between the said Dependency and the Province of Quebec, which had, for many years, been in dispute, was defined by the Judicial Committee of the Privy Council in March, 1927, as being, in effect, the watershed of the rivers flowing into the Atlantic Ocean, the coastal boundaries being from Blanc Sablon, on the South, to Cape Chidley, on the North. As a result of this decision an estimated area of some 110,000 sq. miles, formerly in dispute, was confirmed as under the jurisdiction of Newfoundland. The population of Labrador in 1931 was 4,324 (2,221 males, 2,103 females). Of the total Newfoundland population in 1921, 65,448 were engaged in the fisheries, 3,227 were farmers, 4,862 mechanics, and 1,117 miners. Capital, St. John's, 43,176 inhabitants (1932); other towns (1921), Harbour Grace, 3,825; Bonavista, 4,052; Carbonear, 3,320; Twillingate, 3,217, and Grand Falls, 3,769. The birth rate in 1933 was 23·5, and the death rate (1933), 12·3 per 1,000. Immigrants (1933), 6,521; emigrants (1933), 5,831.

Religion and Education.—Of the total population of Newfoundland and Labrador in 1932, 92,722 belonged to the Church of England, 95,953 were Roman Catholics, 78,356 United Church, 1,896 Presbyterians, 14,108 Salvation Army, 3,310 other denominations.

The number of schools of all kinds was as follows:—

1932-33	Number of Schools	Attendance
Church of England	337	17,116
Roman Catholic	345	20,116
United Church	322	15,140
Others	79	2,895
Total	1,133	55,267

Total expenditure, 1932-33, 509,137 dollars.

Public debt (June 30, 1934), 96,500,000 dollars.

Production, &c.—The total value of all crops harvested in 1932–33 was 4,879,700 dollars. In 1932–33 there were in Newfoundland 14,100 horses, 29,000 cattle, 60,300 sheep, 8,000 swine, 10,000 goats and 233,000 poultry. The total value of live-stock was 2,906,400 dollars. Pine forests exist to the north, and large saw mills have been established. The mineral resources of Newfoundland are considerable. Large beds of iron ore have been found on Bell Island in Conception Bay, on the east coast, and other rich deposits have been discovered on the west coast. The total deposits are estimated at about 3,600 million tons. Copper ore and pyrites are worked. Coal is found near St. George's Bay on the west coast, and in the Grand Lake district. In the eastern part of the island gold-bearing quartz rock and extensive deposits of silver and lead ore have been found. Extensive paper and pulp mills have been erected at Grand Falls, Bishop's Falls, Corner Brook, and Lomond in Bonne Bay.

Of the imports (1932–33) the value of 3,778,014 dollars came from the United Kingdom; 5,812,695 from Canada; 4,148,608 from the United States. Of the exports the value of 8,912,688 dollars went to the United Kingdom; 400,021 to Canada; 6,150,700 to United States; 950,849 to Portugal; 963,565 to Spain; 582,168 to Italy; 1,169,172 to Brazil; 1,196,204 to Belgium; 597,665 to British West Indies.

Shipping.—Total tonnage of vessels entered and cleared in 1932-33, 2,047,878 tons, of which 1,488,238 tons were British. Vessels registered December 31, 1933, 2,001 sailing vessels of 79,126 tons, 75 steam vessels of 32,790 tons, and 215 motor vessels of 9,665 tons; total, 2,291 vessels of 121,581 tons.

Fishing is the principal occupation of the population. The principal fish are cod, salmon, halibut, lobster, caplin, and seal: the value of the fishing products is about four millions sterling annually.

By the Anglo-French Convention of 1904, France renounced her exclusive fishing rights under the treaty of Utrecht, but retained the right to fish in territorial waters from St. John's Cape northwards to Cape Ray for all sorts of fish, including bait and crustacea. An award of The Hague court in 1910 secured the right of Great Britain to make fishing regulations without the consent of the United States, subject to any limitations imposed by treaty. It also confirmed Great Britain's contention that the whole extent of a bay from headland to headland is comprised within territorial waters.

There were engaged in the Bank cod fishery during 1933, 919 men, and 39 Newfoundland schooners, aggregating 3,922 net tons. The catch in 1933 totalled 113,042 quintals (112 lbs.) of dry fish, valued at 452,168 dollars. In 1933 the output of the cod-fishery is estimated at 1,193,969 quintals of dry fish, valued at 5,091,772 dollars. There were about 12,931 small sailing vessels, boats (including motor boats), &c., utilised, and 27,500 men employed in this fishery. In 1933 exports of fresh lobsters amounted to 19,756 lbs., valued at 2,371 dollars, and preserved, 10,764 cases, valued at 150,851 dollars, salmon fresh, 2,288,381 lbs., valued at 315,705 dollars.

During 1933, 176,046 seals, valued at 191,911 dollars, and 137 whales were caught; 6 steamers and 1096 men were engaged in the seal fishery.

Communications, &c.—Railways open 1933: 704 miles of Government line with a gauge of 3ft. 6in., and 56 miles of private line. Communication between various points on the coast and between the island and the continent is maintained by a fleet of first-class steamers; each of which connects with some central point on the railway. There were in 1933 (including 42 Labrador stations) 600 post offices, 186 of which were telegraph offices; there were 40 telegraph offices which were not post offices. There were about 600 Government postal telephone stations, most of them being in post and telegraph offices. Letters and cards sent in 1933, 8,500,000; newspapers, books, parcels, &c., 500,000 sent abroad; received, 3,800,000. The postal and telegraph revenue, 1933-34, was 576,130 dollars, and the expenditure, 736,400 dollars. Telegraph line open (1933), 4,443 miles of wire; about 1,200 miles of telephone wire.

In December, 1933, the Newfoundland Savings Bank held 1,300,328 dollars standing to the credit of 2,689 depositors; this is in addition to the amount of 24,207,391 dollars held by the Savings Departments of the four banks doing business in St. John's.

The legal coin of the colony is the gold dollar, normally equivalent to 4*s.* 1½*d.* of British money.

LEEWARD ISLANDS.

Governor and Commander-in-Chief.—Sir Reginald *St. Johnston*, K.C.M.G. (2,750*l.* (of which 550*l.* is a duty allowance), and 100*l.* travelling allowance).
Colonial Secretary.—Edward *Baynes*, C.B.E. (750*l.*–900*l.*).

The group, which lies to the north of the Windward group, and south-east of Puerto Rico, is divided into 5 Presidencies, viz., Antigua (with Barbuda and Redonda); St. Christopher or St. Kitts (with Nevis and Anguilla), Dominica, Montserrat, and the Virgin Islands (with Sombrero). There are for the whole Federation an Executive Council nominated by the Crown, and a Legislative Council, 10 official and 10 unofficial members. Of the latter, 3 are elected by the unofficial members of the local Legislative Council of Antigua, 2 by those of Dominica, 3 by those of St. Kitts, 1 by those of Montserrat, and 1, appointed by the Governor, for the Virgin Islands. The Federal Legislative Council meets, as a rule, once a year. The duration of the Council is three years. There are also separate Executive and Legislative Councils for the four larger Presidencies, and an Executive Council for the Virgin Islands. A Commission appointed in 1932 recommended in 1933 that the Leeward Islands and the Windward Islands should be united into one Colony under a Governor, with headquarters at St. Lucia.

The following table shows the area and population of the Leeward Islands:—

—	Area: Square miles	Estimated Population Dec. 31, 1933	Population according to Census taken in 1921		
			Males	Females	Total
Antigua	108	32,42	12,200	16,664	28,864

Savings bank, 571 depositors, with 5,409*l.* deposits. Telephone line, 510 miles. Dominica contains a Carib settlement with a population of about 400, the majority being of mixed Negro blood, but about 100 apparently pure Caribs.

Administrator.—His Hon. H. B. *Popham*, M.B.E.

TRINIDAD.

Trinidad, which lies immediately north of the mouth of the Orinoco, and includes Tobago administratively, was discovered by Columbus in 1498 and colonised by the Spaniards in the 16th century. About the period of the Revolution a large number of French families settled in the island, where the French element is still preponderant. In 1797, Great Britain being at war with Spain, Trinidad was occupied by the British, and ceded to Great Britain by the Treaty of Amiens in 1802.

Governor.—Sir Alfred Claud *Hollis*, G.C.M.G., C.B.E. (5,500*l.*, and allowances 375*l.*), appointed Nov. 27, 1929. There is an Executive Council consisting of the Governor, as President, the Colonial Secretary, Attorney-General, and Treasurer and such other persons, not being *ex-officio* members, as may from time to time be appointed; there is also a Legislative Council with the Governor as President, twelve official and thirteen unofficial members. Of the unofficial members six are nominated and seven are elected. Women over thirty years of age have the franchise.

Colonial Secretary.—Alfred Wallace *Seymour*, C.M.G. (February 28, 1935).

Area: Trinidad, 1,862 square miles; Tobago 114. Population: census 1931, 412,783 (206,619 males and 206,165 females), (Trinidad, 387,425, Tobago, 25,358). Estimated population, end of 1933, 425,572. Capital, Trinidad, Port of Spain, 72,518. The white population is chiefly composed of English, French, Spanish and Portuguese. The large majority of the inhabitants are natives of the West Indies, of African descent, the balance being made up of East Indians, estimated at 140,689, and a small number of Chinese. English is spoken generally throughout the Colony. Births, 1933, 13,134; deaths, 8,040; marriages, 1,941.

Education.—At the close of 1933 there were 290 Elementary and Intermediate schools in the Colony, 43 being Government and 247 Assisted Schools. There were 254 schools in Trinidad and 36 in Tobago. Of the 211 Assisted Schools in Trinidad, 93 were Roman Catholic, 41 Church of England, 69 Canadian Presbyterian Mission, 4 Methodist, 2 Moravian, 1 Baptist and 1 African Methodist Episcopal. There were 2 Government and 4 Assisted Intermediate Schools. The following Colleges afford facilities for the higher education of boys: the Queen's Royal College and its affiliated institutions, the St. Mary's College in Port-of-Spain, and the Naparima College in San Fernando. The St. Joseph's Convent and the Bishop's High School in Port-of-Spain and the Naparima Girls' High School in San Fernando, which are also affiliated to the Queen's Royal College, provide similar education for girls. The number of pupils on the roll at December 31, 1933, was: Queen's Royal College 260, St. Mary's College 510, Naparima College 197, St. Joseph's Convent School 415, St. Hilary's School 160, the Naparima Girls' High School 163, and the Bishop's High School, Tobago, 48. The affiliated institutions work under the same curriculum as the Queen's Royal College, and receive a Government grant-in-aid.

Police force, 921 all ranks (December 31, 1933). In 1933 the number of convictions was 23,807.

The principal imports in 1933 were boots and shoes, 77,432*l.*; butter and butter substitutes, 71,239*l.*; motor vehicles and parts, 153,910*l.*; coal, 45,065*l.*; cocoa (raw, for export) (10,081,151 lbs.), 101,852*l.*; cotton manufactures, 220,335*l.* (includes cotton piece goods, 9,714,753 yards, 170,615*l.*); fish, 85,524*l.* (includes 13,580*l.* canned); rice (37,993,120 lbs.), 147,885*l.*; flour (340,298 bags), 282,640*l.*; hardware, 47,797*l.*; implements and tools, 33,493*l.*; machinery (a) sugar, 40,845*l.*; (b) mining, 363,930*l.*; and (c) other kinds, 99,387*l.*; meats, 94,487*l.* (includes pickled and salted beef and pork, 3,121,500 lbs., 47,105*l.*): metals, 169,069*l.*; milk (96,561 cases), 83,324*l.*; and wood and timber, 140,271*l.*

Imports, 1933, were consigned principally from the United Kingdom (45·30 per cent.); U.S.A. (13·07 per cent.); and Canada (12·14 per cent.). Exports were shipped chiefly to United Kingdom (46·7 per cent.); U.S.A. (9·8 per cent.): and Canada (12·0 per cent.).

Shipping: The number of vessels entered and cleared during the year 1933 was 4,819, with a tonnage of 8,766,464. There were 2,414 arrivals of 4,388,811 tons, and 2,405 departures of 4,377,653 tons, of which 41 per cent. was British.

Of the total area of 1,267,236 acres (Trinidad, 1,192,844 acres, and Tobago, 74,392 acres), about 689,388 acres have been alienated. About 351,435 acres were under cultivation (1933). Sugar production in 1933 amounted to 120,763 tons. Asphalt: The pitch lake is situated in the Ward of La Brea, comprising 114 acres, was first leased as a whole in 1888 for 21 years, and in accordance with the terms of the lease, it was renewed for a further period of 21 years from February 1, 1909, to January 31, 1930. On February 19, 1925, a fresh demise of the pitch lake comprising 109 acres was made to the Trinidad Lake Asphalt, Limited, for 21 years from February 1, 1930. The quantity of asphalt produced during 1933 was 111,337 tons. The quantity of asphalt exported was 52,129 tons of the value of 150,867*l.*, and yielding a revenue of 8,743*l.* The development of the oilfields continues in a satisfactory manner, and the Colony is now the largest producer of petroleum within the Empire. The number of companies operating at the close of 1933 was 14. During 1933, 9,561,354 barrels of 35 imperial gallons of crude oil were extracted. There are two large refineries which manufacture various petroleum products, a considerable proportion of which are exported abroad. In addition to these there are a number of smaller plants, the production from which is marketed locally and exported to the neighbouring West Indian colonies.

There are 1,077 miles of main and 1,274 miles of local roads. Government railway: 118 miles of 4 ft. 8½ in. gauge; 118 miles of telegraph

and 21,857 miles of telephone (1933). Cable: Communication by cable with the United Kingdom, Europe, North America, and other parts of the world is maintained by Imperial and International Communications, Ltd.

Three wireless stations are maintained by the Trinidad Government, at Port-of-Spain, North Post, and Tobago respectively. The North Post Station dealt exclusively with ship and Tobago traffic, while communication with British Guiana, St. Martin, Venezuela and Paramaribo is carried out by Port-of-Spain.

Number of post offices, 120; of telegraph offices, 43. There are four private banks. British currency and United States gold are legal tender. There is no Colonial coinage, but Government 1 and 2 dollar notes (*4s. 2d.* and *8s. 4d.*), are issued. Government savings-banks are established in 36 districts with a Head Office in Port-of-Spain, the amount of deposits at the end of 1933 being 457,343*l.*, and the total number of depositors, 41,901.

TOBAGO is situated about 26 miles north-east of Trinidad, and has an area of 116 square miles.

The total value of the exports in 1933 was 63,403*l.*, of which cocoa amounted to 29,669*l.* and copra to 16,919*l.*

Virgin Islands. See LEEWARD ISLANDS.

WINDWARD ISLANDS.

Consist of Grenada, St. Vincent, the Grenadines (half under St. Vincent half under Grenada), and St. Lucia, and form the eastern barrier to the Caribbean Sea between Martinique and Trinidad.

Governor & Commander-in-Chief.—Sir Selwyn MacGregor *Grier*, K.C.M.G. (January 8, 1935), 2,500*l.*, 500*l.* duty allowance and 500*l.* travelling allowance —resident at St. George's, Grenada.

Each island has its own institutions; there is no common legislature, laws, revenue, or tariff; but colonies unite for certain other common purposes (West Indian Court of Appeal). The legal currency is British sterling and United States gold coins. Barclay's Bank and the Royal Bank of Canada issue 5-dollar notes.

GRENADA.—*Colonial Secretary.*—H. R. R. *Blood.* There is a Legislative Council consisting of the Governor, with 7 other official and 3 unofficial members nominated by the Crown and 5 elected members. AUSTRALASIA AND OCEANIA.

THE British Territories in Australasia comprise the Commonwealth of Australia; the Australian Dependencies of Papua and Norfolk Island, the

Dominion of New Zealand and adjacent islands, and the Crown Colony of Fiji. The British possessions in Oceania include the Solomon and Tonga Islands, and many other groups of islands and islets scattered over the Pacific. There are also the mandatory territories of New Guinea, Western Samoa, and Nauru.

THE COMMONWEALTH OF AUSTRALIA.

The Commonwealth of Australia, consisting of the six colonies (now denominated Original States) of New South Wales, Victoria, Queensland, South Australia, Western Australia, and Tasmania, was proclaimed on January 1, 1901. An Order in Council, February 7, 1933, placed under the authority of the Commonwealth of Australia the Antarctic territories, comprising all the islands and territory, other than Adélie Land, situated south of 60° S. latitude, and lying between 160° E. longitude and 45° E. longitude.

On September 1, 1906, the administration of Papua was transferred to the Commonwealth (*see* Papua).

Legislative power is vested in a Federal Parliament, consisting of the King, represented by a Governor-General, a Senate, and a House of Representatives. There must be a session of Parliament at least once every year. The Senate consists of 36 Senators (at least six for each of the Original States voting as one electorate) chosen for six years. In general, the Senate is renewed to the extent of one-half every three years, but in case of prolonged disagreement with the House of Representatives, it may be dissolved, and an entirely new Senate elected. The House of Representatives consists, as nearly as may be, of twice as many members as there are Senators, the numbers chosen in the several States being in proportion to population (excluding aborigines) as shown by the latest statistics, but not less than five for any original State. Number in 1933, 76. The Northern Territory, by virtue of an Act passed in 1922, elects a member who is not entitled to vote, but may take part in any debate in the House. The House of Representatives continues for three years from the date of its first meeting, unless sooner dissolved. Every Senator or Member of the House of Representatives must be a natural-born subject of the King, or have been for five years a naturalised subject under a law of the United Kingdom or of a State of the Commonwealth. He or she must be of full age, must posses electoral qualification, and have resided for three years within the Commonwealth. The franchise for both Chambers is the same and is based on universal adult (male and female) suffrage.

The legislative powers of the Federal Parliament embrace commerce, shipping, &c.; finance, banking, currency, &c.; defence; external affairs; postal, telegraph, and like services; census and statistics; weights and measures; copyright; railways; conciliation and arbitration in industrial disputes extending beyond the limits of any one State; and other matters. The Senate may not originate or amend money bills; and disagreement with the House of Representatives may result in dissolution, or, in the last resort, a joint sitting of the two Houses. No religion may be established. The Federal Parliament is a government of limited and enumerated powers, the several State Parliaments retaining the residuary power of government over their respective territories. If a State law is inconsistent with a Commonwealth law, the latter prevails.

At the election for the Lower House held on September 15, 1934, the following parties were returned: United Australia Party, 32; Country Party, 15; Federal Labour Party, 18; Lang Labour Party, 9.

The Executive power, vested in the King, is exercised by the Governor-General, assisted by an Executive Council of thirteen responsible Ministers of State. These Ministers are, or must become within three months, members of the Federal Parliament.

Governor-General.—His Excellency the Rt. Hon. Sir Isaac Alfred *Isaacs*, P.C., G.C.M.G., Commander-in-Chief of the Commonwealth of Australia and its Dependencies. Assumed office on January 22, 1931.

The Cabinet (October, 1934), is as follows:—

Prime Minister and Treasurer.—Rt. Hon. J. A. *Lyons*, M.L.A.

Minister for Commerce.—Rt. Hon. E. C. G. *Page*, M.L.A.

Minister for External Affairs and Minister Controlling Territories.—Senator the Rt. Hon. Sir G. F. *Pearce*, K.C.V.O.

Attorney-General and Minister for Industry.—Hon. R. G. *Menzies*, K.C., M.L.A.

Vice-President of the Executive Council and Minister for Health and Repatriation.—Rt. Hon. W. M. *Hughes*, K.C., M.L.A.

Minister for Defence.—Hon. Archdale *Parkhill*, M.L.A.

Minister for the Interior.—Hon. T. *Patterson*, M.L.A.

Minister for Trade and Customs.—Hon. T. W. *White*, D.F.C., V.D., L.A.

Postmaster-General and Minister Controlling Development and Science and Industry.—Senator the Hon. A. J. *McLachlan.*

High Commissioner in London.—Rt. Hon. S. M. Bruce, C.H., P.C., M.C. (Appointed September 21, 1933.)

Official Secretary for the Commonwealth in London.—J. G. McLaren, C.M.G. (February 16, 1933).

Representative in the Commonwealth of H.M. Government in the United Kingdom.—E. T. Crutchley, C.M.G., C.B.E.

Commonwealth Trade Representative in France.—C. H. Voss.

Commissioner-General for Australia in the United States of America.—Vacant.

Official Secretary for the Commonwealth in America.—D. McK. Dow.

Australian Trade Commissioner in Canada.—L. R. *McGregor.*

The Constitution provides for a Federal Judicature and an Inter-State Commission on Trade and Commerce, and for the admission or creation of new States. The Inter-State Commission was brought into existence in 1913 and the Commissioners were appointed for a term of seven years. At the expiration of this period no fresh appointments were made. In 1911 the Commonwealth acquired from the State of New South Wales the Yass-Canberra site for the Federal Capital, with an area of 912 square miles. Building operations were begun in 1923 and Parliament was opened at Canberra on May 9, 1927, by H.R.H. the Duke of York. A further area of 28 square miles at Jervis Bay was acquired in 1917 for purposes of a Naval College, with the right to construct a railway from the Capital thereto.

Proposed laws for the alteration of the Constitution must be submitted to the electors, and they can be enacted only if approved by a majority of the States and by a majority of all the electors voting.

Pensions and Maternity Allowances.

The Invalid and Old Age Pension Acts provide for the payment of invalid and old age pensions at such rates as the Commissioner deciding the question deems sufficient, but so that the amount shall not exceed 52*l.* a year, nor the pensioner's whole income (including the pension) exceed 84*l.* 10*s.* a year. By special provision, made in 1920, a permanently blind person may receive an amount of pension (not exceeding £52) as will make his total income equal to £221 per annum, or such other amount as is declared to be a basic wage. Old age pensions are granted upon application to persons who are at least 65 years of age and have lived in Australia or Australian territory at least 20 years. In the case of women, however, and of men subject to certain disability, the pension may be paid from age 60. Invalid pensions are granted to persons who have lived at least 5 years

in Australia, have there become incapacitated, and have no other sufficient means of support. The Financial Emergency Act, 1931, reduced the amount of old age and invalid pensions by 2*s.* 6*d.* per week and the income limit to 78*l.* per annum. In the case of blind pensioners the pension has been reduced to an amount not exceeding 45*l.* 10*s.*, but at present the limitation on total income has not been altered. At June 30, 1934, there were 183,397 old age and 77,282 invalid pensioners, the payments to whom for 1933–34 amounted to 10,963,090*l.*

On October 9, 1912, a Maternity Act was passed providing for the payment of an allowance of 5*l.* in respect of every viable child born (alive or dead) in Australia. The mother must be a native of the Commonwealth or intend to settle permanently therein. No payment is made in the case of an aboriginal or an Asiatic. The amount of maternity allowance which, under the provisions of the Financial Emergency Act, 1931, is only payable where the total income of claimant and her husband did not exceed 260*l.* for the preceding 12 months, was reduced to 4*l.* From August 1, 1934, the income limit was increased by 13*l.* per annum in respect of each previous child of the claimant under the age of 14 years and living at the date of the birth, but the maximum income must not exceed 299*l.* The amount of the allowance payable was also increased by 5*s.* 5*d.* up to a maximum of 5*l.* in respect of each such child. To June 30, 1934, 2,723,977 claims were paid—75,781 in 1933–34—and the aggregate expenditure totalled 13,379,216*l.*, of which 302,928*l.* was paid in 1933–34. War pensions are subject to a reduction of 22½ per cent. under the same Act. At June 30, 1934, Australian War pensioners numbered 266,954, to whom 7,048,592*l.* was paid in 1933–34.

Justice.

The judicial power of the Commonwealth is vested in a Federal Supreme Court (the High Court of Australia), consisting of a Chief Justice and five Justices, appointed by the Governor-General in Council. The High Court has original jurisdiction in all matters arising under treaties, between States of the Commonwealth, or affecting representatives of other countries, as well as in other matters as empowered by the Parliament. It may also hear and determine appeals from judgments of its own Justices exercising original jurisdiction, and from judgments of any other Federal Court, or of the Supreme Court of any State, subject to certain rights of final appeal to the King in Council. The Commonwealth Court of Conciliation and Arbitration consists of a Chief Judge and two other Judges and a Conciliation Commissioner. The Federal Court of Bankruptcy is presided over by a Judge.

Finance.

Actual revenue and expenditure for 1930-31 to 1933-34 are given in the following table. Under the 'Surplus Revenue Act, 1910,' the amount payable by the Commonwealth to each State was a sum equivalent to 25 shillings per head of the population as estimated by the Commonwealth Statistician at 31st December in each year. In 1927 the States Grants Act abolished the *per capita* payments as from 30th June, 1927. In 1929 in accordance with a Commonwealth Referendum, the Commonwealth took over all State Debts existing on 30th June, 1927, and will pay 7,584,912*l.* a year for 58 years towards the interest charges thereon, and will make substantial contributions towards a sinking fund to extinguish existing debts in 58 years and future debts in 53 years. The Commonwealth Government will arrange all future borrowing for both Commonwealth and States through

a Loan council consisting of representatives of Commonwealth and State Governments.

Total	£'000[1]	393,051	829,508	1,222,559

[1] 'Face' or 'book' value, leaving out of account currency changes since the loans were floated.
[2] Payable in terms of dollars which have been converted on the basis of 4·866 dollars to £.

The nominal annual interest payable (taking no account of exchange) was 49,299,637*l.*, an average rate of 4*l.* 0*s.* 8*d.* per cent.

Before the 1931 Conversion Loan, the average rate of interest on internal debt was about 5·35 per cent. At June 30, 1934, the average had fallen to 3·74 per cent.

Debt per head of population at June 30, 1934, equalled 183*l.*, while the annual interest charge, exclusive of exchange, amounted to 7·383*l.* per head.

Defence.

Army.

The Defence Forces of Australia are administered by the Department of Defence, which is presided over by the Minister for Defence. The organization is divided into the Council of Defence. 3 Service Boards (Naval, Military and Air Boards). 3 Civilian Branches (the Munitions Supply Board, Civil Aviation Branch and a Secretariat).

The Council of Defence, under the Presidency of the Prime Minister, deals with policy, and co-ordinates the requirements of the sea, land and air forces.

The Military Forces of Australia are administered by a Military Board, consisting of the Minister for Defence (President), the Chief of the General Staff, the Adjutant-General, the Quartermaster-General, the Finance Member and a Secretary. The Military Forces consist of the Permanent Forces and the Citizen Forces. All male inhabitants who have resided in Australia for six months and who are British subjects, and are between the ages of 18 and 60 years are, in time of war, liable to serve in the Citizen Forces. The Defence Act also provides that all boys on attaining the age of 14 years must register and undergo Cadet Training. At the age of 18 years, Senior Cadets are transferred to the Citizen Forces. The Citizen Forces are maintained for Home Defence purposes only, but the Act permits individuals to volunteer for service overseas. In November, 1929, the above-mentioned compulsory clauses of the Defence Act were suspended, and the Citizen Forces and Cadet Forces are now raised by voluntary enlistment.

The Permanent Forces are organized in such a way as to enable them to carry out administrative and instructional duties in times of peace, to carry out preparations for defence, and to form the nucleus of the technical Services. The Commonwealth of Australia is divided into 6 military districts generally corresponding with the boundaries of the 6 States.

The Citizen Forces are organized into 2 cavalry divisions, 4 infantry divisions and three mixed brigades capable of being formed into a 5th infantry division.

The Peace Organization of each cavalry division is 3 cavalry brigades, 1 cavalry field artillery brigade, 1 field squadron, engineers, 1 cavalry divisional signals, 1 supply company and 1 transport company, army service corps. 3 cavalry field ambulances, 1 cavalry hygiene section, and 3 cavalry mobile veterinary sections.

The Peace Organization of each infantry division is 3 infantry brigades (each 3 battalions), 3 field artillery brigades (each 2 field and 1 howitzer battery), 3 field companies (Engineers), 3 signal companies, 1 supply and 1 transport company, army service corps, 3 field ambulances, 1 field hygiene section and 1 mobile veterinary section.

In addition to the Field Army there are garrison troops in each district

for the purpose of manning the fortresses and carrying out essential services of supply and maintenance.

Beyond the firing of an annual Musketry Course, members of rifle clubs receive no military training. There are 1,134 rifle clubs with a total membership of 43,252. The administration of rifle clubs is under the control of the Military Board and by a system of allotment of the individual clubs as a reserve to various units of the Militia Forces it is planned to take advantage of the rifle club organization to augment the Militia Forces.

The Army educational establishments of the Australian Army are the Royal Military College of Australia, where candidates are prepared for commissions in the Permanent Forces, the School of Artillery which provides the technical instruction for the artillery arm of the Service, and the Small Arms School which trains officers, warrant officers and non-commissioned officers of the Permanent Forces to carry out instruction in infantry weapons.

The strengths of the forces are: Permanent Forces (including cadets at the Royal Military College), 305 officers and 1,374 other ranks; Citizen Forces, 2,401 officers and 25,454 other ranks.

Navy.

Since the establishment in 1911 of the Royal Australian Navy, a squadron commanded by a Rear-Admiral, has been provided and maintained by the Commonwealth. The policy has been to maintain a force as an active unit in the scheme of Empire Naval Defence. The Naval Board, which is responsible for administration and control, consists of the Minister for Defence with two Naval Members and one Finance Member, the seat of administration being at Melbourne. The personnel is now almost entirely Australian recruited and trained, but in order to ensure close co-operation with the Royal Navy a system of exchange of ships and officers is normally followed. This exchange, which was temporarily suspended in 1930 owing to financial stringency, has been resumed, H.M.S. *Sussex* being attached to the Australian Squadron and H.M.A.S. *Australia* to the First Cruiser Squadron, Mediterranean Fleet. Fleet units in August, 1934, included the 10,000 ton cruisers *Canberra* (Flagship) and *Australia*, the older cruisers *Adelaide* (5,100 tons) and *Brisbane* (5,120 tons); the seaplane carrier *Albatross* (5,000 tons, with accommodation for 9 seaplanes); the flotilla leaders *Stuart* and *Anzac*: 9 destroyers, 1 surveying sloop, a depot ship and a fleet oiler. A cruiser to be named *Sydney* is now being constructed in England for the Royal Australian Navy, and will replace the *Brisbane*, the effective life of which has expired. In addition a sloop, to be named *Yarra*, is being built at Cockatoo Island, Sydney. The only sea-going ships in full commission in August, 1934, were the *Canberra*, *Australia*, *Stuart*, 2 destroyers and the surveying sloop. The main repair base and store depot are at Sydney, while training establishments are centred at Flinders Naval Depot, Westernport, near Melbourne. The R.A.N. College, for the training of Naval Cadets, is also at Westernport. The authorised total Active Service personnel for 1934–35 is 4,100, which includes 387 officers. Period of first engagement for ratings is 12 years.

New ships under construction include the 7,000-ton cruiser *Sydney*, building on the Tyne, and the sloop *Yarra*, completing at Cockatoo Dockyard, Sydney. The 6 seaplanes carried by the *Albatross* have been replaced by Seagull Amphibians of more up-to-date type.

The Reserve Forces comprise:—R.A.N.R. (Seagoing), 48 officers;

R.A.N.R. (Citizen Naval Forces), 300 officers, 5,200 ratings; R.A.N.V.R. 53 officers; Emergency List (Reserve of Officers), 150; R.A.F.R. 255 petty officers and men.

Air Force.

There is a Royal Australian Air Force, administered by the Air Board, consisting of three Air Force members and a finance member. To this force is entrusted the air defence of Australia, the training of personnel for co-operation with the naval and military forces, and the refresher training of pilots engaging in civil aviation. The present establishment of the force includes the following units:—(*a*) Headquarters, Royal Australian Air Force, with representation in London; (*b*) a Flying Training School, (*c*) an aircraft depot, (*d*) two service landplane squadrons, and (*e*) one fleet co-operation flight. The approved establishment of the Permanent Air Force in June, 1934, was 102 officers and 788 airmen, and of the Citizen Air Force 49 officers and 261 airmen.

Production.

In 1932, 765,245,825 acres, representing 40·20 per cent. of the total area of Australia, were either unoccupied or occupied by the Crown; only 6·50 per cent. had been actually alienated (123,801,538 acres); 3·39 per cent. (64,595,525 acres) was in process of alienation; and 49·91 per cent. (950,068,212 acres) was held under the various forms of leases and licences.

The area under crops (distinguishing the principal crops) in Australia and the yield in 1932–33 were as follows:—

Crops	Total Acreage	Total Yield	Yield per Acre
	Acres	Bushels	Bushels
Wheat	15,765,504	213,926,981	13·57
Oats	1,027,262	16,159,628	15·73

[3] Including 102,000 tons for wine from 48,084 acres of productive vines.
[4] Gallons per acre of productive vines.
[5] Malting: other 19·33.
[6] Ordinary: sweet potatoes, 2·35.

The total area under all crops in 1932–33 was 22,408,489 acres. The total value of agricultural production in the same year was 75,562,000*l.* For the year 1933–34 the estimated area under wheat was set down as 14,992,276 acres, and the estimated yield as 175,369,749 bushels. Of Australia's total forest area of 24,500,000 acres, 15,946,114 acres have been permanently dedicated for timber.

At the end of 1932 there were in Australia 1,765,437 horses, 12,783,137

cattle, and 2,926,931 pigs. At the end of 1933, according to official estimates, there were 106,954,761 sheep.

The production of wool in 1932-33 amounted to 1,061,672,628 lb., and the exports (Australian produce) to 849,900,729 lb. greasy, valued at 32,107,159*l.*, and 77,758,262 lb. scoured and tops, etc., valued at 4,299,831*l.* Of the total production of 1,062,000,000 lb. of wool in 1932–33, about 942,000,000 lb. consisted of wool shorn, 66,000,000 lb. were made up of dead and fell-mongered wool, while 54,000,000 lb. were contained on skins exported. The butter produced in the year 1932–33 amounted to 419,674,803 lb.; cheese, 36,933,306 lb.; bacon and hams, 68,578,347 lb.

The mineral output was valued as follows in 1932 and 1933:—

Mineral	1932	1933	Mineral	1932	1933
	£	£		£	£
Gold[1] . . .	5,211,892	6,406,069	Coal . . .	5,693,274	5,975,900

Commerce.

Throughout Australia there are uniform customs duties, and trade between the States is free. For 1933–34, the net revenue collected from customs duties amounted to 22,324,438*l.*, and from excise to 12,090,350*l.* The total net revenue from Customs and Excise for 1933–34, after allowing for drawbacks and repayments, was 34,414,788*l.*

The following table shows for 5 years the value of the imports and exports merchandise, bullion, and specie in British currency values.

The value of goods imported represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. The value of goods exported is generally the value in the principal markets of the Commonwealth in the usual and ordinary commercial acceptation of the term.

The Customs Tariff Act of 1933 provides for preference to goods produced in and shipped from the United Kingdom to Australia, and for reciprocal tariff agreements with other countries. A trade agreement signed at the closing session of the Imperial Economic Conference at Ottawa, Canada, on August 20, 1932, provides for increased preference between the United Kingdom and the Commonwealth of Australia. A reciprocal customs tariff which had been in operation between Australia and the Union of South Africa since 1906 was repealed by Customs Tariff 1926. The repeal came into force on July 1, 1926. On September 1, 1922, a reciprocal tariff agreement, revised in 1922, 1926, 1928, and 1933 came into operation between Australia and New Zealand. The agreement made with Canada in 1925 was considerably extended by the new treaty which came into operation on August, 1931.

The Customs Tariff (Papua and New Guinea Preference) 1926 (revised in 1933), came into force in April, 1926, and provides that imports of certain goods specified in the schedule to the Act, and being the produce of the Territory from which they were imported, shall be free of duty.

[1] Includes cost of Brisbane-Grafton standard gauge line which is not apportioned to States.

The staff employed on Government Railways numbered 92,617 persons.

Private railways in Australia, open for general traffic, 1933, 844 miles.

The construction of a trans-continental railway from north to south has been authorized. The terminus of the Northern Territory line has been carried down from Mataranka to Birdum (316 miles from Darwin), while the existing line from Port Augusta to Oodnadatta has been extended as far north as Alice Springs.

In Victoria a scheme for the electrification of the railways in the Metropolitan area has been carried out. Electric railways are also under construction in Sydney.

The State railway gauge is: In New South Wales, 4ft. 8½in. (40 miles, 3ft. 6in.); in Victoria, 5ft. 3in. (122 miles, 2ft. 6in.); in Queensland, 3ft. 6in. (69 miles, 4ft. 8½in. and 30 miles, 2ft. 0in.); in South Australia, 5ft. 3in. for 1,451 miles, the rest, 3ft. 6in.; in W. Australia, 3ft. 6in.; and in Tasmania, 3ft. 6in. (11 miles, 2ft. 0in.). Of the Federal lines, the gauge of the Trans-Australian and Federal Territory is 4ft. 8½in.; and that of the Oodnadatta and Northern Territory is 3ft. 6in. A commission has recommended a uniform 4ft. 8½in. gauge, and this has been accepted in principle. The unification is estimated to cost 20,851,000*l.*

Tramways.

The following are the particulars of the operations of the electric tramway of the several States of the Commonwealth for the year 1932–33:—

[1] Includes motor omnibuses.

There are also 22 miles of steam, and 26 miles of cable and horse traction, making a total of 622 miles of tramways.

Of the total length the several Governments control 400 miles, municipal authorities 186, and private enterprise 36 miles.

Posts and Telegraphs.

Postal and telegraph business, year ended June 30, 1933: number of Post and Receiving Offices, 8,014. In 1932–33, parcels received and dispatched, 9,044,400; registered articles, 6,710,525. Telegrams dispatched, 12,778,028, and cablegrams received and dispatched, 1,219,079; radio-telegraph messages, 131,463. Receipts, 1932–33: Post Office, 5,845,797*l.*; telegraphs and radio, 1,301,957*l.*; telephones, 5,445,838*l.*; total revenue, 12,593,592*l.* Expenses: Post Office, 4,074,849*l.*; telegraphs and radio, 1,238,701*l.*; telephones, 3,603,352*l.*; total, 8,916,902*l.*

At June 30, 1933, 6,071 telephone exchanges with 363,776 lines and 487,662 instruments connected were in operation.

Civil Aviation.

Civil flying in the Commonwealth and Territories is subject to legislative control by the Commonwealth Government. The administration of the Air Navigation Act and Regulations is a function of the Department of Defence, the Minister being assisted by a separate Branch under a Controller of Civil Aviation.

At June 30, 1934, the following regular air services were in operation over the following routes:—"*Major*" *subsidised services:* Perth–Derby (1,467 miles), Derby–Wyndham (600 miles), Brisbane–Camooweal (1,269 miles), Cloncurry–Normanton (215 miles), Daly Waters–Birdum (50 miles), Camooweal–Daly Waters (475 miles). "*Minor*" *subsidised services*: Brisbane–Cracow (250 miles), Rockhampton–Mt. Coolon (330 miles), Sydney–Bega (205 miles), Adelaide–Port Pirie–Eyre's Peninsula (475 miles). *Unsubsidised services:* Perth–Adelaide (1453 miles) (until Jan 4, 1934 this was a "Major" subsidised service), Brisbane–Sydney (500 miles), Melbourne–Launceston, via Flinders Island (356 miles), Launceston–Flinders Island (120 miles), Brisbane–Rockhampton (325 miles).

With the exception of the last-mentioned, surcharged air mail is carried on all services under arrangements with the Postmaster General's department. At June 30, 1934, seven subsidised contractors were operating under contracts which provided that such space as is required on each trip must be reserved for mails; th letters for transmission being surcharged 3*d.* per half ounce. The total route mileage of these services is 5,386 miles. During 1933, 553,963 miles were flown by the subsidised contractors without a fatal accident.

Civil Aviation expenditure for the year 1933–34 was 152,340*l.*

At June 30, 1934, there were 130 licensed public aerodromes under the control of local authorities. The total number of recognised landing grounds in Australia at June 30, 1934, was 334.

Extensive use is made of air transport in the Mandated Territory of New Guinea, where several companies operate daily services for the conveyance of passengers, mails and heavy freight between the coast of Salamaua and the goldfields, some 80 miles inland, the only alternative method of tranportation being the native carrier. The freight conveyed by air during the year 1933 approximated 4,903 tons, the major proportion comprising hydro-electric power plant and dredging machinery for the Bulolo goldfields.

Motor Vehicles.

At June 30, 1933, 617,232 motor vehicles, including 438,499 motor cars, 72,896 motor cycles, and 105,837 commercial vehicles were registered in Australia. The Revenue derived from Registration fees and Motor Tax was 4,119,379*l.* for the year. The registrations were equivalent to 93·1 vehicles per 1,000 of population.

Wireless Telegraphy.

Wireless telegraphy stations are in operation in all the State Capitals, and in certain other places. 468,390 wireless Broadcast Listeners' licences had been issued at June 30, 1933, and 597,949 at June 30, 1934. The National Broadcasting Service controlled by the Postmaster-General's Department now operates twelve broadcasting stations. In addition fifty-three other stations were licensed at June 30, 1934. Two beam stations have been erected, one for direct communication with London, and the other for direct communication with North America; direct beam wireless service with London was established on April 8, 1927, and with North America on June 16, 1928.

Money and Credit.

On January 20, 1913, the Commonwealth Bank was opened at Sydney. Average deposits for June 1934 quarter (General Bank) were 40,963,810*l.*, of which 12,374,013*l.* represented non-interest bearing deposits. The deposits of the savings bank which was created a separate department on June 9, 1928, aggregated 123,608,000*l.* at June 30, 1934. The Savings Bank business in the States of New South Wales, Queensland, and Western Australia is wholly with the Commonwealth Savings Bank. The bank started without capital, and began to make profits in 1913–14. At June, 1930, the capital was 4,000,000*l.*, which was transferred from the reserve and redemption funds. Aggregate net profits to June 30, 1933, exclusive of Note Issue Branch amounted to 10,741,898*l.*, and the Reserve Fund to 1,593,882*l.*

There are, besides, 16 other banks, including 2 State Government institutions, trading in Australia. The total Shareholders' funds of all banks aggregated 135,814,281*l.*, including Paid-up Capital, 79,835,081*l.*, and Reserves, 52,906,963*l.*

The total liabilities of all cheque-paying banks trading in the Commonwealth, in the quarter ended June 30, 1934, were 386,795,289*l.*, and the deposits, excluding Savings Bank deposits in the Commonwealth Bank were 344,035,136*l.* Assets amounted to 437,390,554*l.*, of which advances totalled 262,715,146*l.* and Government and Municipal securities 98,621,741*l.*

The total Savings Banks deposits in the Commonwealth on June 30, 1934, was 210,103,000*l.* (31·5*l.* per head of population).

There are 2 mints in the Commonwealth, at Melbourne (opened

1872), and Perth (1899). Besides issuing gold coin (sovereigns and half-sovereigns) they also issue gold bullion, partly for the use of local manufacturers (jewellers and dentists), and partly for export. Since 1916 silver and bronze coins have been minted at the Sydney and Melbourne Mints on behalf of the Commonwealth Treasury. The Sydney Mint was closed at the end of 1926.

The gold issues during 1933 at the Perth mint amounted to 2,721,677*l.*, and those of the Melbourne mint to 820,961*l.*, making a total of 3,542,638*l.* for the Commonwealth.

Silver coinage to the value of 158,600*l.* was issued during the year ended June 1934, and 44,400*l.* during the year ended June 30, 1933. The total issues of gold coin and bullion to the end of 1933 were 404,197,946*l.* and 41,200,475*l.* respectively.

On June 25, 1934, notes issued by the Commonwealth and unredeemed amounted to 46,300,958*l.* The amount held in reserve comprising gold and English sterling on that date was 15,507,537*l.*, representing 33·49 per cent. of the liability. Bank notes ceased to circulate after 1911.

During 1932 an amendment to the Commonwealth Bank Act permitted the purchase of "English sterling" for note issue reserve purposes, "English sterling" being defined as "currency which is legal tender in the United Kingdom," and includes *inter alia* Bills of Exchange, and secured advances maturing in not more than three months.

NORFOLK ISLAND, 29° S. latitude, 168° E. longitude, area 13 square miles, population (June 30, 1931) 992 (545 males and 447 females). The island was formerly part of the Colony of New South Wales and then of Van Diemen's Land. It has been a distinct settlement since 1856, and under an Order-in-Council of 1900 was governed by the Governor of New South Wales; but from July 1, 1914, the affairs of the island have been administered by the Commonwealth Government. The island, which is very picturesque and possesses a delightful climate, coupled with a fertile soil, is especially suitable for the cultivation of citrus fruits, bananas, and coffee. In 1931-32 the imports (mostly from the Commonwealth) were valued at 40,278*l.*, and the exports, 20,555*l.*

NEW SOUTH WALES.

Constitution and Government.

New South Wales became a British Possession in 1788; a partially elective Legislative Council was established in 1843, and responsible government in 1856. New South Wales federated with the other Australian States

to form the Commonwealth of Australia in 1901. The legislative power of the State is vested in a Parliament of two Houses, the Legislative Council and the Legislative Assembly. The Legislative Council has been reformed. The new House consists of 60 members, elected at a joint sitting of both Houses of Parliament, for a term of twelve years. For the inaugural Council four groups of fifteen were elected for 3, 6, 9 and 12 years respectively. Thereafter fifteen members will retire in rotation every three years. Members receive no remuneration. The Legislative Assembly has 90 members. Postal voting is permissible. Every British subject above 21 years of age, having resided six months in the Commonwealth, three months in the State, and one month in the electorate, is qualified to be enrolled as an elector, and enrolment is compulsory. Members of the Legislative Assembly are paid an annual salary at the rate of 670*l.* per annum, and they are allowed to travel free on Government railways and tramways in the State. The Premier receives an annual salary of 1,710*l.*; the Attorney-General, 1,486*l.*; the Vice-President of the Executive Council, 1,018*l.*; and a sum of 12,510*l.* is divided among remainder of the Cabinet. The leader of the Opposition receives an additional allowance of 176*l.* per annum. The duration of a Parliament is not more than three years. The Women's Legal Status Act, 1918, gives women the same political rights as men.

The Legislative Assembly, elected on June 11, 1932, consists of the following Parties: United Australia and United Country (Government parties), 66; Labour, 24.

The executive is in the hands of a Governor, appointed by the Imperial Government.

Governor.—Brigadier-General the Hon. Sir A. *Hore-Ruthven*, V.C., K.C.M.G., C.B., D.S.O. (Appointed September, 1934.)

In the exercise of the executive the Governor is advised by a Cabinet consisting of the following members (June 17, 1932):—

Premier and Colonial Treasurer.—The Hon. B. S. B. *Stevens*, M.L.A.

Deputy Premier and Minister for Transport.—Lieut.-Col. the Hon. M. F. *Bruxner*, D.S O., M.L.A.

Minister of Justice.—The Hon. L. O. *Martin*, M.L.A.

Official Representative in London.—A. E. *Heath.* (1934.)

Local Government.

A system of Local Government extends over the whole of the State, except the Western Land Division, where, however, a few municipalities are incorporated. There are 181 boroughs and municipal districts under the title of municipalities, and 138 corporate bodies called shires. The central Government of the State affords financial assistance to the municipalities and shires in the form of endowment or of grants for special purposes. The total Government Assistance in 1932 was for Municipalities 479,787*l.*, and for Shires 841,553*l.*

Area and Population.

New South Wales is situated almost entirely between the 29th and 37th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 309,432 sq. miles, inclusive of Lord Howe Island, 5 sq. miles, but exclusive of the Federal Capital Territory (912 sq. miles at Canberra and 28 at Jervis Bay).

The population (excluding aboriginals) at six consecutive censuses was :—

Year	Males	Females	Total	Pop. per square mile	Average increase per cent. per annum
1881	410,211	339,614	749,825	2·42	4·07

Education.

The State maintains a system of national education, and instruction is compulsory between the ages of 7 and 14 years. In all State schools education is free. There is a large number of private schools subject to State inspection.

There were at the end of 1933, 3,437 State schools, including 38 High schools; 2,012 public primary schools; 38 evening continuation schools; 3 industrial and reformatory schools. During December quarter, 1933, there were 382,404 children enrolled. The average attendance during the year was 316,404. The number of teachers at the end of the year was 12,479. The pupils receiving kindergarten instruction at Government schools (1933) numbered 15,299. The total Government expenditure on education during the year ending June, 1933, was 3,985,640*l*.

At the end of 1933 there were 751 private schools (with 94,965 pupils and 4,682 teachers), of which 534 were Roman Catholic Denominational Schools, having 3,274 teachers and 80,787 scholars. The Church of England Denominational Schools numbered 50 with 466 teachers and 4,852 scholars; other denominational schools 26, teachers 254, pupils 2,743. The unde-

nominational private schools numbered 141, the teachers 688, and scholars 6,583.

The University of Sydney, founded in 1850, had (1933) 3,062 individual students (including 757 women) with 299 professors, lecturers and demonstrators. There are 5 denominational colleges, Church of England, Roman Catholic (one for men and one for women), Presbyterian, and Methodist, and an undenominational college for women, affiliated to the University. A Government training college for teachers is situated in the University grounds and another at Armidale. The Technical College, with branch schools, had a total enrolment of 17,102 individual students in 1933.

Widows' Pensions and Family Allowances.

For particulars of old age and invalidity pensions see under *Australia*. The numbers current in New South Wales on June 30, 1934, were: old age, 71,132 (Males, 31,548; Females, 39,584); invalidity, 33,353 (Males, 14,618; Females, 18,735).

The Widows' Pensions Act of New South Wales, 1925–1932, provides for pensions to widows with dependent children under fourteen years of age, also to other widows in special cases. The maximum pension is 17*s*. 6*d*. per week with 8*s*. 9*d*. for each child under 14 years. The amount of each pension is ascertained by deducting from the maximum annual amount 1*l*. for each 1*l*. by which the widow's net income exceeds 39*l*. Pensions became payable on March 10, 1926. On June 30, 1934, pensions were being paid to 6,399 widows, the amount paid during the year was 529,764*l*.

The Family Endowment Act, 1927, as amended by later legislation, provides for the payment of endowment in respect of each dependent child, except one, under 14 years of age in cases where the 'family income,' during the twelve months preceding the date of claim, is less than the appropriate living wage (fixed by the Industrial Commission to cover the maintenance of a man, wife and one child, current rate 67*s*. 6*d*. per week). The Endowment, at a maximum rate of 5*s*. per week, is payable to the mothers. A residence qualification of two years in New South Wales is prescribed in respect of the mothers and of the children except when a child is under 2 years and was born in the State. At June 30, 1934, endowment was payable to 63,071 families. The amount of endowment paid during the year ended June 30, 1934, was 1,960,972*l*. State relief is also given to neglected and destitute children.

Unemployment Relief.

Special measures have been undertaken by the State to alleviate the effects of widespread unemployment which developed as a result of world economic depression. A system of food relief and relief works was organised and a special levy was imposed on incomes to provide funds. Orders for food relief are issued to persons whose family income does not exceed a certain limit. The income limit and the value of the food order vary according to the size of the family to be maintained. The income limit is 25*s*. per fortnight in the case of single adults, 40*s*. for married couples, 50*s*. and 60*s*. for married couples with one and two children respectively, and it rises by 5*s*. per child up to five children and by 6*s*. for each additional child. The value of the food relief ranges from 13*s*. per fortnight for adults and 21*s*. 6*d*. for married couples, to 33*s*. 6*d*. for married couples with one child, with 6*s*. per fortnight for each additional child.

Where practicable, work is provided instead of sustenances under a scheme of emergency relief works conducted by the State and local governing authorities. Persons eligible for food relief are given work for a certain period per week and are paid (in cash) wages calculated on the basis of the standard living wage fixed by the Industrial Commission. The period of work varies according to family responsibilities and the wages earned in this way exceed by several shillings the value of the gratuitous food order for which it is substituted.

Loan moneys appropriated by State and Federal Governments for the relief of unemployment have been expended on such works as water conservation, sewerage and drainage, roads, schools and other public buildings.

Justice and Crime.

In New South Wales legal processes may be grouped within the Lower or Magistrates Courts, or the Higher Courts presided over by Judges. There is also an appellate jurisdiction. Prisoners charged with capital crimes must be tried before the Supreme Court.

Children's Courts have been established with the object of removing children as far as possible from the atmosphere of a public court. There are also a number of tribunals exercising special jurisdiction, *e.g.* the Industrial Commission and the Workers' Compensation Commission.

In 1933 there were 100,075 convictions before magistrates at Courts of Petty Sessions and Children's Courts and 1,024 distinct persons were convicted at the Higher Courts. On June 30, 1933, there were 1,775 convicted prisoners in gaol.

Industrial Arbitration.

Two systems of industrial arbitration and conciliation for the adjustment of industrial relations between employers and employees are in operation in New South Wales—the State system which operates within the State only, and the Commonwealth with jurisdiction in the case of industrial disputes which extend to other parts of the Commonwealth.

The industrial tribunals are authorised to fix minimum rates of wages and other conditions of employment and their awards may be enforced by law. Industrial agreements between employers and organisations of employees, when registered, may be enforced in the same manner as awards.

The principal State tribunal is the Industrial Commission, consisting of a president and two other members, all having the same status as judges of the Supreme Court. It determines the standard of living and the living wage, on which awards and agreements as to wages are based. Conciliation committees representing employers and employees make awards for the various industries. The living wage is adjusted to variations in the cost of living at six monthly intervals. The current rate, 67*s.* 6*d.* per week for men and 36*s.* 6*d.* for women, was fixed in April, 1934.

The chief industrial tribunal of the Commonwealth is the Court of Conciliation and Arbitration, constituted by judges. Awards as to basic wages and hours must be determined by the Chief Judge and not less than two other judges. The majority of the Federal awards contain a provision for the automatic adjustment of the prescribed rates of wages according to the rise and fall of retail price index numbers, issued at quarterly intervals by the Commonwealth Statistician. The current basic rate for Sydney is 68*s.* per week.

The standard of hours in most industries under State jurisdiction is 44 per week; under Federal awards the general standard is 48 hours, but there are a number of exceptions—mainly for 44 hours.

Finance.

The revenue and expenditure of the State for six years was as follows :—

Year ended June 30	Revenue	Expenditure	Year ended June 30	Revenue	Expenditure
	£	£		£	£
1930	43,611,000	48,119,000	1933	46,154,999	49,913,838
1931	37,664,000	45,597,000	1934	42,568,929	45,777,320
1932	42,416,790	56,644,635	1935 [1]	42,322,619	45,232,619

[1] Budget estimates.

In 1933–34, taxation yielded 14,198,932*l.* including Unemployment Relief 5,248,287*l.* and Family Endowment Tax 998,914*l.* (Motor taxes amounted to 1,770,828*l.*). The contribution from the Commonwealth was 2,917,411*l.*

There is an agreement between the States and the Commonwealth which provides for the transfer to the Commonwealth of the debts of the States, annual contributions by the Commonwealth towards the payment of interest on such debts, the establishment of sinking funds in respect of these debts and new loans, and joint borrowing and management of loans through an Australian Loan Council. In terms of the agreement the Commonwealth took over the debts of the States on July 1, 1929, and assumed the liabilities of the States to bond holders.

The loan liability of New South Wales to the Commonwealth in terms of the financial agreement on June 30, 1934, was 325,541,590*l.*, viz. 161,680,120*l.* repayable in London; 13,346,142*l.* repayable in New York, and 150,515,328*l.* repayable in Australia. The annual interest payable was 12,644,318. The Sinking Fund balance was 195,888*l.* Taking into account the sinking fund balance and Commonwealth advances in special deposits accounts, also overdrafts on the loan accounts, the public debt of New South Wales at June 30, 1934 was 322,387,025*l.*

Production and Industry.

I. Land Settlement.

The total area of land alienated or in process of alienation from the Crown on June 30, 1933, was 67,935,508 acres, exclusive of Federal Capital Territory; 6,030,087 acres were held under perpetual lease; 104,849,676 acres under other leasehold tenures; and the total area of land neither alienated nor leased (including roads, reserves for public purposes, etc.) was 19,221,229 acres.

II. Agriculture.

In 1932-33 there were 6,330,370 acres under crops (exclusive of areas double cropped).

The area under cultivation in New South Wales during three years and the principal crops produced were as follows :—

Year ended June 30		1931		1932[1]		1933[1]

[1] Year ended March 31.

It is estimated that yield of wheat harvested for grain in 1933–34 was about 55,000,000 bushels.

In 1932–33, the area planted with cane-sugar was 16,145 acres, of which 7,796 acres were cut for crushing, the yield being 156,818 tons; grapes, total area, 15,444 (including 1,307 not bearing) acres, wines, 2,075,737 gallons; dried grapes, 111,572 cwt., and 5,401 tons of table grapes.

The principal fruit-culture of the State is that of the orange. There were in March, 1933, 32,525 acres under citrus fruit, the production from 27,235 acres was 2,909,142 bushels. The total area under fruits was 83,909 acres, and the total production (from 66,548 acres) was 6,605,300 bushels. During 1932–33 the production of bananas was 533,560 cases from an area of 6,241 acres.

At March 31, 1933, the State had 53,698,236 sheep and lambs, 3,141,174 cattle, 528.943 horses, and 388,273 pigs. The production of wool in the year 1932-33 was 532,080,210 lbs. (greasy), and in 1933–34, according to a preliminary estimate, was 483,000,000 lbs. (greasy). In the year ended June 30, 1933, production of butter was 128,931,070 lbs.; cheese, 7,193,806 lbs.; bacon and ham, 20.476,555 lbs. It is estimated that the production of butter in 1933–34 was about 148,000,000 lb.

There were 130,140 persons engaged permanently in rural holdings during the year ended March 31, 1933.

The estimated forest area is 11,000,000 acres. The total area of State forests amounts to 5,128,305 acres, and 1,420,082 acres have been set apart tentatively as timber reserves. The revenue from royalties, licences, &c., amounted in the year ended December 31, 1933, to 139,211*l.* There were 373 saw-mills in the year ended June 30, 1933, the employees numbering 2,176; the value of plant and machinery was 511,131*l.*, and land and buildings 684,247*l.* The estimated value of production from Forestry in 1932–33 was 1,476,000*l.*

III. Mines and Minerals.

The aggregate value of all minerals won in N.S.W. to the end of 1933 was 474,624,694*l*. The following table gives details for the year 1933 :—

Mineral	Quantity 1933	Value 1933	Total value to end of 1933

[1] Preliminary.

The chief exports are wool, butter, wheat, flour, fruits, timber, meats (frozen and preserved), hides and skins, tallow, leather, pig-lead, tin, copper, coal, and gold.

Of the total value of trade of New South Wales in 1932–33, an amount of 9,266,164*l.* stg. was imported from Great Britain and Northern Ireland and £A22,403,903 (including Bullion and Specie, £A11,436,094) exported thereto. Imports from Great Britain and Northern Ireland in 1933–34 were valued at £10,192,600.

The vessels engaged in the interstate and oversea trade which entered the ports of New South Wales in 1932–33 numbered 2,648, net tonnage 8,781,550 tons; the clearances were 2,648 vessels, 8,741,934 tons. Of the total net tonnage in the year 1932–33, 28·4 per cent. was owned in Australia, 42·5 per cent. in Great Britain, 6·0 per cent. elsewhere in the Empire, and 23·1 per cent. was foreign. Sydney Harbour is the principal port of Australia. The number of vessels, coastal, inter-State, and oversea, which entered in 1933–34 was 6,498, and the net tonnage 9,432,777.

On June 30, 1934, 6,164 miles of Government railway were open and the capital expended on lines open was 140,933,321*l.* The revenue in 1933–34 was 14,890,186*l.*; the working expenses, 11,203,520*l.*[1] The number of passengers carried, 142,520,429.[1] Victorian Government railways (203 miles) which extend over the border into New South Wales are not included in the foregoing figures. There are also 7 private railways having a total

mileage of 109 miles (mainly in mining districts). The tramways, with the exception of one short line, are the property of the Government. There were 191 miles of tramways open for traffic on June 30, 1934, the capital cost being 8,467,884*l.* The gross earnings for 1933-34 were 3,237,942*l.*[1]; the working expenses, 2,533,338*l.*[1] Government operated bus services were introduced in 1933.

The number of registered motor vehicles on June 30, 1934, was 228,324, including 22,571 motor cycles and 48,601 vans and lorries.

There are 118,776 miles of roads in New South Wales, including 27,545 miles metalled. A bridge across Sydney Harbour, the largest arch bridge in the world, was opened in March, 1932. The total capital cost to June 30, 1934, was 10,107,300*l.* Tolls are charged for traffic (except pedestrians) crossing the bridge, and part of the cost is met by a special levy on the capital value of land in the city of Sydney and on certain local areas on the northern side of the harbour.

Banking and Credit.

There were 14 banks trading in New South Wales in 1934, the assets in the June quarter being: coin, 928,417*l.*; bullion, 494*l.*; Australian notes and cash with Commonwealth Bank, 13,337,737*l.*; landed and house property, 3,845,958*l.*; notes and bills of other banks, 497,986*l.*; balances due from other banks, 930,942*l.*; Government and municipal securities, advances and other assets, 140,987,823*l.*; total assets, 161,029,357*l.*

The liabilities of the banks (exclusive of those to shareholders) were, for June, 1934; Notes in circulation, 54,681*l.*; bills in circulation, 1,276,793*l.*; deposits not bearing interest, 47,245,456*l.*; deposits bearing interest, 75,499,964*l.*; total deposits, 122,745,020*l.*; balances due to other banks, 7,367,223*l.*; total liabilities, 131,443,717*l.*

Savings Bank deposits at June 30, 1934, amounted to 75,714,070*l.*

Permanent Building Societies also receive money on deposit, the amount at June 30, 1933, being 558,496*l.*

Lord Howe Island, 31° 33′ 4″ S., 159° 4′ 26″ E., a dependency of New South Wales, situated about 436 miles north-east of Sydney, area, 3,220 acres, of which only about 300 acres are arable; population (1933), 160.

The Island, which was discovered in 1788, is of volcanic origin. Mount Gower, the highest point, reaches a height of 2,840 feet.

A Board of Control at Sydney, under the Government of New South Wales, manages the affairs of the island and supervises the *Kentia* palm seed industry.

VICTORIA.

Constitution and Government.

Victoria, formerly a portion of New South Wales, was, in 1851, proclaimed a separate colony, with a partially elective Legislative Council, and in 1855 responsible self-government was conferred. The legislative authority is vested in a Parliament of two Chambers. The Upper House consists of 34 members, elected for six years, and the Lower of 65, elected for three years (unless sooner dissolved). Members of the Council must be in possession of an estate of the net annual value of 50*l.* for one year prior to their election; and electors must be in the possession or occupancy of property of the rateable value of 10*l.* per annum if derived from freehold, or of 15*l.* if derived from leasehold or the occupation of rented property. No electoral property qualification is required for graduates of British or Colonial universities, matriculated students of the Melbourne University, ministers of religion of any denomination, certificated teachers, lawyers, medical practitioners, and officers of the army and navy active and retired. One-half of the members of the Legislative Council retire every three years. The members of the Legislative Assembly require no property qualification, and are elected by universal male and (since 1908) female suffrage, and no person may vote in more than one district, nor twice in the same district. Clergymen of any religious denomination are not allowed to hold seats in either the Legislative Council or the Legislative Assembly.

Members of the Legislative Assembly are entitled to reimbursement for expenses at the rate of 500*l.* per annum, and members of the Legislative Council at the rate of 200*l.* per annum. Members of both Houses have free passes over all the railways.

The Legislative Assembly, elected on May 14, 1932, consists of the following parties:—United Australia Party, 29; Labour, 16; United Country Party, 17; Independent Labour Party, 2; Independents, 1. Total, 65.

Governor.—His Excellency Captain the Right Hon. Lord *Huntingfield*, K.C.M.G. (appointed December, 1933, and assumed office May, 1934).

In the exercise of the executive the Governor is assisted by a Cabinet of responsible ministers.

The Ministry (appointed May 19, 1932) is as follows:—

Premier, Treasurer and Minister of Public Health.—Hon. Sir S. S. *Argyle*, K.B.E., M.R.C.S., M.L.A.

Chief Secretary, Attorney-General and Solicitor-General.—Hon. I. *Macfarlan*, M.L.A.

Minister of Agriculture.—Hon. J. *Allan*, M.L.A.

President of the Board of Land and Works, Commissioner of Crown Lands and Survey, and Minister of Forests.—Hon. A. A. *Dunstan*, M.L.A.

Minister of Public Instruction.—Hon. J. W. *Pennington*, C.B.E., M.L.A.

Commissioner of Public Works, Minister in Charge of Immigration and Minister of Mines.—Hon. J. P. *Jones*, M.L.C.

Minister of Water Supply and Minister in Charge of Electrical Undertakings.—Hon. G. L. *Goudie*, M.L.C.

Minister of Transport and Minister of Labour.—Hon. W. S. *Kent Hughes*, M.L.A.

Ministers without Portfolio.—Hon. A. E. *Chandler*, M.L.C., Hon. H. E. *Cohen*, C.M.G., M.L.C., Hon. C. *Shields*, M.L.A., and Hon. T. K. *Maltby*, M.L.A

The Constitution Act Amendment Act, 1928, limits the number of salaried ministers to eight, and their total salaries to 10,000*l*. This Act also provides that not more than two members of the Legislative Council and not more than six members of the Legislative Assembly shall occupy salaried office at any one time. In addition to the salaried ministers it has been customary to appoint two members of each House as honorary ministers without portfolios.

Agent-General for Victoria in Great Britain.—The Hon. Richard Linton (appointed February 7, 1933).

Local Government.

With the exception of the unincorporated area of French Island (42,000 acres), the State is divided into municipal districts called cities, towns, boroughs and shires. The basis of the constitution of cities, towns, and boroughs, is statutory requirements in respect of area, the number of inhabitant householders and net annual value of rateable property; and of shires, not limited in area by statute, rateable property capable of yielding upon a rate not exceeding one shilling in the *l*. on the net annual value thereof, a sum of at least 1,500*l*. In 1933 there were 31 cities, 4 towns, 21 boroughs, and 140 shires.

The net annual value of rateable property in all municipalities in 1933–34 amounted to 31,279,217*l*., and the capital improved value was 596,173,714*l*. For 1932–33 ordinary revenue and ordinary expenditure amounted to 6,153,387*l*. and 5,979,712*l*. respectively, and loan expenditure was 259,477*l*. At September 30, 1933, the loan indebtedness (including loans due to the Country Roads Board), was 14,932,449*l*.

Area and Population.

The State has an area of 87,884 square miles, or 56,245,760 acres, about $\frac{1}{84}$ part of the whole area of Australia. The State is divided into 37 counties, varying in area from 920 to 5,933 square miles.

The population (exclusive of full-blood aboriginals) at six consecutive censuses was :—

Date of Census Enumeration	Population			On previous Census	
	Males	Females	Total	Numerical increase	Increase per cent.
April 3, 1881 .	451,623	409,943	861,566	131,363	17·99
April 5, 1891 .	598,089	541,751	1,139,840	278,274	32·30
March 31, 1901	603,720	597,350	1,201,070	61,230	5·37
April 2, 1911 .	655,591	659,960	1,315,551	114,481	9·53
April 4, 1921 .	754,724	776,556	1,531,280	215,729	16·40
June 30, 1933 .	903,399	916,961	1,820,360	289,080	18·88

The estimated population at June 30, 1934, was 1,829,680 (906,925 males, 922,755 females).

The average density of the population is 20·8 persons to the square mile, or one person to every 31 acres.

At the date of the census of 1921, the Australian-born numbered 1,330,136, or 87 per cent. of the population; natives of New Zealand, 11,210; of British Isles, 161,117; of Germany, 3,693; of other countries, 20,171; 1,111 were born at sea and the birthplaces of 3,842 were unspecified.

The population of Greater Melbourne (capital city) at the census of June 30, 1933, was 992,048, or 54·5 per cent. of the population of the State. The other cities are Geelong, 39,225; Ballarat, 37,409; Bendigo, 29,131; and Warrnambool, 8,909; and the principal towns Castlemaine, 5,221; Wonthaggi, 5,593: Mildura, 6,614; Shepparton, 5,699; Hamilton, 5,786; Ararat, 4,913; Maryborough, 5,631; Horsham, 5,272; Wangaratta, 4,794; and Stawell, 4751.

The following are the births, deaths, and marriages in the State for five years:—

Year	Marriages	Total Births	Illegitimate	Deaths	Surplus of Births
1929	12,935	33,604	1,461	16,717	16,887
1930	11,641	33,127	1,480	15,959	17,168
1931	10,182	30,332	1,416	17,033	13,299
1932	11,744	27,464	1,201	16,805	10,659
1933	12,668	28,392	1,242	17,456	10,936

The annual rates per 1,000 of the population in 1933 were as follows: marriages, 6·96; births, 15·59; deaths, 9·59; infantile deaths, 40·43 per 1,000 births.

The recorded immigration into and emigration from the State of Victoria by sea were as follow in recent years:—

Year	Immigration (by sea)	Emigration (by sea)	Year	Immigration (by sea)	Emigration (by sea)
1928	78,153	72,968	1931	49,396	51,398
1929	74,936	74,709	1932	56,193	56,573
1930	67,218	69,248	1933	65,640	62,991

Of the immigrants in 1933, 33,939 were females, and of the emigrants 32,196 were females.

Religion.

There is no State Church in Victoria, and no State assistance has been given to religion since 1875. At the date of the census of 1933, the following were the enumerated numbers of each of the principal religions: Christian: Roman Catholic, 315,516; Catholic (undefined), 26,619; Church of England, 626,172; Methodist, 193,096; Presbyterian, 276,699; Protestant (undefined), 25,231; other Christian, 104,010. Non-Christian: Hebrew, 9,500; other, 565; indefinite, 3,752; no religion, 3,535; unspecified, 235,566; total, 1,820,261.

Education.

Educational establishments in Victoria are of four kinds, viz., the University, established under a special Act and opened in 1855, with its

four affiliated colleges, State schools (primary and secondary), technical schools or colleges, and registered schools.

Affiliated to the University are four colleges—Trinity, Ormond, Queen's and Newman—in connection with the Church of England, Presbyterian, Methodist and Roman Catholic Churches respectively. In 1933 the students who matriculated numbered 697, the direct graduates numbered 498, and there were 3,095 students attending lectures.

Primary education of children of the ages of 6 to 14 years inclusive is free, secular and compulsory. The compulsory provisions of the Education Act are rigidly enforced. At December 31, 1932, there were 2,613 State primary schools with 7,645 teachers, a total enrolment of 262,417 scholars, and an average attendance of 189,100, or 72 per cent. of the numbers on the roll. There were also 154 State intermediate and secondary schools, comprising 36 central schools, 44 higher elementary schools, 12 domestic art schools, 26 junior technical schools, and 36 high schools. At these schools there were 1,260 teachers, a total enrolment of 33,894 scholars, and an average attendance of 27,032, or about 80 per cent. of the total on the roll. In addition to the before mentioned, there were 29 senior technical schools with a staff of 842 teachers and a total enrolment of 16,098 students. The total cost to the State of public instruction, including grants to the University of Melbourne, was 2,534,151*l.* in 1932–33 (exclusive of interest on loans).

Schools not receiving Government Aid.—There were, in 1932, 504 registered schools in Victoria with 2,317 teachers and a net enrolment of 66,225 scholars. More than 70 per cent. of these schools were connected with the Roman Catholic denomination, the members of which do not as a rule avail themselves of the free primary education provided by the State. Some are under the control of the larger Protestant denominations, namely, the Church of England, the Presbyterian and the Methodist Churches, whilst a few are managed by private persons or companies. At the census of 1921 there were 1,075,344 persons aged 15 years and over, and of these only 2 per cent. were unable to read and write.

Pensions, &c.

Victoria was the first State of the Commonwealth to make statutory provision for the payment of Old Age Pensions. The Act providing for the payment of such pensions came into operation on January 18, 1901, and continued until July 1, 1909, when the Federal Invalid and Old Age Pension Act came into force. The provisions of the Federal Act relating to invalid pensions did not operate until Decembes 15, 1910. The commencing age for old age pensions is 65 years in the case of men (60 years if permanently incapacitated) and 60 years in the case of women, while applicants for invalid pensions must furnish satisfactory evidence that his or her disability is both total and permanent and became so in Australia. The maximum rate of pension to both classes of pensioners at the commencement of the Act was 26*l.* per annum, various increases in the rate were granted until at October 8, 1925, the rate reached 52*l.* per annum. On July 23, 1931, it was reduced to 45*l.* 10*s.* and was further reduced to 39*l.* on October 13, 1932. The present rate of 45*l.* 10*s.* per annum was paid from October 26, 1933. Pensioners are permitted to earn other income providing that the annual income, including pension, does not exceed 78*l.*

On June 30, 1934, there were 57,253 old age and 15,193 invalid pensioners in Victoria, and the amount paid in pensions during 1933–34 was 3,053,247*l.*

The number of war pensions in force in Victoria on June 30, 1934, was

90,645, and the amount paid during 1933–34 by the Commonwealth Government in connexion therewith was 2,134,218*l.*

An Act was passed by the Commonwealth Parliament in October, 1912, providing for the payment, on application, of a maternity allowance of 5*l.* to the mother of every child born in the Commonwealth, no additional sum to be paid for twins (see under *Commonwealth*). During the year ended June 30, 1933, the allowance was granted to 19,499 mothers in the State of Victoria, the total payment being 77,996*l.*

Justice and Crime.

There is a Supreme Court with a Chief Justice and five puisne judges. There are courts of general and petty sessions, county courts, courts of mines, courts of licensing, and children's courts.

The following are the criminal statistics for 1933:—58,406 cases (19,874 arrest cases and 38,532 summons cases); summarily convicted, 46,979; committed for trial, 1,404.

There are 4 gaols and 5 reformatory prisons in Victoria, besides 2 police gaols. At the end of 1933 there were confined in these prisons and police gaols 1,359 males and 55 females.

Finance.

The revenue and expenditure of the State in the years shown were:—

Year ended June 30	Revenue	Expenditure	Year ended June 30	Revenue	Expenditure
	£	£		£	£
1930	27,328,842	28,496,712	1933	24,905,985	25,747,486
1931	25,575,504	28,029,702	1934	24,150,365	24,919,605
1932	24,565,272	26,173,594	1935 [1]	23,156,000	23,258,000

[1] Estimates.

In 1933-34 the principal items of State revenue were taxation (including motor taxation), 8,473,152*l.*; railways, 8,764,154*l.*; Commonwealth payment to State, 2,127,159*l.*; and land revenue, 1,886,381*l.* The principal heads of expenditure from revenue were 8,438,251*l.* on interest and expenses of the public debt, 6,155,461*l.* on the railways (excluding pensions and interest paid by State), and 2,406,233*l.* on education.

The amount raised by taxation (exclusive of taxes collected by Commonwealth) as shown in the above paragraph, viz. 8,473,152*l.*, was equivalent to a proportion of 4*l.* 12*s.* 10*d.* per head of population.

The public debt of Victoria on June 30, 1934, was 175,132,749*l.* The amount of 195,358,350*l.* has been expended on public works from loan funds. Of this amount 74,280,758*l.* was spent on railways; 28,563,240*l.* on waterworks; 27,588,216*l.* on discharged soldiers' settlement; 12,744,590*l.* for civilian settlement; 11,116,426*l.* on country roads; 17,839,227*l.* on electricity supply; and 23,225,893*l.* on other public works.

Production and Industry.

I. Agriculture.

Of the total area of Victoria about 33,532,511 acres at the end of 1932 were either alienated or in process of alienation. Of the remainder about 4,378,487 acres are at present suitable for agriculture; 5,946,083 acres for pastoral purposes; 86,577 acres are held under perpetual lease; 11,202

acres are held under other leases; State forests, timber, water, and other reserves, 6,204,082 acres; auriferous land, 474,024 acres; roads, 1,794,218 acres; and unsold land in towns, &c., 3,818,576 acres.

The total number of holdings in 1932-33 was 75,392.

The following table shows the areas under the principal crops and the produce of each for five years (year ending, March 1) :—

Year	Total Area	Wheat		Oats		Barley		Potatoes		Hay

QUEENSLAND.

Constitution and Government.

Queensland, formerly a portion of New South Wales, was formed into a separate colony in 1859, and responsible government was conferred. The power of making laws and imposing taxes is vested in a Parliament of one House—the Legislative Assembly, which comprises 62 members, returned from 62 electoral districts for three years, elected by ballot. Members of the Assembly are entitled to payment of 500*l.* per annum, with travelling expenses, and an allowance for stationery and postage. At the General Election of June, 1932, there were 525,944 persons registered as qualified to vote under the 'Elections Acts Amendment Act of 1932.' This provides for male and female adult franchise, a three months' continuous residence in the State, six months' residence in the Commonwealth, and one month in the electoral district, being the only qualifications.

Prior to 1922 there was also a Legislative Council, but this has been abolished.

The Legislative Assembly, elected on June 11, 1932, is composed of the

following parties: Ministerialists (Labour), 33; National and Country Progressive, 28; Independent, 1.

Governor of Queensland.—Lieut.-Col. Sir Leslie Orme *Wilson*, P.C., G.C.I.E., C.M.G., D.S.O. (appointed April, 1932). (Salary, 3,000*l.*)

The Executive Council of Ministers, elected June 17, 1932, consists of the following members:—

Premier, Chief Secretary, Treasurer, and Vice-President of the Executive Council.—Hon. Wm. *Forgan Smith.*
Secretary for Public Lands.—Hon. P. *Pease.*
Attorney-General.—Hon. John *Mullan.*
Home Secretary.—Hon. E. M. *Hanlon.*
Secretary for Labour and Industry.—Hon. M. P. *Hynes.*
Secretary for Transport.—Hon. John *Dash.*
Secretary for Mines.—Hon. J. *Stopford.*
Secretary for Public Instruction.—Hon. F. A. *Cooper.*
Secretary for Agriculture and Stock.—Hon. F. W. *Bulcock.*
Secretary for Public Works.—Hon. H. A. *Bruce.*

Each Minister has a salary of 1,000*l.*; the Vice-President of the Executive Council receives 300*l.* in addition.

Acting Agent-General for Queensland in Great Britain.—L. H. Pike. Office.—409 Strand, London. Acting Secretary, T. J. Whittington.

Provision is made for Local Government by the subdivision of the State into areas denominated respectively cities, towns and shires. These are under the management of aldermen and councillors, who are elected by the Parliamentary electors and are charged with the control of all matters of a parochial nature, more especially the construction and maintenance of roads and bridges within their allotted areas. Shires for the most part consist of purely rural districts.

The number and area of these subdivisions, together with the receipts and expenditure for the year 1933, were:—

Area and Population.

Queensland comprises the whole north-eastern portion of the Australian continent, including the adjacent islands in the Pacific Ocean and in the Gulf of Carpentaria. Estimated area 670,500 English square miles, with a seaboard of 2,250 miles. In 1825 a branch penal settlement was made at Moreton Bay; in 1842 free settlers were admitted to the country, and during the next twenty years great progress was apparent.

The increase in the population at different periods since 1846 has been as follows:—

Years	Population	Equivalent increase per cent. per annum	Years	Population	Equivalent increase per cent. per annum	Years	Population	Equivalent increase per cent. per annum
1846	2,257	—	1881	226,968	4·26	1921	765,736	2·29
1856	18,544	72·16	1886	342,614	10·19	1930	916,988	2·19
1864	74,036	37·41	1891	410,350	3·95	1931	929,949	1·42
1868	107,427	11·28	1901	506,721	2·35	1932	939,340	1·01
1871	125,146	5·50	1911	623,123	2·30	1933	949,286	1·06
1876	187,100	9·90						

At the census of June, 1933, the population consisted of 497,394 males and 450,395 females. The estimated population on June 30, 1934, was 957,992 (502,273 males, 455,719 females). In 1921 there were 3,502 male and 80 female Chinese; 873 male and 142 female 'Polynesians'; 1,036 male and 43 female Japanese; 2,080 persons of other Asiatic, &c., races. The total number of aboriginals according to the preliminary count of the census June 30, 1933, was 12,524 full-bloods and 4,402 half-castes.

For occupational census, 1921, see THE STATESMAN'S YEAR-BOOK, 1928, p. 374.

Of the total population, 1921, 592,295 persons (exclusive of aboriginals) were born in Australia; 128,082 in the British Isles; 148,163 in Europe; 6,741 in Asia; 740 in Africa; 1,764 in America; 1,015 in Polynesia.

The following table shows the births, deaths, and marriages for five years:—

Years	Total Births	Illegitimate	Deaths	Marriages	Excess of Births
1929	18,487	942	8,308	6,169	10,179
1930	18,939	952	7,455	6,199	11,484
1931	17,833	1,018	7,525	5,951	10,308
1932	17,367	834	7,813	6,415	9,554
1933	17,150	869	8,354	6,471	8,796

The immigration and emigration, including arrivals and departures by sea and by rail across the border:—Immigration, 1931, 53,460; 1932, 54,530; 1933, 56,179. Emigration, 1931, 50,099; 1932, 53,994; 1933, 55,029.

Brisbane, the capital, with an area of 385 square miles, had (at the census of June 1933) a population of 299,782. The estimated population of the chief towns at the same date was: Rockhampton, 29,373; Townsville, 25,872; Maryborough, 11,414; Gympie, 7,749; Ipswich, 22,499; Toowoomba, 26,430; Charters Towers, 6,982; Bundaberg, 11,466; Cairns, 12,004; Warwick, 6,664; Mackay, 10,660; Southport, 4,216.

Religion.

There is no State Church. Previous to 1861 valuable grants of land had been made to the principal religious denominations, which they still retain. The following were the numbers in 1921:—Church of England, 309,786; Church of Rome, 172,662; Presbyterian, 91,610; Methodist, 77,566; Lutheran, 17,891; Baptist, 14,735; other Christian sects, 44,132; Hebrew, 1,003; other non-Christians, 3,264; no religion, 3,926; unspecified, &c., 19,397.

Education.

Primary secular education is free and compulsory. According to the marriage statistics, 99·94 per cent. of persons married during 1932 were able to read and write. The Public Expenditure on account of education, science and art for the year 1933 was 1,632,188*l.* During the year 1933 there were 1,720 State schools (including 13 high schools and 91 provisional schools, also 20 'Rural Schools,' 9 Intermediate, and 6 'Special' schools) in operation, with 4,097 teachers, and an average daily attendance of 111,139 pupils. Secondary education is provided for by 10 grammar schools, 6 for boys and 4 for girls, with, in 1932, 96 teachers and an average attendance of 1,507 pupils; 13 'High Schools' with (1933) 99 teachers and 1,654 scholars. There were besides (1933) 203 private schools, with 1,224 teachers, and an average daily attendance of 24,632 pupils. The Government grants annually a considerable number of scholarships (2,802 in 1933), tenable for two years, to the various secondary schools. There were 14 technical schools in 1932 with 10,893 enrolled students. The Queensland University (established in 1911) in Brisbane had, at the end of 1932, 14 professors, 28 full-time lecturers, and 17 other members of staff, with 826 students on the roll.

Justice and Crime.

Justice is administered by Supreme Courts, Magistrates' Courts, and Courts of Petty Sessions. In these last Justices of the Peace sit, presided over in the more important centres by Police magistrates. The Supreme Court consists of a Chief Justice and six puisne judges. The total number of persons convicted of serious offences by the Superior Courts in 1932–33 was 198, and the summary convictions at petty sessions in the same year numbered 21,679 (including cases of bail estreated). Including penal establishments, there were, at the end of 1933, 6 prisons, with 356 male and 7 female prisoners. The total police force, including native troopers, averages about 1,301 men.

Pauperism, Pensions, etc.

Charitable institutions and hospitals are maintained by public subscription, supplemented by State endowment; benevolent asylums, an institution for the blind, deaf, and dumb, refuges and homes are also maintained by the Government or receive State assistance. Old Age and Invalid Pensions are payable by the Commonwealth. The number of Old Age Pensioners in the State at June 30, 1933, was 23,366, and of Invalid Pensioners, 10,650. The number of War Pensioners at the same date was 28,386 (including dependants). Maternity allowance was paid to 10,780 mothers during 1932–33.

Finance.

The following table shows the net revenue and expenditure of Queensland during five years ending June 30:—

Defence.

For **Defence**, see under *Commonwealth of Australia*.

Production and Industry.

Of the total area of the State, 19,279,392 acres (1933) have been alienated: in process of alienation, under deferred payment system, are 8,688,589, leaving 401,152,019 acres still the property of the Crown, or about 93·48 per cent. of the total area. The receipts from the sale of land up to the end of 1932 amounted to 11,988,103*l.*

A large proportion of the area is leased in squatting runs for pastoral purposes, amounting to 225,496,200 acres in 1933, besides 79,091,381 acres in grazing selections, and 10,945,200 acres under occupation licence. Perpetual Leases, 4,798,321 acres; Prickly Pear Leases, 3,013,760. The live-stock in 1933 numbered 450,024 horses, 5,781,170 cattle, 20,072,804 sheep, and 217,448 pigs. The total area under cultivation in 1933 was 1,499,996 acres, and of this 1,313,438 acres were under crops, and 186,558 acres lying fallow, idle, etc., also 777,706 acres laid down with permanent artificial pasture. In addition, 6,153 acres were cleared and prepared for ploughing. The wool production, expressed as greasy, was in 1930–31, 182,061,407 lbs., valued at 7,479,689*l.*; 1931–32, 184,716,462 lbs., valued at 6,626,703*l.*; 1932–33, 185,833,546 lbs., valued at 7,332,682*l.*

A considerable area consists of natural forest, eucalyptus, pine and cedar being the timbers mostly in demand, although a considerable quantity of more ornamental woods are utilised by cabinet makers. The amount of wood cut in the various saw mills in 1932–33 was (in superficial feet):—pine, 37,539,357; cedar, 146,320; hardwood, 22,147,556; other, mostly cabinet timber, 7,226,621; number of railway sleepers, 244,452; total value, 1,058,508*l.* This value is exclusive of planing work valued at 82,799*l.*, and of 283,590 super feet of Oregon pine (value 6,428*l.*) sawn from imported flitches. The quantity actually *cut* for all purposes is nearly double these quantities. The plywood industry is important; 31,652,667

sq. ft. of plywood were produced, the value being set down at 201,657*l.* Forest reservations total 5,657,373 acres (1933); areas for National Parks 333,441 acres.

The crops, &c., in two years were as follows:—

In the western portion of the State water is comparatively easily found by sinking artesian bores. Up to June 30, 1934, 4,808 bores were recorded as having been sunk. Total depth bored, 796·16 miles. The continuous yield of water is estimated at 267,782,410 gallons per diem from 1,434 flowing bores and supplies are pumped from 1,938 others.

Commerce and Shipping.

The overseas commerce of Queensland is included in the Statement of the commerce of the Commonwealth of Australia.

The total value of the direct oversea imports and exports of Queensland in recent years is given in the following table:—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1928–29	11,594,348	20,142,224	1931–32	4,774,859	16,106,067
1929–30	11,540,083	18,821,824	1932–33	5,660,772	15,279,726
1930–31	6,244,969	16,922,406	1933–34	5,821,417	19,955,699

In above table both imports and exports are valued in Australian currency.

Statistics for inter-state trade has not been collected in detail since 1909, except in 1931–32, when exports totalled 11,197,000*l.* and imports 11,540,000*l.*

In 1932–33 the net customs revenue amounted to 1,880,027*l.*, excluding excise 1,267,340*l.* and miscellaneous receipts 7,514*l.*, or about 41·76 per cent. of the total value of oversea imports. The chief exports overseas are meat (preserved or frozen), hides, skins, tallow, wool, butter, cheese, sugar, timber, lead, pearlshell and bêche-de-mer.

The registered shipping in 1933 consisted of 118 sailing vessels of 5,251 net tons (including river steamers), 53 steamers of 7,970 net tons and 56 motor vessels of 884 net tons; total, 227 vessels of 14,105 net tons.

There are 10 banks established in Queensland with 477 Branches (excluding the Commonwealth Bank), of which the following are the statistics for the year 1933–34:—Treasury Bills, 3,349,230*l.*; deposits, 35,183,776*l.*; total liabilities, 37,430,448*l.*; coin and bullion, 226,604*l.*; advances, 31,345,273*l.*; landed property, 1,268,853*l.*; total assets, 41,046,528*l.* The Commonwealth Bank had in Queensland at June 30, 1934, assets to the amount of 9,213,597*l.*, and liabilities, 9,697,504*l.* The Savings Bank Branch had at June 30, 1934, assets to the amount of 24,510,098*l.*, and liabilities, 24,841,213*l.*: depositors' balances, 24,834,274*l.*; number of operative accounts, 404,089; average per inhabitant, 25*l.* 18*s.* 6*d.*

THURSDAY ISLAND (longitude 142°, latitude 11°), with an area of 900 acres, is the smallest of the Prince of Wales group of Islands. It is situated in Torres Straits, about 30 miles to the north-west of Cape York, on the northernmost point of the Queensland coast, and is some 1,430 miles by sea from Brisbane, the capital city. The island was constituted a municipality in 1912, and is part of the State of Queensland. The town of Port Kennedy is situated on the south side of the island, and is the centre of local government and the residential area for Commonwealth and State officials.

Thursday Island is the headquarters of the pearl-shell, bêche-de-mer and other fisheries of the Torres Straits, and is in regular and frequent communication by steamer with the other Australian States. The picturesque Albany Passage is passed through on the way from Cooktown to Thursday Island.

The climate during the south-east monsoon period from March to October is ideal; but during the north-east monsoon period from November to March it is rather humid.

The population is a mixed one and numbered 1047 at the census on June 30, 1933.

SOUTH AUSTRALIA.

Constitution and Government.

South Australia was formed into a British Province by Letters Patent of February, 1836, and a partially elective Legislative Council was established in 1851. The present Constitution bears date October 24, 1856. It vests the legislative power in a Parliament elected by the people. The Parliament consists of a Legislative Council and a House of Assembly. The former is composed of twenty members. Every three years half the members retire, and their places are supplied by new members elected from each of the five districts into which the State is divided for this purpose. The executive has no power to dissolve this body. A Government Bill to establish a five-year Parliament was passed in October, 1933. The operation of the Bill is limited till February, 1938, the object being to permit the electors to express an opinion on the question after an experimental period. The qualifications of an elector to the Legislative Council are, to be twenty-one years of age, a natural born or naturalised subject of His Majesty, and have been on the electoral roll six months, besides having a freehold of 50*l.* value, or a leasehold of 20*l.* annual value, or occupying a dwelling-house the rent of which is not less than 17*l.* per annum, or a registered proprietor of a Crown lease with improvements to the value of at least 50*l.*, the property of the elector; head teacher of a college or school residing on premises; postmaster or postmistress residing in the building; railway stationmaster resident on premises; member of police force in charge of a station; officiating minister of religion. By the Constitution Amendment Act, 1894, the franchise was extended to women, who voted for the first time at the General Election of April 25, 1896. There were 132,726 registered electors in 1933. The qualification for a member of Council is merely that he must have attained the age of thirty, be a natural born or naturalised subject and a resident in the State for three years. Judges and ministers of religion are ineligible for election as members. Each member of the Council and also of the House of Assembly receives 400*l.* per annum and

a free pass over Government railways. At present the salary is reduced by 10 per cent.

The House of Assembly consists of 46 members elected for 3 years (5 years for the present Parliament), representing 19 electoral districts. The qualifications for an elector are that of having been on the electoral roll for 6 months, and of having arrived at 21 years of age; and the qualifications for a member are the same. There were 342,019 registered electors in 1933. The election of members of both houses takes place by ballot.

The House of Assembly, elected on April 8, 1933, consists of the following parties: Liberal-Country League, 29; Australian Labour, 6; Parliamentary Labour, 4; Lang Labour, 3; Single Tax, 2; Independent, 2.

The executive is vested in a Governor appointed by the Crown and an Executive Council, consisting of 6 responsible Ministers and the Chief Justice of the Supreme Court.

Governor of South Australia.—Major-General Hon. Sir Winston *Dugan*, K.C.M.G., C.B., D.S.O., appointed March 26, 1934. (Salary, 5,000*l.* per annum.)

The departments of the Public Service are controlled by the following Ministers (appointed April 18, 1933):—

Premier, Treasurer, and Minister of Immigration.—Hon. R. L. *Butler*, M.P.

Chief Secretary, Minister for Mines and Afforestation.—Hon. G. *Ritchie*, M.L.C.

Attorney-General and Minister for Education, Industry and Employment.—Hon. S. W. *Jeffries*, M.P.

Minister for Lands, Repatriation and Irrigation.—Hon. M. *McIntosh*, M.P.

Minister for Works, Railways and Marine.—Hon. H. S. *Hudd*, M.C., M.P.

Minister for Agriculture and Local Government.—Hon. A. P. *Blesing*, M.L.C.

The provision for the payment of Ministers was increased from 5,000*l.* to 7,750*l.* to date from December 1, 1921, but at present is reduced by 20 per cent. They are jointly and individually responsible to the Legislature for all their official acts, as in the United Kingdom.

Agent-General for South Australia in London.—C. F. C. McCann (appointed September 21, 1934).

Area.

The total area of South Australia is 380,070 square miles. The settled part of the State is divided into counties, hundreds, municipalities, and district councils, the last being the most general, as they cover most of the settled districts. There are 48 counties proclaimed, covering 54,195,200 acres. This area covers the settled portion of the State, 44,773,076 acres being in occupation. Outside this area there are three extensive pastoral districts—the western, northern, and north-eastern, covering 189,049,600 acres, 87,741,220 being under pastoral leases, with a population of less than 5,000. There are 33 municipalities and 133 district councils.

Population.

Population (exclusive of aboriginals) at six consecutive censuses was:—

The chief exports of the State are wool, wheat, wheat-flour, barley, iron ore, concentrates and other minerals, meats, butter, eggs, honey, wine, fruits (fresh and dried), skins and hides, tallow, leather, manures and sandalwood.

In 1932–33, 1,101 vessels of 4,374,937 tons entered. Nationality—British, 3,544,968 tons; Foreign, 829,969 tons.

The State possesses about 46,500 miles of roads. There were (1933) 3,776 miles of railway in the State, including the Transcontinental Railway which has been built from Port Augusta in South Australia to Kalgoorlie in Western Australia, and which, in connection with various State lines, completes a through rail connection between Brisbane, on the east coast, and Fremantle on the west coast. Of the Transcontinental line, which is of 4ft. 8½in. gauge, 600 miles are within the borders of South Australia.

There are several good harbours, and the river Murray is navigable for six months of the year for 250 miles within the State. In the city and suburbs are 156 miles of electric tramways. A passenger and mail air service is maintained with Western Australia and facilities are available for air transport between the capital city and country centres and other states.

Postal, telephone and telegraph facilities are afforded at 874 offices. Telephones connected total to 48,463. There are four wireless broadcasting stations, and 50,097 wireless listeners' licences have been issued.

Banks.

There are 8 banking associations in addition to the Commonwealth and State Government Banks. In June quarter, 1934, their average deposits were 25,816,420*l.* and average advances 21,262,134*l.*

The State Savings Bank is managed by a board of trustees appointed by the Government, and has 42 branches and 369 agencies. On June 30, 1934, there were 528,360 accounts open, with a total balance of 21,132,754*l.* The Commonwealth Savings Bank (not included above) had 42,239 accounts open and 2,304,750*l.* deposits at the end of June, 1934. WESTERN AUSTRALIA.

Constitution and Government.

In 1791 Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Fredericks Town. In 1827 Captain James (afterwards Sir James) Stirling surveyed the coast from King George Sound to the Swan River, and in May, 1829, Captain (afterwards Sir Charles) Fremantle, took possession of the territory. In June, 1829, Captain Stirling founded the Swan River Settlement, now the Commonwealth State of Western Australia, and the towns of Perth and Fremantle, and was appointed Lieutenant-Governor.

Large grants of land were made to the early settlers, and agricultural and pastoral occupations were pursued by a small population with varying success, until, in 1850, the State was in a languishing condition, and the inhabitants' petition that it might be made a penal settlement was acceded to. Between 1850 and 1868, when transportation ceased, 9,718 convicts were sent out. The Imperial convict establishment was transferred to the Colonial Government on March 31, 1886.

In 1870 partially representative government was instituted, and in 1890 the administration was vested in the Governor, a Legislative Council, and a Legislative Assembly. The Legislative Council was, in the first instance, nominated by the Governor, but it was provided that in the event of the population of the Colony reaching 60,000, it should be elective. In 1893 this limit of population being reached, as set forth in a proclamation dated July 18, of that year, the Colonial Parliament passed an Act (57 Vict. No. 14) amending the constitution.

By the Constitution Acts Amendment Act, 1899, further amended by the Constitution Acts Amendment Act, 1911, it is provided that the Legislative Council shall consist of 30 members representing 10 electoral provinces and holding their seats for six years. Members must be 30 years of age, resident in the State for two years, and either be natural-born British

subjects or naturalized for 5 years and resident in the State for 5 years. Every elector must have resided in the State for 6 months, and must possess within the province freehold estate of the clear value of £50, or be a householder occupying a dwelling-house of the clear annual value of £17, or holder of a lease of the value of £17 per annum, or the holder of a lease or licence from the Crown of the annual rental of £10, or have his name on the electoral list of a Municipality or Roads Board in respect of property in the province of the annual rateable value of £17. The Legislative Assembly consists of 50 members, each representing one electorate, and elected for 3 years. Members must be 21 years of age, be either natural-born subjects of the Crown and have resided in Western Australia for twelve months, or naturalized for 5 years and have resided therein for 2 years. Electors must be 21 years of age, natural-born or naturalized subjects of the Crown, and must have resided in the State for 6 months, and must be resident in the district for at least one month when making their claims. Members of and electors for both Houses may be of either sex. Enrolment for the Legislative Assembly is compulsory. No person can be registered as a voter in more than one district or more than once in each Province for which he holds a sufficient qualification. Members of the Legislature are paid 600*l.* a year, less 20 per cent. (Financial Emergency deduction) and travel free on all Government railways. The entire management and control of the unalienated lands of the Crown in Western Australia is vested in the Legislature of the State.

There is a movement for West Australian secession from the Commonwealth, and under the provisions of the Secession Referendum Act, 1932, a Referendum was taken on April 8, 1933, which resulted in a majority of 67,947 votes being cast in favour of Secession out of a total of 217,280 votes recorded. In May 1934 the Legislative Assembly passed a bill for a petition to the Imperial Parliament to give effect to the referendum vote.

State of political parties (1933):—Legislative Assembly: Labour Party, 30; Nationalist Party, 8; Country Party, 11; Independent, 1.

Area and Population.

Western Australia includes all that portion of the continent situated to the westward of 129° E. longitude, together with the adjacent islands. The total estimated area of the State is 975,920 English square miles, or, 624,588,800 acres. It is divided into 38 magisterial districts.

The enumerated population at the date of each census was as follows :—

Census Year	Males	Females	Total
1881	17,062	12,646	29,708
1891	29,807	19,975	49,782
1901	112,875	71,249	184,124
1911	161,565	120,549	282,114
1921	177,278	155,454	332,732
1933	234,000	204,948	438,948

There were enumerated, in 1921, 1,956 half-caste aborigines. The estimated full-blood aboriginal population in the State on June 30, 1933, was 25,623.

Of the total population in 1921, 248,866 were returned as born in Australia, of whom 142,947 were recorded as natives of Western Australia. The number of married persons was 121,635 (61,899 males and 59,736 females); widowers, 4,528; widows, 8,526; divorced, 316 males and 294 females; unmarried, 108,792 males and 85,843 females. The conjugal condition of the remaining 2,798 persons was not stated. The number of males under 21 was 72,346, and of females 70,455. The population at the census of June 30, 1933, gives: males, 234,000; females, 204,948; total, 438,948.

Perth, the capital, had an estimated population on December 31, 1933, within the 10-mile radius area of the Metropolitan district, of 208,131. This, however, includes the chief port of the State, Fremantle, with its suburbs, the population of which, as at June 30, 1933, was 25,233. The other principal municipalities, with population as at June 30, 1933, are :—Claremont, 5,949; Cottesloe, 5,860; Boulder, 5,809; Kalgoorlie, 9,091; Midland Junction, 5,410; Subiaco, 16,813; Bunbury, 5,139; Narrogin, 2,464; Northam, 4,816; Geraldton, 4,985; Albany, 4,076; Collie, 3,785.

Certain population and vital statistics, covering a 5 year period, are set out hereunder :—

Years	Marriages	Births	Deaths	Immigrants	Emigrants
1929	3,367	9,051	3,930	32,847	27,078
1930	3,205	9,200	3,774	22,457	24,040
1931	2,741	8,549	3,681	14,192	18,057
1932	2,904	7,965	3,715	15,446	18,113
1933	3,374	7,874	3,790	17,261	17,397

The total number of persons committed to prison in the year ended June 30, 1934, was 1,551; the number of commitments totalled 2,469—viz.: adult males, 2,321, adult females, 148.

All the above figures are exclusive of aboriginal crime.

Pauperism and Old Age Pensions.

There are two charitable institutions, one situated at Claremont, and one at Fremantle, both supported by public funds, with 614 inmates on June 30, 1934. Twenty-five Government hospitals, a Government sanatorium for consumptive patients, 4 hospitals for the insane, and 2 depôts for diseased natives at Port Hedland and Derby, are maintained by public funds, whilst 3 public and 66 other assisted hospitals exist, in addition to numerous private hospitals situated in Perth and other centres of population. Ten Protestant and 5 Roman Catholic orphanage industrial and farm schools are supported partly by private subscriptions and partly out of public money. There are 14 native and half-caste institutions, including 4 Government native settlements. There is also a Government receiving depôt for all State children who are afterwards sent to the various Institutions. During the year ended June 30, 1934, a total of 1,906 adults and 2,871 children, total, 4,777 persons, in the State received monetary assistance from the public funds for widows and others.

Old Age and Invalidity Pensions are paid by the Commonwealth Government. The number of pensioners in Western Australia at June 30, 1934, was: Old Age, 11,854; Invalid, 4,122; War Pensioners and dependents, 24,940.

Finance.

The revenue and expenditure of Western Australia in six years, ended June 30, are given as follows:—

[1] Estimate.

Approximately two-fifths of the public income is derived from railways and tramways (3,165,594*l.* for the year ended June 30, 1934), and the rest mainly from various forms of taxation (1,368,720*l.*), lands, timber, and mining (312,818*l.*), business and trading concerns (1,366,570*l.*), from Commonwealth Funds (1,073,432*l.*) and from other sources (1,194,563*l.*). Western Australia had a net public debt of 85,476,390*l.* on June 30, 1934, the annual charge for which was 4,070,022*l.* (inclusive of exchange). The amount of accrued sinking fund on June 30, 1934, was 1,371,412*l.*

For **Defence**, see under *Commonwealth of Australia*.

Production and Industry.

Up to June 30, 1934, of the entire acreage of the State, 16,325,689 acres had been alienated; on that date 18,763,975 acres were in process of alienation: the area alienated and in process of alienation thus amounting to 35,089,664 acres. At the same date there were in force leases comprising an area of 200,588,136 acres, of which 198,339,035 acres were pastoral, and 1,207,081 acres were timber, while 63,082 acres were under mining leases, and 31,846 acres were Miners' Homestead leases.

The chief crops for two recent years were as follows:—

Crops	1932-33	1933-34	1932-33	1933-34
	Acres	Acres	Bushels	Bushels
Wheat . . .	3,389,352	3,183,216	41,791,866	37,305,100

			Grapes Tons	Grapes Tons
Vines . . .	5,511	5,700	13,477	11,872

The estimated acreages sown with wheat, oats and barley for the season 1934–35, for grain, hay or green food, are respectively 2,883,133, 785,483, and 35,875 acres.

The total forest area is 4,804,000 acres; the greater proportion of the State is carrying trees of some description providing timber for development; the number of superficial feet cut was (1932–33) 59,254,410.

The live-stock at the end of 1933 consisted of 159,646 horses; 885,669 cattle; 10,322,350 sheep; 91,213 pigs; 19,731 goats; 2,456 camels; and 9,719 mules and donkeys.

The wool clip in 1933 was 78,424,200 lb.; the exports (expressed as greasy wool), 78,181,945 lb., valued at 4,810,846*l.*

Gold was first obtained in Western Australia in 1885. The sensational gold finds at Coolgardie and Kalgoorlie in 1892 and 1893 gave an impetus to Western Australian gold mining, which, in a few years' time, placed this State at the head of all the Australian States as regards gold output. The aggregate output to the end of 1933 was 40,058,305 fine ozs., valued in Australian currency at 177,677,772*l.* There were in the State, in 1933, 811 gold-mining leases; men employed in the mines, 9,701, viz., 4,554 above and 5,147 underground; output of gold, 637,207 fine ozs., value 4,886,254*l.*

The total value of the mineral output of the State in 1932 was 4,721,620*l.*, and in 1933, 5,239,498*l.* Principal minerals in 1933, other than gold, were coal, 458,399 tons, value 289,806*l.*; arsenic, 1,331 tons, value 36,753*l.*; silver, 67,036 fine ozs., value 6,792*l.*

There were, for the year ended June 30, 1933, a total of 1,499 industrial establishments in the State, employing either machinery or at least four hands. The average number of persons employed by them over the year was 14,810, as against 13,392 in 1932. The gross output of these establishments for the year ended June 30, 1933, was computed at 12,327,548*l.*, while the net output, *i.e.* the value added in the course of manufacture, was 5,061,842*l.* The total estimated value of Western Australian production during 1932–33 was 26,663,556*l.*, distributed as follows: agricultural, 10,247,311*l.*; pastoral, 4,028,270*l.*; dairy, poultry, and bee-farming, 1,669,074*l.*; forestry and fisheries, 811,505*l.*; mining, 4,845,554*l.*; manufacturing (added value), 5,061,842*l.*

Commerce and Communications.

The external commerce of Western Australia, exclusive of inter-State trade, is comprised in the statement of the commerce of Australia given under the heading of the Commonwealth.

The total value of the imports and exports, including inter-State trade, in 5 years (June 30) is as follows:—

—	1929–30	1930–31	1931–32	1932–33	1933–34
	£	£	£	£	£
Imports . .	18,781,656	10,879,854	10,655,821	12,186,760	12,832,517
Exports . .	17,769,529	17,975,502	16,296,086	15,537,412	17,291,577

The more important of the exports of local products for 1933–34 were wheat (3,417,230*l.*) and flour (392,269*l.*), wool (4,810,846*l.*), gold, uncoined (5,326,885*l.*), timber (484,241*l.*), pearl-shell (97,930*l.*), pearls (11,137*l.*), hides and skins (385,365*l.*), meats (142,007*l.*), fresh fruit (369,515*l.*).

There were on the West Australian register on December 31, 1933, 66 steamers of 6,524 tons, and 310 sailing vessels of 8,963 tons; total, 376 vessels of 15,487 tons. Tonnage inwards and outwards, 1932–33, from and to ports outside the State, 7,113,283.

For the year ending June 30, 1934, the State had 4,360 miles of State Government railway; 277 miles of privately owned line and 450 miles of Commonwealth line, the latter being the western portion of the Trans-Australian line (Kalgoorlie-Port Augusta), which links the State Railway System to those of the other States of the Commonwealth.

Money and Credit.

A branch of the Royal Mint was opened at Perth in 1899. The issues of Imperial coin to the end of June, 1934, were: gold, 106,751,535*l.*; silver, 15,600*l.*; bronze, 2,000*l.*

There are seven banks in Western Australia besides the Commonwealth Bank of Australia and Savings Bank. The State Savings Bank was taken over by the Commonwealth Bank on November 1, 1931. The total paid-up capital of the cheque paying banks in the quarter ended June 30, 1934, was 36,647,350*l.*; and within the State deposits were 17,590,920*l.*; total average liabilities, 19,008,704*l.*; total assets, 26,584,967*l.*

Branches of the Commonwealth Savings Bank were opened in this State at the beginning of 1913. On June 30, 1934, 10,398,972*l.* stood to the credit of 192,915 depositors.

TASMANIA.

Constitution and Government.

Abel Jans Tasman discovered Van Diemen's Land (Tasmania) on November 24, 1642. The island became a British settlement in 1803 as a dependency of New South Wales; in 1825 its connection with New South Wales was terminated; in 1851 a partially elective Legislative Council was established, and in 1856 responsible government came into operation. On January 1, 1901, Tasmania was federated with the other Australian States into the Commonwealth of Australia.

Parliament consists of a Legislative Council and a House of Assembly. The Council has 18 members, elected on a property qualification of 10*l.* freehold or 30*l.* a year leasehold. Certain professional men and all 'returned soldiers' are also electors. Members sit for 6 years, and retire in rotation. There is no power to dissolve the Council. The House of Assembly has 30 members, elected for 3 years by adults with six months' residence in the State. Members of both Houses are paid according to the district represented. The amounts vary from 370*l.* (Buckingham) to 500*l.* (Darwin) a year. Women received the right to vote in 1903. Proportional representation was adopted in 1907, the method being the single transferable vote in 6-member constituencies. By-elections are superseded (from 1919) by a recount of the votes at the preceding General Election. At the election in 1934 for the House of Assembly 15 Labour, 13 Nationalist, and 2 Independent members were returned.

Governor.—Sir Ernest *Clark*, K.C.B., C.B.E.

The Cabinet (appointed June, 1934) is composed as follows:—

Premier without Portfolio.—Hon. A. G. *Ogilvie*, K.C.
Treasurer.—Hon. E. *Dwyer-Gray.*

Attorney General and Minister for Forestry.—Hon. E. J. *Ogilvie.*
Chief Secretary, and Minister for Agriculture and Agricultural Banks.—Hon. T. G. *D'Alton.*
Minister of Lands and Works, Mines, and Hydro-Electric Department.—Hon. T. H. *Davies.*
Hon. Ministers.—Hon. R. *Cosgrove*; Hon. J. F. *Gaha*, M.L.C.; Hon. J. *McDonald*, M.L.C.

A minister must have a seat in one of the two Houses.
Each of the ministers has a salary of 1250*l.* per annum. The Premier has an additional 250*l.* a year.
Members of Parliament and Ministers of the Crown suffered a reduction from July 25, 1931, of 25 per cent. of their official salaries as given above.

Agent-General in London.—(Acting) H. W. Ely, I.S.O.
Official Secretary.—H. W. Ely, I.S.O., Australia House, Strand, London, W.C. 2.

Area and Population.

Area, with Macquarie (170 square miles), 26,215 square miles or about 16,778,000 acres, of which 15,571,500 acres form the area of Tasmania Proper, the rest constituting that of a number of small islands, in two main groups, the north-east and north-west.
The population at six consecutive censuses was:—

Year	Population	Increase per Ct. per Annum	Year	Population	Increase per Ct. per Annum
1881	115,705	1·38	1911	191,211	1·04

Population of the capital, Hobart, and suburbs (June 30, 1933), 60,408, of Launceston and suburbs, 32,841.

Religion.

In 1921, belonging to the Church of England, 112,222; Roman Catholics, 33,106; Catholics (undefined), 2,359; Methodists, 27,171; Presbyterians, 14,796; Baptists, 5,332; Congregationalists, 4,543.

Education.

Primary education is free and secular, and compulsory between the ages of 7 and 14. Nine-tenths of the primary teaching is at State schools. Secondary education is about equally divided between the new State High Schools and the older endowed schools. The 5 State High Schools in 1932 had an average attendance of 1,229. There are 4 Technical Schools, and 3 junior Technical Schools, with an average attendance of 1,168.

The University of Tasmania, established 1890, had 369 students taking courses for degrees in 1932. University expenditure in 1932 (exclusive of capital expenditure) was about 17,230*l.* In 1932, 235 effective students were attending Tutorial Classes provided by the University at different centres for the Workers' Educational Association.

Justice and Crime.

There are a Supreme Court, courts of petty sessions and general sessions, the latter presided over by a stipendiary magistrate, assisted by justices of the peace. The Supreme Court is both a court of first instance and a Court of Appeal in all jurisdiction, civil and criminal. The State is also divided into four districts with local civil courts presided over by Commissioners who are also police magistrates, and petty sessions have all the powers of two justices of the peace. Petty offences and a limited number of civil claims are dealt with in petty sessions and in general sessions by justices of the peace. During the year 1932, 6,450 persons were summarily convicted, and 142 persons were committed for trial. The total police force on June 30, 1933, was 264. There was 1 gaol, with 122 male and 3 female inmates, at the end of June, 1933.

Old Age Pensions.

Old Age and Invalidity Pensions are paid by the Commonwealth Government. The number of pensioners in Tasmania on June 30, 1933, was: Old Age, 8,030; Invalid, 2,715; War, 12,526.

Revenue and Expenditure.

The revenue is derived chiefly from taxation (income, land, death duties and taxation of betting), and from the rental and sale of Crown lands. The customs and excise duties are in the hands of the Commonwealth, which Government makes a special grant to Tasmania and contributes a fixed amount per annum towards interest on the State's Public Debt.

[1] Estimates.

The public debt of Tasmania amounted, June 30, 1934, to 23,767,286*l.*, of which 24 per cent. has been spent on railways, 16 per cent. on hydro-electric works, and 23 per cent. on roads and bridges.

State taxation amounted to 4*l.* 8*s.* 1*d.* per head, of which income tax provides 1*l.* 9*s.* 9*d.* lotteries, 17*s.* 3*d.*, land tax, 8*s.* 2*d.*; death duties 10*s.* 4*d.* Land and income taxes and death duties are also collected by the Commonwealth, averaging 14*s.* 11*d.* per head, sales tax of 1*l.* 3*s.* 3*d.* and customs and excise of 4*l.* 1*s.* 11*d.* in 1932–33 per head.

Defence.

For defence, see under *Commonwealth of Australia.*

Production and Industry.

The total area of Tasmania is 16,778,000 acres, including 1,206,500 acres islands and lakes. Unalienated land, chiefly rugged mountain country, much of it mineral-bearing, amounts to about 10,500,000 acres. Of this unalienated land about 2,600,000 acres are leased.

The net value in 1932–33 of agricultural and pastoral products was 2,728,000*l.*, of manufactures, 2,879,000*l.* (output less raw material, fuel, etc.), and of mining products, 1933, 839,000*l.*

Manufactures.—The two important manufactures for export are metal extraction and fruit-preserving. The electrolytic-zinc works at Risdon near Hobart are using large quantities of ore imported from Broken Hill. The output in 1933 was 53,956 tons of zinc, valued at 1,100,950*l.*, with 160 tons of cadmium and other by-products. Other manufactures that have an output beyond local requirements are wool, confectionery and cement. The carbide works at North-West Bay are able to supply the needs of all Australia.

Commerce, Shipping, &c.

Principal imports, 1932–31 : Food, drink and tobacco, 2,013,406*l.* ; apparel, textiles and manufactured fibres, 1,366,793*l.* ; metals and metal manufactures, 1,087,592*l.* ; stones and minerals, 515,168*l.* Total imports, 6,796,105*l.* Principal exports, 1932–33 : Butter and cheese, 317,843*l.* ; fruit, fresh, 678,605*l.* ; fruit, dried, preserved or pulped, 269,414*l.* ; hops, 122,282*l.* ; jams and jellies, 260,286*l.* ; oats and chaff, 13,668*l.* ; peas, 155,663*l.* ; potatoes, 351,861*l.* ; wool, 546,637*l.* ; hides and skins, 141,395*l.* ; zinc bars and blocks, 902,882*l.* ; timber, 224,463*l.* ; woollen manufactures, 728,664*l.* Total exports, 6,685,698*l.*

Direct oversea imports and exports were 8 per cent. and 27 per cent. respectively of total imports and exports.

The registered shipping in 1933 consisted of 130 sailing vessels of 4,059 tons, and 53 steamers of 5,683 tons. Total, 184 vessels, 10,124 tons.

For shipping, railways, posts and telegraphs, see under *Commonwealth of Australia.*

Savings Banks.

The number of depositors in Savings Banks, including the Commonwealth Savings Bank, 1933, was 188,365, and the amount on deposit 5,950,722*l.*

THE NORTHERN TERRITORY OF AUSTRALIA.

Government.

The Northern Territory, after forming part of New South Wales, was annexed in 1863 to South Australia, and in 1901 entered the Commonwealth as a corporate part of South Australia. The Commonwealth Constitution Act of 1900 made provision for the surrender to the Commonwealth of any territory by any State, and under this provision an agreement was entered into on December 7, 1907, for the transfer of the Northern Territory to the Commonwealth, and it formally passed under the control of the Commonwealth Government on January 1, 1911.

On the 1st March, 1927, the Northern Territory was divided for administrative purposes into two Territories, North Australia and Central Australia, the dividing line between the two Territories being the twentieth parallel of south latitude. Each Territory was under a Government Resident, with headquarters at Darwin and Stuart (now Alice Springs) respectively. This division was effected under the authority of the Northern Australia Act, 1926, which also provided for the appointment of a North Australia Commission, the powers of which extended to matters relating to the development of North Australia, and also to the administration of Crown Lands throughout North Australia and Central Australia. The Northern Australia Act, 1926, was repealed as from June 12, 1931, by the Northern Territory (Administration) Act, 1931, and the whole of the Northern Territory was placed under the control of an administrator.

The North Australia Commission was abolished and the administration of Crown Lands vested in a Land Board.

Administrator (at Darwin).—Lieut.-Col. R. H. *Weddell*, V.D.
Deputy Administrator (at Alice Springs).—V. G. *Carrington.*

Area and Population.

The Northern Territory is bounded by the 26th parallel of south latitude, and the 129th and 138th degrees of east longitude. Its area is

523,620 square miles. The area alienated on June 30, 1933, amounted to 746 square miles absolutely; 291,403 square miles were held under leases and licences; and the remainder, 231,471 square miles, was unoccupied. The coast line is about 1,040 miles in length. The Territory possesses many fine rivers and several good harbours, the principal being Port Darwin. The greater part of the interior consists of a table-land rising gradually from the coast to a height of about 1,700 feet. On this tableland there are large areas of excellent pasturage. The southern part of the territory is generally sandy with a small rainfall, but it can be watered by means of sub-artesian bores. The climate is tropical, but varies considerably over the whole Territory. The proximity of the sea in the north keeps it fairly equable in the coastal region, but further south the climate is of a continental type, showing a great variation between the hottest and coldest months.

The population, excluding aborigines, has varied as follows:—

Year	Europeans	Others	Totals
1881	667	2,751	3,418
1901	782	3,112	3,894
1911 (Census)	1,418	1,892	3,310
1921 (Census)	2,459	1,408	3,867
1931 (30th June)	3,416	777	4,193
1933 (30th June)	3,186	803	3,989

Of the 1921 Census total 1,046 were females. Chinese in the Territory numbered 722.

The estimated number of aborigines (including half-castes) on the 30th June, 1933, was 19,424.

Finance.

The revenue and expenditure for 6 years were as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1927–28	142,902	459,756	1930–31	108,777	440,624
1928–29	125,830	454,259	1931–32	84,195	422,875
1929–30	121,835	482,562	1932–33	82,812	386,077

The chief sources of revenue for the year ending June 30, 1933, were Customs and Excise, 3,869*l.*; Railways, 22,149*l.*[1]; Lands revenue, 26,570*l.*; and Postal revenue, 9,770*l.* Land and Income Tax: Territorial, 3,056*l.*; Federal, 2,596*l.* The chief items of expenditure (excluding interest, loans, &c.) were Administrative Staff, 75,545*l.*, and Railways, 39,007*l.*[1] The public debt (outstanding indebtedness in respect of securities taken over from South Australia on account of Northern Territory and Central Australia Railways plus Loan Moneys used for (*a*) redemption of such securities as have matured and (*b*) for development) on June 30, 1933, was 9,670,278*l.*

Production and Industry.

The soils of the Territory differ greatly, but most products suitable to the tropical and semi-tropical zones can be grown successfully. At present, however, agriculture is insignificant. In most parts the natural grasses are extremely rich in nutriment, and provide food for cattle, horses, sheep, and other stock. The numbers of stock on December 31, 1932, were:—Cattle, 780,121; horses, 33,072; goats, 20,622; pigs, 449; sheep, 18,250; camels, 438; mules, 479; donkeys, 776.

[1] The figures in respect of Railways are for North Australia Railways only.

The Territory is rich in mineral resources, though these are very little developed. The value of the minerals produced in the year ended June 30, 1933, was as follows:—Gold bullion, 4,488*l.*; tin ore, 2,519*l.*; mica, 10,772*l.*; copper, 1*l.*; silverlead, 411*l.*; grand total, 18,191*l.*

Commerce.

The oversea imports and exports are given as follows:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1927–28	30,387	29,265	1930–31	19,251	14,956
1928–29	32,069	53,720	1931–32	9,884	20,624
1929–30	38,883	58,471	1932–33	4,125	10,427

TERRITORIES OF THE AUSTRALIAN COMMONWEALTH

TERRITORY OF PAPUA (BRITISH NEW GUINEA).

Papua is the south-eastern part of the island of New Guinea, with the islands of the d'Entrecasteaux and Louisiade groups and all islands between 8° and 12° S. latitude, and 141° and 155° E. longitude. Area 90,540 square miles, of which about 87,786 are on the mainland of New Guinea, and 2,754 on the islands above mentioned. On June 30, 1934, the population was as follows:—European, 1,107; Papuans (estimated), 275,000. (For the part of New Guinea lately possessed by Germany and now administered by Australia, *see* below.)

To prevent that portion of the island of New Guinea not claimed by Holland from passing into the hands of a foreign power, the Government of Queensland annexed it in 1883. This step was not sanctioned by the Imperial Government, but on November 6, 1884, a British Protectorate was proclaimed over the Southern portion of the Eastern half of New Guinea, and in 1887 Queensland, New South Wales and Victoria undertook to defray the cost of administration, and the territory was annexed to the Crown the following year. The Federal Government took over the control in 1901; the political transfer was completed by the *Papua Act* of the Federal Parliament in November, 1905, and on September 1, 1906, a proclamation was issued by the Governor-General of Australia declaring that British New Guinea was to be known henceforth as the Territory of Papua. There is an executive council composed of 8 official members and 1 non-official member, and a legislative council composed of the executive councillors and 5 non-official members, 4 being nominated by the Lieutenant-Governor and appointed by the Governor-General of Australia, and the fifth being

nominated by the Lieutenant-Governor of Papua as representing the interests of the Christian Missions of the Territory.

Lieut.-Governor and Judge.—Sir J. H. P. *Murray*, K.C.M.G.
Government Secretary.—Herbert William *Champion*, C.B.E.

Tribes have in large areas settled down to peaceful habits. Seven missionary bodies are at work ; many hundreds of natives are being taught by these bodies. 190,047 acres of land have been leased, chiefly by planters, the principal cultures being coconuts (49,305 acres at December 31, 1932), rubber (8,796 acres), sisal hemp (150 acres). On December 31, 1932, there were 59,751 acres of plantations. A preferential tariff is granted by the Commonwealth on certain raw material from Papua, and a bonus for 10 years on other products imported into Australia. Freehold alienation is prohibited, but leases may be obtained at low rentals for long terms. Indigenous sago is plentiful in the western portion of the Territory, and there are considerable numbers of native-owned coconut trees. A regulation, which is strictly enforced, requires that each native shall plant coconut trees or other economic trees or plants if his land is suitable, or the natives may, in lieu of paying a tax in money, establish communal plantations under the direction of European instructors.

The ports of entry are—Port Moresby, Samarai, Kulumadau and Daru.

There are 8 magisterial districts, each in charge of a resident magistrate. There are also 20 assistant resident magistrates, and 9 patrol officers. There is a Central Court at Port Moresby, but it holds sittings wherever and whenever necessary. For native government some simple regulations have been passed. There were (1934) 1,136 village policemen ; armed constabulary, 250 (exclusive of Europeans who are officers of armed constabulary).

Throughout the Territory there are numerous schools belonging to the various Christian missions ; the attendance of native children is compulsory if English is taught. There is a tax not exceeding 10*s.* per head on indentured native labourers, and not exceeding 20*s.* per head on other natives. After expenses of collection are paid the balance is devoted, first, to native education, and, secondly, to other purposes having for their object the direct benefit of the natives. The education is chiefly undertaken by the missions aided by grants from the taxation fund. 4,690*l.* was spent on education in 1933–34. The expenses of the plantation instructors to develop native agriculture are borne by the Education Fund, 1,238*l.* being expended in 1933–34.

A Government Anthropologist is supported from this fund with a view to assisting the Government to understand the native point of view. A Family Bonus is paid to native mothers of four or more children under 16 years of age at the rate of 5*s.* for four and 1*s.* for each child over the four. In 1933–34, 6,414*l.* was spent from the fund on medical work among the natives, besides 30*l.* on native hospital buildings.

1934	121,147	121,199	220,227	249,135	373,895

Revenue is mainly from customs duties. An annual subsidy is given by the Australian Government. The subsidy for 1933–34 was 40,000*l.*

Gold, silver and osmiridium are the only minerals exported. There are 9 proclaimed mineral fields, seven of which are gold fields, and 2 copper. Gold is obtained in the Louisiade Islands, on the mainland, and on Woodlark Island. A large area near Port Moresby with promising copper deposits has been proclaimed a mineral field, but it is not being worked owing to the low price of copper. A railway from the field to the coast was constructed and smelters erected. The whole field was abandoned in 1927 owing to the low price of copper. Indications of petroleum have been found over an area of 1,000 sq. miles. In 1932–33 the gold output was valued at 40,880*l.* Bullion produced and exported contains a fairly high percentage of silver. The trade is principally with Queensland and New South Wales. The chief imports are food-stuffs, tobacco, drapery and hardware; exports 1933–34, copra (8,082 tons, 42,990*l.*); gold (19,496¾ ozs., 45,933*l.*); rubber (948 tons, 61,324*l.*); desiccated coconut (1,274 tons, 48,00*l.*).

A steamer trades between Sydney, Port Moresby and Samarai every 3 weeks, and small coastal vessels run at frequent intervals between the various inter-territorial ports. Ocean-going shipping entered and cleared 1933–34, British, 306,929 tons; foreign, 66,966 tons. There are wireless telegraph stations at Port Moresby and Samarai.

There are branches of the Bank of New South Wales at Port Moresby and Samarai. The currency and its legal tender are the same as in the Commonwealth of Australia.

NEW ZEALAND.

New Zealand was first discovered in 1642 by Tasman, and the coast was explored by Captain Cook in 1769, and in subsequent years. It became a resort for whalers and traders, chiefly from Australia. In 1840 the native chiefs ceded the sovereignty to the British Crown and the islands became a British Colony.

The aborigines, called Maoris, are a branch of the Polynesian race; they were divided into about twenty clans, analogous to those of the Scottish Highlands. Between 1845 and 1848, and again between 1860 and 1870, about half of these clans were in revolt against British rule, but peace was

permanently established in 1871. Tribal organization has now weakened and occasionally disappeared. In effect, the Maoris have largely blended with the general population.

Government and Constitution.

By Order in Council, the designation of the Colony of New Zealand was changed to the Dominion of New Zealand, on and from September 26, 1907. The present form of government was established by Statute 15 & 16 Vict., cap. 72, passed in 1852. The Colony was divided into six provinces and later into nine. By an Act of the Colonial Legislature, 39 Vict., No. xxi., passed in 1875, the provinces and the provincial system of government were abolished, and the powers previously exercised by superintendents and provincial officers were exercised by the Governor (Governor-General from June, 1917) or by local boards. The legislative power is vested in the Governor-General and a 'General Assembly' consisting of two Chambers—a Legislative Council and a House of Representatives. The Governor-General has the power of assenting to or withholding consent from bills, or he may reserve them for His Majesty's pleasure. He summons, prorogues, and dissolves the Parliament. He can send drafts of bills to either House for consideration, but in case of appropriations of public money must first recommend the House of Representatives to make provision accordingly before any appropriations can become law. He can return bills for amendment to either House.

Definition was given the status of New Zealand (with other Dominions) by the (Imperial) Statute of Westminster of December, 1931, which had received the antecedent approval of the New Zealand Parliament in July, 1931.

The Legislative Council consists, at present, of thirty members, who are paid at the rate of 268*l.* per annum. Members hold their seats for seven years only, unless reappointed.

The House of Representatives consists of eighty members, including four Maoris, elected by the people for three years. (The life of the present Parliament has been extended to four years.) They are paid at the rate of 364*l.* per annum. Every man or woman registered as an elector is eligible as a member of the House of Representatives. For European representation every adult person (of either sex), other than aliens, if resident one year in the Dominion and three months in an electoral district, is required to be registered as an elector for such Electoral District. No person may be registered on more than one electoral roll. Every adult Maori resident in any of the four Maori electoral districts can vote, provided he (or she) be not registered on any European roll. Registration is not required in Native districts. Women's suffrage was instituted in 1893; women became eligible as members of the House of Representatives in 1919.

Governor-General and Commander-in-Chief.—His Excellency Viscount *Galway*, D.S.O., O.B.E. (appointed October 1, 1934, assumed office, March, 1935). Salary 5,000*l.*, and 2,500*l.* allowances. (For the year 1934–35 subject to a voluntary reduction of 2,250*l.*)

The (Coalition of United and Reform Parties) Cabinet (Assumed office September 22, 1931) was composed (September, 1933) as follows:—

Prime Minister, Attorney-General, Minister of Railways and of External Affairs.—Rt. Hon. G. W. *Forbes*, P.C.

Minister of Finance, of Customs, of Transport, and of Stamp Duties.—Rt. Hon. J. G. *Coates*, P.C., M.C.

Each Minister has a salary of 940*l.* (with the exception of the Prime Minister, who has 1,446*l.*), with House Allowance of 180*l.* if no Government residence is provided.

High Commissioner.—(Vacant, March 1935), 415 Strand, London, W.C. 2.

Local Government.

For purposes of local government New Zealand is divided into counties, boroughs and town districts. The counties are subdivided into ridings. There are also numerous other local authorities created for specific functions, such as electric-power districts, river (*i.e.* river protection) districts, gas districts, rabbit districts, etc.

Area and Population.

There are two principal islands, the North and South Islands, besides Stewart Island, and small outlying islands, including (since 1901) the Cook and some other islands in the Pacific Ocean. The group is 1,100 miles long, and 180 miles across at the broadest part; coast line 3,000 miles. New Zealand is about 1,200 miles east of Australia. Area, excluding annexed islands, 103,722 square miles. North Island, 44,281 square miles, South Island 58,092, Stewart Island 670 square miles, Chatham Islands 372 square miles, outlying islands 307 square miles. Acreage 66,390,196 acres, exclusive of the Cook and other islands (179,200 acres), and up to March, 1934, 21,490,567 acres had been alienated, and 15,486,237 acres reserved and set apart by the State for special purposes. The area of Native lands at March 31, 1934, was 4,554,134 acres. The estimated population June 30, 1934, was 1,548,955, inclusive of Maoris, 73,259, but exclusive of residents of Cook and other annexed Islands, 15,852, of the Tokelau Islands, 1,179, and of Western Samoa (mandated territory), 52,792. Census population, exclusive of aborigines and dependencies :—

Religion.

No direct State aid is given to any form of religion. For the Church of England the Dominion is divided into seven dioceses, with a separate bishopric (Ao-tea-roa) for the Maoris. The present Bishop of Auckland is Primate and Archbishop of New Zealand. The Roman Catholic Church is under an Archbishop residing at Wellington, assisted by a coadjutor Archbishop and three bishops.

Education.

The University of New Zealand consists of the Otago University at Dunedin, with 24 professors; the Canterbury University College at Christchurch, with 13 professors; the Auckland University College, with 13 professors; and the Victoria University College at Wellington, with 15 professors; students on registers of the four constituent colleges (1933), 4,806. The University colleges are all endowed with lands. The Canterbury Agricultural College and the Massey Agricultural College (at Palmerston North) are recognised schools of agriculture.

At the end of 1933 there were 44 secondary or combined schools, with 693 (excluding part-time) teachers and 15,238 pupils. There are also 81 District High Schools with 4,389 scholars in the secondary division, one Intermediate School with 122 pupils and 21 Technical High and Technical Day Schools with 7,149 pupils. Of private secondary and endowed schools there were 54 registered, with 4,063 pupils. Ten secondary schools for Maoris had 302 pupils.

For primary schools there is an Education Department (which also exercises certain functions in regard to both university and secondary schools). There are 9 Local Education Boards. At the end of 1933 there were 2,531 public primary schools, 6,072 teachers, 200,641 scholars on the rolls; average attendance (1933), 182,017. Education is compulsory between the ages of 7 and 14. The instruction given at the public schools is secular only, and for the ordinary standard course entirely free.

There are 6 schools of mines in addition to the Otago University School of Mines; 15 child welfare institutions; a school for the deaf (at Sumner); an institute for the blind (at Auckland); a special school for mentally backward boys at Otekaike, Otago; and a similar school for girls at

Richmond, Nelson. There were also, at the end of 1933, 309 registered primary private schools, with 26,428 pupils.

There were 137 native village schools, with 332 teachers and 7,340 scholars, including 894 Europeans. Total net expenditure by the State on Native schools in 1933-34 was 79,700*l.* Total expenditure out of public funds in 1933-34 upon education of all kinds 2,740,545*l.*

Justice and Crime.

There are (September, 1934) nine supreme court judges, and twenty-nine stipendiary magistrates. There are numerous magistrates' courts and justices of the peace.

In 1933 there were 37,671 summary convictions, and 1,513 sentences in supreme courts, including 1,009 cases sent up from lower courts for sentence. At the end of 1933 the gaols and Borstal institutions contained 1,410 prisoners undergoing sentence.

Pauperism, Pensions, etc.

The Dominion is divided into districts, with elective boards for the administration of the public hospitals and charitable relief. The Government subsidises contributions by local authorities, according to a sliding scale, ranging from 14*s.* in the pound to 26*s.* in the pound, and averaging throughout the Dominion 20*s.* in the pound. The apportionments are made according to the value of rateable property within the district. Subsidies on bequests and voluntary contributions were discontinued in 1932. The total expenditure on Charitable Aid during the year ended March 31, 1933, was 294,671*l.*, and on hospital maintenance, 974,402*l.* During 1932 the benevolent and orphan asylums accommodated 12,547 inmates; and 4,031 children were wholly or partly maintained by the State in various institutions in 1933.

An Act, passed in 1898 and amended on several occasions since, provided for old-age pensions. Every person, not an alien or an Asiatic, who fulfils certain conditions is entitled to a pension of 40*l.* 19*s.* a year, reducible by 1*l.* for every 1*l.* by which income exceeds 39*l.* The joint annual income of a married couple in receipt of pensions must not exceed 121*l.* (including pensions). The Government proposes to grant a 5 per cent. increase in old-age pensions, operative from October 1, 1934.

There is a system of family allowances at the rate of 2*s.* per week for each child after the second, in cases where income excluding family allowance is under 3*l.* 5*s.* per week, plus 2*s.* per week for each child over two.

The total expenditure out of the Public Works Fund from 1870 to March 31, 1934, was 122,294,129*l.*, including charges and expenses for raising loans.

The average taxation per head of the population in 1933–34 was 13*l.* 18*s.* 7*d.* (includes unemployment taxation, 4,413,221*l.* or 2*l.* 17*s.* 3*d.* *per caput* in 1933–34. Unemployment taxation receipts are not paid into the Consolidated Fund).

The gross public debt at March 31, 1934, was: 302,791,996*l.*; of which outstanding indebtedness on account of the war of 1914–19 represented 66,724,765*l.* Most of the rest of the debt represents reproductive expenditure or investments.

The public debt includes outstanding Treasury Bills to the amount of 19,404,872*l.*, issued under the Banks Indemnity (Exchange) Act, 1932–33. Against this sum Government held equivalent investments in sterling, and, since the assumption of exchange regulation functions by the newly created Reserve Bank of New Zealand (August 1, 1934), these Treasury Bills have been redeemed and the account liquidated.

Defence.

The New Zealand military forces are under a general officer commanding, who has at his disposal a general headquarters divided into the general staff and administrative services and departments. He is responsible to the

Ministry of Defence. New Zealand is organised into 3 military commands, the Northern, Central, and Southern, each command being under an officer commanding.

The Air Force consists of 21 machines. The personnel is 171, including 91 permanent officers and men, organized in 4 squadrons.

The system of compulsory Territorial and Cadet training is now in abeyance. It has been replaced by a voluntary Territorial system upon a lesser scale. Strength of Territorial Force at June 30, 1934, 635 officers and 8,634 other ranks.

Civil Aviation.—There are 26 licensed aerodromes, over 300 licensed pilots and 69 aircraft.

The Naval Defence Act, 1913, provided for the establishment of a New Zealand Naval Force, to be raised and maintained by voluntary enlistment only, enlistment being for a prescribed period not more than twelve years. In time of war the Naval Force (including vessels acquired for defence purposes) is at the disposal of the British Government. The Naval force consists of the cruisers *Dunedin* and *Diomede*, lent free of charge (other than maintenance) by the Imperial Government, and the sloops *Laburnum* and *Leith*. In addition there are the harbour training ship *Philomel* (ex-cruiser of 2,500 tons), the oil-tank vessel *Nucula*, the trawler *Wakakura* and the tug *Toia*. The establishment of a New Zealand Royal Naval Reserve is also provided for under the Act. Expenditure on naval defence in 1933–34 amounted to 397,384*l*., not including interest on loan-moneys. In addition 100,000*l*. was paid as the seventh instalment of 1,000,000*l*. voted in 1927 towards the cost of the Singapore Naval Base.

Production and Industry.

I. Agriculture.

Two-thirds of the surface of New Zealand is suitable for agriculture and grazing. About 12,600,000 acres are still under forest. The total area under cultivation (including 17,336,490 acres in sown grasses and 105,766 in fallow) in 1934 was 19,186,748 acres. The area of Crown lands (other than reserves) leased under various tenures at March 31, 1934, was 17,832,122 acres, and 1,873,370 acres were available for future disposal.

The largest freehold estates are held in the South Island. The extent of occupied holdings of or over one acre in 1934 (exclusive of holdings within borough boundaries) was as follows:—

Sizes of Holdings (Acres)	Number of Holdings	Acres	Sizes of Holdings (Acres)	Number of Holdings	Acres

Live-stock in 1934: 273,906 horses, 4,301,128 cattle, 28,646,222 sheep, and 660,393 pigs. The total number of dairy cows in 1933–34 was 1,950,000, with a total butter-fat production of 435.000,000 lbs. Estimated production of wool for the twelve months ended June 30, 1934, 300,500,000 lbs. (greasy basis). Exports (June years): 1929–30, 212,000,000 lbs.; 1930–31, 250,700,000 lbs; 1931–32, 254,900,000 lbs.; 1932–33, 321,100,000 lbs.; 1933–34, 323,300,000 lbs.

II. Manufactures.

The telegraph and telephone systems are Governmental. On March 31, 1934, there were 12,294 miles of line and 65,004 of wire. Number of telegrams despatched during the year, 13,287,303. The telegraph and telephone revenue for the year 1933–34 was 1,905,657*l*.

Money and Credit.

The bronze and gold coins in use in New Zealand are identical with those in England and are purchased from the Royal Mint in England, as is also the distinctive silver coinage now in use. British coins are also legal tender. Australian silver and bronze coinage, although strictly speaking, not legal tender, circulate freely in New Zealand.

There are six banks doing business, two of these being wholly New Zealand institutions and the New Zealand Reserve Bank. Bank notes of the Reserve Bank are legal tender. The note-issuing power of the six trading banks has been withdrawn, and their notes are being taken out of circulation. The paid-up capital of the six banks amounts to 30,255,463*l*. and their reserved profits to 22,048,571*l*. The total average liabilities for 1933, in respect of New Zealand transactions, were 65,281,375*l*., and the average assets 69,656,700*l*. The average amount on deposit was 57,620,233*l*. The value of the notes in circulation averaged 6,205,429*l*. for the year. Gold has almost entirely disappeared from circulation.

There are the post-office savings-bank and 5 trustee savings banks. The former had, March 31, 1934, 870 branches; the latter have not more than one or two branches each; number of depositors in Post Office Savings Banks at March 31, 1934, 798,262; amount deposited during year, 19,428,853*l*.; withdrawn, 17,818,172*l*.; amount on deposit at end of year, 44,870,391*l*. At 31st March, 1934, 10,847,709*l*. was on deposit in trustee savings banks to the credit of 219,732 depositors.

Attached to New Zealand are the following islands:—

Auckland Islands, 50° 32′ S., 166° 13′ E., 200 miles S. of Stewart Island. Area of largest about 200 square miles. Uninhabited.

Chatham Islands, 43° 30′ to 44° 30′ S., 175° 40′ to 177° 15′ W., 536 miles E. of New Zealand. Area 372 square miles; population (April, 1926) 562 (268 Europeans and 294 Maoris).

The Cook and other South Pacific Islands were annexed to New Zealand in June, 1901. They lie between 8° and 23° S. lat., 156° and 170° W. long. The names of the islands with their populations (1926) are as follows:—

Cook Islands—	Population		Population
Rarotonga	3,936	Palmerston I.	97
Mangaia	1,249	Penrhyn (Tongareva)	395
Atiu	933	Manihiki	416

Mitiaro	238	Suwarrow	—
Manuae and Te Au-o-tu	23		
Nassau	—	Total	10,082

Total area of the Cook and other islands about 180 square miles.

Rarotonga is 20 miles in circumference; Atiu, 20 miles; Aitutaki, 21 miles. Laws for the Cook Islands have been made since 1890 by a general Legislature, and are administered by an Executive Council, of which the Arikis, or native chiefs, are members. At Rarotonga there is a (New Zealand) Resident Commissioner, whose approval is required for all enactments. The customs tariff of New Zealand is enforced. In 1915 an Act was passed by the New Zealand Parliament consolidating the laws relating to the Islands, and providing for the appointment of a member of the Executive Council of New Zealand as Minister of the Cook Islands. The Minister is charged with the administration of the Islands. The Act provides for the constitution of Island Councils, lower and higher Courts of Justice, and native land court, as well as for the establishment of public schools, &c. In 1933–34 the numbers of births, marriages, and deaths were respectively 410, 110, and 185. Education: there are 18 Government or subsidised mission schools in the group, with 2,356 pupils. Revenue, financial year 1933–34, 36,531*l.* (including grants from N.Z. to extent of 11,013*l.*); expenditure, 38,744*l.* The trade for 1933 was:—Imports, 76,716*l.*, including 54,022*l.* from New Zealand, 8,762*l.* from United Kingdom, and 6,667*l.* from United States; exports 73,983*l.*, including 59,262*l.* to New Zealand, 8,797*l.* to United States of America, and 2,572*l.* to France. Chief exports 1933:—Bananas, 15,959*l.*; oranges, 33,980*l.*; tomatoes, 6,579*l.*; copra, 13,513*l.* Wireless stations are maintained at Rarotonga, Aitutaki, Atiu, Mangaia, and Mauke.

Niue Island was annexed with the Cook and other islands in June, 1901. Until October, 1932, it was administered by the Minister for the Cook Islands, but then passed to the Minister of External Affairs Distance from Auckland, New Zealand, 1,340 miles; from Rarotonga, 590 miles. Area, 100 square miles; circumference, 40 miles; height above sea-level, 200 ft. Population estimated April 1, 1934, at 3,949. There is a Resident Commissioner, and laws, etc., are same as for Cook Islands. Revenue, 1933–34, 13,972*l.*; expenditure, 13,840*l.* Exports, 1933, 11,542*l.*, chiefly bananas, copra, hats and baskets. Imports, 1933, 13,123*l.* There are two Government schools and 10 mission schools, total scholars numbering 520. A wireless station at Alofi, the port of the island, maintains radio communication through Apia, Western Samoa.

Kermadec Islands, 29° 15′ to 31° 26′ S. lat., 177° 55′ to 178° 55′ W. long., 600 miles N.N.E. of New Zealand. Area 13 square miles. Uninhabited. The largest of the group is Raoul or Sunday Island, 20 miles in circuit; Macaulay Island is 3 miles in circuit.

Ross Dependency.—The coasts of the Ross Sea, with the adjacent islands and territories, between 160° east longitude and 150° west longitude, and south of the 60th degree of latitude, were proclaimed a British Settlement and placed under the jurisdiction of the Governor-General of New Zealand by Order-in-Council of July 30, 1923.

Union Islands (Tokelau).—These Islands, formerly part of the Gilbert and Ellice Islands Colony, were transferred to the jurisdiction of New Zealand, February 11, 1926, and are administered by the Administrator of Western Samoa. They lie between 8° and 10° S. lat., and 171° and 173° W. long. (population 1934, 1,179), and comprise five clusters of islets, the principal of which are Fakaofo, Nukunono, and Atafu; area of group, 4 square miles.

Small uninhabited outlying islands within the boundaries of New Zealand are: Campbell Island, the Three Kings Islands, the Antipodes Islands, the Bounty Islands, and the Snares Islands.

FIJI.

Constitution and Government

The Fiji Islands were discovered by Tasman in 1643 and visited by Captain Cook in 1769. The sovereignty was ceded to Great Britain on October 10, 1874.

Governor of Fiji and High Commissioner for the Western Pacific.—Sir Murchison *Fletcher*, K.C.M.G., C.B.E. (appointed, 1929). Salary 3,000*l.* as Governor of Fiji, and 1,200*l.* as High Commissioner for the Western Pacific.

The Constitution is regulated by Letters Patent of February 9, 1929. The Executive Council consists of the Governor, the Colonial Secretary, the Attorney-General, the Colonial Treasurer, the Secretary for Indian Affairs, the Secretary for Native Affairs, and two unofficial members nominated by the Governor.

The Legislative Council consists of the Governor and not more than thirteen nominated members, six European elected members, three native members and three Indian elected members.

The natives retain a large share of self-government. Their system of village and district councils has been recognised and improved, and supplemented by a triennial meeting of the high chiefs and representatives from each province, presided over by the Governor. There is a Native Regulation Board, constituted under the 'Native Affairs Ordinance, 1876,' which has power to make regulations with regard to the marriage and divorce of natives, succession to property, the jurisdiction and powers of native courts and magistrates in matters of civil and criminal procedure, and also in regard to other matters having reference to the good government and well-being of the native population. All such regulations have to receive the sanction of the Legislative Council.

There is a constabulary force consisting of Fijians and Indians, with European officers, and a Defence Force (Europeans, half-castes, and Fijians). Strength of constabulary force in 1933, 207.

Area and Population.

Fiji comprises a group of about 250 islands (about 80 inhabited) lying between 15° and 22° south latitude and 177° east and 178° west longitude. The largest is Viti Levu, area 4,053 square miles; next is Vanua Levu, area 2,130 square miles. The island of Rotuma, between 12° and 15° of south latitude, and 175° and 180° east longitude was added to the colony in 1880. Total area, including Rotuma, 7,083 square miles.

At December 31, 1933, the population of the Colony, including Rotuma, was estimated at 193,238; Europeans, 4,804 (2,494 males, 2,310 females); Fijians, 96,656 (49,530 males, 47,126 females); Indians, 80,991 (47,621 males, 33,370 females); Chinese, 1,476 (1,340 males, 136 females); half-castes, 3,661 (1,879 males, 1,782 females); others, 5,650 (3,352 males, 2,298 females).

Among Europeans the birth-rate in 1933 was 16·03 per 1,000, and deaths 8·74; among Fijians, birth-rate, 35·10, death-rate, 17·72; among Indians, birth-rate, 38·67, death-rate, 11·37; others, birth-rate, 33·74, death-rate, 15·85; marriages, 10·39 per 1000.

Suva, the capital, is on the south coast of Viti Levu; the European population (census of April 24, 1921), 1,443, suburbs, 298, total, 1,741.

PACIFIC ISLANDS.

TONGA.

(FRIENDLY ISLANDS.)

The Tonga or Friendly Islands continued up to 1899 to be a neutral region in accordance with the Declaration of Berlin, April 6, 1886. By the Anglo-German Agreement of November 14, 1899, subsequently accepted by the United States, the Tonga Islands were left under the Protectorate of Great Britain. A Protectorate was proclaimed on May 18, 1900, and a British Agent appointed. British and foreign nationals charged with any offence against the laws of Tonga, not including crimes punishable by death or by imprisonment exceeding two years, are subject to the jurisdiction of the Tongan courts. In other respects they are subject to the jurisdiction of the Court of the High Commissioner.

Queen.—Salote, succeeded on the death of her father, George II, on April 12, 1918.

There is a Legislative Assembly which meets annually, composed of seven nobles elected by their peers, seven elected representatives of the people, and the Ministers of the Crown, numbering seven, or twenty-two members including the Speaker. The elections are held triennially.

The kingdom consists of 3 groups of islands, called respectively Tongatabu, Haapai (which are low-lying groups of coral formation), and Vavau (which is high and mountainous), together with the outlying islands of Niuatobutabu, Tafahi, and Niuafoou, and lies between 15° and 23° 30′ south, and 173° and 177° west, its western boundary being the eastern boundary of Fiji. The main group was discovered by Tasman in 1643. The climate is mild and healthy, malaria being unknown. The temperature during seven months of the year, from May to November, rarely exceeds 84° F. in the shade, and seldom, even in the hottest part of summer, exceeds 90° F. Total area, approximately 385 square miles; capital, Nukualofa; population, at the census taken in 1932, 28,381, Tongans, 412 Europeans, 397 half-castes, 264 Pacific islanders and others. The natives are Christian, there being about 16,560 adherents of the Wesleyan Free Church of Tonga, 7,584 of the Free Churches, 1,088 of other Protestant Churches, and 3,149 Roman Catholics. The native Tongans enjoy free education, free medical attendance and dental treatment. At the end of 1932 there were 69 Government and 42 denominational primary schools, with an average daily attendance throughout the year of 5,480 pupils. At Tonga College there were 9 teachers, 3 Europeans, and 6 Tongans, and the number of pupils averages 200. The revenue amounted in 1931-32 to 57,224*l.*, and the expenditure to 63,986*l.* Native produce consists almost entirely of copra; the export in 1932 amounted to 8,323 tons, valued at 83,228*l.*, most of which was shipped to the U.K. and Continental ports. Total imports, 1932, 86,006*l.*; total exports, 96,163*l.* The imports include drapery, flour, kerosene, benzene, biscuits, fish, hardware, timber, sugar, meats; and the exports copra. The trade is with Great Britain, New Zealand, Australia, Fiji, Europe and the United States of America. Steamer communication

with the outside world consists of one vessel of the Union Company's Fleet which maintains a four-weekly service with New Zealand, in addition to which cargo vessels visit the group for shipments of copra. During 1932, 29 vessels entered and cleared: total tonnage 124,908, of which 76,184 tons were British. There is a wireless station at Nukualofa which keeps up telegraphic communication through Samoa or Fiji, and sub-stations at Vavau, Haapai, Nuiafoou and Nuiatoputabu, which communicate only with Nukualofa. There is a telephone system in Nukualofa.

Since 1906 British coin has been legal tender. There is a Government note issue. The weights and measures are the same as in Great Britain. Accounts are kept in pounds, shillings, and pence.

High Commissioner and Consul-General for the Western Pacific.—Sir A. G. M. Fletcher, K.C.M.G., C.B.E.

Agent and Consul.—J. S. Neill.

The High Commissioner of the Western Pacific, assisted by deputies, has jurisdiction, in accordance with an Order in Council of 1893, for the purpose of carrying out the provisions of the Pacific Islanders' Protection Acts of 1872 and 1875, and to settle disputes between British subjects living in these islands. The jurisdiction of the High Commissioner extends over all the Western Pacific not within the limits of Fiji, Queensland, or New South Wales, or the jurisdiction of any civilised Power, and includes the Southern Solomon Islands, and the various small groups in Melanesia.

In the sections devoted to New South Wales and New Zealand mention is made of various annexed Pacific Islands. The following summary (omitting islands described elsewhere) gives the names and positions of islands which are unattached:—

Ducie Island, 24° 40′ S. lat., 124° 48′ W. long.

Pitcairn Island, 25° 5′ S., 130° 5′ W.; area 2 sq. m.; pop. in 1914, 140 (35 adult males, 39 adult females, 66 children). The affairs of the island are conducted by a Council of 7 members, with a President, who acts also as Chief Magistrate, and a Vice-President, who is also Government Secretary, subject to the control of the High Commissioner for the Western Pacific. In religion the islanders (descendants of the mutineers of the *Bounty*) are 'Seventh Day Adventists.' The products of the island are sweet potatoes, beans, sugar cane, yams, taro, melons, pumpkins, oranges, bananas, pineapples, and arrowroot, which is prepared in limited quantities with antiquated appliances. Excellent coffee also grows. The island is well stocked with goats and poultry.

Phœnix Group, between 2° 30′ and 4° 30′ S. lat., and 171° and 174° 30′ W. long. Eight islands: Mary, Enderbury, Phœnix, Birney, Gardner, McKean, Hull, Sydney; area of group, 16 sq. m., pop. 59.

Gilbert and Ellice Islands Colony. The islands in this group were proclaimed as Protectorates in 1892 and annexed (at the request of the native Governments) as Gilbert and Ellice Islands Colony, on November 10, 1915. The Colony includes several groups of islands, all of which, save Ocean Island, are coral atolls. (1) **The Ellice Islands,** between 5° 30′ and 11° 20′ S. lat., and 176° and 180° E. long. (population December 31, 1933, 4,162). The principal islands are Funafuti, Nukufetau, Vaitupu, Nui (or Netherland), Niutao (or Lynx or Speiden), Nanumaga (or Hudson), Nanumea (or St. Augustine), Nukulaelae (or Mitchell); Nura kita; area of group, 14 sq. m. (2) **Fanning Island,** 3° 50′ N., 159° W., area 15

sq. m.; **Washington Island**, 4° 40′ N., 160° 20′ W., area 6 sq. m., population of the two islands, December 31, 1933, 536, including 37 Europeans; and **Ocean Island** (population December 31, 1933, 2,074, including 112 Europeans and 372 Asiatics). The last-named island is the Colony headquarters. It is situated 0° 52′ S., and 169° 35′ E., is six miles in circumference, and was annexed by Great Britain in 1901. The island is exceedingly rich in high-grade phosphate, which is worked by the British Phosphate Commission, who purchased the rights of the Pacific Phosphate Company in 1921. A wireless station on the island maintains telegraphic communication via Fiji and Australia. (3) **Christmas Island**, situated roughly 2° N. lat., and 157° W. long., discovered by Cook in 1777, annexed by Great Britain in 1888, and included in the Colony in November, 1919, is the largest atoll in the Pacific, being over 100 miles in circumference. It is leased to the Central Pacific Coconut Plantations, Ltd., for a term of 87 years from January 1, 1914. Population 1927, European, 5, natives, 18. The **Gilbert Islands**, on the equator (population, December 31, 1933, 27,313, including 87 Europeans). The principal islands are Butaritari, Makin, Tarawa, Abaiang, Marakei, Maiana, Abemama, Kuria, Aranuka, Nonouti, Tabiteuea, Beru, Nukunau, Onotoa, Tamana, and Arorae. Area, 166 sq. m. The Gilbertese are classed as Micronesians, and speak a language having Polynesian and Melanesian affinities. The Ellice Islanders are Polynesians, speaking a Samoan dialect. The Administration maintains two native boys' schools—the King George V. School at Tarawa, Gilbert Islands, with 90 pupils, and a school at Vaitupu, Ellice Islands, with 60 pupils. A school for native boys on Ocean Island has been maintained since 1920 out of Banaban phosphate royalties, and there is a school on Ocean Island for European children. Village schools for native boys and girls throughout the Gilbert and Ellice Groups are kept up by the London Missionary Society and the Society of the Sacred Heart. Revenue of the Colony for the year ended June 30, 1933, 59,400*l.*, of which the principal items were: Customs, 22,985*l.*; native taxes, 6,205*l.*; licences, &c., 11,046*l.*; fees of court, &c., 4,391*l.*; miscellaneous, 3,350*l.*; royalties on phosphate, 5,701*l.*; interest on investments, 4,372*l.*; post office and telegraphs, 599*l.*; Imperial grant, 750*l.* The expenditure for the same period amounted to 46,753*l.* Principal crops: pandanus fruit and cocoanuts. The trade in 1932–33 amounted to 117,920*l.* for imports (drapery, 13,479*l.*; provisions, 20,936*l.*), and 398,068*l.* for exports (phosphate, 224,200 tons, 302,670*l.*; copra, 8,995 tons, 94,844*l.*). The Colony is administered by the High Commissioner through a Resident Commissioner, whose headquarters are at Ocean Island.

Resident Commissioner—J. C. Barley.

British Solomon Islands are comprised in the approximate area enclosed by 5° to 12° 30′ S., and 155° 30′ to 169° 45′ E. The Group includes the islands of Guadalcanar, Malaita, Santa Isabel, San Cristoval, New Georgia, Choiseul, Shortland, Mono (or Treasury), Vella Lavella, Ronongo, Gizo, Rendova, Russell, Florida, Rennell, and numerous small islands (the Lord Howe Group or Ontong Java, the Santa Cruz Islands, Tucopia and Mitre Islands, and the Duff, or Wilson Group, are also included in the Solomon Islands Protectorate). The total area of land and sea included in the B.S.I. Protectorate boundaries is approximately 375,000 square nautical miles. Population (census 1931), Europeans, 497; Aliens, 193; native population, 93,415. They are under British Protection. Education is entirely in the hands of missions. Revenue, for the year ended March 31, 1934, 53,039*l.*; expenditure, 56,822*l.* Coconuts, rubber, sweet potatoes, pine-apples, bananas are grown. The value of imports in 1933–34 was

158,776*l.*; and of exports, 111,669*l.* (mainly copra, 21,119 tons, 70,379*l.*; trocas shell, 467 tons, 25,210*l.*; ivory nuts, 1,085 tons, 6,841*l.*; timber logs, 735,419 super. ft., 2,935*l.*). Vessels entered, 1933–34, 61,501 tons (46,967 British); cleared, 58,554 tons (British 46,779 tons). A paper currency was issued in 1917–18. Little gold is in circulation, and only 4,600*l.* Protectorate paper money. The chief medium of exchange is money orders. There is a Resident Commissioner, whose headquarters are at Tulagi, a small island off the south coast of Florida. A nominated Advisory Council assists in the administration. (For part of the Solomon Islands lately owned by Germany and now administered by Australia, *see* section on late German New Guinea below.)

Resident Commissioner.—F. N. Ashley.

Starbuck Island, 5° 30′ S. lat., 155° W. long.; area 1 sq. m., uninhabited. **Malden Island**, 4° S. lat., 155° W. long.; area 35 sq. m., contains a considerable deposit of guano. **Jarvis Island**, on the equator, 159° W., area 1½ sq. m., pop. 30. **Palmyra**, 6° N., 162° 30′ W., area 1½ sq. m. **Baker Islands**, on the equator.

These islands are mostly of coral formation; most of them grow coconut trees, and some of them are valuable for their guano.

CONDOMINIUM.

The **New Hebrides Group** lies roughly 500 miles west of Fiji and 250 miles N.E. of New Caledonia. Estimated area 5,700 square miles. The group is under joint administration of English and French officials, as provided for by Anglo-French Convention of February 1906, ratified October 1906, and a Protocol signed at London on August 6, 1914, and ratified on March 18, 1922. The interests of British, French, and natives, respectively, are guaranteed; the conditions of land-holding in the Islands fixed; and the regulation of the recruitment of native labour provided for. Within the Islands Great Britain is represented by a High Commissioner, who delegates his powers to a Resident Commissioner stationed in the group.

The larger islands of the group are Espiritu Santo, Malekula, Epi, Ambrym, Efate or Sandwich, Erromanga, Tanna and Aneityúm. There are three active volcanoes, on Tanna, Ambrym and Lopevi, respectively. Earthquake shocks are of common occurrence. The native population of the group is about 50,000. On Malekula, Santo and Pentecost cannibalism is still practised. White population 1933: British 180, French 789. Foreigners, including Asiatics, who have opted for British regime 60, and for French regime 1,289. With the latter are included 62 Javanese, and 1,166 Tonkinese coolies under indenture to the French. There are numerous Presbyterian and Catholic mission native schools; one French Government school and two Catholic mission schools for whites. Public revenue, 1933: Condominium service, 11,126*l.*; public expenditure, 1933: British service, 8,850*l.*; Condominium service, 19,019*l.*

Bananas, sugarcane, oranges and all tropical fruits grow well. Kauri pine is found on Aneityúm, but is no longer worked. There are several British and French trading companies operating in the group. Settlers and speculating companies have acquired large areas of land within the islands, the ownership of which is generally disputed, and which in consequence remains undeveloped pending adjudication by the mixed tribunal. Imports, Condominium, 1933: value in French currency, 10,607,515 francs; value in British currency, 85,544*l.* Exports, Condominium: value in French cur-

rency, 8,908,036 francs; value in British currency, 71,839*l.* The trade is mostly with Australia, New Caledonia and France. Principal imports are: Provisions and foodstuffs, clothing, metal-work and furniture; exports: Copra (7,045 tons in 1933, value 23,864*l.*); coffee (433 tons, 15,937*l.*); cocoa (1,893 tons, 28,745*l.*); cotton, (62 tons, 1,084*l.*). Import of arms, ammunition, wines and spirits is prohibited except under special permit. There is frequent communication between New Caledonia and Australia, a six-weekly mail service being maintained by the Burns, Philip Line and a five-weekly service by Messageries Maritimes, while a two-monthly service is also maintained by the last-named company with France and the New Hebrides via Tahiti and Panama. The shipping entered and cleared from the Port of Vila during 1933 was: *Entered*:—British, 34,614 tons (14 vessels); French, 102,922 tons (37 vessels); other, 21,269 tons (9 vessels). *Cleared*:—British, 34,614 tons (14 vessels); French, 105,583 tons (37 vessels); other, 21,269 tons (9 vessels).

British High Commissioner.—Sir A. G. M. *Fletcher*, K.C.M.G., C.B.E.
French High Commissioner.—Monsieur *Siadous.*
British Resident Commissioner.—G. A. *Joy.*
French Resident Commissioner.—Monsieur *Sautot.*

MANDATED TERRITORIES IN THE PACIFIC: NEW GUINEA, WESTERN SAMOA, AND NAURU ISLAND.

THE former German possessions in the Western Pacific included: Kaiser Wilhelm's Land, Bismarck Archipelago, the German Solomon Islands, Nauru, the Caroline Islands, the Marshall Islands, and the Marianne or

Ladrone Islands (excepting the Island of Guam). The islands north of the Equator, namely, the Marshall, Caroline, Pelew, and Ladrone (Marianne) Islands, are now administered by Japan as mandatory. Those south of the Equator, namely, the Bismarck Archipelago, those of the Solomon Islands formerly owned by Germany, and (late) German New Guinea (Kaiser Wilhelm's Land), are assigned to Australia, German Samoa to New Zealand, and Nauru, a small islet just south of the Equator, to the British Empire.

THE MANDATED TERRITORY OF NEW GUINEA.

The Territory has an area of 93,000 square miles, extending from the Equator as far as 8° south latitude, and from 141° east longitude as far as 160° east longitude. An Australian force occupied these Possessions on September 12, 1914. The mandate from the League of Nations (see p. xxvii, THE STATESMAN'S YEAR-BOOK, 1929) is dated December 17, 1920, and on May 9, 1921, the Australian Government established its civil administration in the Territory. The laws of the Commonwealth, subject to local modifications as necessary, may be applied to the mandated territories. The military training of the natives, except for local police purposes, is prohibited, and no naval or military base or any fortifications may be established.

The non-indigenous population at June 30, 1934, was 5,453, of which the British numbered 3,026, Chinese 1,424, Dutch 249, German 404, Japanese 45, and United States of America 142. The approximate number of persons engaged in agricultural pursuits was 330, and in mining pursuits 1,150. The enumerated native population was 456,924 (included in which are 30,595 indentured labourers). The estimated native population of those areas of the Territory which have not yet been brought under Government control is 250,000.

Inter-island trade is carried on by small steamships and motor-schooners. There is a three-weekly service from Australia to Rabaul, and a monthly service from Yokohama, Hong Kong and Manila.

The total area under cultivation in the Mandated Territory at June 30, 1933, was 88,482 hectares. The greater part of this area was planted with coconuts, 85,326 hectares. Coffee, cocoa and kapok are also grown. Tropical fruits grow very abundantly. The staple articles of food of the natives are yams, taro, sago, and bananas. There is very little land used for pasture. The land is rich in mineral wealth, but no minerals, except gold in the Morobe District, are worked on account of the difficulty of transporting mining machinery. Native labour is used to work the plantations, and the natives are recruited either from the adjacent villages or from other parts of the Territory. There are some 16,999 native labourers so recruited for plantation purposes. The total indentured labour in the territory on June 30, 1934, was 30,595.

Administrator of the Territory of New Guinea.—Brigadier-General W. Ramsay *McNicoll*, C.B., C.M.G., D.S.O., V.D. (appointed Sept. 13, 1934).

The seat of Administration is at Rabaul, New Britain (non-indigenous population, 1,856, including 761 Asiatics).

1. **North Eastern New Guinea.** This territory, the northern section of south-east New Guinea, lies between 2° 35′ and 8° south latitude, and 141° and 148° east longitude. The area, including Manam, Karkar, Long, Bagabag, Schouten, Kairiru (D'Urville), and some smaller islands, is 69,700 square miles. The enumerated native population in 1934 for areas explored was 247,780. It was declared a German Protectorate in 1884, and was under the control and development of the New Guinea Company from 1885

to 1899. The principal station on the mainland is at Salamaua. The coast-line is very little broken, and there are few good harbours. There are high ranges running parallel with the coast plain, which is from 20 to 100 miles wide and broken with steep spurs in some places extending to the actual coast-line. The ranges in the interior have been little explored, and some of their summits are known to exceed 12,000 feet. The principal rivers are the Sepik, which is navigable for over 250 miles, the Ramu or Ottilien, and the Markham. The climate is hot and the rainfall large. There are three missionary societies at work; these missions are also planters and traders.

The chief towns are: In the Morobe District (non-indigenous population, 1,554) Salamaua, Wau and Lae; in the Madang District (non-indigenous population, 393) Madang.

2. **Bismarck Archipelago.**—In November, 1884, a German Protectorate was declared over the New Britain Archipelago and several adjacent groups of islands, and in May, 1885, they were renamed the Bismarck Archipelago. The Archipelago lies between 140° 30′ and 156° east longitude, and the Equator and 8° south latitude. The chief islands are New Britain, area 14,600 square miles; New Ireland, area 2,800 square miles; Lavongai (late New Hanover), 460 square miles; Duke of York Islands, area 22 square miles; the Admiralty Islands (principal island, Manus), area 663 square miles. The other groups included in this Archipelago are Mussau Islands, Gardner Islands, Nuguria, Nissan Island, the Vitu Islands, Umboi Islands, Hermit Islands, Ninigo Group, Kaniet and Sae Islands. In these various groups there are upwards of 100 small islands, having a total area of 1,115 square miles. The enumerated native population of the Archipelago in 1934 of areas patrolled was 247,780.

New Britain, the largest island of this group, is a long island of crescent shape lying east and west. It has a mean breadth of 50 miles and a length of 300 miles. The island is practically undeveloped except for 67,000 acres under cultivation chiefly on the Gazelle Peninsula in the north, four plantations on the northern coast, and six plantations on the southern coast, west of Henry Reid Bay. A Government station, named Gasmata (non-indigenous population 16), has been established about midway along the southern coast. Talasea (non-indigenous population 34) is situated on the north coast. The interior of the island is little known. The enumerated native population of areas patrolled in 1934 was 88,057. A mountain chain traverses the entire length of the island, and in the centre consists of several irregular ranges. There are several active volcanoes. The highest known peak is the Father, about 7,500 feet high, which is an active volcano. The island has very fine harbours. The only one visited regularly by oversea shipping is Simpson Harbour, in Blanche Bay. The principal settlement is around the shores of this bay. The chief product is copra, but cocoa and coffee are now being extensively planted. There are four missionary societies at work. The chief town is Rabaul (non-indigenous population, 1,856), which is the seat of the Government. The old capital was at Kokopo (non-indigenous population, 350), which is situated 14 miles south-east of Rabaul. At Rabaul there is an anchorage for all ships and a fine wharf has been built. Rabaul is well laid out and has a fine public garden. New Britain and the adjacent islands, including Duke of York Island, have an area of 14,600 square miles.

New Ireland (non-indigenous population, 592), the second in size and importance of the Bismarck Archipelago, is situated north of New Britain, from

which it is separated by St. George's Channel. The chief town is Kavieng (non-indigenous population, 200), at the north-west extremity of the island. The only other town is Namatanai (non-indigenous population, about 30), on the south-east coast. The island has a long range of mountains running through it. It is of older formation than New Britain, and does not show any signs of recent volcanic activity. The principal harbour is Nusa, on the north coast of which Kavieng, the seat of the local administration, is situated. The interior of the island, with the exception of the extreme southern end, is fairly well known. The enumerated native population in 1934 was 37,434, including adjacent islands. The soil is fertile and the climate similar to that of New Britain. The chief industry is coconut growing, the area under cultivation in New Ireland on June 30, 1934, was 24,451 hectares, 24,217 being planted with coconuts. There are numerous plantations around the coast near Kavieng. New Ireland and adjacent islands, including Lavongai, Tabar, Litui, Tanga, Feni, Mussau and Emirau Groups have an area of 3,800 square miles.

The Admiralty Islands are the most important of the small groups. The chief island is Manus, sometimes called Great Admiralty Island. The chief town is Lorengau (population, including district, 89) on the north-east coast. The enumerated native population of the group in 1934 was 13,633. Coconuts are the chief article of cultivation, and there are valuable pearl and other shell fisheries. There were 8,447 hectares planted with coconuts on June 30, 1934.

3. **Solomon Islands.**—The portion of the Solomon Islands within the area of the territory of New Guinea consists of the islands of Bougainville, Buka, and adjacent islands, including Nuguria, Nissan, Kilinailau, Tauu (Mortlock), and Nukumanu (Tasman) Islands. Bougainville has an area of 3,880 square miles, and an enumerated native population (of areas patrolled in 1934) of 39,425, including Buka, which has an area of 190 square miles. Smaller islands in this group have a total area of 30 square miles. The islands are very mountainous. Of the several volcanic cones, Bagana (in the Crown Prince range) is the only active volcano. The principal harbour is Kieta, situated on the east coast of Bougainville, where there is a Government station. Other good harbours are: Rawa and Tinputz on the north-east coast of Bougainville. There is a good harbour on the west side of Buka, named Carola Hafen. Missionary work amongst the natives is carried on by three missionary societies. The area planted with coconuts on June 30, 1934, was 9,914 hectares. The natives grow bananas, coconuts, taro, and sweet potatoes. The non-indigenous population is 216.

The following figures relate to the Territory of New Guinea:—

TERRITORY OF WESTERN SAMOA.

The former German Samoan Islands, now the Territory of Western Samoa, include Savaii and Upolu, the largest of the Samoan or Navigators' Islands. Samoa is a group of islands in the Western Pacific, lying in 13½ deg. to 14½ deg. S. lat., and 168 deg. to 173 deg. W. long. The islands are some 130 miles N. of Tonga and between 400 and 500 miles N.E. of Fiji. The group consists of nine islands, in addition to rocks and islets. They are all, with the exception of Rose Island, of volcanic formation, and are, for the most part, surrounded with coral reefs. The four largest islands are Savaii, Upolu, Tutuila and Tau, in the Manu'a Group. By the Anglo-German Agreement of November 14, 1899, ratified by the United States in January, 1900, Great Britain renounced all rights over the islands in favour of Germany as regards Savaii, Upolu, Apolima and Manono, and in favour of the United States as regards Tutuila and other islands.

On August 29, 1914, the British occupied German Samoa. By the Treaty of Peace, 1919, Germany surrendered her possessions abroad, and Samoa is assigned under a mandate dated December 17, 1920, from the League of Nations to His Majesty the King in right of his Dominion of New Zealand, which has been empowered to govern Western Samoa. The military training of the natives, except for local police or defence purposes, is prohibited, and no naval or military base or any fortifications may be established.

The civil administration was inaugurated on May 1, 1920. There is a Legislative Council, consisting of six official members, two elected European unofficial members, and two nominated native members representing the Samoan race. The Administrator is entitled to preside over every meeting of the Council. No person is qualified for appointment to the Legislative Council unless he is either a natural-born British subject or was born in Samoa. There is also an elective Native Council which advises the Administrator in native affairs.

Savaii has an area of about 700 square miles; Upolu has an area of approximately 430 square miles. Both islands are mountainous, fertile, and well watered. Several adjacent islets were included in the German dependency. The port of Apia is in Upolu. The inhabitants of the islands are Polynesians, professing Christianity (Protestants, Catholics, and Mormons). Population of Western Samoa, as recorded at June 30, 1934, was:—Europeans and half-castes, 3,017; Samoan natives, 49,048; Chinese labourers, 632; other islanders, 95; total, 52,792. There are five Government schools, forty-one schools conducted jointly by Government and Missions, and also schools conducted by various Missions alone—the number of scholars recorded being over 15,000. There are 160 miles of roads in the Territory, 20 miles of which are bitumen or asphalt. The chief products are copra, cacao, and bananas. Rubber is cultivated but is not exported at present. The revenue collected in Western Samoa for the year ended March 31, 1934, was 90,613*l.*; the expenditure was 89,955*l.* Imports for 1933, 150,856*l.* (from United Kingdom, 30,762*l.*, New Zealand, 51,034*l.*, Australia, 33,643*l.*, Canada, 4,515*l.*, Fiji, 6,802*l.*, U.S.A., 12,117*l.*); exports, 1933, 173,837*l.* (to United Kingdom, 37,839*l.*, New Zealand, 28,125*l.*, U.S.A., 27,638*l.*, Holland, 80*l.*, European ports (exact destination unknown), 76,290*l.*). The exports are mainly copra (11,526 tons, 101,347*l.*), cacao beans (899 tons, 41,813*l.*), and bananas (81,938 cases, 26,999*l.*). In 1933, 122 vessels (98,330 tons, of which 78 vessels of 68,983 tons were British) entered at and cleared from the port of Apia.

There is regular steam communication from New Zealand and Fiji, and the products of the territory are transported to overseas markets by steam and oil vessels which call at Apia every few weeks. A high power wireless station is erected at Apia.

The German currency has been replaced by sterling in the form of Samoan Treasury notes issued under the authority of the New Zealand Government. A branch of the Bank of New Zealand was opened at Apia in April, 1915.

The Minister of External Affairs for New Zealand is in charge of Samoa.

Administrator.—Brigadier-Gen. H. E. *Hart*, C.B., C.M.G., D.S.O., V.D. (appointed April, 1931).

NAURU ISLAND.

The island lies 26 miles south of the Equator, in longitude 166 degrees east. Area, 5,396 acres approximately. It is an oval shaped atoll of approximately 12 miles in circumference, surrounded by a reef which is exposed at low tide.

There is no anchorage adjacent to the island. On the seaward side the reef dips abruptly into the deep waters of the Pacific. On the landward side of the reef there is a sandy beach interspersed with coral pinnacles. From the sandy beach the ground rises gradually, forming a fertile section ranging in width from 200 to 800 yards and completely encircling the island. On the inner side of the fertile section there is a coral cliff which rises to a height of from 40 to 60 feet. Above the cliff there is an extensive plateau bearing phosphate of a high grade, the mining rights of which are vested in the British Phosphate Commissioners subject to the rights of the native landowners. It is chiefly on the fertile section of land between the sandy beach and the plateau that the natives have established themselves, and from which they obtain the necessary food for themselves and families. With the exception of a small fringe round a shallow lagoon, about one mile inland, the plateau, which contains the phosphate deposits, has few food-bearing trees and is not utilized for the purposes of native villages.

The island was discovered by Captain Fearn in 1798, annexed by Germany in October, 1888, and surrendered to the Australian forces in 1914. It is administered under a mandate, dated December 17, 1920, conferred on the British Empire and approved by the League of Nations. The military training of the natives, except for local police or defence purposes, is prohibited, and no naval or military base or any fortifications may be established. Great Britain, Australia and New Zealand agreed in July, 1919, that Australia should appoint the first Administrator for a term of five years, and thereafter the administrator was to be appointed as the three Governments should decide. The administrator has all the powers of government, administrative, legislative and judicial. The expenses of administration are met out of local revenue.

Population, July 1, 1934: 164 Europeans, 1,567 Nauruans, 14 other Pacific islanders, and 933 Chinese; total, 2,677.

Education.—Attendance at school both for European and Native children is compulsory until children reach the age of 16 years; then, until they reach the age of 17 years, the native children are required to attend at specified periods for technical training in the case of boys and home craft training in the case of girls.

Finance.—The revenue and expenditure of the island have been as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1928	19,903	18,267	1931	16,440	16,903
1929	19,936	17,859	1932	20,235	15,435
1930	18,992	15,532	1933	19,779	18,748

Excess of assets over liabilities as at December 31, 1933, 26,699*l.*

The interests in the phosphatic deposits were purchased in 1919 from the Pacific Phosphate Company by the Governments of the United Kingdom, the Commonwealth of Australia and New Zealand, at a cost of 3,500,000*l.*, and a Commission was appointed to ensure that the deposits were worked on business lines. An amount at the rate of 6*d.* per ton, in effect an export duty, is charged on phosphate exported. A Capitation Tax of 2*l.* for Europeans, 1*l.* for Chinese, 15*s.* for natives is collected from all physically fit males between the ages of 16 and 60 years. A royalty of 7⅞*d.* per ton as from July 1, 1932, is paid by the British

Phosphate Commissioners for every ton of phosphate shipped, of which $4\frac{3}{8}d.$ per ton is paid to the native landowner, $1\frac{1}{2}d.$ per ton is paid to the Administrator to be used solely for the benefit of the Nauruan people, and $2d.$ per ton is paid to the Administrator in trust and invested for the benefit of the landowner or his assigns, to whom the interest will be paid after the principal has been invested for a period of 20 years.

Commerce.—The export trade of the island consists, with the exception of a small quantity of copra, almost entirely of phosphate, shipped mainly to Australia and New Zealand. Phosphate exported (tons); 1930, 271,255; 1931, 245,165; 1932, 418,180; 1933, 363,680; Copra exported (tons): 1929, nil; 1930, 3; 1931, 74; 1932, nil; 1933, 15.

The imports consist almost entirely of food supplies, and machinery for the British Phosphate Commissioners, for use in connection with their works. Value of imports: 1930, 143,416*l.*; 1931, 108,729*l.*; 1932, 95,279*l*; 1933, 97,684*l.*

Shipping.—Practically the whole of the shipping coming to the island consists of steamers under charter to the British Phosphate Commission. Numbers of vessels entered and cleared: in 1929, 64 of 288,393 gross tons; 1930, 57 of 247,422 gross tons; 1931, 51 of 220,430 gross tons; 1932, 68 of 295,209 gross tons; 1933, 70 of 302,145 gross tons.

Communications.—The outstanding feature of Nauru, apart from the phosphate operations, is the Wireless Station, erected by the German Government to link up the island with their other Pacific possessions and Tsingtau. It was opened in December 1913, and though partially dismantled shortly after the outbreak of war, was soon restored, and has been in use ever since, though a large part of the original equipment has during recent years been replaced with new and up-to-date apparatus.

Administrator.—Commander Rupert C. Garsia (appointed January 17, 1933).

PART THE SECOND

THE UNITED STATES

UNITED STATES.

(UNITED STATES OF AMERICA.)

Constitution and Government.

THE Declaration of Independence of the thirteen States of which the American Union then consisted was adopted by Congress July 4, 1776. On November 30, 1782, Great Britain acknowledged the independence of the United States, and on September 3, 1783, the treaty of peace was concluded.

The form of government of the United States is based on the Constitution of Sept. 17, 1787, to which ten amendments were added Dec. 15, 1791; an eleventh amendment, Jan. 8, 1798; a twelfth amendment, Sept. 25, 1804; a thirteenth amendment, Dec. 18, 1865 (slavery abolished); a fourteenth amendment, July 28, 1868; a fifteenth amendment, March 30, 1870 (equal rights for white and coloured citizens); a sixteenth amendment, February 25, 1913 (income tax authorised); a seventeenth amendment, May 31, 1913; an eighteenth amendment, January 29, 1919 (liquor prohibition amendment); a nineteenth amendment, August 26, 1920 (woman suffrage); a twentieth amendment, February 6, 1933 (advancing the date of the President's and Vice-President's inauguration and abolishing the 'lame ducks' sessions of Congress); and a twenty-first amendment, December 5, 1933 (repealing the eighteenth, or liquor prohibition amendment).

By the Constitution, the government of the nation is entrusted to three separate authorities, the Executive, the Legislative, and the Judicial. The executive power is vested in a President, who holds his office during the term of four years, and is elected, together with a Vice-President chosen for the same term, in the mode prescribed as follows:—'Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of senators and representatives to which the State may be entitled in the Congress: but no senator or representative, or person holding an office of trust or profit under the United States, shall be appointed an elector.' In every State the electors, chosen by the various political parties and pledged to the party's candidates for President and Vice-President, are in turn chosen by direct vote of the citizens on a general ticket, on the system known in France as *scrutin de liste*. The Constitution enacts that 'the Congress may determine the time of choosing the electors, and the day on which they shall give their votes, which day shall be the same throughout the United States'; and further, that 'no person except a natural-born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years, and been fourteen years a resident within the United States.'

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in November; the electors thus chosen meet and give their votes at their respective State capitals on the first Monday after the second Wednesday in December next following their election; and the votes of the electors of all the States are opened and counted in the presence of both Houses of Congress on the sixth day of January. The total electoral vote is 531 (1 each for 96 Senators and 435 Representatives) and a majority—266—is necessary to elect. If no candidate has a majority, or if the successful candidate dies before taking office, the Vice-

President-elect becomes President; if the latter fails to qualify or dies, then Congress, by the twentieth amendment, designates the Acting President and Acting Vice-President until their successors can be elected. The presidential term formerly began at noon on March 4, in the year following leap years, but the twentieth amendment to the Constitution ratified February 6, 1933, advances the date for the inauguration of the President from March 4 to January 20 of the inaugural year. This amendment also instals the newly elected Congress in office on January 3, instead of—as formerly—in the following December. The President's salary is 75,000 dollars per year, but the Economy Acts of 1933 and 1934 reduced the salary by 15 per cent. until June 30, 1935. The Vice-President's salary, usually 15,000 dollars, was similarly reduced.

The President is commander-in-chief of the army and navy, and of the militia when in the service of the Union. The Vice-President is *ex-officio* President of the Senate; and in the case of the death or resignation of the President, he becomes the President for the remainder of the term.

President of the United States.—Franklin Delano *Roosevelt*, of New York, born in New York, on January 30, 1882; educated at Harvard University and Columbia University Law School; lawyer; member of State Senate, 1910–13; Assistant Secretary of the Navy, 1913–20; Democratic candidate for Vice-President of the United States, 1920; elected Governor of New York State, 1928; re-elected, 1930. Present term of office began on March 4, 1933, and expires January 20, 1937.

The offices of President and Vice-President have been occupied as follows:—

The administrative business of the nation is conducted by ten heads of departments, who form the 'Cabinet.' They are chosen by the President, but must be confirmed by the Senate. Each presides over a separate department, under the immediate authority of the President. The Cabinet, appointed March 4, 1933, is composed as follows:—

1. *Secretary of State.*—Cordell *Hull*, U.S. Senator from Tennessee; born 1871.

2. *Secretary of the Treasury.*—Henry *Morgenthau*, Jr., of New York, publisher; appointed January 1, 1934; born 1891.

3. *Secretary of War.*—George H. *Dern*, Governor of Utah; born 1872.

4. *Attorney-General.*—Homer S. *Cummings*, of Connecticut; lawyer and politician; born 1870.

5. *Postmaster-General.*—James A. *Farley*, of New York; business man and politician; born 1888.

6. *Secretary of the Navy.*—Claude A. *Swanson*, U.S. Senator from Virginia; born 1862.

7. *Secretary of the Interior.*—Harold L. *Ickes*, of Illinois; lawyer; born 1874.

8. *Secretary of Agriculture.*—Henry A. *Wallace*, of Iowa; editor of farm paper; born 1888.

9. *Secretary of Commerce.*—Daniel C. *Roper*, of Washington, D.C.; publicist and lawyer; born 1867.

10. *Secretary of Labour.*—Miss Frances *Perkins*, of New York; State Industrial Commissioner; born 1882.

Each of the above ministers has usually an annual salary of 15,000 dollars, but the Economy Acts of 1933 and 1934 reduced it by 15 per cent. until June 30, 1935; each holds office during the pleasure of the President.

The whole legislative power is vested by the Constitution in a Congress, consisting of a Senate and House of Representatives. The Senate consists of two members from each State, chosen by popular vote for six years. Senators must be not less than thirty years of age; must have been citizens of the United States for nine years; and be residents in the States for which they are chosen. Besides its legislative functions, the Senate is entrusted with the power of giving or withholding its 'advice and consent' to the ratification of all treaties initiated by the President with foreign Powers, a two-thirds majority of senators present being required for approval. It also has the power of confirming or rejecting all appointments to office made by the President; and its members constitute a High Court of Impeachment, with power, by a two-thirds vote, to remove from office and disqualify. The House of Representatives has the sole power of impeachment.

The House of Representatives is composed of members elected every second year by the vote of citizens who, according to the laws of their respective States, are qualified to vote for members of the State legislature. By amendments of the Constitution, disqualification on the ground of race, colour, or sex, is forbidden. Accordingly the electorate consists practically of all citizens of both sexes over 21 years of age. But the franchise is not universal. There are requirements of residence varying in the several States as to length from three months to two years; differing requirements as to registration; in some States the payment of taxes is necessary to qualify for the suffrage; in others the ability to read—in Massachusetts the ability to read English. In some Southern States voters are required to give a reasonable explanation of what they read. Some of the Western States admit to the franchise unnaturalised persons who have formally declared their intention to become citizens. Several of the Southern States have adopted methods—which differ from one another—too complicated for explanation here, with the frankly avowed purpose of excluding the negroes from the franchise and yet avoiding the constitutional consequences of discriminating 'on account of race, colour, or previous condition of servitude.' Untaxed Indians are excluded from the franchise, in most States convicts, in some States duellists and fraudulent voters. Women by the 19th amendment to the Federal Constitution, passed in 1920, have the vote and eligibility

for both the Federal and the State Legislatures on the same terms as men.

The number of Representatives to which each State is entitled is determined by the decennial Census, in the absence of specific Congressional legislation affecting the basis. By the Apportionment Act following the Census of 1910 the number of Representatives was 433 (one for every 210,415 inhabitants), but in 1912, with the admission of Arizona and New Mexico, it became 435. The Census of 1930, while leaving the total membership at 435, gave rise to an alteration, due to population shifts, in the representation of 36 out of the 48 States; this redistribution, as indicated by the Census, became effective in 1933, by virtue of legislation passed by Congress in 1929. The States now have the following Representatives:—

Alabama	9	Maryland	6	Oregon	3
Arizona	1	Massachusetts	15	Pennsylvania	34
Arkansas	7	Michigan	17	Rhode Island	2
California	20	Minnesota	9	South Carolina	6
Colorado	4	Mississippi	7	South Dakota	2
Connecticut	6	Missouri	13	Tennessee	9
Delaware	1	Montana	2	Texas	21
Florida	5	Nebraska	5	Utah	2
Georgia	10	Nevada	1	Vermont	1
Idaho	2	New Hampshire	2	Virginia	9
Illinois	27	New Jersey	14	Washington	6
Indiana	12	New Mexico	1	West Virginia	6
Iowa	9	New York	45	Wisconsin	10
Kansas	7	North Carolina	11	Wyoming	1
Kentucky	9	North Dakota	2		
Louisiana	8	Ohio	24		
Maine	3	Oklahoma	9	Total	435

According to the Constitution, Representatives must be not less than twenty-five years of age, must have been citizens of the United States for seven years, and be residents in the States from which they are chosen. The House also admits a 'delegate' from each of the two organised Territories, Alaska and Hawaii, and a 'resident commissioner' from Puerto Rico and the Philippines, each of whom has the right to speak on any subject and to make motions, but not to vote. The delegates and resident commissioners are elected in the same manner as the Representatives.

Each of the two Houses of Congress is sole 'judge of the elections, returns, and qualifications of its own members'; and each of the Houses may, with the concurrence of two-thirds, expel a member.

The Congress of the United States has the power to propose alterations in the Constitution, by the 5th article of the same. The article orders that the Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to the Constitution, or, on the application of the Legislatures of two-thirds of all the States, shall call a convention for proposing amendments, which in either case shall be valid to all intents and purposes as part of the Constitution when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or other mode of ratification may be proposed by Congress.

The salary of a Senator, Representative, or Delegate in Congress is usually 10,000 dollars per annum, with an allowance, based on distance, for travelling expenses, but it has been reduced by Act of Congress to 8,500 dollars per annum until June 30, 1935. The salary of the Speaker of the House of

Representatives is usually 15,000 dollars per annum, but has been reduced by 15 per cent.

No Senator or Representative can, during the time for which he is elected, be appointed to any *civil* office under authority of the United States which shall have been created or the emoluments of which shall have been increased during such time; and no person holding *any* office under the United States can be a member of either House during his continuance in office. No religious test is required as a qualification to any office or public trust under the United States, or in any State.

The period usually termed 'a Congress' in legislative language continues for two years; by the twentieth amendment, that of the 73rd Congress lasted from noon, March 4, 1933, until noon, January 3, 1935, at which latter time the term of the new House of Representatives began. The term of one-third of the Senators expires at the end of each 'Congress.'

The 74th Congress (1935–37), elected November, 1934, was constituted as follows: Senate, 69 Democrats, 25 Republicans, 1 Farmer Labour, 1 Progressive. House of Representatives, 322 Democrats, 102 Republicans, 3 Farmer Labour, 7 Progressives, 1 vacant. There are 6 women members of the Lower House and 1 of the Senate.

The National Government has authority in matters of general taxation, treaties and other dealings with foreign powers, army, navy, and (to a certain extent) militia, commerce, foreign and inter-State, postal service, coinage, weights and measures, and crimes against the United States.

Slavery was abolished throughout the whole of the United States by the thirteenth amendment of the Constitution, passed December 18, 1865, while the fourteenth and fifteenth amendments of the Constitution, passed in 1868 and 1870, gave to the former slaves all the rights and privileges of citizenship.

State and Local Government.

The Union comprises 13 original States, 7 States which were admitted without having been previously organised as Territories, and 28 States which had been Territories—48 States in all. Each State has its own constitution, which must be republican in form, deriving its authority, not from Congress, but from the people of the State. Admission of States into the Union is granted by special Acts of Congress, either (1) in the form of 'enabling Acts,' providing for the drafting and ratification of a State constitution by the people, in which case the Territory becomes a State as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission.

Each State is provided with a Legislature of two Houses (except Nebraska, which beginning 1937 will have a single-chambered Legislature), a Governor, and other executive officials, and a judicial system. Both Houses of the Legislature are elective, but the Senators (having larger electoral districts) are less numerous than the Representatives, while in some States their terms are longer and, in a few, the Senate is only partially renewed at each election. Members of both Houses are paid at the same rate, which varies from 150 to 2,500 dollars per session, or from 3 to 10 dollars per day during session, plus mileage, etc. The duties of the two Houses are similar, but in many States money Bills must be introduced first in the lower House. The Senate sits as a court for the trial of officials impeached by the other House, and often has power to confirm or reject appointments made by the Governor. In most States sessions are biennial, the Governor having power to summon an extraordinary session, but not to dissolve or adjourn. State Legislatures are competent to deal with

all matters not reserved for the Federal Government by the Federal constitution, or falling within restrictions imposed by the State constitutions. Among their powers are the determination of the qualifications for the right of suffrage, and the control of all elections to public office, including elections of members of Congress and electors of President and Vice-President; the criminal law, both in its enactment and in its execution, with unimportant exceptions, and the administration of prisons; the civil law, including all matters pertaining to the possession and transfer of, and succession to, property; marriage and divorce, and all other civil relations; the chartering and control of all manufacturing, trading, transportation, and other corporations, subject only to the right of Congress to regulate commerce passing from one State to another; labour; education; charities; licensing; fisheries within State waters, and game laws. The provision in the constitution forbidding Congress to levy direct taxes save in proportion to population, left taxes on income exclusively to the States until 1913, when the sixteenth amendment was adopted authorising the imposition of an income tax by Congress.

The Governor is chosen by direct vote of the people over the whole State. His term of office varies in the several States from 2 years to 4 years and his salary from 3,000 to 25,000 dollars. His duty is to see to the faithful administration of the law, and he has command of the military forces of the State. He may recommend measures, but does not present Bills to the legislature. In some States he presents estimates. In all but two of the States the Governor has a veto upon legislation, which may, however, be overridden by the two Houses, in some States by a simple majority, in others by a three-fifths or two-thirds majority.

The chief officials by whom the administration of State affairs is carried on (secretaries, treasurers, members of boards of commissioners, &c.) are usually chosen by the people at the General State elections for terms similar to those for which governors hold office.

In the Territories of Hawaii and Alaska there is a local legislature, whose Acts may be modified or annulled by Congress. The President appoints for 4 years the Governor of a Territory, the Territorial secretaries and other officials, and the Territorial judges. Puerto Rico, although not designated as a 'territory' in the technical sense, is self-governing, on a system almost identical with that of the Territories. The Philippine Islands are governed by a civil Governor and elected Upper and Lower Legislative Chambers.

The District of Columbia is the seat of the United States Government provided by the State of Maryland for the purposes of government in 1791. It is co-extensive with the city of Washington, and embraces an area of 62 square miles. The district has no municipal legislative body, and its citizens have no right to vote either in national or municipal concerns. By an Act of Congress of 1878, its municipal government is administered by three commissioners, appointed by the President.

The unit of local government in the North, especially in the New England States, is the rural township, governed directly by the voters who assemble annually or oftener if necessary, and legislate in local affairs, levy taxes, make appropriations, and appoint and instruct the local officials (selectmen, clerk, school-committee, &c.). Where cities exist the township government is superseded by the city government. Townships are grouped to form counties, each with its commissioners and other paid officials who have charge of public buildings, lay out highways, grant licences, and estimate and apportion the taxation necessary for county purposes. In the South the counties are themselves the units, though subdivided for educational or other special purposes. Their officials have in general additional functions, as the care of the poor and

the superintendence of schools. In the Middle and North-Western States the two systems of local government are mixed. In the West all the public land is already divided into townships six miles square.

Area and Population.

I. Progress and Present Condition.

Population of the United States at each census from 1790. Residents of Hawaii, Alaska, Puerto Rico, the Philippine Islands, Guam, Samoa, Virgin Islands, and Panama Canal Zone, and persons in the military and naval service stationed abroad are not included in the figures of this table. The residents of Indian reservations are not included prior to 1890.

[1] The other races, in 1860, comprise 34,933 Chinese and 44,021 Indians; for 1870, 63,199 Chinese, 55 Japanese, and 25,731 Indians; for 1880, 105,465 Chinese, 148 Japanese, and 66,407 Indians; for 1890, 107,488 Chinese, 2,039 Japanese, and 248,253 Indians; for 1900, 89,863 Chinese, 24,326 Japanese, and 237,196 Indians; for 1910, 71,531 Chinese, 72,157 Japanese, 265,683 Indians and 3,175 other races; for 1920, 61,639 Chinese, 111,010 Japanese, 244,437 Indians, and 9,488 all others; for 1930, 1,422,533 Mexicans, 332,397 Indians, 74,954 Chinese, 138,834 Japanese and 50,978 all others. In 1930 a separate classification was provided for Mexicans who, previously, had been counted with the white population. The 1920 figure for the white population included 700,541 who would have been counted as Mexicans, and included in 'other races' in 1930.

[2] Enumeration in 1870 incomplete. Figures in italics represent estimated corrected population.

[3] Between the 1910 census (April 15, 1910) and the 1920 census (January 1, 1920), the period covered was 116¼ months (less than a full decade). Adjusting for this, the exact rate of increase for the decade was 15·4 per cent. Similarly correcting for the 123 months between the 1920 and 1930 censuses, the true rate of increase was 15·7 per cent.

Total population in 1930 comprised 62,137,080 males, and 60,637,966 females; 68,954,823, or 56·2 per cent., were urban, and 53,820,223, or 43·8 per cent., rural.

In the following table of population statistics for 1920 and 1930, the

dates indicate the year in which the constitution was ratified by each of the original thirteen States, the year of the admission of each of the other States into the Union, and the years of organization of Territories:—

II. Movement of Population.

Natality and mortality statistics are based upon the birth and death certificates filed with the registrars of vital statistics of the respective states and territories, in accordance with their laws. Birth and death rates are computed from returns for those areas for which the registration is accepted by the Bureau of the Census as approximately complete. The registration area for births was established in 1915. With the admission of Texas in 1933 this area included for the first time all the Continental United States, the Virgin Islands and Hawaii. The estimated population of this area (exclusive of the Virgin Islands and Hawaii) was for that year 125,693,000, and the number of births (exclusive of still-births) returned was 2,064,944 or 16·4 per 1,000 population.

The annual collection of statistics for the registration area for deaths

began in 1900. For 1933 the death registration area was the same as the registration area for births with the addition of Puerto Rico. In that year there were reported from Continental United States 1,340,683 deaths, corresponding to a death rate of 10·7 per 1,000 population.

Total number of private families in 1930 was 29,904,663, of which 17,372,524 were urban, 6,604,637 lived on farms and 5,927,502 were rural but non-farm families. Of the total, 14,002,074 families owned their homes, 15,319,817 were tenants and the tenure of 582,772 was unknown.

The number of marriages in 1932 was 981,903; 1931, 1,060,914. There were 160,338 divorces and 3,903 annulments in 1932, against 183,664 divorces and 4,339 annulments in 1931.

Total number of immigrants admitted in year ending June 30, 1933, was 23,068, including 9,219 males and 13,849 females.

Total alien arrivals in 1933 (June 30) was 150,728; total alien departures, 243,802, an excess of departures over admissions of 93,074.

The total number of alien immigrants from 1820 to 1933 (June 30) arriving for permanent residence was 37,917,795. In the following statement, immigrants from Canada and Mexico are included in the total :—

Year ending June 30	British Isles [1]	Germany	Sweden, Norway, and Denmark	Austria and Hungary	Italy	Poland	France	Total Immigrants
1927	52,214	48,513	16,860	1,829	17,297	9,211	4,405	335,157

[1] Including Irish Free State.

The total number of immigrants from China between 1820 and 1933 was 379,293; the total number from Japan, from 1861, the earliest year of record, was 276,897. In 1929, the number of Chinese admitted, from all countries, was 1,071; in 1931, 748, and in 1933, 40. In 1929 there were 716 Japanese admitted; in 1931, 626, and in 1933, 60. Of recent years, departures have far exceeded arrivals.

Education

Each State of the Union has a system of free public schools established by law, comprising elementary schools, junior high schools and high schools, with courses covering from 11 to 13 years. In 1930 illiterates comprised 1·5 per cent. of native-born whites, 9·9 per cent. of foreign-born whites, 16·3 per cent. of Negroes, and 25 per cent. of other races; rate for entire population above 10 years of age, 4·3 per cent.

Since 1803, the United States Government, upon the organization of all

new States, has set aside from the public domain for the benefit of the public schools therein from one to four 'sections' (square miles) of land in each township of six miles square. The proceeds of the sale of this land make the principal part of the permanent school funds of such States. The income of permanent school funds and unsold school lands constitutes about 1·4 per cent. of the revenue receipts of the schools of the country. Taxation and appropriations yield about 95·5 per cent. of total revenue receipts, and other sources yield about 3·1 per cent. In 1932 the amount expended on public schools of elementary and secondary grades was 2,174,650,555 dollars. In 1932 the 1,380 universities, colleges, teachers' colleges and professional schools had an income of 670,197,145 dollars from all sources except additions to endowments.

[1] 1933. [2] 1931.

In 1930 there were in the United States 2,299 daily newspapers, 65 tri-weeklies, 12,825 weeklies, 487 semi-weeklies, 3,804 monthlies, 285 semi-monthlies, and 959 other periodicals; total, 20,724. In 1931 there were 2,415 daily newspapers, 11,524 weeklies and a total of 21,191 publications.

Justice and Crime.

The Federal Government maintains courts for the trial of crimes against the United States and of civil suits brought by the Government or its officers, or which arise under the Constitution, treaties and laws of the United States relating to such subjects as Admiralty, Patents, Taxation, Banking and Bankruptcy. The Federal Courts also have jurisdiction of cases between citizens of the different States and between citizens of a State and foreign States, citizens or subjects. In these cases, the amount in controversy must exceed 3,000 dollars, besides interest and costs.

The State Courts have jurisdiction over all civil and criminal cases arising under State laws and of proceedings in probate and divorce; the decisions of the Courts of last resort of the States as to the validity of treaties or of laws of the United States, or on questions arising under the Constitution, are subject to review by the Supreme Court of the United States. The highest court in each State is usually called the Supreme or Appellate Court with a Chief Justice and Associate Justices, usually elected by the people, but sometimes appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. Their salaries range from 5,000 to 22,500 dollars. The lowest courts are usually those of Justices of the Peace, but many towns and cities have municipal courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances; they frequently try civil cases involving usually not more than 300 dollars.

The Judges of the Courts of the United States, which include the District Courts, the Court of Claims, the United States Customs Court, the Court of Customs and Patent Appeals, the Circuit Courts of Appeals, and the Supreme Court of the United States, hold office during good behaviour. They may, however, retire with full pay at the age of 70 years, if they so desire, and if they have served a period of ten years.

The 88 United States District Courts are the lowest of the Federal Courts, being the courts of original jurisdiction. These try all criminal cases arising under the laws of the United States, including capital offences. The 12 Federal prisons in 1932 had 13,526 prisoners, including 442 women.

The Supreme Court consists of the Chief Justice and 8 Associate Justices, appointed by the President, with the advice and consent of the Senate. The United States is divided into 10 circuits, with a Circuit Court of Appeals, to each of which the Chief Justice or an Associate Justice is assigned. Cases from inferior courts are taken to the Circuit Courts of Appeals by appeal or to the Supreme Court either on appeal or writ of certiorari. That Court has also original jurisdiction in cases affecting foreign Ministers and those between the different States. The salary of the Chief Justice is usually 20,500 dollars, and that of each of the Associate Justices, 20,000 dollars, but the Economy Act of March 20, 1933, reduced them until June 30, 1935, by 15 per cent.

The Court of Claims has jurisdiction of suits based on claims against the Government founded on the Constitution and laws of the United States or arising out of contracts entered into with the Government and not sounding in tort. The United States Customs Court (formerly the Board of General Appraisers) has jurisdiction in customs cases. The Court of Customs and Patent Appeals passes upon appeals from decisions of the United States Customs Court involving questions as to the classification of merchandise under tariff Acts and the rates of duty to which various articles are liable, as well as appeals from decisions of the Patent Office.

The District of Columbia has a Juvenile Court, a Municipal Court, a Police Court, a Supreme Court with a general jurisdiction which includes that of a United States District Court, and a Court of Appeals. The more important territorial possessions of the United States have two systems of Courts, one corresponding to the Courts of the States to adjudicate cases arising under territorial laws, and the other, the United States Courts, to pass on cases involving Federal Law. The Philippine Islands have no Federal District Court.

Social Welfare.

Social legislation falls normally within the province of the various State Governments, though the 74th Congress is considering legislation designed to encourage it through Federal aid. Twenty-eight States and 2 Territories have since 1925 established Old Age Pension systems of which 25 are mandatory and the others optional, depending upon the consent of the counties in the States for adoption. In 15 jurisdictions the applicant must have reached 65 years of age, in 14 States 70 years, and in one, 68 years. Maximum pensions, where stated, range from 20 dollars a month to 45 dollars. Most States require that the applicant shall have been a citizen for 15 years, and shall have resided in the State for periods varying from 10 to 20 years.

Finance.

Federal.

The following table gives 'receipts' and 'expenditures' of the Federal Government. The former item includes receipts from customs and internal revenue, repayment of foreign loans, and receipts from miscellaneous sources but excludes postal revenues. 'Expenditures' cover disbursements for general governmental activities, including departmental expenditures, national defence, Indians, veterans' benefits, and miscellaneous activities, interest on public debt, public debt retirements from the sinking fund and certain special receipts, and emergency expenditures; they exclude postal expenditures which are payable from postal revenues, except postal deficiencies, and debt retirements from surplus revenues. Figures for both receipts and expenditures include trust and contributed funds.

Since June 10, 1921, a National Annual Budget System and an independent Audit of Government Accounts have been installed.

State Finance.

The revenues of the separate States are derived from direct taxation ; motor fuel and motor vehicle and other license taxes now constitute the greatest source of revenue of State Governments, while the counties, cities, towns and other local sub-divisions rely largely on taxes on property, real and personal, collected and expended by the local authorities. For details see the separate States.

According to the Bureau of Census, in 1932 revenue receipts of the National Government were 2,625,330,000 dollars : of the State Governments, 2,207,935,000 dollars ; of the 3,062 counties, 1,313,832,000 dollars ; and of cities, towns, school districts and other political units, 5,330,150,000 dollars. Governmental-cost payments that year were: National Government, 3,906,556,000 dollars (31·20 dollars *per capita*); State Governments, 2,505,885,000 dollars (20·24 dollars); counties, 1,411,826,000 dollars (12·88 dollars); cities, towns and other units, 5,644,954 (49·24 dollars *per capita* in those units having a population of 2,500 or more). Net debt, 1932, was: National Government, 21,834,565,000 dollars (174·40 dollars *per capita*); State Governments, 2,373,634,000 dollars (19·17 dollars); counties, 2,390,830,000 dollars (21·82 dollars); cities, towns, etc., 12,825,051,000 dollars (120·50 dollars for units above 2,500 population). Aggregate debt was 39,424,080,000 dollars (316·63 *per capita*).

National Defence.

I. Army.

The Army of the United States, under the Act of June 15, 1933, consists of the Regular Army, the National Guard of the United States, the Officers' Reserve Corps, the Organised Reserves, and the Enlisted Reserve Corps.

Original or first enlistments in the Regular Army are for one or three years at the option of the soldier, but all re-enlistments are for three-year periods. Enlisted men are classified in seven grades. The pay of the lowest grade, or private, is 21 dollars per month (about 4 shillings a day at normal exchange rates), and that of the highest grade, or master sergeant, is 126 dollars per month. In addition enlisted men receive an increase of

5 per cent. of their base pay for each 4 years of service in the army, the total increase not to exceed 25 per cent. Certain enlisted men also receive additional pay as specialists, the maximum addition under this head being 30 dollars per month. Additional pay is also received by enlisted men of the Army air corps who are rated as and perform duties of air mechanics or who are assigned to duties which require participation in flights.

The strength of the Regular Army, as authorised by Congress for the year 1934, was 12,403 officers and 118,750 enlisted men. The authorised number of warrant officers is 869. For the year 1935 provision was made for 165,000 of all ranks.

The actual strength at the end of June, 1934, was 136,975 all ranks.

The war organisation and establishments of the Regular Army on mobilisation are as follows:—

Field Army . .	340,963	Cavalry Division .	9,762
Army Corps . .	88,828	Infantry Brigade .	6,310
Infantry Division .	22,030	Artillery Brigade .	5,823

For administration, training, and tactical control, continental United States is divided into 9 Corps areas on a basis of military population. On June 30, 1934, the United States Army troops stationed abroad were as follows: Philippines, 11,130; Hawaii, 14,294; Panama, 9,598; China, 722; Puerto Rico, 870; Alaska, 291; Miscellaneous (including troops en route, military attaches, etc.), 2,242; total, 39,147.

The peace-time organization of the Regular Army comprises the following tactical or mobile units (some partly inactive) and certain wholly inactive units to balance this force:—

	G.H.Q.	Army	Division	Non-Divisional or Separate Units

[1] Includes batteries, troops, sections, and similar units.
[2] Includes Air Corps wings.
[3] Includes Air Corps groups.

The Officers' Reserve Corps consists of officers of all grades, including general officers, organised into sections corresponding to the various branches of the Regular Army. In the higher grades it is at present composed principally of men who served as officers during the World War, and on June 30, 1934, had a strength of 126,463. These officers may be called for training not exceeding 15 days each year, and, with their own consent, except in time of a national emergency, may be ordered to active service at any time and for any period, provided that the appropriations for the purpose are not exceeded.

The Reserve Officers' Training Corps, maintained for the purpose of keeping up the strength of the Officers' Reserve Corps, is organised into units at civil educational establishments. It is divided into a Senior Division, formed mainly at the universities, and a Junior Division, formed mainly at the secondary schools. On June 30, 1934, 104,147 students were enrolled in the Reserve Officers' Training Corps, of whom 65,419 were enrolled in senior units and 38,728 in junior units. Students of the Reserve Officers' Training Corps before being commissioned in the Officers' Reserve Corps must complete the four years' military training prescribed, which includes one summer training camp of a period of six weeks each.

The Enlisted Reserve Corps consists of men voluntarily enlisted therein who have qualifications making them eligible for enlistment in the Regular Army. On June 30, 1934, the Enlisted Reserve Corps had a strength of 4,646. Provided the appropriations for the purpose are not exceeded, enlisted reservists may be called up for training not exceeding fifteen days each year, and, with their own consent, except in time of a national emergency, may be ordered to active service at any time and for any period.

The National Guard, or organised militia, is maintained by the several States and Territories (including the District of Columbia, and the Territories of Hawaii and Puerto Rico) with the aid of grants from the Federal Government. It is organised into the same arms of the service as the Regular Army, and is supplied by the Federal Government with uniforms, arms, and equipment of the same type as issued to the Regular Army. Service in the National Guard is purely voluntary.

The National Guard of the United States was created as of June 15, 1933, as a reserve component part of the Army of the United States, to consist of such federally recognised National Guard units, organisations and personnel as may comply with the requirements of the amended National Defence Act, so that when Congress authorises the use of the armed land forces of the United States for any purpose requiring the use of troops in excess of those of the Regular Army, the President may henceforth order, instead of draft, any or all units of the National Guard of the United States, and the members thereof, into the active military service of the United States. The organization of the units will be maintained intact in so far as practicable. Upon being relieved from active duty all individuals and units thereupon revert to their original status in the National Guard of the United States and of the several states.

The strength of the National Guard as authorised by law in enlisted men is 800 men for each Senator and Representative in Congress with such strength as the President may decide for the District of Columbia, the Territories of Hawaii and Puerto Rico, Alaska and the Canal Zone. The maximum strength of the National Guard for the present as fixed by the Secretary of War is 190,211 officers, warrant officers, and enlisted men. The actual strength on June 30, 1934, was 13,309 officers, 198 warrant officers, and 171,284 enlisted men. Minimum training required includes 48 drill periods yearly, each of not less than one and one-half hours' duration, in addition to fifteen days' training in encampments or manœuvres. Pay is provided for the 15 days' training in encampments at the same rate as for Regular Army, while each drill period is considered approximately equal to a day's service for pay purposes.

Citizens' military training camps are operated during the summer months, at which thousands of young men acquire military training each year, without cost to themselves. Four courses are provided, the highest of which has as its objective the preparing of the candidate for appointment as second lieutenant in the Officers' Reserve Corps. Civilians attending the highest

course must have had prior military training equal to that obtainable in the three lower courses.

The President is Commander-in-Chief of both the Army and the Navy. The Secretary of War controls the Army with the aid of one Assistant Secretary and a Chief of Staff. The former has supervision of the procurement of all military supplies, and is charged with the mobilisation of industrial establishments for wartime needs, while the latter is entrusted with the general supervision of the Army.

The Springfield rifle is the standard shoulder weapon of the Military Forces of the United States. Improvement in ammunition has increased its range from 3,450 to 5,500 yards. During the World War a large quantity of modified Enfield rifles were used. Machine guns of all calibres are of the Browning type. The approved calibres of mobile artillery are as follows:—

for the pack . . .	75 mm. pack howitzer
for the light . . .	75 mm. gun and 105 mm. howitzer
for the medium . .	155 mm. gun and 155 mm. howitzer.
for the heavy . .	155 mm. gun and 8 inch howitzer.

The 155 mm. howitzer is now issued in lieu of the 105 mm. howitzer, pending production of sufficient quantity of 105 mm. howitzers. Likewise, the 240 mm. howitzer is used in lieu of the 8-inch howitzer. Anti-aircraft guns are of 3-inch and 105 mm. calibres. The most powerful mobile gun is a 14-inch gun on railway carriage. The largest calibre is the 16-inch gun on barbette carriage.

In the Budget for 1934–35, 250,831,036 dollars were voted for the Army, including 27,396,453 dollars for the Air Corps. Budget 1935–36, 378,000,000 dollars.

II. Navy.

As provided under the terms of the Washington Treaty of August 17, 1923, and the London Treaty of December 31, 1930, the United States is allowed 15 capital ships. The replacement tonnage allowed for capital ships is the same as for the British Navy, viz. 525,000 tons. As authorised by Congress, the Navy Department has completed important alterations to the ten oldest battleships. These alterations include chiefly the installation of additional protection against submarine attack, anti-aircraft deck protection and the substitution of tripod masts for the cage type. Increased angle of elevation has been given to the last four battleships modernised. No increase in elevation has been made in the case of the three oldest battleships of the 15 retained on the effective list.

The Air Service is an integral part of the Fleet. For the fiscal year 1934–35, the appropriation for the Bureau of Aeronautics is 18,643,320 dollars. This sum is exclusive of personnel and certain establishment charges. The appropriation for the fiscal year 1933–34 was 21,957,459 dollars.

The gross naval expenditures have recently been as follows: 1929–30, 375,291,828 dollars; 1931–32, 353,628,362 dollars; 1932–33, 342,176,417 dollars. The appropriation for the fiscal year 1933–34 was 313,330,878 dollars; and for the current year, 1934–35, it is 283,812,732 dollars.

The total number of enlisted men as at June 30, 1934, was 80,312. Naval officers number 9,582. The Marine Corps, which is largely employed as an expeditionary force, consists of 1,187 officers and 15,174 men.

The American Navy is administered by the Secretary of the Navy, as the head of the executive department known as the Department of the Navy.

The Secretary has an Advisory Council, composed of: the Assistant Secretary of the Navy; the Assistant Secretary of the Navy for Aeronautics; the Chief of Naval Operations; the Chiefs of the following Bureaus: Navigation; Ordnance; Construction and Repair; Engineering; Aeronautics; Supplies and Accounts; Ordnance; and Medicine and Surgery; also the Commandant of the Marine Corps, the Judge Advocate-General, and the Budget Officer. The Chief of Naval Operations, who is charged by law with the operations of the Fleet and with the preparations and readiness of plans for its use in war, is also President of the Naval General Board, which is an advisory body of senior officers, consulted on important questions of policy, including the number, types and characteristics of ships that should constitute the Fleet.

The Government navy yards are at Portsmouth, N.H.; Boston, Mass.; Brooklyn, N.Y.; Philadelphia, Pa.; Norfolk, Va.; Charleston, S.C.; Mare Island, Cal.; Puget Sound, Wash.; Pearl Harbour, Hawaii, and Cavite, P.I. In addition there are naval stations at Newport, R.I.; Key West, Fla.; New Orleans, La.; Guantanamo, Cuba; Tutuila, Samoa; Olangapo and Guam. The naval training stations are at Norfolk, Va.; San Diego, Cal.; Newport, R.I.; and Great Lakes, Ill. Naval air stations and air bases are located at Norfolk, Va.; Pensacola, Fla.; Coco Solo, C.Z.; San Diego, Cal.; Seattle, Wash.; and Pearl Harbour, Hawaii.

The Operating Force Plan for 1934–35 provides for the following ships in commission: 14 battleships; 15 heavy and 10 light cruisers; 72 destroyers; 54 submarines; 4 aircraft carriers; 5 mine-layers; and 1 airship. Counting patrol vessels, mine-sweepers, etc., the total will be 306 ships.

The following is a classified statement of United States vessels built on September 30, 1932, 1933, and 1934, based on data furnished by the U.S. Navy Department:—

	As at September 30.

Other vessels of the United States navy may be summarised. There are 4 mine-layers; 6 modern and 2 old river gunboats; 23 small 'eagle' patrol vessels, and 23 submarine-chaser patrol vessels; also rated as patrol vessels are 4 old gunboats and 2 converted yachts. There are 8 tenders for destroyers, 2 for aircraft, and 6 for submarines; 3 repair ships; 3 colliers and 18 oilers; and a large number of miscellaneous auxiliaries, mine-sweepers and tugs.

The submarine flotillas include 46 of the S Class, 20 of the R Class, 9 of the O Class and 11 of the V Class—a total of 86 completed units.

In April, 1935, there were under construction for the United States

Navy three aircraft carriers (*Enterprise* and *Yorktown*, each of 20,000 tons, and a third of 14,500 tons); 12 10,000-ton cruisers (*Quincy, Vincennes, Wichita, Savannah, Nashville, Brooklyn, Philadelphia, Phœnix, Boise, Honolulu* and two more); 13 flotilla leaders; 42 destroyers; 14 submarines; and two gunboats. Seven of the destroyers are due for completion during 1935.

The United States Coast Guard, though administered by the Treasury in time of peace, is a potential reserve for the Navy, as part of which it is intended to operate in time of war. Its personnel comprises 1,173 officers and 9,800 men. Vessels in commission on July 1, 1934, included 37 cruising cutters, 28 harbour tugs, 4 special service vessels, 140 patrol vessels, 81 picket boats and about 2,000 smaller craft; 22 of the cruising cutters are modern vessels of from 1,780 to 2,065 tons displacement. With a single exception, they are armed with 5-inch or 6-inch guns.

Production and Industry.

I. Agriculture.

Public lands, unappropriated and unreserved, as reported by the United States General Land Office, on July 1, 1932, totalled 173,318,246 acres, including both surveyed and unsurveyed. They were situated in the following States:—

States	Acres	States	Acres	States	Acres
Arizona	13,581,760	Minnesota	269,451	Oregon	12,920,334
Arkansas	175,924	Montana	6,288,429	South Dakota	419,270

In 1930 there were 6,288,648 farms, of which 3,568,394 were operated by owners, 55,889 by managers, and 2,664,365 by tenants; farm population on January 1, 1934, was estimated at 32,509,000; 1933, 32,242,000; 1932, 31,241,000; 1931, 30,585,000.

Gross income from farm production, 1933, was 5,985,341,000 dollars, including 271,000,000 dollars from Government payments under the Agricultural Adjustment Act; 1932, 5,330,943,000 dollars; in 1931, 6,968,491,000 dollars; in 1929, 11,941,000,000 dollars. The gross income from all crops was, in 1933, 2,876,880,000 dollars; in 1932, 2,290,778,000 dollars; in 1931, 2,748,528,000,000 dollars; in 1929, 5,434,000,000 dollars. From animals and products, gross income in 1933 was 3,094,359,000 dollars; in 1932, 3,033,620,000 dollars; in 1931, 4,210,439,000 dollars; in 1929, 6,507,000,000 dollars.

The areas and production of the principal cereal crops for three years are shown in the subjoined tables.

In 1934 output of tame hay was estimated at 51,941,000 tons from 51,495,000 acres; of alfalfa, 18,986,000 tons from 11,448,000 acres; and of wild hay, 4,749,000 tons from 8,899,000 acres.

The output of cane sugar in 1932 amounted to 223,000 short tons; in 1933, 205,000 short tons; and in 1934, 228,000 short tons. All these figures are for Louisiana only. The beet sugar production, refined value, in 1934 amounted to 1,162,000 short tons; and in 1933, 1,642,000 short tons.

Cotton acreage and production (excluding 'linters'), for the last six years were:—

Years	Acres harvested	1,000 Bales (500 lbs. gross)	Years	Acres harvested	1,000 Bales (500 lbs. gross)
1929	43,242,000	14,825	1932	35,939,000	13,002

1931	38,705,000	17,095	1934	27,515,000	9,731

The cotton production in 1934 was grown in the following States (in bales, 500 lbs. gross): Texas, 2,395,000; Mississippi, 1,145,000; Alabama, 965,000; Georgia, 995,000; Oklahoma, 325,000; Arkansas, 875,000; North Carolina, 650,000; South Carolina, 695,000; Louisiana, 488,000; Tennessee, 412,000; Missouri, 245,000; Arizona, 110,000; California, 255,000; New Mexico, 92,000; Virginia, 39,000; Florida, 28,000; all other, 17,000; total, 9,731,000.

In 1934 tobacco was harvested from 1,335,200 acres (1,756,600 acres in 1933), producing 1,095,662,000 lbs. Output of the chief tobacco-growing States were:—

The following table exhibits the number of farm animals on farms on January 1, 1920, April 1, 1930, and January 1, 1934 and 1935.

Live Stock	1920 (Census)	1930 (Census)	1934 (Estimate)	1935 (Estimate)
Horses	19,767,161	13,510,839	11,963,000	11,827,000
Mules	5,432,391	5,375,017	4,925,000	4,795,000
Cattle of all kinds	66,639,556	63,895,826	68,290,000	60,667,000
Sheep	35,033,516	56,975,084	52,212,000	49,766,000
Swine	59,346,409	56,287,920	57,177,000	37,007,000

Total estimated value of all farm animals on farms in the United States on January 1 was, for 1930, 5,994,970,000 dollars; for 1933, 2,674,509,000 dollars; and for 1934, 2,854,217,000 dollars.

In 1933, 1,762,688,000 lbs. of butter, 543,735,000 lbs. of cheese, and 2,141,929,000 lbs. of condensed and evaporated milk were produced.

In 1932 the estimated production of wool was 345,440,000 pounds from 44,431,000 sheep; in 1933, 364,730,000 pounds from 44,771,000 sheep; and in 1934, 354,529,000 pounds from 44,376,000 sheep.

The census of manufactures reports for 1931 show that the value of canned vegetables and soups was 210,997,427 dollars; of canned fruits, 79,297,064 dollars; of dried fruits, 60,564,703 dollars.

II. Forests and Forestry.

The United States forest lands, capable of producing timber for commercial use, cover 494,898,000 acres, or about one-fifth of the whole country. The classification is as follows:—Old growth, 98,855,000 acres; second growth of saw timber size, 89,790,000 acres; second growth of cordwood size, 120,881,000 acres; fair to satisfactory restocking land, 102,073,000 acres; and poor to non-restocking land, 83,299,000 acres. Ownership of forest land is distributed as follows: Federal Government, 88,027,000 acres; State, county, and municipal, 10,632,000 acres; privately

owned, 396,239,000 acres. The net area of the 148 national forests administered by the U.S. Forest Service, including commercial and non-commercial forest land, was on July 1, 1933, 162,009,145 acres.

Fire takes a heavy annual toll in the forests; total area burned over in 1932 was 41,731,160 acres. About two-thirds of total forest area is now under organized fire protection service.

III. Mining.

The following are the statistics of the metallic products of the United States in 1932, and 1933 (long tons, 2,240 lbs.; short tons, 2,000 lbs.). The values are: For iron, at point of production; for platinum and quicksilver, the value at New York City; for copper, lead and zinc, sales values.

The approximate value of mineral products, 1933, 2,499,000,000 dollars; 1932, 2,461,700,000 dollars; 1931, 3,166,600,000 dollars.

Oil production in 1933 included 898,874,000 barrels of crude petroleum, 33,610,000 barrels of natural gasolene, and 1,473,000 barrels of benzol. Refinery consumption in 1933 of domestic crude petroleum totalled 873,745,000 barrels. Production of motor fuel, 1933, 408,284,000 barrels.

The precious metals in 1934 were mined mainly in California, South Dakota, Alaska, the Philippines, Colorado, Utah and Nevada for gold, and Idaho, Utah, Montana, New Mexico, Colorado, Arizona, and Nevada for silver. The production of gold and silver in the United States from 1792 to 1934 was as follows:—

Year	Gold		Silver	
	Quantity	Value	Quantity	Value
	Ozs. troy	Dollars	Ozs. troy	Dollars
1792–1847 . . .	1,186,977	24,537,000	309,500	404,500

[1] See footnote to table on preceding page covering value of gold output for 1933; that for 1934 was calculated at 35·00 dollars per ounce.

[2] The 31,584,218 ozs. produced in 1934 were valued at the Treasury's buying rate of 64·6 cents an ounce.

Precious stones are found in considerable varieties in the United States, including sapphires (in Montana), turquoise, tourmaline, garnets, beryl, agates, amethyst, ruby, topaz, &c.

IV. Manufactures.

The following table shows the condition of manufacturing industries in the United States as reported at various censuses from 1909 to 1933. Statistics relate to establishments reporting products valued at 5,000 dollars or more, except figures for 1909 and those for wages and horse-power for 1914 and 1919 which include data for all establishments reporting products valued at 500 dollars or more. The change affects very slightly the statistics except for the number of establishments; as in 1919 establishments with products valued at more than 500 dollars but less than 5,000 dollars, while representing 22·6 per cent. of the total number of establishments, reported only five-tenths of one per cent. of the total number of wage earners and three-tenths of one per cent. of the total value of products.

[1] Does not include millinery, gloves, footwear, underwear and outerwear made in knitting mills, and corsets.

[2] Embraces the manufacture of products of boiler shops, foundries, and machine shops, exclusive of products of establishments specialising in specific classes of products such as locomotives, stoves and furnaces, cast-iron pipe, engines and power pumps, machine tools, and textile machinery, which are placed in other classifications.

[3] Does not include fur and fur-lined garments, hats, gloves, boots and shoes, shirts, hosiery, underwear and outerwear made in knitting mills.

[4] The principal products, in a broad sense classified as chemicals, which are treated as separate industries and not here included are explosives, fertilizers, soap, and wood distillation products.

In certain textile industries the number of active spindles and looms in the years 1928 to 1933 was as follows:

Year	Spindles in operation			Wool looms in operation [2]		
	Cotton [1]	Woollen [2]	Worsted [2]	Wide	Narrow	Carpet and Rugs
1928	33,569,792	1,646,989	1,558,089	32,618	9,256	6,489

[1] Spindles operated at some time during the year excluding short time or overtime.

[2] Average number based on monthly returns from about 97 per cent. of the manufacturers.

Value of the output of certain classes of textiles in 1931 and 1933 :—

Nature of products	1931	1933

Woollen and worsted goods	479,632,000	442,399,000

Output of motor vehicles and chassis in 1933 comprised 1,573,913 passenger vehicles valued at 762,721,000 dollars, and 346,443 motor trucks valued at 186,085,000 dollars. Domestic exports of automotive products (automobiles, parts, accessories, tyres, service appliances, fire-engines and trailers) in 1932 were valued at 86,637,000 dollars; in 1933 at 101,721,000 dollars.

The output of the iron and steel industries since 1929 is shown by the following figures, supplied by the American Iron and Steel Institute :—

The production of tin plates and terne plates was, in 1920, 1,445,545 gross tons; in 1929, 1,968,280 gross tons; in 1930, 1,763,443 gross tons; in 1932, 1,032,507 gross tons; and in 1933, 1,769,098 gross tons.

Bureau of Census reported there were in 1933 214 blast furnaces (in active plants in which any furnaces were in operation during any part of the year) with a daily capacity of 134,693 gross tons. Active furnaces numbered 125 with a daily capacity of 78,324 tons. In 1933 the output of pig-iron (including blast-furnace ferro-alloys) was 13,257,000 gross tons, value 204,056,000 dollars. Active Bessemer, or modified Bessemer, steel plants in 1931, had 79 converters with a total daily capacity (24 hours) of 47,491 gross tons of ingots or direct steel castings. Active open-hearth steel plants in 1931 had 1,123 basic and acid furnaces with daily capacity (24 hours) 180,861 gross tons. The crucible steel furnaces in active steel plants in 1931 were 36 of 174 gross tons daily capacity (24 hours); and the electric steel furnaces numbered 271 of 6,407 tons.

Steel Output for Consumption or Sale	1931	1933

Total	25,895,146	23,163,000

The total value of products of the steel works and rolling mills in 1933 was 1,143,889,000 dollars; in 1931, 1,402,843,000 dollars. The values of the principal products, excluding the values of amounts consumed in the same works, were for 1931 and 1933 as follows:—

Products	1931	1933
	Dollars	Dollars
Direct steel castings	59,557,000	32,296,000
Steel rails	48,197,000	15,157,000

Iron and steel plates and sheets (not armour)[1]	201,773,000	190,427,000
Iron and steel rolled blooms, slabs, &c.; muck and scrap bar and sheet and tinplate bars	161.673,000	137,957,000

[1] Not including cold-rolled.

The output of tin plates in 1933 was 3,764,702,348 lbs., valued at 144,434,487 dollars; output of terne plates was 198,253,737 lbs., valued at 6,336,352 dollars.

The following are some statistics of cotton (exclusive of linters) :—

Year ending July 31	Production		Consumption (running bales)	Exports of U.S. production (running bales)	Net imports (500-pound bales) [2]

In the United States the values are fixed not according to average prices, but according to invoices or shipping papers, which the importers and exporters have to produce. For imports the invoices are signed by an American Consul; for exports the shipping papers are signed by the exporter or agents at the port of shipment. The quantities and values are determined by declarations.

The 'most favoured nation' treatment in commerce between Great Britain and the United States was agreed to for 4 years by the treaty of 1815, was extended for 10 years by the treaty of 1818, and indefinitely (subject to 12 months' notice) by that of 1827.

Currency and Credit.

Prior to the banking crisis that occurred early in 1933, the monetary system had been on the gold standard for more than 50 years; an Act of March 14, 1900, required the Secretary of the Treasury to maintain at a parity with gold all forms of money issued by the United States. For a description of these, *see* THE STATESMAN'S YEAR-BOOK, 1934, p. 491. At the time of the banking crisis in March 1933, gold payments by banks and the Treasury were suspended by the Government, and the export of gold was placed under the control of the Secretary of the Treasury, who in April placed an embargo on gold exports; the value of the dollar in foreign exchange markets declined, by the end of the year, to more than 35 per cent. below its legal parity in terms of gold currencies. Steps were taken to withdraw from circulation all gold coin and gold certificates. Further

legislation in June, 1933, prohibited the inclusion of gold clauses in all future obligations, including obligations of the United States except currency, and abrogated such clauses in obligations already outstanding; currency may be redeemed in gold certificates, in silver and in lawful money.

The Gold Reserve Act of 1934, approved January 30, vested the title to all gold in the country in the United States Government, and the Federal Reserve banks were given credits in equivalent amounts in dollars in the Treasury payable in gold certificates. On January 31, under powers granted by Congress, the President re-determined the weight of the gold dollar, which was fixed at 15 5/21 grains of gold nine-tenths fine compared with the old weight of 25 8/10 grains, and the Treasury announced its intention to buy any gold tendered at 35 dollars per fine ounce troy and to sell gold at the same rate for export to foreign central banks whenever exchange rates reached the gold export point.

The Silver Purchase Act of 1934, approved by the President on June 19, declared it to be the policy of the United States to increase the amount of silver in its monetary stocks with the aim of having and maintaining one-fourth of their monetary value in silver and three-fourths in gold, and the Treasury was directed to purchase silver at home or abroad to achieve this end. The President was also authorized by executive order to require the delivery to the United States Government of all silver within the country in exchange for coin or currency; this he did in a proclamation of August 9.

Currency in the United States for many years has comprised several varieties. Prior to May, 1933, the legal tender qualities of these classes varied, but in that month all types of currency were made equally legal tender.

The following statement shows by kinds the amount of United States money in circulation—*i.e.* outside the Treasury and the Federal Reserve banks—on September 30, 1933 and 1934:—

Banking.

The banking system of the United States comprises: (1) National banks supervised by the Federal Government, under the National Bank Act of 1863 and subsequent amendments; (2) State-chartered banking institutions,

State banks, trust companies and savings banks organized under the banking laws of the various States, and private banks; and (3) Federal Reserve banks operating under the supervision of the Federal Reserve Board.

In addition there are banks for extending agricultural credits operating under the jurisdiction of the Farm Credit Administration; and Federal Home Loan Banks organized under the Federal Home Loan Bank Act of July 22, 1932 to make advances upon the security of home mortgages.

National banks organized after June 16, 1933, are required to have capital of not less than 50,000 dollars. Prior to that date the minimum capital was 25,000 dollars. Since 1927 they have been permitted under certain limitations to establish branches within the cities in which they are located, and since June 16, 1933, they have been permitted to have branches in the States in which they are located to the same extent as may be permitted by State law to the State-chartered institutions. They are authorized to issue circulating notes not in excess of paid-in capital, secured by United States Government bonds of certain issues deposited with the Treasurer of the United States. By an Act approved July 22, 1932, the eligible list of bonds, previously limited to certain issues of 2 per cent. bonds, was extended for a period of three years to include all United States Government bonds bearing interest at a rate not exceeding 3⅜ per cent. On June 30, 1934, 724,566,000 dollars of eligible bonds were on deposit with the Treasurer to secure circulation.

At the time of the banking crisis, early in March, 1933, all banks in the United States were closed by action of the Federal Government, and were subsequently permitted to reopen only under official licence. For National banks and State bank members of the Federal Reserve System the licence had to be obtained from the Secretary of the Treasury, and for other State banks from the State banking authorities.

Licensed member banks (5,417 National banks and 958 State member banks) which were operating on an unrestricted basis on June 30, 1934, reported resources and liabilities as follows:—

Resources	Thousands of dollars	Liabilities	Thousands of dollars
Loans (including overdrafts)	12,522,980	Capital stock, including pfd.	2,497,343

[1] Includes certified and officers' cheques, and cash letters of credit and travellers' cheques outstanding.

For State-chartered banking institutions, minimum capital and other requirements imposed by State banking codes vary from State to State. These institutions (including commercial, mutual and stock savings banks

and all private banks under State supervision) numbered about 10,150 (licensed) on June 30, 1934 (compared with 18,256 on June 30, 1928). There were on that date 565 mutual savings banks, with deposits of 9,720,000,000 dollars, and about 8,630 other banks with deposits exceeding 5,000,000,000 dollars, none of which belonged to the Federal Reserve System.

The functions of a central bank are performed in the United States by the Federal Reserve System, established by Act of December 23, 1913, and comprising the Federal Reserve Board of eight members sitting in Washington, and 12 Federal Reserve banks located one in each of the Federal Reserve districts into which the country is divided. Of the Board members, six are appointed for twelve-year terms by the President, who designates one to serve as Governor and one as Vice-Governor of the Board. The Secretary of the Treasury and Comptroller of the Currency are members *ex-officio*. This Board prescribes administrative regulations and exercises general supervisory powers. In each Federal Reserve district the capital of the reserve bank is subscribed by member banks of the district in proportion to their capital and surplus. Member banks include all National banks, except in Hawaii and Alaska, since these banks are required by law to join the system, and such eligible state banks and trust companies as elect to accept the conditions of membership. Member banks are required to deposit their reserves in the Reserve banks and only deposit credits in the Reserve banks count as their regular reserve.

The Reserve banks are authorized to issue Federal Reserve notes secured by an equal amount of gold certificates and eligible paper, or until March 3, 1935 (or until 1937 if the President so prescribes), by direct obligations of the United States if so authorized by a majority rule of the Federal Reserve Board, with a minimum reserve of gold certificates equal to 40 per cent. of the gold certificates; to issue Federal Reserve bank notes secured by direct obligations of the United States, or during the existing emergency by other collateral; to discount eligible paper for member banks; to make properly secured advances to member banks; in exceptional cases to make properly secured loans and advances to individuals, partnerships or corporations; under certain conditions to grant credits for working capital for established industrial and commercial businesses for a period up to 5 years, either directly or through a financial corporation; to engage in certain open market operations, principally to buy and sell U.S. securities and bankers' acceptances; to function as collection agencies and clearing houses for member banks; and to act as fiscal agents of the United States Government. These banks loan principally to banks and carry no deposits, except for other banks and for governments. On December 31, 1934, the capital funds and total resources of these banks were as follows:

District	Federal Reserve Bank	Capital paid in and Surplus (in thousands of dollars)	Total Resources (in thou. dollars)	District	Federal Reserve Bank	Capital paid in and Surplus (in thousands of dollars)	Total Resources (in thous. dollars).

[2] Uncollected items (exclusive of Federal reserve notes of other Federal Reserve banks) in excess of deferred availability items.

There are also banks which operate solely in the field of agricultural credits. The Farm Credit Administration was created by Executive Order, effective May 27, 1933, to consolidate existing Federal agencies dealing primarily with agricultural credit. These include among others the twelve Federal Land banks and the twelve Federal Intermediate Credit banks. The loans of these banks outstanding on September 30, 1934, were 1,792,410,000 dollars and 191,391,000 dollars, respectively. The Joint-Stock Land banks, which formerly made farm mortgage loans, are no longer making new loans, and are being gradually liquidated.

Savings banks and trust companies reported for June 30, 1934, total savings deposits of 21,867,666,000 dollars belonging to 39,562,174 depositors, an increase of 742,132,000 dollars and 299,732 depositors from the previous year.

The Banking Act of June 16, 1933, made provision for the insurance of bank deposits, effective January 1, 1934, at first on a temporary basis for an amount up to 2,500 dollars for each depositor, and later, effective July 1, 1934, for an amount up to 5,000 dollars for each depositor. Under the law a permanent fund will be available on July 1, 1935, which will permit the insurance of deposits up to 10,000 dollars, and for 75 cents on the dollar for amounts between 10,000 and 50,000 dollars, and 50 cents on the dollar on amounts above 50,000 dollars. On December 31, 1934, all of the National banks (5,555) and 8,700 State banks had their deposits insured.

Money, Weights, and Measures.

The old *dollar* of 100 *cents* was of the par value of 49·26*d.*, or 4·8666 dollars to the pound sterling.

The monetary unit, in accordance with the monetary law of March 14, 1900, was the gold dollar of 25·8 grains (or 1·6718 gramme) ·900 fine. Under existing statutes, the Government is still under obligation to maintain parity between gold and all forms of currency. By the Act of May 12, 1933, the President of the United States was given authority to reduce the gold content of the dollar by not more than 50 per cent. and by the Gold Reserve Act of January 30, 1934, he was required to reduce it to at least 60 per cent.; accordingly on January 31, 1934, he fixed its value (which may be subsequently reduced still further to 50 per cent.) at 59·06 per cent., or $15\frac{5}{21}$ grains of gold ·900th fine. This was equal to a price for gold of 35 dollars a fine ounce.

During 1934 the relationship between the dollar and the pound ranged between 4·89 and 5·17 dollars; against the gold currencies, the dollar ranged between 58·49 cents and 64·44 cents, based on its old parity.

Gold coins (of the old weight and fineness) are 20, 10, 5 and $2\frac{1}{2}$-dollar pieces called *double eagles*, *eagles*, *half-eagles*, and *quarter-eagles*. The old eagle weighed 258 grains or 16·7181 grammes ·900 fine, and therefore contained 232·2 grains or 15·0463 grammes of fine gold. Except for collectors' holdings, these are no longer legally in circulation.

The silver dollar weighs 412·5 grains or 26·7296 grammes ·900 fine, and therefore contains 371·25 grains or 24·0566 grammes of fine silver. Subsidiary silver coins contain 347·228 grains of fine silver per dollar. These are the half-dollar, quarter-dollar and dime (one-tenth). There is a 5-cent piece of nickel and copper and a one cent piece of bronze.

Seven kinds of Notes are in circulation in the United States. (1) United States Notes, in denominations of 1, 2, 5, 10, 20, 50, 100, 500, 1,000 and 10,000 dollars (so-called 'Greenbacks') which are covered by a gold reserve of 156 million dollars in the Treasury. (2) Gold Certificates, in denominations of 10, 20, 50, 100, 500, 1,000, 5,000, and 10,000 dollars. (3) Silver Certificates in denominations of 1, 2, 5, 10, 20, 50, 100 (and a few 500 and 1,000) dollars. (4) Treasury Notes of 1890, which have long been in process of retirement. (5) Federal Reserve notes in denominations of 5, 10, 20, 50, 100, 500, 1,000, 5,000 and 10,000 dollars. (6) National Bank Notes in denominations of 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 dollars. (7) Federal Reserve Bank Notes in denominations of 1, 2, 5, 10, 20, 50 and 100 dollars.

British weights and measures are usually employed, but the old Win-

chester bushel and wine gallon are used instead of the new or imperial standards. They are:—

Wine Gallon = 0·83268 imperial gallon.
Bushel . = 0·9690 imperial bushel.

Instead of the British cwt. of 112 lbs., one of 100 pounds is used; the *short ton* contains 2,000 lbs.; the *long ton*, 2,240 lbs.

The State debt on July 1, 1930, amounted to 82,277,000 dollars, most of it in 3 per cent. interest-bearing bonds. The assessed value of property (1927) was 614,383,152 dollars. According to the Council of the Corporation of Foreign Bondholders, the State has a defaulted debt estimated at about 8,700,000 dollars, exclusive of interest charges.

The National Guard on June 30, 1934, consisted of 154 officers, 2 warrant officers and 2,040 enlisted men.

Production and Industry.—Arkansas is an agricultural State. In 1930 the total farm area was 16,052,962 acres, of which 7,907,000 acres were crop land (number of farms, 242,334) ; value of farm lands and buildings, 547,828,250 dollars. Gross income, 1932, from crops, 63,600,000 dollars ; from live-stock, 29,600,000 dollars. In the north maize (15,398,000 bushels in 1934), wheat (296,000 bushels), oats, sorghum (698,000 gallons of syrup), potatoes (2,624,000 bushels), sweet potatoes (1,620,000 bushels), hay and forage crops are grown ; in the south, cotton and tobacco. For 1934 the cotton area was 2,277,000 acres, and the yield 875,000 bales. In the north-west, fruits, especially apples and peaches, are grown. The cultivation of roses (for perfumes) is pursued locally. Live stock on January 1, 1933, comprised 125,000 horses, 319,000 mules, 549,000 milch cows, 915,000 all cattle, 61,000 sheep, and 1,100,000 swine. The national forests in Arkansas on June 30, 1933, had an area of 1,270,677 acres.

Arkansas produces 92 per cent. of the country's supply of bauxite for aluminium ; output, 1933, 142,179 long tons. The State has a large coal area ; 1,033,471 short tons were mined in 1933. The State also produced in 1933 manganese ores (1,890 long tons), lead, whetstones (from novaculite), petroleum (11,608,000 barrels), natural gasoline or petrol (15,000,000 gallons), and natural gas (18,585,000 *M* cubic feet in 1930). Zinc output, 1933, 11 short tons. The quarries yield limestone, sandstone, granite, and slate, besides asphalt, and mineral waters. Total mineral output in 1932 was valued at 15,540,323 dollars.

Of the industries the cutting and working of timber is one of the most important. Arkansas, according to the census of manufactures of 1931, had 1,017 manufacturing establishments employing 25,161 wage-earners earning 19,023,047 dollars, using materials, containers, fuel and power costing 53,871,445 dollars, and with an output valued at 98,323,495 dollars.

In 1933, there were in the State 4,782 miles of steam railway and 122 miles of electric railway. State-maintained highways (1932) total 9,020 miles, of which 7,480 miles are surfaced. Federal-aid appropriations to the State were in 1933, 2,124,109 dollars ; in 1934, 6,748,335 dollars.

On June 30, 1933, Arkansas had 45 licensed national banks with deposits of 43,224,000 dollars and loans and investments of 44,531,000 dollars and 149 licensed State banks and trust companies with deposits of 38,112,000 dollars and loans and investments of 34,378,000 dollars.

CALIFORNIA.

Constitution and Government.—California, first settled in 1769, was from its discovery down to 1846 politically associated with Mexico. On July 7, 1846, the American flag was hoisted at Monterey, and a proclamation was issued declaring California to be a portion of the United States, and on February 2, 1848, by the treaty of Guadalupe-Hidalgo, the territory was formally ceded by Mexico to the United States, and was admitted to the Union September 9, 1850.

The Senate is composed of 40 members elected for four years—half being elected each two years—and the Assembly, of 80 members, elected for two years. Regular sessions are held biennially. The State capital is Sacramento.

California is represented in Congress by 2 Senators and 20 Representatives.

Governor.—Frank F. Merriam, 1935-39 (10,000 dollars).

Secretary of State.—F. C. Jordan.

California is divided into fifty-eight counties, one of which—San Francisco—has a combined county and city government. The legislative authority is vested in a board of 11 supervisors elected from the city and county at large. Each of the other counties is governed by a board of 5 supervisors elected from districts.

Area and Population.—Area, 158,297 square miles (2,645 square miles being water). Public lands, unappropriated on June 30, 1932, totalled 15,712,567 acres, practically all either mountains or deserts.

Census population, April 1, 1930, 5,677,251, an increase of 2,250,390, or 65·7 per cent. over 1920.

The population in 4 census years (with distribution by sex in 1930) was :—

Years	White	Negro	Mexican	Indian	Asiatic [4]	Total	Per Sq. Mile

[4] California leads in the number of Asiatics; in 1930 they included: males, 27,988 Chinese, 56,440 Japanese and 28,625 Filipinoes; females, 9,373 Chinese, 41,016 Japanese and 1,845 Filipinoes; a total equal to almost 3 per cent. of the population. Also included are a small number of Hawaiians, Samoans and Maoris.

Three-fourths of the population of California are of American birth. Of the 810,034 persons of white foreign birth in 1930 (14·3 per cent. of the total) 107,249 (13·2 per cent.) were Italian, 101,445 (12·5 per cent.) Canadian, 85,019 (10·5 per cent.) English, 81,840 (10·1 per cent.)

German, 45,385 (5·6 per cent.) Irish, 44,047 Russian, 41,734 Swedish, 27,803 Scotch, 23,175 Danish, and 22,695 Portuguese. Of the total population in 1930, 73·3 per cent. were urban, 1·4 per cent. Negro, and 44 per cent. (1,943,290 males and 557,354 females) were gainfully employed. The 1930 census showed 59,586 men and 68,567 women divorced. The number of private families in 1930 was 1,610,030 (of 3·34 persons).

Old Age Pensions (maximum one dollar per diem) were established in 1929 for those 70 years or older who have been citizens and residents of the State for 15 years, and have assets not exceeding 3,000 dollars. On September 1, 1934, 18,547 pensioners were drawing an average of 19·94 dollars per month.

There are about 27 Indian reservations in the State, with a total area (1931) of 899 square miles and population of 19,251 Indians.

The census population of the larger cities on April 1, 1930, was: Los Angeles, 1,238,048; San Francisco, 634,394; Oakland, 284,063; San Diego, 147,995; Long Beach, 142,032; Sacramento, 93,750; Berkeley, 82,109; Pasadena, 76,086; Glendale, 62,736; San José, 57,651; and Fresno, 52,513.

Religion and Education.—The Roman Catholic Church, with 720,803 adherents in 1926, is much stronger than any other single church; next are the Jewish congregations with 122,724 members, Methodists (116,974), Presbyterians and Baptists. Total membership, all denominations, 1,522,211.

In 1930, illiterates 10 years of age or older numbered 124,810 (2·6 per cent. of that age group), of whom 45,600 were foreign-born whites; of persons between the ages of 5 and 20, 1,104,943 (78·5 per cent.) were attending school. Full-time attendance at school is compulsory for children from 8–16 years of age for a minimum of 170 days per annum, and part-time attendance is required from 16 to 18 years. In 1933–34, 1,780 kindergartens had 1,179 teachers and 65,415 pupils; the 4,003 elementary schools had an enrolment of 678,977 pupils, with 22,827 teachers; the 616 public high schools (including 125 junior high schools) had an enrolment of 626,442 pupils (of whom 5,452 were taking junior college courses), and 19,627 teachers; 17 junior colleges had 29,601 pupils and 872 teachers. The 7 teachers' colleges had 11,351 students and 463 teachers. Total expenditures for the above in 1933–34 were 112,134,429 dollars.

There are in California three great universities—the University of California (State), Leland Stanford Junior University, and the University of Southern California. The University of California has colleges for resident instruction and research at Berkeley, Davis, San Francisco, Los Angeles, Mount Hamilton (the Lick Astronomical Department), Riverside and at La Jolla (the Scripps Institution of Oceanography). In 1933–34, during the regular college year, there were at Berkeley, 1,072 officers of instruction and 12,445 students; at Los Angeles, 328 officers of instruction and 6,765 students; at other centres, 780 officers of instruction and research and 1,128 students: a grand total (with deduction for duplicates) of 2,181 officers and 20,275 resident students. Leland Stanford Junior University near Palo Alto, chartered in 1885 and opened in 1891, has an endowment now amounting to about 31,685,000 dollars and total assets of 43,500,000 dollars. The original endowment, including large landed estates, was given by Mr. and Mrs. Leland Stanford in memory of their son. In 1933–34 it had 713 professors and teachers and 3,975 students. The University of Southern California at Los Angeles (Meth. Episcopal) had 500 instructors and 12,699 students (1933–34). It has an endowment of one million dollars. California (State) Polytechnic School is located at San Luis Obispo.

California has a comprehensive public library system, headed by the

State Library; 46 county libraries in 1933 had 3,973 branches and 5,826,215 volumes; 43 city libraries had 4,960,569 volumes.

The assessed value of taxable property on June 30, 1934, was 7,807,448,030 dollars, and the gross bonded State debt amounted to 155,916,500 dollars.

The National Guard, on June 30, 1934, consisted of 502 officers, 7 warrant officers, and 6,078 enlisted men.

Agriculture and Forestry.—Extending seven hundred miles from north to south, and intersected by several ranges of mountains, California has almost every variety of climate, from the very wet to the very dry, and from the temperate to the semi-tropical. Irrigated land, 1930, 4,746,632 acres. On April 1, 1930, there were 135,676 farms, comprising 30,442,581 acres, from 6,549,967 of which crops were harvested in 1929; 4,502,755 acres were classed as woodland; the value of all farm lands and buildings was 3,419,470,764 dollars. Gross income, 1932, from crops, 247,100,000 dollars; from live-stock, 140,200,000 dollars.

The cereal crops in 1934 were: maize, 2,850,000 bushels; wheat, 8,384,000 bushels; oats, 2,254,000 bushels; barley, 22,682,000 bushels; rice, 7,665,000 bushels. California leads in the following fruit crops (with output in 1934): wine grapes, 446,000 tons; table grapes, 299,000 tons; raisin grapes, 799,000 tons; oranges, 36,660,000 boxes; lemons, 7,500,000 boxes; pears, 9,751,000 bushels; figs, 28,500 tons; peaches, 20,460,000 bushels; apricots, 140,000 tons; plums, 61,000 tons; prunes, 170,000 tons; olives, 16,000 tons; almonds, 10,900 tons; and walnuts, 39,000 tons. Grapefruit, 1934, was 1,617,000 boxes; apples, 6,500,000 bushels; cherries, 16,000 tons. It also leads in truck or vegetable crops; beans, 1934, 3,675,000 bags.

The hay crop is the most valuable of all crops grown in the State; acreage, 1934, 1,733,000; crop, 3,722,000 tons. The State leads in output of alfalfa 2,530,000 tons in 1934. Hops amounted to 11,250,000 pounds, and cotton 255,000 bales.

On January 1, 1934, the farm animals were: 176,000 horses, 36,000 mules, 619,000 milch cows, 1,850,000 all cattle, 2,886,000 sheep, and 625,000 swine. The wool-clip in 1934 was 22,387,000 lbs. from 2,630,000 sheep. The coast and river fisheries are important.

There are (1934) in the State 18 national forests covering a total net area of 19,175,640 acres; 4 national parks with a total net area of 1,246,367 acres; 6 national monuments with a total area of 1,658,902 acres; 48 State parks and 12 State historical monuments with a total area of approximately 292,030 acres; a total ocean beach frontage of 78 miles; and private timber land with a total estimated area of 33,039,000 acres. The annual value of lumber produced in the California pine district is approximately 30,000,000 dollars. The 1934 shipments of lumber were valued at 16,615,000 dollars.

Mining, Manufactures, etc.—Gold was first discovered in 1848. In 1933 the gold output was 613,578 ozs. (in 1934, 709,963 ozs.); silver output, 402,592 fine ozs. Other mineral products (1933) were copper, 632,049 pounds; lead, 772,463 pounds; and quicksilver, 4,102 flasks (of 75 pounds net). California is one of three most important petroleum-producing States of the Union (Oklahoma and Texas being the other two); in 1933 the output was 172,139,362 barrels. Natural gas utilised (1933) amounted to 257,876,038 *M.* cubic feet. Natural gasoline or petrol output (1933) was 61,789,536 barrels. Portland cement (1933) was 7,284,031 barrels. From California comes the whole of the borate materials produced in the United States, 197,495 tons in 1933. The value of all the minerals produced in 1933, 206,484,671 dollars; in 1932, 199,196,493 dollars.

In California in 1931 there were 10,050 manufacturing establishments, employing 205,126 wage-earners earning 265,990,997 dollars, using materials, containers, fuel and power costing 1,074,819,807 dollars, and giving an output worth 1,865,942,763 dollars. Petroleum refining, the chief industry, reached a production in 1931 valued at 249,161,044 dollars; canning and preserving fruit, 141,138,382 dollars; meat packing, 99,236,577 dollars. The motion picture industry, in which California ranked first, reported production costs of 119,478,670 dollars. Total output of electric energy generated in 1932 was 7,901,339,382 kilowat hours chiefly from 42 commercial and 21 municipal electric light and power establishments.

Commerce and Communications.—The chief commercial ports of California are San Francisco and Los Angeles. In the calendar year 1933 total exports through San Francisco were valued at 84,511,952 dollars; imports, 55,514,289 dollars. Exports through Los Angeles were valued at 58,113,965 dollars; imports, 25,813,800 dollars.

Total mileage of steam railroads (1933) was 13,367 miles; electric railways, 2,808 miles. During the year 1933 there were 426 automobile stage and truck lines operating on the highways of California. During 1933 the foregoing carriers transported (1) freight: steam roads, 25,054,904 tons; auto trucks, 1,760,329 tons; and (2) passengers: steam roads, 29,194,256; electric roads, 405,182,978. On June 30, 1934, the State maintained 12,751 miles of highway.

On June 30, 1934, all licensed (State and National) banks had 556,546 savings depositors with 1,595,029,000 dollars to their credit; 130 licensed National banks had deposits of 2,046,829,000 dollars and loans and discounts of 1,027,070,000 dollars.

COLORADO.

Government.—Colorado was first settled in 1858, made a Territory in 1861 and admitted into the Union on Aug. 1, 1876. The General Assembly consists of a Senate of 35 members elected for four years, one-half retiring every two years, and of a House of Representatives of 65 members elected for two years. Sessions are biennial. Qualified as electors are all persons male and female (except criminals and insane) 21 years of age who are citizens of the United States, and have resided in the State for 12 months immediately preceding the election. The State is divided into 63 counties. The Capital is Denver. The State sends to Congress two Senators and 4 Representatives.

Governor.—Edward C. Johnson, 1935-1937 (5,000 dollars).
Secretary of State.—James H. Carr.

Area and Population.—Area, 103,948 square miles (290 square miles being water). Public lands unappropriated on June 30, 1932, totalled 7,467,597 acres. Indian reservations cover an area of 619 sq. miles, with a population of 817 on April 1, 1932.

Census population April 1, 1930, 1,035,791, an increase of 96,162 or 10·2 per cent. over that of 1920.

Population in four census years (with distribution by sex in 1930) was as follows:—

CONNECTICUT.

Government.—Connecticut was first settled in 1635 and has been an organised commonwealth since 1637. In 1639 a written constitution was adopted which, it is claimed, was the first in the history of the world formed by a social compact. This Constitution was confirmed by a charter from Charles II. in 1662, and replaced in 1818 by a State Constitution, framed that year by a constitutional convention. Connecticut was one of the original thirteen States of the Union.

The General Assembly consists of a Senate and a House of Representatives. All citizens (with necessary exceptions) 21 years of age, resident in the State for a year and in the town for six months preceding the election, have the right of suffrage provided that they can read the Constitution in English. The Senate consists of 35 members, the House of Representatives of 258 members. Members of each House are elected for

the term of two years ; salary, 300 dollars and mileage. Legislative sessions are biennial. The State Capital is Hartford.

Governor.—Wilbur L. Cross, 1935–37 (5,000 dollars).

Secretary of State.—Dr. C. John Satti.

The State is represented in the Federal Congress by two Senators and six Representatives. For local administration the State is divided into eight counties which are subdivided into towns within which are cities and boroughs.

Area and Population.—Area, 4,965 square miles (145 square miles being water). Census population on April 1, 1930, 1,606,903, an increase of 226,272 or 16·4 per cent. over that of 1920. Population in four census years (with distribution by sex in 1930) was as follows :—

Years	White	Negro	Mexican	Indian	Asiatic	Total	Per Sq. Mile
1870	527,549	9,668	—	235	2	537,454	111·5

DISTRICT OF COLUMBIA.

Government.—The District of Columbia, first settled in 1790, is the seat of Government of the United States, and consists of an area of approximately sixty-nine and one-quarter square miles, which was ceded by the State of Maryland to the United States as a site for the National Capital. It was established under Acts of Congress in 1790 and 1791, which were passed to give effect to a clause in the Constitution of the United States providing for the seat of the Government. Congress first met in it in 1800 and Federal authority over it became vested in 1801.

The present form of local government, which dates from July 1, 1878, is a municipal corporation administered by a board of three Commissioners. Two of these are appointed from civil life by the President of the United States, and confirmed by the Senate, for a term of three years each. The other Commissioner is detailed by the President from the Engineer Corps of the Army. Congress alone has authority to enact legislation and appropriate money for the municipal expenses.

Secretary to the Board of Commissioners.—Daniel E. Garges.

Area and Population.—The area of the District of Columbia is 69·245 square miles, approximately 62 of which are land.

The population at the date of recent Federal Censuses (with distribution by sex in 1930) has been as follows:—

Years	White	Negro	Mexican	Indian	Asiatic	Total	Per sq. Mile
1870	88,278	43,404	—[1]	15	3	131,700	2,270·7
1910	236,113[2]	94,446	15[2]	68	427	331,069	5,517·8
1920	326,825[2]	109,966	35[2]	37	708	437,571	7,292·9
1930	353,914	132,068	67	40	780	486,869	7,852·7
Male .	168,982	62,265	41	17	618	231,883[3]	—
Female	184,932	69,843	26	23	162	254,986	—

[1] Included in white.
[2] Adjusted by deducting the estimated number of persons who would have been classified as Mexican in 1930.
[3] Estimated.

In 1930, 27·1 per cent. of the total population was Negro or of Negro descent; 50·1 per cent. of the population (155,028 men and 88,825 women) were gainfully employed. Of the foreign-born white population, representing

6·1 per cent. of the total population, 9·5 per cent. were English, 11·7 per cent. Irish, 11·4 per cent. German, 16·4 per cent. Russian, 14·5 per cent. Italian, and 5·6 per cent. Canadian.

In 1930 census, 1,808 men and 2,992 women were reported divorced; the number of private families was 125,554 (of 3·7 persons).

In 1933–34 the District's reformatory held 1,157 men, and the workhouse, 738 men and 72 women.

A portion of the District of Columbia embracing 6,654 acres is known in law as the City of Washington, 'The Federal Capital.' But that name is a geographical distinction only, as the territory it includes is not a municipal government separate from the rest of the District of Columbia, but is subject to the same national and municipal control in every respect.

Religion and Education.—The most numerous religious bodies are: Roman Catholic with 67,348 adherents (1926), Negro Baptists (41,262), Protestant-Episcopal (28,347), Methodist, Presbyterian, and Lutheran. Total membership, all denominations, 238,871.

In 1930, illiterates 10 years of age or older numbered 6,611 (4,591 Negroes), which was 1·6 per cent. of the total in that age group; 74 per cent. (83,701) of the persons between the ages of 5 and 20 were attending school. The 225 public school buildings of the District in 1933–34 housed 3,007 teachers and principals, and 61,929 white pupils and 33,221 coloured pupils. In addition, night schools accommodated 10,143 white and 4,087 coloured students. There were, included in the above, junior high schools with 620 teachers and 15,872 pupils; senior high schools with 587 teachers and 15,872 students; 2 teachers' colleges with 56 teachers and 1,038 pupils. There are also about 20,000 students in private elementary and secondary schools. Total expenditure on public education (1933–34), 9,801,484 dollars.

Superior education is given in Georgetown University, an institution under the management of the Jesuit Order, founded in 1795; it has 416 professors and 2,106 students; the George Washington University, non-sectarian, founded in 1821, has 374 professors and instructors, and 5,769 students; the Howard University, principally engaged in the higher education of coloured students, was founded in 1867, and has 228 professors and 1,626 students; the Catholic University of America, a post-graduate institution, was founded in 1884, and has 143 professors, instructors and assistants, and 1,461 students working for degrees; the American University has 51 professors and 523 students.

Finance and Defence.—The revenues of the District are derived from a general real and personal property tax, taxes on corporations and companies, licences for conducting various businesses, and from appropriations out of the Treasury of the United States.

In 1933–34 the finance of the District of Columbia was as follows:—

	Dollars
Balance, July 1, 1933	8,110,133
Receipts to July 1, 1934	39,220,954 [1]
Total	47,331,087
Disbursements in 1933–34	35,771,669
Balance on July 1, 1934	11,559,418

[1] The receipts include 5,700,000 dollars appropriated by the Government of the United States as its contribution to the support of the municipal expenses of its Capital.

The District of Columbia has no bonded debt not covered by its accumulated sinking fund.

In 1934 the assessed valuation of the real property within the municipality, and of tangible and intangible personal property, was 1,641,453,479 dollars.

The National Guard on June 30, 1934, consisted of 69 officers, 1 warrant officer and 901 enlisted men.

Productions and Industry.—The District has few industries, with products mainly for local consumption. The census of manufactures in 1931 showed 492 establishments with 8,668 wage-earners, earning 14,062,328 dollars; the materials, containers, fuel and power used cost 29,525,476 dollars, and the output was valued at 79,458,089 dollars. There were (1930 census) 104 farms, with lands and buildings valued at 7,143,712 dollars.

Within the District are 187 miles of electric street railway track and 42 miles of steam railway.

On June 30, 1934, the District had 9 licensed national banks with capital of 9,450,000 dollars and total assets of 158,916,000 dollars and 12 licensed trust companies and other banks with a capital of 12,385,000 dollars and total assets of 123,069,000 dollars.

FLORIDA.

Government.—On March 27, 1513, Florida was discovered by Juan Ponce de Leon, a Spanish soldier and adventurer, who landing on Easter Sunday (Pascua Florida or Feast of Flowers) called the place Florida. The first settlement dates from 1559. It was claimed by Spain until 1763, then ceded to England; back to Spain in 1781, and to the United States in 1819. Florida became a Territory in 1822 and was admitted into the Union on March 3, 1845. The present constitution dates from 1885. The State Legislature consists of a Senate of 38 members, and House of Representatives with 95 members. Sessions are held biennially, and are limited to 60 days. Senators are elected for four years, Representatives for two, the Senate being renewed by one-half every two years. Two Senators and five Representatives are elected to Congress.

Governor.—David Sholtz, 1933–37 (9,000 dollars).
Secretary of State.—R. A. Gray.

The State Capital is Tallahassee (population 10,700 in 1930). The State is divided into 67 counties.

Area and Population.—Area, 58,666 square miles, including 3,805 square miles of water. Public lands unappropriated on June 30, 1932, totalled 32,303 acres. The Indian reservations had an area in 1931 of 42 square miles, and a population of 575.

Census population April 1, 1930, 1,468,211, an increase of 499,741 or 51·6 per cent. over that of 1920. Population in census years (with distribution by sex in 1930) was as follows:—

Of the total, the foreign-born white (1930) numbered 59,057, of whom 6,237 (10·6 per cent.) were from Cuba, 2,131 from other West Indies, 7,084 (12 per cent.) from England, 1,843 from Ireland, 1,797 from Scotland, 5,464 from Germany, 5,262 from Italy, 8,156 (13·8 per cent.) from Canada, and 4,125 from Spain. Of the total population in 1930, 51·7 per cent. were urban, 29·4 per cent. Negro, and 40·8 per cent. (448,955 men and 149,984 women) were gainfully employed. In 1930 census, 6,442 men and 8,878 women were reported divorced; the number of private families was 376,499 (of 3·81 persons).

The State prison system in 1934 had 2,761 men and 130 women.

The largest cities in the State are: Jacksonville with a census population of 129,549 in 1930; Miami, 110,637; Tampa, 101,161; St. Petersburg, 40,425; Pensacola, 31,579; Orlando, 27,330; West Palm Beach, 26,610.

Religion and Education.—Of the 528,380 church members of the State (1926), Southern Baptists led with 103,135 adherents, followed by Negro Baptists (98,194) and Southern Methodists (74,242).

In 1930, illiterates 10 years of age and older numbered 83,242 (7·1 per cent. of that age group), of whom 65,167 were Negroes; of persons between the ages of 5 and 20 years, 66·2 per cent. (304,430) were attending school. Attendance at school is compulsory. All public schools are required to have readings from the Bible without sectarian comment once every school day. Separate schools are provided for white and coloured children.

In 1934, the 2,048 public elementary schools had 7,462 teachers and 271,107 enrolled pupils. In 615 public high schools there were 3,776 teachers and 111,403 pupils. Total expenditure on public schools, 11,553,337 dollars; on higher education (1933) 1,041,720 dollars. The State provides higher education in a University of the State of Florida at Gainesville (founded 1884) with (1934) 143 professors and 2,371 students, and a State College for Women (founded at Tallahassee in 1905), with 102 teachers and 1,523 students. There are three small private colleges.

Finance and Defence.—For the year 1933–34, the receipts and disbursements amounted to the following sums :—

	Dollars
Balance July 1, 1933	1,785,839
Receipts 1933–34	35,786,378
Total	37,572,217
Disbursements 1933–34	35,298,115
Balance July 1, 1934	2,274,102

The State has no bonded debt. The assessed value of all property in 1933 was 512,243,446 dollars.

On June 30, 1934, the National Guard consisted of 174 officers, 3 warrant officers and 2,299 enlisted men.

Production and Industry.—Florida is largely a peninsula stretching from north to south, between the Atlantic Ocean and the Gulf of Mexico. Agriculture is pursued generally in all parts of the State. In 1930 there were 58,966 farms with a total acreage of 5,026,617, of which 1,969,000 acres were crop land. Total value of all farm property in 1930, 423,346,262 dollars. Gross income, 1932, from crops, 69,900,000 dollars; from live-stock, 16,600,000 dollars. Florida leads in production of grape fruit (13,500,000 boxes in 1934). Other crops are oranges (19,000,000 boxes in 1934), truck products, tobacco (5,034,000 pounds), rice, maize, oats and peas. In 1934 the cotton area was 95,000 acres, and the yield 28,000 bales. On January 1, 1934, the State had 18,000 horses, 42,000 mules, 43,000 sheep, 477,000 pigs, 111,000 milch cows, and 494,000 all cattle. The total national forest area in June, 1933, was 582,888 acres.

Chief mineral products are phosphate rock (2,136,123 long tons in 1933, ranking next to Tunisia as the world's largest source); stone, fuller's earth, lime, and kaolin. Mineral output, 1932, was valued at 7,107,866 dollars.

Florida, with its long coast line, has extensive fisheries. The chief fishery products are oysters, shad, red snappers, mullet, turtles, and sponges, of which Florida has almost a monopoly.

Manufacturing industries in 1931 had 1,677 establishments with 50,123 wage-earners, earning 34,439,307 dollars, using materials, containers, fuel and power valued at 68,311,256 dollars; output was valued at 157,073,857 dollars. The tobacco industries are important.

The State has facilities for transportation both by land and water. In 1931 there were 5,628 miles of steam and 226 miles of electric railway. The Atlantic Coast Line, the Seaboard Air Line, and the Florida East Coast are the leading railroads. State-maintained highways total 8,338 miles, of which 5,053 miles are surfaced.

On June 30, 1934, Florida had 50 licensed national banks with deposits of 165,315,000 dollars and loans and discounts of 32,465,000 dollars, and 105 licensed State banks and trust companies with deposits of 46,001,000 dollars and loans and discounts of 12,687,000 dollars.

ILLINOIS.

Government.—Illinois was first discovered by Joliet and Marquette, two French explorers, in 1673, and settled in 1720. In 1763, the country was ceded by the French to the British. In 1783, Great Britain recognised the title of the United States to Illinois, which was organised as a territory in 1809 and admitted into the Union on December 3, 1818. The Legislature consists of a Senate of 51 members elected for four years (about half of whom retire every two years), and a House of Representatives of 153 members elected for two years. Sessions are biennial. Electors are citizens 21 years of age, having the usual residential qualification.

The State is divided into districts, in each of which one Senator and three Representatives are chosen; for the election of the latter each elector has three votes, of which he may cast one for each of three candidates, or one and a half for each of two, or all three for one candidate. The State has 102 counties; Springfield is the capital. Illinois is represented in Congress by two Senators and twenty-seven Representatives.

Governor.—Henry Horner, 1933–37 (12,000 dollars).
Secretary of State.—Edward J. Hughes.

Area and Population.—Area, 56,665 square miles, of which 622 square miles are water. Census population on April 1, 1930, 7,630,654, an increase of 1,145,374, or 17·7 per cent. over 1920.

LOUISIANA.

Government.—Louisiana was first settled in 1699. That part lying east of the Mississippi river was organised in 1804 as the Territory of New Orleans, and admitted into the Union on April 8, 1812. The section west of the river was added very shortly thereafter. The Legislature consists of a Senate of 39 members and a House of Representatives of 100 members, both chosen for four years. Sessions are biennial. Qualified electors are (with the usual exceptions) all registered citizens with the usual residential qualifications. The State sends to Congress 2 Senators and 8 Representatives. Louisiana is divided into 64 parishes (corresponding with the counties of other States); the Capital is Baton Rouge.

Governor.—Oscar K. Allen, 1932–36 (7,500 dollars).
Secretary of State.—E. A. Conway.

Area, Population, Education.—Area, 48,506 square miles (3,097 square miles being water). Census population on April 1, 1930, 2,101,593, an increase of 303,084, or 16·9 per cent., over that of 1920.

Louisiana has valuable fisheries. The area suitable to planting and growing oysters is over 7,000 sq. miles. The State ranks third as a lumber producer, though nine-tenths of its original forest area of 22,000,000 acres has been cut over at least once.

Rich sulphur mines are found in Louisiana, and wells for the extraction of sulphur by means of hot water and compressed air are in operation ; output, 1933, 321,492 long tons. The yield of crude petroleum in 1933 was 24,636,000 barrels ; of natural gasoline or petrol, 38,100,000 gallons. Output of natural gas (1933) was 193,202,645 *M.* cubic feet ; output of carbon black from natural gas, 54,470,000 pounds in 1933. The State has four of the largest salt mines in the world ; output in 1933 was 532,569 tons. Total mineral output in 1932 was valued at 60,920,829 dollars.

The manufacturing industries are chiefly those associated with petroleum,

sugar, lumber, rice, cotton-seed. In 1931, there were 1,609 manufacturing establishments which employed 57,090 wage-earners, who earned 47,948,952 dollars; materials, containers, fuel and power used cost 253,856,479 dollars, and the output was valued at 384,969,753 dollars.

A large international trade is carried on through the port of New Orleans, where in the calendar year 1932 the imports amounted to 66,553,000 dollars, and the exports to 128,169,000 dollars.

The State has ample facilities for traffic, having, besides 24,900 miles of public roads (17,176 miles maintained by the State), the Mississippi and other waterways, with 4,794 miles of navigable water. In 1932, the steam railways in the State had a length of 4,639 miles, besides 316 miles of electric railway track.

On June 30, 1934, Louisiana had 28 licensed national banks with deposits of 198,562,000 dollars and loans and discounts of 77,046,000 dollars and 119 licensed State banks and trust companies with deposits of 77,155,000 dollars and loans and discounts of 39,762,000 dollars.

MASSACHUSETTS.

Constitution and Government.—The first permanent settlement within the borders of the present state was made at Plymouth in December, 1620, by the Pilgrims from Holland, who were separatists from the English Church, and formed the nucleus of the Plymouth Colony. In 1628 another company of Puritans settled at Salem, forming eventually the Massachusetts Bay Colony. In 1630 Boston was settled. In 1629 the whole region called New England was formed into a Province, the government of which was divided between the colony of Plymouth and that of Massachusetts Bay, but in 1691 they were united. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and in 1780 became one of the thirteen original States of the Union.

The legislative body, styled the General Court of the Commonwealth of Massachusetts, meets annually and consists of the Senate with 40 members, elected biennially, and the House of Representatives of 240 members, elected in 159 districts, each of which returns one, two, or three representatives according to the number of legal voters. The State sends 2 Senators and 15 Representatives to the Federal Congress.

Electors are all citizens of the United States, 21 years of age and over, with the usual residential qualifications, who can read and write the English language; excluded are paupers and those under guardianship.

Governor.—James M. Curley, 1935–36 (salary, 10,000 dollars).

Secretary of the Commonwealth—Frederic W. Cook.

The State has 14 counties, 39 cities and 316 towns; the Capital is Boston.

Area and Population.—Area, 8,266 square miles (227 square miles being water). The census population, April 1, 1930, was 4,249,614, an increase of 397,258 or 10·3 per cent. since 1920.

The population at the date of four recent censuses (with distribution by sex in 1930) was as follows:—

MINNESOTA.

Government.—Minnesota, first explored in the 17th century and first settled in the 20 years following the establishment of Fort Snelling (1819), was made a territory in 1849 (with parts of North and South Dakota), and was admitted into the Union, with its present boundaries, on May 11, 1858. The Legislature consists of a Senate of 67 members, elected for four years, and a House of Representatives of 131 members, elected for 2 years.

Governor.—Floyd B. Olson, 1935–37 (7,000 dollars).
Secretary of State.—Mike Holm.

There are 87 counties, few containing less than 400 square miles. Townships are 6 miles square, each divided into 36 sections of one square mile. When organised they are corporate bodies with a town-meeting, 3 super-

visors, and other officers elected for one and two years. Cities, of four classes, according to population, frame their own charters and are governed by a mayor and council or by a commission. The Capital is St. Paul. The State sends to Congress 2 Senators and 9 Representatives.

Area, Population, Education.—Area, 84,682 square miles, of which 3,824 square miles are water. This is exclusive of 2,514 square miles of Lake Superior. Census population on April 1, 1930, 2,563,953, an increase of 176,828, or 7·4 per cent. over that of 1920.

Population in 4 Census years (with distribution by sex in 1930) was :

MISSISSIPPI.

Government.—Mississippi, settled in 1716, was organised as a territory in 1798 and admitted into the Union on December 10, 1817. In 1804 and in 1812 its boundaries were extended, but in March, 1817, a part was taken to form the new territory of Alabama, leaving the boundaries substantially as at present. The Legislature consists of a Senate and a House of Representatives, both elected for 4 years. The Capital is Jackson; there are 82 counties.

Qualified as electors are all United States citizens who have resided in the State two years and in the election district for one year (clergymen for six months) next before the election, have paid the legal taxes, and have been registered. The applicant for registration must be able to read the State Constitution or show that he understands it when it is read to him.

The State is represented in Congress by 2 Senators and 7 Representatives.

Governor.—Martin S. Connor, 1932–36 (7,500 dollars).

NEBRASKA.

The Nebraska region was first reached by white men from Mexico under the Spanish general Coronado in 1541. It was ceded by France to Spain in 1763, retroceded to France in 1801, and sold by Napoleon to the United States as part of the Louisiana purchase in 1803. Its first settlement was in 1847 and on May 30, 1854, it became a territory and on March 1, 1867, a State. In 1882 it annexed a small part of Dakota territory, and in 1908 it received another small tract from South Dakota.

Government.—The Legislature consists of a Senate of 33 members and a House of Representatives of 100 members; both chambers are elected for two years. But by a constitutional amendment adopted in November, 1934, Nebraska will in 1937 have a single-chambered legislature—the only State in the Union to have one. The present constitution was adopted in 1875. Amendments adopted in 1912 and 1920 provide for legislation through the initiative and referendum and permit cities of more than 5,000 inhabitants to frame their own charters. The State has 93 counties; the Capital is Lincoln. Nebraska is represented in Congress by two Senators and five Representatives.

Governor.—R. L. Cochrane, 1935-37 (7,500 dollars).
Secretary of State.—Harry R. Swanson.

NEW HAMPSHIRE.

Government.—New Hampshire, first settled in 1623, was one of the thirteen original States of the Union. The sense of the people as to the calling of a convention for the revision of the Constitution must be taken every seven years. If a convention is held, the amendments to the Con-

stitution which it proposes must be laid before the people, and approved by two-thirds of the qualified voters present and voting on the subject. The Legislature consists of a Senate of 24 members, elected for two years, and a House of Representatives, of from 418 to 427 members, the number depending on the population. Electors are all citizens 21 years of age, resident six months in the place to be represented, able to read and write, duly registered and not paupers or under sentence for crime.

Governor.—H. Styles Bridges, 1935–37 (5,000 dollars).
Secretary of State.—Enoch D. Fuller.

New Hampshire is represented in the Federal Congress by 2 Senators and 2 Representatives. The State is divided into 10 counties. The State Capital is Concord.

NEW MEXICO.

Constitution and Government.—New Mexico from the time of its discovery by Europeans was politically associated with Mexico. Its first settlement dates from 1664. When the war with Mexico was concluded on February 2, 1848, New Mexico was recognised as belonging to the United States, and on September 9, 1850, it was made a Territory. Part of the Territory was assigned to Texas. Later Utah was formed into a separate Territory; in 1861 part of New Mexico was transferred to Colorado, and in 1863 Arizona was disjoined, leaving to New Mexico its present area. In January, 1912, New Mexico was admitted to Statehood. It sends to the National Congress two Senators and one Representative.

The State legislature consists of 24 members of the Senate and 49 members of the House of Representatives, meeting biennially.

Governor.—Clyde Tingley, 1935–37 (5,000 dollars).

NEW YORK STATE.

Constitution and Government.—From 1609 to 1664, the region now called New York was claimed by the Dutch; then it came under the rule of the English, who governed the country till the outbreak of the War of Independence. On April 20, 1777, New York adopted a Constitution which transformed the colony into an independent State, and paved the way for its entrance into the Union as one of the 13 original States on its ratification, on July 26, 1788, of the Constitution of the United States.

The Senate consists of 51 members elected every two years, and the Assembly of 150 members elected annually. The State capital is Albany.

The right of suffrage resides in every one 21 years of age, who has been a citizen for 90 days, and has the usual residential qualifications.

The question whether there shall be a Convention to revise the Constitution has to be submitted to the people every 20 years, beginning with 1916, 'and also at such times as the Legislature may by law provide.'

The State is represented in Congress by 2 Senators and 45 Representatives.

Governor.—Herbert H. Lehman, 1935–37 (25,000 dollars).
Secretary of State.—Edward J. Flynn.

For local government the State is divided into 62 counties.

Cities are in 3 classes, the first class having each 175,000 or more inhabitants and the third under 50,000. Each is incorporated by charter, under special legislation. The government of New York City is vested in a board of Aldermen, elected for 2 years. Its members are the President, elected by the city; the presidents of the 5 city boroughs (Bronx, Manhattan, Brooklyn, Queens, and Richmond); 67 aldermen, one elected in each of the 67 districts; constituting a board of 73 members. The chief executive officer is the Mayor, elected for 4 years; he appoints all the heads of departments, except the Comptroller, who is elected by the city.

NORTH CAROLINA.

Government.—North Carolina, first settled in 1650, was one of the thirteen original States of the Union. The General Assembly consists of a Senate of 50 members, and a House of Representatives of 120 members, elected for two years.

All citizens of the United States, resident in the State one year, and in the precinct four months next before the election, and registered, have a vote. For registration, the requirement is ability to read any section of the Constitution in the English language.

The State is represented in Congress by 2 Senators and 11 Representatives. North Carolina is divided into 100 counties; the Capital is Raleigh.

Governor.—John C. B. Ehringhaus, 1933–37 (6,500 dollars).
Secretary of State.—Stacey W. Wade.

Area, Population, Education.—Area, 52,426 square miles, of which 3,686 square miles are water. Population at the census April 1, 1930, 3,170,276, an increase of 611,153 or 23·9 per cent over 1920.

Population in four Federal censuses (with distribution by sex in 1930) was:

Years	White	Negro	Mexican	Indian	Asiatic	Total	Per Sq. Mile

Of the total in 1930, 8,788 (representing 0·3 per cent. of the total population) were white foreign-born, 1,208 (13·7 per cent.) being English, 1,006 (11·4 per cent.) Greek, 903 German, and 758 Russian. Urban population formed 25·5 per cent., and the Negro population 29·0 per cent. of the whole; 36·0 per cent. (868,006 males and 272,965 females) were gainfully

employed. In 1930 census, 3,815 men and 6,704 women were reported divorced; the number of private families was 644,033 (of 4·85 persons). Cities (with population in 1930) are: Charlotte, 82,675; Winston-Salem, 75,274; Durham, 52,037; Asheville, 50,193; Raleigh (capital), 37,379; Greensboro, 53,569; High Point, 36,745; Wilmington, 32,270. Indian reservations in 1930 covered an area of 99 square miles and had a population of 3,194.

Leading religious denominations are the Southern Baptists (385,940 members in 1926), Southern Methodists (249,916), and Negro Baptists (206,807). Total, all denominations, 1,407,005. The State prison in 1932 held 2,725 men and 109 women.

In 1930, illiterates 10 years of age or older numbered 236,261 (10 per cent. of that age group), of whom 93,372 were native whites and 139,105 Negroes; of persons between the ages of 5 and 20, 796,426 (64·4 per cent.) were attending school. School attendance is compulsory between 7 and 13, inclusive. Separate schools are provided for white, coloured and Indian children. In 1932–33 the 4,751 public elementary schools of the State had 18,316 teachers and 747,350 enrolled pupils. There were 875 public high schools with 4,367 teachers and 144,731 pupils. There are 7 normal schools and teachers' colleges (3 white, 3 negro and 1 Indian), and 5 four-year colleges (3 white and 2 negro). Total expenditure on account of public elementary and high schools in 1932–33, 24,000,000 dollars.

Higher instruction is given in 7 State and 39 private and denominational university and college institutions. The most important is the University of North Carolina with three units, the University proper at Chapel Hill (founded in 1795) with (1933–34) 215 professors and 5,048 students; the State College of Agriculture and Engineering at Raleigh (founded in 1889) with 165 professors and 2,753 pupils; and the State College for Women (Greensboro) with 129 professors and 2,048 students.

Finance and Defence.—The State had receipts and disbursements in the year ending June 30, 1934, as follows:—

	Dollars
Balance, July 1, 1933	7,416,026
Receipts, 1933–1934	84,880,717
Total	92,296,743
Disbursements, 1933–1934	81,293,819
Balance, June 30, 1934	11,002,924

On June 30, 1933, the recognized net bonded debt amounted to 179,814,000 dollars; sinking fund, 11,292,121 dollars. The assessed value of personal and real property in 1929 was 2,975,208,279 dollars. According to the Council of the Corporation of Foreign Bond-holders the State has a defaulted debt estimated at 12,600,000 dollars. The State declares these bonds to have been fraudulently and corruptly issued during reconstruction days.

The National Guard on June 30, 1934, consisted of 258 officers, 5 warrant officers and 3,213 enlisted men.

Production and Industry.—The chief occupation of the inhabitants of the State is agriculture. In 1930, the U.S. census showed 279,708 farms, including both owners and tenants, with a farm population of 1,597,220. Total farm area, 18,055,103 acres; total value of land and buildings, 844,121,809 dollars. The State census in 1933 showed 240,224 farms with 2,936,920 acres cultivated by active farm owners and 3,014,765 acres

cultivated by tenants. Gross income from crops, 1932, 98,470,000 dollars; from live-stock, 45,801,000 dollars. Corn, produced in every county, is the principal crop; output, 1934, 47,580,000 bushels. The chief money crops are cotton, tobacco and peanuts. For cotton the area in cultivation (1934) was 980,000 acres, with a production of 650,000 bales (of 500 pounds gross weight); she has the heaviest yield per acre of any of the major cotton states. North Carolina leads, usually, in the production of tobacco (1934, 418,802,000 pounds), and of sweet potatoes (8,856,000 bushels). Output in 1934 of peanuts was 272,800,000 pounds. On January 1, 1934, the farm animals were 73,000 horses, 268,000 mules, 594,000 all cattle, 95,000 sheep, and 936,000 swine. The area of national forest lands (June 30, 1934) was 474,409 acres.

Minerals in great variety, some in large quantities, are found in the State, the chief being clay products, mica, soapstone barytes, kyanite, talc, kaolin, olivine, and coal. Gold output, 1934, 666 ozs. Is the world's largest source of mica, being approached only by British India; output, 1933, 6,999 short tons. Leads in output of feldspar (85,962 tons in 1933). Monazite and zircon, used in the manufacture of incandescent light mantles, are also found in commercial quantities. Mineral products, 1932, were valued at 2,466,311 dollars.

North Carolina in 1931 had 2,557 industrial establishments, employing 179,282 wage earners, who received 118,683,874 dollars, using materials, containers, fuel and power costing 405,508,242 dollars, and turning out products valued at 1,026,565,220 dollars. The leading industries, measured by the value of their products in 1931 were: manufacture of cigars and cigarettes, 511,431,455 dollars; cotton goods, 165,009,707 dollars; knit goods, 69,087,446 dollars. North Carolina leads all States in the manufacture of cotton goods and of tobacco products, and ranks second in the output of hosiery and wooden furniture. Active cotton spindles on July 31, 1933, numbered 5,740,318, consuming 1,471,672 bales. The State ranks first in the number of cotton mills, in consumption of cotton, and in the number (6,136,702) of spindles in place.

The State in 1934 contained 4,860 miles of steam railway, and 98 miles of electric railway track. The State maintains 10,255 miles of highways of which 7,301 miles are surfaced; counties maintain 46,750 miles (1,080 miles surfaced).

North Carolina on June 30, 1934, had 42 licensed national banks with deposits of 59,438,000 dollars and loans and investments of 53,154,000 dollars; 172 licensed State banks, including branches, had deposits of 179,510,000 dollars and loans and investments of 148,252,000 dollars.

The National Guard on June 30, 1934, consisted of 78 officers, 1 warrant officer and 1,095 enlisted men.

Production and Industry.—Agriculture is the chief pursuit of the North Dakota population. In 1930 census, there were 77,975 farms, with an area of 38,657,894 acres, of which 24,528,000 acres were crop land; value of farm lands and buildings, 951,225,446 dollars. Gross income, 1932, from crops, was 32,700,000 dollars; from live-stock, 38,600,000 dollars. The area to be irrigated within the State under the Federal Reclamation Act extends to 40,560 acres. North Dakota leads, usually, in the production of spring wheat (21,196,000 bushels in 1934), of rye, 1,030,000 bushels; of durum wheat (6,210,000 bushels) and of flax seed (938,000 bushels). Other important products are potatoes (5,940,000 bushels); wild hay (282,000 tons); oats (8,886,000 bushels); barley (7,119,000 bushels); and corn (4,904,000 bushels). The State has also an active live-stock industry, chiefly horse and cattle raising. On January 1, 1933, the farm animals were: 551,000 horses, 785,000 milch cows, 1,691,000 all cattle, 1,199,000 sheep, and 623,000 swine. The wool-clip yielded 6,731,000 pounds of wool from 811,000 sheep in 1934.

The mineral resources of North Dakota consist chiefly of enormous lignite deposits, the latter estimated at 600,000 million tons (output 1933, 1,650,000 short tons). There are also various clays. Total value of mineral output, 1932, 2,385,735 dollars.

In the State in 1931 there were 325 manufacturing establishments, employing 3,306 wage-earners, who earned 4,600,224 dollars, using materials, containers, fuel and power costing 28,155,069 dollars, and giving an output valued at 40,076,326 dollars. The most important of these industries were the manufacture of butter, flour milling and meat packing.

In 1932, there were 5,278 miles of steam railway in the State, and 11 miles of electric railway. The State maintains 11,774 miles of highway of which 6,255 miles are graded and 5,519 miles are surfaced.

OKLAHOMA.

Government.—The Territory of Oklahoma was organized in 1890 from the western part of Indian Territory and was thrown open to white settlers. In 1889 its boundaries were extended and on November 16, 1907, it was combined with the Indian Territory and admitted as a State. The constitution provides for the *initiative* and the *referendum*, 8 per cent. of the legal voters having the right to propose any legislative measure and 15 per cent. to propose amendments to the constitution by petition.

The Legislature consists of a Senate of 44 members who are elected for 4 years, and a House of Representatives elected for 2 years, and consisting of 120 members. Qualified as electors are (with necessary exceptions) all citizens resident one year in the State, six months in the county, 30 days in the precinct. Indians are qualified as voters.

Governor.—E. W. Marland, 1935–39 (7,500 dollars and Governor's mansion furnished).

Secretary of State.—Frank C. Carter.

The State is represented in Congress by 2 Senators and 9 Representatives. The State has 77 counties; the capital is Oklahoma City.

Area and Population.—Area, 70,057 square miles, of which 643 square miles are water. Census population on April 1, 1930, 2,396,040, an increase of 367,757, or 18·1 per cent., since 1920. Indian reservations in 1932 had an area of 60 square miles with a population of 92,725, including the Five Civilized Tribes.

The population at 4 Federal censuses (with distribution by sex in 1930) was:—

The National Guard on June 30, 1934, consisted of 391 officers, 6 warrant officers and 4,795 enlisted men.

Production and Industry.—Oklahoma is mainly agricultural. In 1931, it had 203,866 farms with a total area of 33,790,817 acres; total value of farm lands and buildings was 1,242,723,526 dollars. Oklahoma leads in production of broom corn (12,100 tons in 1933). The yield of corn in 1934 was 11,644,000 bushels; of winter wheat, 37,348,000 bushels; of oats, 20,150,000 bushels; of grain sorghums, 7,392,000 bushels. Other products are potatoes, hay, fruits, and cotton. The cotton crop for 1934 on 2,740,000 acres amounted to 325,000 bales. Gross income from crops, 1933, was 162,930,000 dollars; from live-stock, 62,297,000 dollars. On January 1, 1934, the stock comprised 784,000 milch cows, 2,394,000 all cattle, 1,024,000 hogs, 161,000 sheep, 431,000 horses, and 251,000 mules. The wool-clip in 1934 was 1,132,000 pounds of wool from 138,000 sheep. National forest lands total 120,380 acres.

With 19,461 miles of oil pipe-lines, Oklahoma leads in pipe-line mileage; with local oil storage capacity of 156,709,500 barrels it is exceeded only by Texas and California. In 1933, 181,506,000 barrels of crude petroleum were produced and 359,700,000 gallons of natural gasoline. Natural gas is also obtained in large quantities (240,000 million cubic feet in 1933). Coal (1,326,000 short tons in 1932), lead (18,038 short tons), and zinc (91,065 tons) are also worked. Total mineral output in 1932, 185,120,909 dollars.

There are few manufacturing industries. Petroleum refining is the chief industry; value of output, 1931, was 82,998,964 dollars; flour milling and meat-packing are also important. In 1931, the State had a total of 1,322 industrial establishments, employing 22,576 wage-earners who earned 26,270,545 dollars, the cost of materials, containers, fuel and power used being 150,348,853 dollars, and the value of the output 218,721,964 dollars.

OREGON.

Government.—Oregon, first settled in 1838 and organized as a Territory in 1848, was admitted into the Union on February 14, 1859. The Legislative Assembly consists of a Senate of 30 members, chosen for four years (half their number retiring every two years), and a House of 60 Representatives, elected for two years.

The Constitution was amended in 1902, to reserve to the voters the power to propose laws and amendments to the Constitution and to enact or reject the same at the polls independently of the Legislative Assembly, and also to give them the power at their own option to approve or reject at the polls any Act of the Legislative Assembly. This is known as the initiative and referendum. The Legislature in 1927 adopted an official State song entitled 'My Oregon.'

At the General Election held November, 1912, suffrage was extended to women and 'every citizen of the United States of the age of 21 years and upwards who shall have resided in the State during the 6 months immediately preceding such election shall be entitled to vote.'

The State is represented in Congress by two Senators and three Representatives. There are 36 counties in the State; the Capital is Salem.

Governor.—Charles H. Martin, 1935–1939 (7,500 dollars).
Secretary of State.—Hal E. Hoss.

Area, Population, Education.—Area, 96,699 square miles, 1,092 square miles being water. Public lands, unappropriated on June 30, 1933, totalled 13,012,158 acres. Census population, July 1, 1930, 953,786, an increase of 170,397, or 21·8 per cent. since 1920.

The foreign-born whites in 1930 numbered 105,475 (11·1 per cent. of total population), of whom 17,916 (17·0 per cent.) were Canadian, 12,913 (12·2 per cent.) German, 11,032 (10·5 per cent.) Swedish, 8,077 (7·7 per cent.) English, 7,450 Norwegian, 6,278 Russian, 5,507 Finns, and 4,728 Italian. Of the total population in 1930, 51·3 per cent. were urban, 0·2 per cent. Negro, and 42·9 per cent. (328,503 males and 81,142 females) were gainfully employed. In 1930 census, 10,126 men and 8,783 women were reported divorced; the number of private families was 266,328 (of 3·43 persons). The Oregon State penitentiary in June, 1934, held 771 men and 14 women. Indian reservations in 1932 comprised 2,337 square miles; population, 4,561 Indians.

Old Age pensions (maximum 30 dollars a month) were established in 1933 for all 70 years or older who have been American citizens and residents of the State for 15 years (of the county for 2 years) with assets not exceeding 3,000 dollars.

The largest towns, according to the 1930 census, are Portland, with a population of 301,815; Salem, 26,266; Eugene, 18,901; Klamath Falls, 16,093; Medford, 11,007; Astoria, 10,349.

The chief religious bodies in the State are (in order of strength) Catholic (55,574 members in 1926), Methodist (32,135), Presbyterian (21,545), Disciples of Christ, Baptist, and Jewish. Total membership, all denominations, 232,731. Marriages in 1932, 6,668; divorces, 1,702; annulments, 25.

In 1930, illiterates 10 years of age or older numbered 7,814 (1·0 per cent. of that age group), of whom 3,743 were foreign-born whites; of persons between the ages of 5 and 20, 197,719 (75 per cent.) were attending school. School attendance is compulsory from 8 to 16 years of age; those between the ages of 16 and 18 years, if legally employed, must attend part-time or evening schools unless they have already acquired the ordinary branches of learning. On June 30, 1934, the 2,084 public elementary schools had 5,125 teachers and 146,274 enrolled pupils; 274 four-year standard high schools had 2,103 teachers and 54,949 pupils; and the three Normal Schools at Monmouth, Ashland, and La Grande had (1933–34) 106 teachers, 1,023 regular students and 586 summer students. Total expenditure on education (1933–34), 11,059,046 dollars, excluding debt service and capital outlay. Beginning July, 1929, higher education was placed under a single board administering the three normal schools, the State University, the State Agricultural College and the Medical School. The Oregon State Agricultural College at Corvallis, has an agricultural experiment station, with nine branch stations, an engineering experimental station, an extension service in

agriculture and home economics, and 7 degree-granting schools. In 1933–34 the instructional staff numbered 250 engaged in instruction, and the student enrolment, 2,249. The University of Oregon, organized at Eugene in 1876, has 9 degree-granting schools and (1933–34) 189 professors and 2,386 full-term students. The Medical School at Portland in 1933–34 had 174 full-time and volunteer instructors, 252 students of medicine and 411 students of nursing. There are also several denominational colleges.

Finance and Defence.—The receipts and disbursements of the General Fund of the State, for the year ending December 31, 1933:—

Balance, January 1, 1934	230,708

On January 1, 1934, State bonded indebtedness was 55,089,510, dollars; in 1933 assessed value of real and personal property was 958,749,855 dollars.

On June 30, 1934, the National Guard of the State of Oregon consisted of 207 officers, 3 warrant officers and 2,842 men.

Production and Industry.—Oregon is divided by the Cascade Range into two distinct zones as to climate. West of the Cascade Range there is a good rainfall and almost every variety of crop common to the temperate zone is grown. East of the Range lack of rainfall has been to some extent compensated for by irrigation by private companies as well as by State and Federal enterprise. Stock raising is the principal industry of eastern Oregon. With a stand of 400 billion feet Oregon has now one-fifth of the standing timber of the United States; about four billion feet are cut annually. In 1933, the commercial forest area was 19,675,000 acres. National forest lands on June 30, 1934, amounted to 13,416,344 acres.

In 1930 there were 55,153 farms with an acreage of 16,548,678; total value, land and buildings, was 630,827,927 dollars. In 1930 only 4,172,519 acres out of total area of 16,548,678 acres were devoted to general farm crops; 13,012,141 acres of Government land were still open to entry. Gross income, 1932, from crops, was 27,500,000 dollars; from live-stock, 35,100,000 dollars. Oregon leads in the production of hops (18,700,000 pounds in 1934). Leading crops are winter wheat (8,874,000 bushels in 1934); oats (5,904,000 bushels); fresh prunes (38,000 tons); hay (1,977,000 tons), and potatoes (5,720,000 bushels). Rye, barley, and flax-seed are important crops. Fruits are grown, especially plums, apples, pears, peaches, strawberries, cherries, and loganberries. Dairying is the most important industry, and there is an active live-stock industry. Horses on January 1, 1933, numbered 175,000; milch cows, 240,000; all cattle, 794,000; sheep, 2,800,000; swine, 265,000. Range land for grazing cattle and sheep, 45,000,000 acres. In 1934 the wool-clip yielded 18,886,000 pounds from 2,196,000 sheep; mohair clip, 400,000 pounds. The salmon, sturgeon, halibut, and oyster fisheries are abundant. During 1933 the fish caught in the Columbia river—of which two-thirds was canned on the Oregon side—totalled 336,711 cases. The total canned salmon pack on the Oregon coast, 1933, was 12,450 cases.

Oregon's mineral resources include gold, silver, mercury and platinum as

well as useful earths, but output is not large. Output of mercury was 1,342 flasks in 1933; gold, 20,239 ounces (in 1934, 32,580 ounces); silver, 20,760 ounces. Value of mineral products, 1932, was 2,989,383 dollars.

In 1931 Oregon had 1,709 industrial establishments employing 42,267 wage-earners who received in wages 47,503,901 dollars; the cost of the materials, containers, fuel and power used was 120,887,624 dollars, and the value of the product 231,880,396 dollars.

Oregon has good water facilities in the Pacific Ocean, and the Columbia, Willamette, and Snake rivers. The Dalles and Celilo Canal, completed in 1915, opens the Columbia and Snake rivers to navigation to a length of 570 miles from the ocean. Large ocean-going vessels can navigate the Columbia and Willamette rivers to Portland, 100 miles inland, through a channel 35 feet in depth. The State had (1933) a total steam railway mileage of 5,162 besides 507 miles of electric railway track. The State maintains 4,751 miles of primary highways, of which 4,127 are surfaced and 2,019 miles of secondary highways (1,335 miles surfaced); the counties maintain 43,799 miles of highway of which 17,487 miles are surfaced.

On June 30, 1934, 56 licensed National banks had deposits of 186,207,635 dollars and loans and investments of 156,262,535 dollars; 58 licensed State banks had deposits of 26,896,000 dollars, loans and investments of 21,942,000 dollars.

PENNSYLVANIA.

Government.—Pennsylvania, first settled in 1682, is one of the thirteen original States in the Union. The General Assembly consists of a Senate of 50 members chosen for four years, one-half being elected bi-annually, and a House of Representatives of 208 members chosen for two years. Every citizen 21 years of age, with the usual residential qualifications, is entitled to vote. The State is represented in Congress by two Senators and 34 Representatives.

Governor.—George H. Earle, 1935–1939 (18,000 dollars).
Secretary of State.—Richard J. Beamish.

The State is organised in counties (numbering 67), cities, boroughs, townships, school districts, and poor districts; the State Capital is Harrisburg.

Area, Population, Education.—Area, 45,126 square miles, of which 294 square miles are water area (excluding 891 square miles of Lake Erie).

Census population April 1, 1930, 9,631,350, an increase of 911,333, or 10·5 per cent., since 1920. Population at various Federal censuses (with distribution by sex in 1930) was:

In 1930, the foreign-born white population of the State numbered 1,233,051 (12·8 per cent. of the total population), of whom 225,979 (18·3 per cent.) were Italian, 166,672 (13·5 per cent.) Polish, 115,792 (9·4 per cent.) Russian, 111,171 (9 per cent.) Czechoslovakian, 110,622 (9·0 per cent.) German, 97,600 (8·0 per cent.) Irish, and 78,019 (6·3 per cent.) English. Of the total population in 1930, 67·8 per cent. were urban, 4·5 per cent. Negro, and 38·6 per cent. (2,918,211 males and 803,892 females) gainfully employed. The 1930 census showed 21,287 men and 24,360 women divorced; the number of private families was 2,235,620 (of 4·23 persons). The State's penal and reformatory system in 1932 held 6,164 men and 140 women.

Old Age pensions (maximum 30 dollars a month) were established in 1933 for all 70 years or older who have been American citizens and residents of the State for 15 years; there are no stated maxima as to assets or income.

The population of the larger cities and townships, in the census of 1930, was:

Cities	Population	Cities	Population	Cities	Population
Philadelphia .	1,950,961	Altoona . .	82,054	McKeesport .	54,632
Pittsburgh .	669,817	Harrisburg(cap.)	80,339	New Castle .	48,674

The chief religious bodies in the State are the Roman Catholic with 2,124,382 members in 1926, United Lutheran (551,202), Methodist, (452,145), Presbyterian, Dutch Reformed and Baptist. In 1926 a total of 135 denominations reported 13,843 churches and 5,213,023 members.

In 1930, illiterates 10 years of age or older numbered 240,323 (3·1 per cent. of that age group), of whom 187,942 were foreign-born whites; of persons between the ages of 5 and 20, 2,135,688 (69·4 per cent.) were attending school. School attendance is compulsory for children 8 to 14 years of age for the full school term; children employed who have passed the sixth grade are required to attend a continuation school. In 1932–33, the 10,758 public elementary schools had 40,185 teachers and 1,445,457 enrolled pupils. The 1,215 high schools had 19,366 teachers and 545,483 pupils. Public kindergartens numbered 540. Enrolment in vocational classes averages 17,550. The 13 State teachers' colleges had (1932–33) 652 teachers and 9,659 students. Expenditure on education (1932–33) was 137,039,068 dollars, excluding debt service and capital outlay.

The leading academic institutions (1933) are as follows:—

Founded	Institutions	Professors	Students
1740	University of Pennsylvania, Philadelphia (non-sect.)	1,310	6,325
1787	University of Pittsburgh (non-sect.)	903	6,903

Finance and Defence.—For the year ending May 31, 1934, the finance statement, including general and special operating funds, was:—

	Dollars
Balance in Treasury, June 1, 1933	59,153,267
Receipts, all funds, June 1, 1933, to May 31, 1934	352,546,361
Total	411,699,628
Expenditures, all funds, June 1, 1933, to May 31, 1934	342,074,597
Balance in Treasury, May 31, 1934	69,625,031

On May 31, 1934, the net bonded debt of the State amounted to 160,260,000 dollars. Local net bonded debt (exclusive of State debt) was 1,057,390,060 dollars. The assessed value of taxable real property in 1932 amounted to 9,418,350,162 dollars, and of personal property to 2,749,929,345 dollars.

The National Guard on June 30, 1934, consisted of 840 officers, 13 warrant officers and 11,007 men.

Production and Industry.—Agriculture, market-gardening, fruit-growing, horticulture and forestry are pursued within the State. In 1930, there were 172,419 farms; the farm area was 15,309,485 acres, of which 7,813,826 were crop land and 4,576,192 pasture land, the remainder being woodland. The total value of farm land and buildings in 1930 was 1,203,017,645 dollars; implements and machinery, 154,756,206 dollars. Gross income from crops, 1932, was 53,800,000 dollars; from live-stock, 136,000,000 dollars. Pennsylvania leads, usually, in the production of buckwheat (3,105,000 bushels in 1934). In 1934, production of winter wheat was 14,654,000 bushels; rye, 1,344,000 bushels; oats, 24,915,000 bushels; corn, 52,896,000 bushels; potatoes, 34,000,000 bushels; tobacco, 17,504,000 pounds; hay, 2,569,000 tons; apples, 8,554,000 bushels; peaches, 442,000 bushels; pears, 385,000 bushels; and grapes, 18,981 tons. On January 1, 1933, there were on farms: 285,000 horses, 51,000 mules, 1,057,000 dairy cows two years old and over, 1,412,000 all cattle, 501,000 sheep, 707,000 swine. Wool-clip, 1934, was 3,589,000 pounds from 485,000 sheep. National forest lands (1933) total 369,108 acres; State forests, 1,588,583 acres.

Pennsylvania so far exceeds all the rest of the States in the value of its mineral products as to stand almost alone. This is due principally to the State's leadership in the production of coal. Mineral products in 1932

had a value of 424,734,073 dollars, of which the value of anthracite and of bituminous coal represented about 76 per cent. of the total. In 1933 anthracite coal output reached 49,399,000 tons and bituminous, 79,770,000 tons. Other minerals (1933) were petroleum (12,639,000 barrels), natural gasoline or petrol (11,685,000 gallons in 1932), iron ore (magnetite and hematite, 264,366 long tons), pig-iron, 3,733,590 long tons, natural gas (88,706 million cubic feet in 1930). Pennsylvania has important quarries, cement works, and brick and tile works. Leads in output of clay, 397,944 tons in 1933. The output of coke in 1933 was 6,840,419 short tons; cement (1932), 28,510,231 barrels.

The 1931 Federal census showed 14,774 manufacturing establishments employing 778,735 (wages, 845,607,403 dollars), using materials, containers, fuel and power valued at 2,114,171,694 dollars, and with output valued at 4,105,387,107 dollars.

The Pennsylvania Department of Internal Affairs, 1932, reported 18,277 industrial establishments, with an aggregate capital of 5,022,191,100 dollars, employing 130,728 salaried officials and 1,929,022 wage-earners; salaries amounted to 277,226,600 dollars, and the wages to 755,085,700 dollars. The value of the output was 3,117,806,500 dollars. Metals and metal products had the largest value, 802,472,300 dollars. Then came textiles, 547,963,800 dollars; food products, 410,170,000 dollars; mines and quarries, 330,629,700 dollars; chemicals, 293,696,100 dollars; paper and printing, 246,671,700 dollars; leather and rubber products 96,252,000 dollars; clay, glass and stone products, 80,907,500 dollars; tobacco products, 55,369,300 dollars. Pennsylvania has 34·5 per cent. of the country's blast furnace capacity, 36·4 per cent. of its iron and steel manufactures, 40·9 per cent. of its silk manufactures.

The total value of imports at the port of Philadelphia for the calendar year 1933, was 90,873,800 dollars, and of exports, 47,847,000 dollars. In 1932, the aggregate length of steam railroads was 11,155 miles; total of all tracks operated by electric railways, 3,621 miles.

Roads. The State highway system, not including township, city and borough roads and streets, has a mileage of 13,461 miles of which 12,146 miles have been hard-surfaced.

On June 30, 1934, 697 licensed national banks had deposits of 2,132,642,000 dollars and loans and discounts of 860,629,000 dollars; 414 licensed State banks and trust companies had deposits of 2,061,204,000 dollars and loans and discounts of 834,678,000 dollars.

RHODE ISLAND.

Constitution and Government.—The earliest settlers in the region which now forms the State of Rhode Island were colonists from Massachusetts who had been driven forth on account of their non-acceptance of the prevailing religious beliefs. The first of the settlements was made in 1636, and their numbers and importance quickly increased, settlers of every creed being welcomed. In 1647, a patent was granted for the government of the settlements, and on July 8, 1663, a charter was executed recognising the settlers as forming a body corporate and politic by the name of the English Colony of Rhode Island and Providence Plantations. On May 29, 1790, the State accepted the Federal Constitution and entered the Union as one of the 13 original States. The General Assembly consists of a Senate and a House of Representatives. The Senate has 42 members, besides the Lieutenant-Governor who is *ex officio* President of the Senate. The House of Representatives consists of 100 members. Every citizen, 21 years of age, who has resided in the State for 2 years, and is duly registered, is qualified to vote. The State is divided into 5 counties and 39 cities and towns. The Capital is Providence.

Governor.—Theodore Francis Green, 1935–37 (8,000 dollars).
Secretary of State.—Louis W. Cappelli.

Rhode Island is represented in the Federal Congress by 2 Senators and 2 Representatives.

Area, Population, Education.—Area, 1,248 square miles, of which nearly 181 square miles are water. Population according to Federal Census, April 1, 1930, 687,497, an increase of 83,100, or 13·7 per cent. since 1920. Population of census years (with distribution by sex for 1930) was:

Years	White	Negro	Mexican	Indian	Asiatic	Total	Per Sq. Mile

[1] Included in white, if any.
[2] Adjusted by deducting the estimated number of persons who would have been classified as Mexican in 1930. [3] Estimated.

The foreign-born whites in 1930 numbered 170,714 (24·8 per cent. of the total), of whom 32,493 (19·0 per cent.) were Italian, 31,501 (18·5 per cent.) French Canadian, 24,696 (14·5 per cent.) English, 17,740 Irish, 8,696 Polish, and 6,401 Scottish. The urban population in 1930 (635,429) was 92·4 per cent. of the whole, and the Negro population 1·4 per cent.; 43·2 per cent. (209,343 males and 87,829 females) were gainfully employed. The 1930 census showed 2,070 men and 3,056 women divorced; the number of private families was 165,343 (of 4·05 persons). The State's penal and reformatory system in 1934 had 933 men and 71 women.

The chief cities and towns are Providence, which (1930) had a population of 252,981; Pawtucket, 77,149; Woonsocket, 49,376; Cranston, 42,911; E. Providence, 29,995; Newport, 27,612; Central Falls, 25,898; Warwick, 23,196; West Warwick, 17,696; Bristol, 11,953.

The principal religious bodies are Catholic with 325,375 members in 1926, Protestant Episcopal (36,197), Jewish congregations (24,034), Congregational, and Methodist. Total, all denominations, 452,044.

In 1930 census, illiterates 10 years of age or older numbered 27,536 (4·9 per cent. of that age group), of whom 24,124 were foreign-born whites; of persons between the ages of 5 and 20, 144,033 (69·7 per cent.) were attending school. In 1932–33, the 2,315 public elementary classes had 2,559 teachers and 85,063 enrolled pupils. The high schools (339 senior and 519 junior) had 1,548 teachers and 38,973 pupils. Local current expenditures for schools for the school year ending June 30, 1933, totalled 9,029,355 dollars; State expenditures for education were 1,649,896 dollars; total, 11,679,251 dollars. In addition, local communities spent for capital outlay, 600,859 dollars, and for interest and bond retirement, 2,021,604 dollars. The State maintains a College of Education with 55 professors and teachers and 577 students (1932–33), and a State College with 93 professors and 940 students (1932–33). Brown University at Providence, founded in 1764 by the Baptists and others, is now non-sectarian; in 1932–33, it had 191 professors and instructors, and 2,786 students. Providence College, at Providence, founded in 1928–29 under Roman Catholic administration, has 52 professors and 753 students.

Finance and Defence.—For the fiscal year ending June 30, 1934, receipts and payments were as follows:—

	Dollars
Cash on hand June 30, 1933 . . .	3,753,217
Receipts to June 30, 1934	12,331,386
Total	16,084,603
Payments to June 30, 1934 . . .	13,646,207
Balance, June 30, 1934 . . .	2,438,396

The net bonded debt of the State on June 30, 1934, amounted to 19,604,333 dollars. The assessed value of the property within the State in 1933 was as follows:—Real property, 954,482,687 dollars; personal property, 388,022,074 dollars; total, 1,342,504,761 dollars.

The National Guard on June 30, 1934, consisted of 162 officers, 3 warrant officers and 1,828 enlisted men.

Production and Industry.—Rhode Island is a manufacturing State, though there is a little farming. In 1930 census, it had 3,322 farms with an area of 279,361 acres, of which 68,256 acres were crop land. The total

value of farm land and buildings in 1930 was 34,507,749 dollars; total value of land, buildings, equipment and stock was 41,111,441 dollars.

At the Federal census in 1931, 1,473 manufacturing establishments had 95,435 wage-earners, who earned 96,036,152 dollars; materials, containers, fuel and power used were valued at 198,494,156 dollars, and the output at 409,815,678 dollars. SOUTH CAROLINA.

Constitution and Government.—South Carolina, first settled in 1670, was one of the thirteen original States of the Union. The General Assembly consists of a Senate of 46 members, elected for four years (half retiring biennially), and a House of Representatives of 124 members, elected for two years.

All citizens of the United States who have paid the poll tax and are registered have the right to vote. For registration, it is necessary to be able to read and write English, and to have paid the taxes, payable in the previous year, on property in the State assessed at 300 dollars or more. The State is divided into 46 counties. The capital is Columbia. South Carolina is represented in the United States Congress by two Senators and six Representatives.

Governor.—Olin D. Johnston, 1935–39 (7,500 dollars).
Secretary of State.—W. P. Blackwell.

Area, Population, Education.—Area, 30,989 square miles, of which 494 square miles are water. Census population on April 1, 1930, 1,738,765, an increase of 55,041, or 3·3 per cent., since 1920. The population in various Federal Census years (with distribution by sex in 1930) was:

The cotton crop for 1934 covered 773,000 acres and yielded 412,000 bales. The tobacco crop (1934) was 103,590,000 pounds. Fruit-trees and small fruits (notably strawberries)

are cultivated. There are important forest products from about 27,300 square miles of woodland. The area of national forest lands (June 30, 1933) was 388,777 acres. Stock-raising in the State is falling off. On January 1, 1933, the domestic animals consisted of 146,000 horses, 315,000 mules, 613,000 milch cows, 1,094,000 all cattle, 405,000 sheep, and 1,236,000 swine. Wool clip in 1934, 1,487,000 pounds from 354,000 sheep.

The most important mineral product of Tennessee is coal. The coal-fields have an area of about 4,400 square miles, and in 1933 produced 3,570,000 short tons. Other mineral products (1933) are iron-ore (24,912 long tons), copper, zinc, gold (531 ozs. in 1934), silver, clay products, phosphate rock (333,946 tons), sandstone, marble, and limestone. Cement (1931), 3,302,720 barrels. Total value of mineral products in 1932, exclusive of pig-iron, was 14,561,792 dollars.

The manufacturing industries include iron and steel working, but the most important manufactured products are knit goods and rayon and allied products. On July 31, 1933, the State had 527,510 active cotton spindles, consuming 153,206 bales.

Census of manufactures, 1931, showed 1,948 manufacturing establishments, employing 92,660 wage-earners, who received wages of 74,055,917 dollars; cost of materials, containers, fuel and power used, 233,722,016 dollars; value of output, 446,181,620 dollars.

The Mississippi and Tennessee rivers are natural waterways, and the State contains (1932) 3,940 miles of steam railway, besides 507 miles of electric railway. The State maintains 7,051 miles of highways, of which 5,897 miles are surfaced.

On June 30, 1934, Tennessee had 71 licensed national banks with deposits of 239,887,000 dollars and loans and discounts of 100,817,000 dollars; 258 licensed State banks and trust companies had deposits of 81,343,000 dollars and loans and discounts of 58,207,000 dollars.

TEXAS.

In 1836, Texas declared its independence of Mexico, and after maintaining an independent existence, as the Republic of Texas, for 10 years, it was on December 29, 1845, received as a State into the American Union. The State's first settlement dates from 1686.

Government.—The Legislature consists of a Senate of 31 member elected for four years (half their number retiring every two years), and a House of Representatives of 150 members elected for two years. Qualified electors are all citizens resident in the State one year and in the district or county six months next before the election, but persons subject to the poll-tax must have paid their tax prior to February 1 of the year in which they desire to vote. The State has 254 counties; the Capital is Austin.

Texas is represented in Congress by 2 Senators and 21 Representatives.

Governor.—James V. Allred, 1935–37 (4,000 dollars).
Secretary of State.—W. W. Heath.

Area and Population.—Area, 265,896 square miles (including 3,498 square miles of water). Census population April 1, 1930, 5,824,715, an increase of 1,161,487, or 24·9 per cent., since 1920.

Population for the four census years (with distribution by sex for 1930) was as follows:—

Years	White	Negro	Mexican	Indian	Asiatic	Total	Per Sq. Mile
1870	564,700	253,475	—[1]	879	25	818,579	3·1

Of the total number (1930) 98,396, or 1·7 per cent., were foreign-born whites, 25,913 (26·3 per cent.) being German, 12,282 (12·5 per cent.) Czechoslovakian, 6,782 (6·9 per cent.) English, and 6,550 Italian; of the total 41·0 per cent. were urban, 14·7 per cent. Negro, and 37·9 per cent. (1,785,059 males and 421,708 females) gainfully employed. The 1930 census showed 27,808 men and 37,182 women divorced; the number of private families was 1,380,096 (of 4·15 persons.) The State's prison system in December, 1933, held 5,239 men and 96 women.

The largest cities of the State with census population in 1930, are:—

Houston . .	292,352	El Paso . . .	102,421	Waco . . .	52,848
Dallas . . .	260,475	Beaumont . .	57,732	Port Arthur .	50,902

Fort Worth .	163,447	Galveston . .	52,938	Amarillo. . .	43,132

The largest religious bodies are the Roman Catholic, with 555,899 members in 1926, Southern Baptists (465,274), Southern Methodists (380,453), Evangelical Lutheran, Disciples of Christ, Presbyterian, and Episcopalian. Total, all denominations, 2,280,366.

Education.—In 1930, illiterates 10 years of age or older numbered 308,121 (6·8 per cent. of that age group), of whom 46,878 were native whites and 90,225 Negroes; of persons between the ages of 5 and 20, 1,233,956 (61·9 per cent.) were attending school. School attendance is compulsory for children from 8 to 14 years of age. Separate schools are provided for white and coloured children. In 1933–34 the 9,792 public elementary schools had 1,046,270 enrolled pupils, and 31,204 teachers; the 3,971 public high schools, 265,332 pupils, and 10,535 teachers. There are also 7 teachers' colleges for white students and 1 for Negro students with (1933–34) 434 teachers and 17,085 students. Three other State colleges had 157 teachers and 3,570 students in 1933–34. The total net amount expended on all public schools for all State and local purposes for 1933–34 was approximately 50,000,000 dollars. For superior instruction there are numerous institutions, the principal of which (1934) are:—

Finance and Defence.—The receipts and disbursements from all sources in the year ending August 31, 1934, were :—

	Dollars
Balance, Sept. 1, 1933	15,046,468
Receipts, 1933-34	161,945,568
Total	176,992,036
Disbursements, 1933-34	165,158,189
Balance, Aug. 31, 1934	11,833,847

The bonded debt, August 31, 1934, amounted to 14,602,200 dollars. In 1933 the total assessed value of real and personal property was 3,764,139,512 dollars.

The National Guard on July 31, 1934, consisted of 599 officers, 8 warrant officers and 7,502 enlisted men.

Production and Industry.—Texas is one of the most important agricultural States of the Union. In 1930, it had 495,489 farms covering 124,707,130 acres; value of farm lands and buildings was 3,597,406,986 dollars. There are 1,567,642 acres of irrigable lands in Texas, of which 797,695 acres are irrigated. Gross income, 1933, from crops, was 292,930,000 dollars; from live-stock, 148,029,000 dollars. Texas leads in the production of cotton (2,395,000 bales from 10,454,000 acres in 1934), of grain sorghum (17,928,000 bushels), of onions (1,952,000 bushels) and of pecans (13,000,000 pounds). Other important crops in 1934 were (in bushels) maize, 45,873,000; wheat, 25,749,000; oats, 32,466,000; rice, 7,738,000; potatoes, 3,780,000; sweet potatoes, 3,300,000. Other products are peanuts (73,125,000 pounds), vegetables, and fruits (especially peaches, oranges, and grape-fruit). The State has a very great live-stock industry, leading in the number of all cattle (6,740,000 on January 1, 1934), of sheep (8,179,000), and of mules (960,000); it also had on that date 727,000 horses, 1,706,000 milch cows, and 1,667,000 swine. It leads in wool and mohair production; the wool-clip in 1934 amounted to 74,800,000 pounds of wool from 7,875 000 sheep; mohair, 1933, 13,700,000 pounds from 3,342,000 goats.

The chief mineral products are petroleum, sulphur, natural gas, cement,

and quicksilver. In 1933, 396,453,000 barrels of petroleum were produced; natural gasoline or petrol, 359,400,000 gallons. Some quicksilver is produced; about 3,500 flasks in 1933. Texas leads in production of petroleum (with California a close second) and in natural gas; output in 1933, 446,000,000 *M.* cubic feet; output of carbon black from natural gas (Panhandle district), 190,356,000 lbs. in 1933. Output in 1933, coal, 610,000 short tons; cement (1932), 6,189,137 barrels. Leads in output of helium. Salt, sulphur (1,082,967 tons in 1933), gypsum (112,106 tons in 1933), granite, sandstone, and limestone are also produced. Western Texas has extensive undeveloped potash fields. Total value of mineral products in 1932, 389,963,183 dollars.

In 1931, there were in the State 4,326 manufacturing establishments with 94,867 wage-earners earning 99,060,731 dollars; materials, containers, fuel and power cost 572,282,065 dollars, and the value of the output was 845,217,158 dollars.

The port of Galveston is by far the most important outlet for the cotton grown in the United States, and as a commercial port is now second only to New York. Imports in the calendar year 1932, 10,773,000 dollars; exports, 244,509,000 dollars. A permanent causeway over 2 miles in length now connects Galveston with the mainland. The steam railways (January 1, 1932) had a total mileage of 17,203 miles (main lines); there are 518 miles of electric railway. The State maintains 18,868 miles of highways, of which 11,585 miles are surfaced.

There are 1,047 miles of navigable water in the rivers of Texas. The long coast-line with its good harbour facilitates traffic by sea. The Houston Ship Channel (50 miles long), connecting Houston with the Gulf of Mexico, makes that city the largest inland cotton market of the world.

Texas had on June 30, 1934, 456 licensed national banks with deposits of 825,859,000 dollars and loans and discounts of 290,726,000 dollars; 501 licensed State banks and trust companies had deposits of 148,821,000 dollars and loans and discounts of 76,998,000 dollars.

UTAH.

Constitution and Government.—Utah, which had been acquired by the United States during the Mexican war, was, in 1847, settled by Mormons, and on Sept. 9, 1850, organised as a Territory. It was admitted as a State into the Union on Jan. 4, 1896; it sends to Congress two Senators and two Representatives.

The Legislature consists of a Senate (in part renewed every two years) of 23 members, elected for four years, and of a House of Representatives of 60 members elected for two years. The Constitution provides for the initiative and referendum. Electors are all citizens, male or female, who, not being idiots, insane or criminals, have the usual residential qualifications.

Governor.—Henry H. Blood, 1933–37 (6,000 dollars).
Secretary of State.—Milton H. Welling.
There are 29 counties in the State. The Capital is Salt Lake City.

Area and Population.—Area, 84,990 square miles, of which 2,806 square miles are water. The area of the Indian reservations in 1930 was 531 square miles, and the population, 2,869 Indians. Census population on April 1, 1930, 507,847, an increase of 58,451, or 13 per cent. since 1920.

Population at 4 Federal censuses (with distribution by sex for 1930) was:—

Of the total in 1930, 43,772 (8·6 per cent.) were foreign-born whites, of whom 10,851 (24·8 per cent.) were English, 4,883 (11·2 per cent.) Danes, 4,389 (10·0 per cent.) Swedes, 4,104 (9·4 per cent.) German, 2,814 Italian, and 2,197 (5·0 per cent.) Greek. Of the total population in 1930, 52·4 per cent. were urban, 0·2 per cent. Negro, and 33·5 per cent. (141,016 males and 28,984 females) gainfully employed. The 1930 census showed 2,153 men and 2,357 women divorced; the number of private families was 115,936 (of 4·29 persons). The Utah State prison in 1934 held 339 men and 4 women.

Old Age pensions (maximum 25 dollars a month) were established in 1929 for all 65 years of age or older who have been American citizens and residents of the State for 15 years (of the county for 5 years) with an income not exceeding 300 dollars; on December 31, 1933, pensioners numbered 944, drawing an average of 8·15 dollars per month.

The largest city is Salt Lake City with a population of 140,267 according to the census of 1930. Ogden had 40,272; Provo, 14,766; and Logan, 9,979.

Latter-Day Saints (Mormons) form about 91 per cent. of the Church membership of the State with 337,200 members in 1926 out of a total, for all denominations, of 369,591. There are Catholics (14,595), Protestant Episcopalians (3,837), Presbyterians, Methodists, and others in small numbers.

Education.—In 1930, illiterates 10 years of age and older numbered 4,640 (1·2 per cent. of that age group); of persons between the ages of 5 and 20, 141,399 (76·8 per cent.) were attending school. School attendance is compulsory for children from 8 to 16 years of age. For the school year, 1932–33, the total expenditures for elementary and secondary education amounted to 9,433,445 dollars. There were enrolled (1932–33) 87,493 pupils in the 471 elementary schools and 54,787 in the 159 high schools. There were 2,618 elementary teachers and 1,686 high school teachers.

The University of Utah (1850), Salt Lake City, during the school year 1934, had 166 instructors and 3,392 regular students. The Agricultural College of Utah, Logan (1890), during the same year, had 105 instructors

and 2,300 regular students. The Mormon Church maintains the Brigham Young University at Provo (1875), with 120 instructors and 1,900 students and five other colleges. Other denominations also maintain colleges in the State.

Finance and Defence.—For the year ending June 30, 1934, the revenue and expenditure were:—

	Dollars
Cash on hand, July 1, 1933	1,102,363
Receipts for 1933–34	22,918,805
Total	24,021,168
Total disbursements for 1933–34	20,685,399
Cash on hand, July 1, 1934	3,335,769

The bonded debt of the State on July 1, 1934, amounted to 9,860,000 dollars and redemption funds to 6,187,500 dollars. The assessed valuation of real and of personal property in 1933 was 525,413,008 dollars.

The National Guard on July 1, 1934, consisted of 131 officers, 2 warrant officers and 1,282 enlisted men.

Production and Industry.—The area of unappropriated and unreserved lands within the State on June 30, 1932, was 25,197,820 acres, of which 13,656,351 acres were surveyed; the State contained 7,629,163 acres of national forest. In 1930, it had 27,159 farms with a total area of 5,613,101 acres, of which 1,495,000 acres were crop land; total value of farm land and buildings, 221,223,172 dollars. Gross income, 1932, from crops, was 10,500,000 dollars; from live-stock, 17,200,000 dollars.

In 1934, the chief crops were winter wheat, 1,606,000 bushels; oats, 832,000 bushels; potatoes, 1,040,000 bushels; hay, 583,000 tons; sugar beets, 261,000 tons. Maize, barley, and rye are also grown. Much attention is paid to vegetables and fruit trees. There is a considerable live-stock industry. On January 1, 1933, the numbers were: horses and mules 86,000, milch cows 140,000, all cattle 480,000, sheep 2,360,000, swine 87,000. The wool-clip (1934) yielded 17,512,000 pounds of wool from 1,990,000 sheep.

In 1933 the principal minerals were gold (109,129 fine ounces); silver (5,669,197 fine ounces); copper (73,583,130 pounds); coal (2,610,000 tons); iron ore (95,279 tons); lead (117,376,556 pounds); gypsum and salt (56,305 short tons). Other products are sulphur, zinc (59,489,193 pounds), and asphalt. Gold output, 1934, 137,943 ounces. Total value of mineral production, 1932, 22,620,230 dollars.

In 1931, there were 578 manufacturing establishments with 10,762 wage-earners, who earned 12,510,951 dollars; materials, containers, fuel and power used were valued at 63,818,350 dollars, and the value of the output was 96,006,413 dollars.

In 1932, the State had 2,196 miles of steam railways, and 279 miles of electric railway. The State maintains 4,108 miles of highway, of which 2,413 miles are surfaced.

VERMONT.

Constitution and Government.—Vermont, first settled in 1724, was admitted into the Union as a State on February 18, 1791. The first Constitution was established by Convention at Windsor, July 2, 1777; in 1793 a new Constitution was adopted which, with amendments, is still in force. Amendments are proposed by two-thirds vote of the Senate each decennium, and must be accepted by two sessions of the Legislature before being submitted to popular vote. The State Legislature, consisting of a Senate of 30 members and a House of Representatives of 248 members, meets in January in odd numbered years. Electors are all citizens of the United States who possess certain residential qualifications and have taken the freeman's oath set forth in the Constitution. The Capital is Montpelier (7,837, Census of 1930). The State is divided into fourteen counties, and 248 towns and cities. The State sends two Senators and one Representative to the United States Congress.

Governor.—Charles M. Smith, 1935–37 (5,000 dollars).
Secretary of State.—Rawson C. Myrick.

Area and Population.—Area, 9,564 square miles, of which 440 square miles are water. Census population on April 1, 1930, 359,611, an increase of 7,183, or 2 per cent. since 1920. Population at four census years (with distribution by sex in 1930) was as follows:

Production and Industry.—Agriculture is the most important occupation within the State. In 1930, the State contained 24,898 farms with a total area of 3,896,097 acres, of which 1,128,000 acres were crop land; total value of farm lands and buildings, 145,935,241 dollars. Gross income, 1932, from crops, was 7,035,000 dollars; from live-stock, 25,656,000 dollars. The chief agricultural crop is hay (967,000 tons in 1934), but cereals are grown; in 1934, the yield of oats was 1,769,000 bushels, and of maize, 2,814,000 bushels. The production of potatoes in 1934 was 2,720,000 bushels; and apples, 255,000 bushels. The production of maple products in Vermont in 1934, was 971,000 gallons of syrup, and 678,000 pounds of sugar.

Cattle raising, especially dairy cattle, is important. On January 1, 1934, Vermont had 352,000 dairy cows, 434,000 all cattle, 46,000 horses, 35,000 sheep, and 29,000 swine.

The forests provide annually over 180,000,000 board feet of lumber, approximately 88,500 cords of pulpwood, and 450,000 cords of fuel-wood.

The Federal census of manufactures in 1931 found 702 manufacturing establishments, paying 20,922,525 dollars in wages to 18,726 wage-earners, using materials, containers, fuel and power costing 37,417,358 dollars, and giving an output valued at 80,602,968 dollars.

The marble quarries, first opened in 1785, produce half of the marble of the United States. Vermont usually ranks first in the production of monumental and memorial granite, and of marble for monumental work, and second in production of marble for building stone. The State also contains the largest deposits of asbestos in the United States, and ranks second in the production of slate, talc (36,233 short tons in 1933), and soapstone. Metals occur only in small quantities. Total mineral output in 1932 was valued at 6,401,143 dollars.

There were (January 1, 1934) 1,005 miles of steam railway in the State,

and electric railways with 4·25 miles of track. The State maintains 1,028 miles of highways, all surfaced.

VIRGINIA.

Constitution and Government.—The first English Charter for settlements in America was that granted by James I. in 1606 for the planting of colonies in Virginia. The State was one of the thirteen original States in the Union. On the outbreak of the civil war in 1861, Virginia, after long hesitation, decided to join the seceding States, a course objected to by some in the western portion of the State, who set up a separate government which in 1863 was admitted into the Union as West Virginia.

The General Assembly consists of a Senate of 40 members elected for 4 years and a House of Delegates of 100 members, elected for 2 years. Qualified as electors are (with few exceptions) all citizens 21 years of age, fulfilling certain residential qualifications who have paid their State poll-taxes and registered. The State Capital is Richmond; the State contains 100 countries and 24 independent cities. The State sends to the Federal Congress 2 Senators and 9 Representatives.

Governor.—George C. Peery, 1934–38 (10,000 dollars).
Secretary of the Commonwealth.—Peter Saunders.

Area and Population.—Area, 42,627 square miles, including 2,365 square miles water area. Census population on April 1, 1930, 2,421,851, an increase of 112,664, or 4·9 per cent. since 1920. Population for four Federal census years (with distribution by sex in 1930) was:—

WEST VIRGINIA.

Government.—In 1862, after the State of Virginia had seceded from the Union, the electors of the western portion ratified an ordinance providing for the formation of a new State, which was admitted into the Union on December 31, 1862, under the name of West Virginia; its government began on June 20, 1863.

The Legislature consists of the Senate and the House of Delegates. The Senate is composed of 30 members elected for a term of four years, one half being renewed biennially. The House of Delegates consists of 94 members elected biennially. The right to vote is given to every citizen (with necessary exceptions) 21 years of age and meeting certain residential requirements. The State Capital is Charleston; there are 55 counties.

Governor.—H. G. Kump, 1933–37 (10,000 dollars).
Secretary of State.—William S. O'Brien.

The State sends to Congress two Senators and six Representatives.

Area and Population.—Area, 24,282 square miles, of which 260 square miles are water area. The population, by the census of April 1, 1930, is 1,729,205, an increase of 265,504, or 18·1 per cent. since 1920. Population in 4 Federal census years (with distribution by sex in 1930) was:—

Years	White	Negro	Mexican	Indian	Asiatic	Total	Per Sq. Mile
1870	424,033	17,980	—[1]	1	—	442,014	18·4
1910	1,156,811[2]	64,173	6[2]	36	93	1,221,119	50·8
1920	1,377,180[2]	86,345	55[2]	7	114	1,463,701	60·9
1930	1,613,934	114,893	257	18	103	1,729,205	72·0
